

**Empowering the People's Economy:  
BRI Growing Stronger  
for a Resilient Nation**

**2025**  
Annual Report

## Empowering the People's Economy: BRI Growing Stronger for A Resilient Nation

**"Empowering the People's Economy: BRI Growing Stronger for a Resilient Nation"** is not merely a slogan, but BRI's strategic compass. Our mandate to empower the people's economy remains the foundation and structural advantage of the Bank amid an increasingly dynamic landscape.

Throughout 2025, domestic dynamics and heightened global volatility called for prudence and disciplined execution. BRI recorded solid performance, marked by healthy balance sheet growth, sustained profitability, and increasingly stronger funding and capital structures. Margins remained resilient and liquidity was well managed, providing ample room for sustainable expansion.

Loan growth reached 12.3% yoy, with MSMEs accounting for 77.5% of the portfolio—reaffirming that micro and MSME segments remain at the core of BRI's business and a key source of the Bank's resilience. Growth in the Commercial and Corporate segments was pursued in a measured manner with a strong focus on asset quality.

On the funding side, deposits increased by 7.4% yoy, while CASA grew by 12.7% yoy, driving the CASA ratio to 70.6%—the highest level in BRI's history. This strong funding structure further strengthened funding costs efficiency, liquidity management, and margin resilience.

During the year, BRI introduced the tagline of "One Bank for All," representing an evolution of its capabilities to serve the full spectrum of economic needs, from ultra-micro customers to corporate clients. This multi-segment approach broadened diversification and strengthened cyclical resilience.

Digital transformation through Qlola, BRImo, BRILink Agents, and BRIspot continues to strengthen end-to-end capabilities, expand financial access, improve operational efficiency, and deepen customer relationships. Growth continues to be directed toward quality, effective risk management, and stronger capital positioning.

BRI does not only pursue short-term growth, but rather focuses on building a resilient institution across every economic cycle—supported by a strong micro foundation, an efficient funding structure, and continuously evolving universal banking capabilities.

With clear strategic direction and disciplined execution, BRI is well positioned to continue creating long-term value while supporting inclusive and sustainable economic growth in Indonesia.

Annual Report

2025

## About The Annual Report

This Annual Report is an integrated report that puts historical performance into the context and describes the Company's risks, opportunities, and prospects in the future, so as to help shareholders and stakeholders understand the Company's strategic objectives and its progress in creating sustainable value. This Annual report contains an overview of key financial data for the last 5 (five) years, company profile, Board of Directors and Board of Commissioners reports, management discussion and analysis covering the Company's performance compare to the performance of previous years, projected performance and prospects of the Company. This Annual Report also provides the implementation of corporate governance including structure and process of governance involving the implementation of a risk management system which, among other, describes the risk profile and its management.

# Theme Continuity

## 2024

### Continuing The Transformation, Becoming More Brilliant and Excellent

In the midst of challenging macroeconomic conditions, PT Bank Rakyat Indonesia (Persero) Tbk (referred as BRI/Perseroan) remains committed to providing comprehensive financial services to the community, as well as supporting sustainable and equitable economic growth throughout Indonesia. Bank BRI is also consistent in responding to various situations and challenges by issuing strategic initiatives for sustainable business growth.

BRI Group continues to strengthen its internal capabilities by carrying out continuous digital and cultural transformation in all pillars of business growth, especially the Micro and Ultra Micro segments while still paying attention to Good Corporate Governance and risk control. In addition, innovation and exploration of new sources of growth continue to be carried out to optimize current and future business opportunities.

In 2024, Bank BRI is able to adapt to various situations and stand firmly as a market leader in the national banking sector, as well as becoming a symbol of support for Micro, Small and Medium Business (UMKM) and encouraging the people's economy to advance the country. In the midst of an unfavorable situation, BRI succeeded in maintaining profitability by recording a Return on Assets of 3.06%, Return on Equity of 19.01% and a net income of IDR60.64 trillion.

2023

## Sustainable Transformation to be Stronger and Greater

In the midst of global economic uncertainty and geopolitical conditions which create a challenging situation during 2023, BRI succeeded in showing positive performance. This performance is inseparable from BRI's commitment to continue carrying out Sustainable Transformation to Grow Stronger and Greater so that it can continue to contribute to the creation of economic and social values in supporting inclusive national economic growth. The ongoing transformation carried out has enabled BRI to provide the right strategic response amidst an economic situation that is still far from ideal after the Covid-19 pandemic period.

The Company is committed to continuing to grow sustainably while remaining focused on transformation in the cultural and digital areas to realize BRI's vision of becoming a "Champion of Financial Inclusion" by 2025.

In line with efforts to realize the vision, BRI optimizes its strengths, focusing on the business escalation period (beyond banking) by optimizing the synergy of Ultra Micro Holding (BRI, PT Pegadaian and PT Permodalan Nasional Madani) supported by a strong customer base to become a new source of growth for BRI, widespread infrastructure and complete financial products and services, as well as strengthening retail banking through value chain business development, improving digital products, and strengthening synergy and cross selling of BRI and its subsidiaries.

Holding Ultra Micro is proof that BRI continues to be proactive in encouraging financial inclusion by facilitating access to financing and social empowerment for the community. In the second year after its founding, Ultra Micro Holding has served more than 37 million customers with financing, savings and insurance products with support to facilitate outreach with the availability of 15,000 business unit (BRI Unit 6,700, Pegadaian 4,087 and PNM 4,553) , 1,018 SENYUM (Ultra Micro Service Centers) namely co-location units, more than 740 thousand BRILink Agents and 686 thousand E-channels.

BRI also continues to carry out digital innovation to improve banking services. BRImo as BRI's super app is continuously being improved. In 2023 BRImo has integrated aspects of artificial intelligence, namely chat banking service (Sabrina) and increased cross border transaction and investment capabilities. BRImo has served 31.6 million users (an increase of 32.6% yoy), with 3.1 billion transactions worth IDR4,159 trillion, which generated IDR2.4 trillion in fee based income.

Consistency in continuing to innovate and the right strategic response succeeded in making BRI record solid performance with consolidated assets reaching IDR1,965 trillion or growing 5.3% yoy. BRI's total credit and financing was able to grow 11.2%, amounting to IDR1,266 trillion. Increasing profitability with good risk management made BRI set a new record for Income by recording a Net Income of IDR60.4 trillion (an increase of 17.5% yoy) at the end of 2023.

# 2022

## Reach Further, Provide Solution, Grow Better and Stronger

BRI implements a hybrid bank concept that combines digital and physical services (conventional banking services) to expand reach.

BRI also continued to spur the development of AgenBRILink services to encourage inclusion and services closer to the community. The number of AgenBRILink increased by 24.6% YoY to 627 thousand agents with transaction volume reaching IDR1,298 trillion or growing 13.5% YoY. Currently AgenBRILink services reached 58,896 villages in all corners of Indonesia, or covered at least 77% of the total villages in Indonesia.

BRI continued to carry out a strong commitment to digital transformation to provide easy public access to banking services. One of them was through Super Apps BRImo which received a positive response from the community. This was shown by the volume of financial transactions through BRImo

which had more than doubled to IDR2,669 trillion, with the number of transactions reaching 1.83 billion transactions, and BRImo users also shot up 68.46% Year on Year (YoY) to 23.85 million users.

In addition, efforts to expand its reach were also carried out through the Ultra Micro Holding between BRI (as the holding company) and PT Pegadaian and PT Permodalan Nasional Madani (PNM). One year after its establishment, Holding Ultra Micro has successfully integrated more than 34 million ultra micro customers to obtain formal financial services. SENYUM colocation services (Ultra Micro Service Centers) until the end of 2022 have reached 1,013 locations.

Thus, through a hybrid bank strategy that makes BRI's services more extensive and provides convenience, encouraging BRI's business to continue to grow and become more resilient.

2021

## Digitalization: Go Smaller, Go Shorter, Go Faster

In the midst of the economic recovery, PT Bank Rakyat Indonesia (Persero) Tbk. (BRI) managed to maintain performance fundamentals to grow in a healthy, strong and sustainable manner. BRI's success in recording this brilliant performance became the result of a transformation strategy prepared since 2016 through the grand concept of BRIvolution 1.0. The program was started in 2017 and had been implemented until 2020.

Since the onset of the pandemic, the transformation continued to become BRIvolution 2.0 focusing on two main areas, namely digital and culture. BRI's vision was also changed to become The Most Valuable Banking Group in Southeast Asia. In addition, another focus was to become the Champion of Financial Inclusion. This was to restore BRI's focus on its pathway in the MSME segment, including the Ultra Micro (UMi) business.

Champion of Financial Inclusion was intended to maintain the company's sustainable growth. BRI looked for new sources of growth. With a go smaller strategy, BRI targeted a business segment smaller than micro, namely ultra micro by extending loan with a smaller ticket size. BRI provided short tenors as needed or go shorter. In addition, BRI strengthened the digitization of its financial services so that services and business processes could go faster. That way, BRI can serve the community by providing wider, easier, faster and more

affordable financial access. To provide banking services to various regions by Go Smaller, Go Shorter & Go Faster, BRI digitalization was carried out by referring to 3 (three) main frameworks, namely first, Digitizing Core or digitizing business processes with the aim of increasing productivity and focusing on efficiency. Second, Digital Ecosystems in which BRI prepared digital platforms to encourage BRI to enter the value chain ecosystem business so that it was expected to be a new source of growth for CASA, FBI and BRI's new customers. Third, New Digital Propositions, in which BRI innovated financial technology with a fully digital approach and new business models that could provide services to customers faster, better and more efficiently.

Through the transformation as well as the go smaller, go shorter and go faster strategy supported by digitalization, BRI had proven to be able to show solid performance by recording consolidated assets of IDR1,678.10 trillion or growing 4.23% YoY. As for the total credit and financing of the BRI Group, it reached a thousand trillion rupiah exactly at IDR1,042.87 trillion. The proportion of BRI's MSME loans continued to climb, with 83.86% of BRI's total lending being channeled to the MSME segment. This figure became an increase compared to the same period last year, and BRI would continue to increase this proportion to reach 85% by 2024.

# Milestones

1895

On December 16, 1895, Raden Aria Wiriatmaja founded De Poerwokertosche Hulp en Spaarbank der Inlandsche Hoofdenin Purwokerto as a mosque fund manager whose function was to manage and disburse funds to the people through a simple scheme. The institution experienced several name changes, from Hulp en Spaarbank der Inlandsche Bestuurs Ambtenaren (1895), De Poerwokertosche Hulp Spaar-en Landbouw Credietbank or Volksbank, to Centrale Kas Voor Volkscredietwezen Algemene (1912). In 1934 the name was again changed, to Algemene Volkscredietbank (AVB). During the Japanese occupation period, AVB was known as Syomin Ginko (1942-1945).

1946

On February 22, 1946, the Government of Indonesia, by virtue of Government Regulation No. 1 of 1946, changed Syomin Ginko into Bank Rakyat Indonesia (BRI), a government owned bank with the front-line role of supporting national economic development.

1960

The government changed BRI into Bank Koperasi Tani Nelayan (BKTN).

1968

Based on Law No. 21 of 1968, the Government reestablished the name Bank Rakyat Indonesia with a commercial bank status.

1969

BRI was appointed by the Government as the only bank to disburse loan program Mass Assistance (Bimas) and started to establish BRI Units.

2011

- On January 11, 2011, the Bank exercised a 1:2 ratio stock split.
- On March 3, 2011, the signing of a Deed of Acquisition of shares of PT Bank Agroniaga Tbk between BRI and Dana Pensiun Perkebunan (Dapenbun).

2009

Real-time online interconnection with the whole works unit, numbering 6,480 outlets at the time.

2007

BRI acquired Bank Jasa Artha, later changed into PT Bank BRI Syariah.

2003

On November 10, 2003, BRI became a Publicly listed Company by listing its shares on the Jakarta Stock Exchange (now Indonesia Stock Exchange/IDX) with ticker code "BBRI." Now BRI is part of the LQ-45 share index and also one of the bluechip companies on IDX.

1992

According to Republic of Indonesia Government Regulation No. 21 of 1992, BRI changed its legal status to PT Bank Rakyat Indonesia (Persero).

1984

Following the closing of Bimas program by the Government, BRI started to manage the micro business commercially, distributed through BRI Units.

## 2011

On December 16, 2011, the signing of Instrument of Transfer, and Bought and Sold Notes between BRI and PT Asuransi Jiwa BRIngin Jiwa Sejahtera over the shares of BRIngin Remittance Co. Ltd. (Hong Kong).

## 2013

BRI Hybrid Banking, the first self-service banking in Indonesia.

## 2014

- BRI's ATM network continues to increase, reaching 20,792 ATM units and 131,204 EDC units – constituting the largest ATM and EDC network in Indonesia.
- BRI signed the BRI Satellite (BRISat) Satellite Procurement and Launcher Agreement with Space System/ Loral (SSL) and Arianespace on April 28, 2014.

## 2015

- In 2015, BRI opened Singapore Overseas Unit and acquired PT Asuransi Jiwa Bringin Jiwa Sejahtera (Bringin Life).
- On August 4, 2015, BRI launched Teras BRI Kapal to reach out to people living in coastal areas that are underserved by banking services.
- BRI also inaugurated BRI Corporate University to provide comprehensive facilities for employee education.

## 2016

- BRI's own satellite, the BRISat, was successfully launched on June 18, 2016, at 18:38 Kourou Time, French Guiana. BRISat will provide the supporting infrastructure for BRI's digital services.
- BRI acquired BTMU Finance, a multifinance company, and subsequently changed its name to BRI Finance.
- BRI inaugurated a full digital branch at Terminal 3, Soekarno Hatta Airport, and launched several programs concerning digitalization for SME, such as e-Pasar, Teras BRI Digital. 1 Million Free Domain for MSMEs, and Rumah Kreatif BUMN.

## 2017

- BRI began operating Timor Leste Overseas Unit on March 14, 2017.
- On February 24, 2017 BRI officially launched Teras BRI Kapal Bahtera Seva II and Teras BRI Kapal Bahtera Seva III to reach communities in the coastal areas of Labuan Bajo and Halmahera Island.
- BRI Extraordinary General Meeting of Shareholders ("EGMS") held on October 18, 2017 has approved the stock split from IDR250,- (two hundred fifty Rupiah) per share to IDR50,- (fifty Rupiah) per share (Ratio 1:5) and began its trading on November 10, 2017, the 14<sup>th</sup> Anniversary of BRI's listing at the stock exchange.

## 2018

- To enhance its customer service BRI launched Sabrina, an Artificial Intelligence as BRI New Assistance to facilitate the customers in getting information on the Bank.
- BRI encouraged the MSME to Go Digital by launching the Indonesia Mall, cooperating with the marketplace startups thereby providing the MSME communities the opportunities to sell their products in wider market.
- BRI issued the following bonds:
  - Bank BRI Shelf Registration Bonds II Phase IV 2018 Series-A, maturity on February 21, 2023, with nominal value of 1,837,000,000,000 shares and coupon/discount rate of 6.65%, with AAA credit rating from Pefindo.
  - Bank BRI Shelf Registration Bonds II Phase IV 2018 Series-B, maturity on February 21, 2025, with nominal value of 605,000,000,000 shares and coupon/discount rate of 6.90%, with AAA credit rating from Pefindo.
  - Bank BRI Registration Bonds III 2018, maturity on June 21, 2023, with nominal value of 500,000,000,000 shares and coupon/discount rate of 7.70%, with AA credit rating from Pefindo.
- BRI has exercised three new equity investments, which are 2 (two) new subsidiaries, PT BRI Ventura Investama (BRI Ventures) and PT BRI Danareksa Sekuritas (DS), as well as investment in PT Danareksa Investment Management (DIM). On these equity investments, total Subsidiaries of BRI become 8 (eight) Subsidiaries, namely Sharia (BRISyariah), Conventional Bank (BRI Agro), Remittance (BRI Remittance), Insurance (BRI Life), Multifinance (BRI Finance), Venture Capital (BRI Ventures), Securities (BRI Danareksa Sekuritas), and General Insurance (BRI Insurance).
- BRI also launched the BRI Institute as a manifestation of Bank BRI's effort in the National Capacity Building for MSMEs segment.

## 2019

- BRI through its subsidiary BRI Agro launched PINANG, the First Digital Lending Banking in Indonesia. By combining digital technology, PINANG speeds up the application process to disbursement to less than 10 minutes. Applications can be made through branchless methods. Using a fast, affordable, and secure process, as well as a competitive ceiling, PINANG will provide extra convenience for customers to apply for loans.
- BRI has acquired companies engaged in General Insurance, PT Bringin Sejahtera Artha Makmur (BRINS), this acquisition is a strategic step for the company to become an integrated financial solution that will further complement the financial services owned by the BRI Group.
- On March 28, 2019 BRI issued a (sustainability bond) with a nominal value of USD 500.000.000 (full amount) for a period of 5 years. Proceeds from the bond issuance were used to fund Eligible Projects in accordance with the Sustainability Framework.
- BRI has launched its latest digital banking breakthrough to provide convenience and security in banking transaction services. BRI launched the BRImo application, the latest BRI Mobile application based on data with the latest UI/UX (User Interface/ User Experience) and the latest features that can be used by customers and noncustomers without having to come to the branch office with a choice of funding sources current account, savings and Electronic Money for each of its features. BRImo has various interesting advantages, such as convenience in opening a BRI Britama Muda Savings account, login applications using finger print or face id recognition, checking of account transactions up to the last 1 year, the use of account aliases and access to information on BRI Bank promos. Until December 2019 there have been 2.96 million BRImo users.
- On December 12, 2019, BRI made a breakthrough innovation in its financial products and services to establish itself as a leading financial institution in digital banking in Indonesia. The latest one, BRI launched an online loan called CERIA. Through this launch, BRI became the first state-owned bank to have an online loan application.
- In addition to innovating through various digital banking products development, during 2019 BRI also continued to empower the MSMEs through KUR disbursement of IDR87.9 trillion to more than 4 millions of them. Of the total KUR disbursed during 2019 by BRI, IDR75.7 trillion or 86.1% were disbursed specifically for the micro segment. As such, since 2015, BRI has succeeded in disbursing KUR with a total value of IDR323.4 trillion to more than 16.6 million MSMEs communities throughout Indonesia.

## 2020

BRI actively becomes the Government main partner in implementing the National Economic Recovery Program (NER) which have rendered positive impact, not only for the debtors that mostly are MSMEs, but also to the Company. As of December 2020, the following are NER programs carried out by the Company:

1. Distribution of MSME Loan in the framework of Accelerating National Economic Recovery. In accordance with the target set by the Government of IDR45 trillion (3 times) from Placement of Government Funds;
2. Lending with guarantee scheme for small and retail segments amounted to IDR8.73 trillion to more than 14 thousand Debtors;
3. Disbursement of MSME Loan Interest Subsidies amounted to IDR5.47 trillion to more than 6.5 million beneficiaries;
4. Disbursement of Micro Business Productive Assistance (BPUM) amounted to IDR18.64 trillion to more than 7.7 million micro business;
5. Disbursement of KUR Super Micro amounted to IDR8.66 trillion to more than 985 thousand debtors;
6. Disbursement of salary subsidies of IDR6.45 trillion to more than 5 million beneficiaries.

In addition, as a recovery effort to the debtors impacted by the COVID-19, as of December 2020, BRI has carried out restructuring amounted to IDR186.6 trillion to 2.8 million debtors, where 95% included as debtors from Micro, Consumer, Small and Medium segments.

- To provide customer transactions convenience during the pandemic, BRI launch the following digital innovations:
  - Launching of BRImo New Look.
  - Launching of Pasar.id. The social distancing and Large Scale Social Restrictions has limited the activity in the market, resulting in profitability declined for the traders. BRI helps the "Survival Mode" of Traditional Market by introducing online shopping (through WA, Website, Mobile Apps, or start-ups cooperation).
  - Launching of Digital Saving. BRI launch digital account opening service through Digital Saving Platform that are accessible through BRI channels or cooperating third parties. The platform uses 2 technologies, namely face recognition and digital signature, hence providing a branchless facility for customers.
- Launching of the Indonesian Banking Professional Certification Agency (BRISLP).
- Launch of BRI Micro & SME Index (BMSI). The launch of BMSI is BRI's concern for the activities of Indonesian MSMEs to become information. BMSI is the first leading indicator in Indonesia to measure MSME activities which one day will be useful for public policy.

## 2021

- Throughout 2021, BRI successfully carried out 3 (three) major corporate actions to support sustainable growth. These three major corporate actions became part of BRI's business growth which was carried out inorganically and in the value creation process. The 3 (three) corporate actions included:
  1. Consolidation of Bank Syariah Indonesia (BSI) with an increase in the price of BRIS shares up to four times since the consolidation process.
  2. Increased valuation of BRI Life to IDR7.5 trillion through strategic collaboration with FWD Financial in 2021, where BRI previously acquired BRI Life for IDR1.6 trillion in 2015.
  3. Establishment of an Ultra Micro Holding with Pegadaian and PNM with a total Right Issue value of IDR95.9 trillion consisting of IDR54.7 trillion in the form of government noncash participation in the form of Pegadaian and PNM shares, and IDR41.2 trillion in cash proceeds from shareholders public. This achievement marked history as the largest right issue in the Southeast Asia region, ranked third in the right issue in Asia, and number seven worldwide.
- Sustaining the current momentum of national economic recovery, BRI has become the titling sponsor of BRI Liga 1, which is expected to stimulate the national economy. Specifically, it will help revive the national football industry, including SMEs, MSMEs, and their derivatives such as jersey convection companies, souvenir sellers, team merchandisers, and the football shoe industry.
- BRI opened its sixth overseas outlet, namely a Branch Office in Taipei, Taiwan located at No. 166, Sec. 3, Nanjing East Road, Zhongshan District, Taipei City, Taiwan. The operation of the BRI Taipei Branch (BRITW) started operating on Tuesday, November 30, 2021. The BRI Taipei Branch had also obtained an operational permit as a Full Retail Foreign Bank Branch Office License by the Taiwanese authorities. With this license, BRI Taipei Branch could provide Savings, Loans, Remittances, Trade Finance, and Treasury services to customers in Taiwan.

## 2022

In 2022 BRI continued to develop its business in a number of ways:

1. Acquiring Danareksa Investment Management to continue making the BRI Group a one-stop financial solution for the people of Indonesia.
2. Launching the Qlola by BRI product as an Integrated Corporate Solution Platform with just a single sign on login.
3. Being more consistent in supporting Indonesia's financial inclusion through:
  - BRILink agents reached 627 thousand agents and are spread over >58 thousand villages or cover >77% of villages in Indonesia.
  - Super Apps BRImo which already had 23.85 million users and made BRImo the banking app with the largest users in Indonesia.
  - Presenting >1,000 Senyum Outlets to facilitate access for customers of the Ultra Micro ecosystem in one door that successfully integrated >34 million customer data.

## 2023

The success of BRI's digital transformation is evident from the number of BRImo users, which reached 31.6 million by the end of 2023—an increase of more than tenfold in just 4 (four) years. This makes BRImo the most downloaded mobile banking app in Indonesia. Additionally, in 2023, BRImo's transaction volume saw extraordinary growth, reaching IDR4,159 trillion.

## 2025

- Throughout 2025, BRI reached an important milestone in reaffirming the direction of its long-term transformation. On July 3, 2025, BRI launched BRIVolution Reignite as a strategic initiative to strengthen its business fundamentals, enhance competitiveness, and create sustainable value, with a focus on strengthening the funding structure, accelerating digitalization, improving productivity, and developing customer-centric business initiatives.
- The foundation of this strategy was further reinforced through the strengthening of organizational culture with the introduction of the Brilian Way. The five core values—Integrity, Collaborative, Accountability, Growth Mindset, and Customer Focus—serve as guiding principles and behavioral standards for all BRILiaN employees in carrying out their roles.
- The alignment between strategy and culture was further embodied through the Corporate Rebranding launched on December 16, 2025, reflecting BRI's increasingly modern and inclusive identity, while preserving its DNA of supporting the people's economy, empowering MSMEs, and fulfilling its strategic role as an agent of development.
- The results of this transformation are also reflected in the Bank's strong performance achievements. On the funding side, deposits increased by 7.4% while CASA grew by 12.7%, driving the CASA ratio to 70.6%—the highest in BRI's history. A stronger funding structure, supported by more resilient transaction-based activities, contributed to improved cost of funds efficiency while maintaining liquidity and margin resilience. Loans grew by 12.3%, with MSMEs accounting for 77.5% of the portfolio—reaffirming that micro and MSME segments remain the core of BRI's business and a key source of resilience. Growth in the Commercial and Corporate segments was pursued in a measured manner and with a strong focus on quality.
- In addition, as part of its support for government programs, BRI continues to serve as the main distributor of People's Business Credit (KUR). In 2025, BRI disbursed KUR amounting to IDR178.08 trillion to approximately 3.8 million borrowers. Cumulatively, from 2015 until the end of December 2025, total KUR disbursement by BRI reached IDR1,435 trillion, benefiting around 46.4 million business actors.
- BRI also actively supports other government initiatives, including the Free Nutritious Meals Program, Koperasi Desa Merah Putih, and the People's Housing Credit Program. This further reinforces BRI's role as a strategic partner of the Government in expanding financial access and optimizing the implementation of national programs.
- With a clear strategic direction and disciplined execution, BRI is well positioned to continue creating long-term value while supporting inclusive and sustainable economic growth in Indonesia.

## 2024

- BRIVolution 3.0 was officially launched as a strategic step to establish BRI's long-term corporate plan, formulating its vision as "The Most Trusted Lifetime Financial Partner for Sustainable Growth".
- Bank BRI continues to be committed to encouraging the people's economy by serving and empowering UMKM through Ultra Micro Holding (UMi). Since 3 years from it was founded, UMi has served 35.9 million customers, including 1,032 colocations spread throughout Indonesia.

# Our Best Contribution

Amid the challenges arising from domestic and global economic dynamics, the strategic direction and business fundamentals of PT Bank Rakyat Indonesia (Persero) Tbk continue to be strengthened, reaffirming BRI's role as a state-owned bank that grows alongside the community and consistently contributes to the national economy.

Within this framework, BRI established the **BRIVolution Reignite** transformation agenda as a strategic initiative to reinforce business fundamentals, enhance efficiency, and ensure that the Company remains relevant and competitive amid the evolving economic and technological landscape. BRIVolution Reignite underscored BRI's focus on strengthening its funding structure, accelerating digital transformation, improving productivity, and developing both core and new sustainable business lines. All of these initiatives were implemented with a strong customer-centric orientation, while further solidifying BRI's role as a bank that serves all segments of society.

Transformation progresses in parallel with BRI's DNA as a bank deeply rooted in the people's economy. Since its establishment in 1895, BRI has grown with a mandate to

serve micro and small communities as well as grassroots entrepreneurs, a foundational value that continues to be upheld to this day. Going forward, BRI aspires to become an even stronger bank serving all segments, realizing its vision as one bank for all.

While remaining steadfast in its commitment to the people, BRI also plays an active role in accelerating the national economy by supporting various government priority programs. Such contributions were manifested not only through economic initiative but also through social actions that directly impact communities and strengthen sustainable development outcomes.

BRI's presence within society underscores that, beyond its transformation agenda and performance enhancement efforts, the Company remains committed to standing and moving forward together with the people. At least ten tangible contributions have been delivered by BRI to the nation, reflecting the Company's strategic role in fostering inclusive, equitable, and sustainable economic growth across Indonesia.

## Fostering Sharing Economy through 1.19 Million BRILink Agents

Throughout 2025, BRI was supported by approximately 1.19 million BRILink Agents across Indonesia, reaching 66,098 villages, or more than 87.8% of the total villages nationwide. Through this partnership-based business model, BRILink Agents facilitated more than 1.2 billion financial transactions, with a total transaction volume reaching IDR1,746 trillion.

In addition, through the BRILink Agents network, BRI continues to strengthen the role of Koperasi Desa/Kelurahan Merah Putih (KDKMP) as a driver of the people's economy, leveraging the extensive reach of BRILink Agents, including in 3T areas (Frontier, Outermost, and Disadvantaged regions). The presence of BRILink Agents has also fostered a sharing economy within communities. Through the BRILink Agents network, BRI strives to extend financial services to segments of society that were previously underserved by the banking system, thereby reinforcing its commitment to advancing financial inclusion across Indonesia.

## Consistently Supporting The Three Million Housing Program, BRI Disburses IDR16.16 Trillion in Subsidized Home Ownership Loans

**IDR16.16 Trillion**

BRI continues to strengthen its role in supporting the national housing program through the distribution of Subsidized Home Ownership Loans (KPRS). As of the end of December 2025, BRI had realized KPRS financing amounting to IDR16.16 trillion, benefiting more than 118 thousand debtors across Indonesia, as part of its commitment to expanding access to affordable housing for Low-Income Communities (MBR).

The distribution comprised several financing schemes, including the Sejahtera Housing Loans under the Housing Financing Liquidity Facility (FLPP) amounting IDR15.74 trillion, Tapera Housing Loans totaling IDR321.23 billion, the Interest Subsidy Scheme (SSB) valued at IDR94.03 billion, and the Savings-Based Housing Financing Assistance Program (BP2BT) amounting IDR9.06 billion.

## Commitment to Asta Cita, BRI's KUR Reaches IDR178.08 Trillion

BRI recorded solid achievements in the distribution of People's Business Credit (KUR). The majority of the financing was channeled to productive sectors, in line with the Government's Asta Cita, particularly the pillar focused on strengthening the people's economy.

The Company's tangible commitment to empowering the people's economy is clearly reflected in its KUR distribution. As the largest KUR distributing bank. In 2025, BRI had distributed IDR178.08 trillion, reaching IDR3.8 million debtors.

In terms of economic sectors, BRI's KUR distribution remained predominantly allocated to productive sectors, covering agriculture, fisheries, trade, manufacturing, and other services, which accounted for 64.49% of the total KUR disbursement. The agriculture sector emerged as the primary contributor, with financing reaching IDR80.09 trillion, equivalent to 44.97% of the total KUR distributed by BRI. This achievement reflects BRI's strong commitment to strengthening the real sector and supporting sustainable economic growth.

## BRI Expands Its Global Presence, Recognized as Indonesia's Largest Public Company by Forbes

Throughout 2025, BRI garnered 258 awards at the domestic, regional, and international levels, underscoring its consistent performance excellence and strong global recognition. One of the most notable achievements came from the Forbes Global 2000 - The World's Largest Companies 2025, where BRI ranked 349th among the world's 2,000 largest public companies, making it the highest-ranked Indonesian public company on the prestigious list.

At the regional level, BRI secured the top position among all Indonesian banks and financial institutions and ranked 4th in the financial category across Southeast Asia in the Fortune Southeast Asia 500 2025, which lists the largest companies in the region based on revenue. BRI's international recognition was further reinforced through The Banker Top 1000 World Banks, where BRI was named the number one bank in Indonesia and ranked 114th globally, supported by strong financial performance fundamentals. Most recently, on December 3, 2025, BRI was honored as Bank of the Year 2025 in Indonesia by The Banker, a leading global financial publication under the Financial Times Group.

## Empowering MSMEs through 5,245 Fostered Villages and 42,682 Business Clusters

Beyond financing initiatives, BRI continues to implement various empowerment programs that directly impact communities and MSMEs. As of December 2025, the BRILiaN Village program had reached 5,245 fostered villages across Indonesia.

In addition, through the BRI Business Cluster Program, the Bank has developed 42,682 business clusters as part of its strategy to strengthen community-based productive sectors. BRI also introduced LinkUMKM, a digital empowerment platform designed to enhance the capability and capacity of MSMEs. More than 14.98 million MSME entrepreneurs have utilized the platform to strengthen their business capacity, accelerate their upgrading process, and expand market access. Furthermore, to foster sustainable MSME development, BRI manages 54 BUMN Houses and has conducted 18,218 training programs, reinforcing its commitment to building resilient and competitive MSMEs nationwide.

## Increasingly Preferred by Customers, BRI mmo Super Apps Reaches 45.9 Million Users

BRI continues to realize tangible results from the ongoing implementation of its BRIVolution Reignite transformation. One notable achievement is the growth in users of the BRI mmo Super Apps, which reached 45.9 million users throughout 2025, representing an 18.9% YoY increase compared to the previous year. In parallel, BRI mmo's transaction activities have continued to demonstrate robust growth. By the end of 2025, BRI mmo had facilitated 5.62 billion transactions, reflecting a 29.5% annual increase, underscoring the public's growing trust in BRI's digital services, which are secure, fast, and convenient.

## Strengthening the Grassroots Economy, UMi Holding Reaches 34.5 Million Borrowers

The Ultra Micro Holding (UMi Holding), consisting of BRI, Pegadaian, and PNM, has become a strategic pillar in expanding national financial inclusion. As of the end of December 2025, the UMi Holding had served more than 34.5 million active borrowers, with total micro savings accounts exceeding 187 million accounts.

BRI has also expanded its outreach and delivered services closer to the community. The UMi Holding operates a service network comprising more than 15,000 physical outlets, 1,034 SenyuM (Ultra Micro Service Centers) outlets, 1.19 million BRILink Agents, more than 627 thousand BRI e-channels, and approximately 74 thousand marketers and financial advisors from BRI, Pegadaian, and PNM distributed across Indonesia.

# Report of The Board of Directors and Board of Commissioners

In April 2025, BRI launched the BRIVolution Reignite transformation, designed to strengthen the Company's competitiveness on a sustainable basis. This transformation is built upon two main pillars: Transform the Funding Franchise and Revamp Existing Core, Build New Core.

# Board of Directors' Report

**Hery Gunardi**

President Director

**BRI's consolidated total assets grew by 7.2% to IDR2,135 trillion. This growth was supported by higher loan and financing disbursements, which reached IDR1,521 trillion, or 12.3% year-on-year (YoY) growth, in line with the implementation of the BRIVolution Reignite transformation aimed at strengthening the Company's business fundamentals, along with the reinforcement of corporate culture through the internalization of the BRILiaN Way values.**

## Dear Shareholders and Stakeholders,

Praise be to God Almighty for His blessings and grace. Amid the evolving dynamics of the global economy and the challenges facing the banking industry, BRI has maintained healthy, sustainable performance. The Company's consistency in innovating and responding strategically to change has become an important foundation for strengthening its competitiveness.

In response to these dynamics, in April 2025 BRI introduced the BRIVolution Reignite transformation, designed to strengthen the Company's competitiveness on a sustainable basis. The transformation is anchored on two main pillars, namely Transform the Funding Franchise and Revamp Existing Core and Build New Core, supported by six strategic foundations: Human Capital, Risk Management, IT & Digital, Distribution, Operational Excellence, and Rebranding.

Through this transformation, BRI strengthens its funding structure based on low-cost funds, enhances transaction banking capabilities, reinforces the Company's core business, and creates new sources of growth across various business segments in order to expand the transaction base and increase the contribution of fee-based income.

BRI also strengthened its cultural transformation through the internalization of the BRILiaN Way values, namely Integrity, Collaborative, Accountability, Growth Mindset, and Customer Focus. At the same time, the Company reinforced its positioning through rebranding under the spirit of "One Bank for All", reflecting BRI's commitment to becoming a bank that is increasingly inclusive, modern, and relevant for all segments of society.

In line with the ongoing transformation agenda, in 2025, BRI successfully recorded solid performance with consolidated assets reaching IDR 2,135 trillion or growing 7.2% YoY. On the intermediation side, BRI's loans grew 12.3% YoY to IDR 1,521 trillion, with a focus on lending to the MSME segment, which is the backbone of the national economy, in line with BRI's people-centric DNA. Through financing for micro, small, and medium-sized enterprises, the BRI also supports the government's efforts to expand financial inclusion and

strengthen productive sectors across various regions. Asset and loan growth were supported by a stronger funding structure. Third Party Funds (DPK) grew 7.4% YoY to IDR 1,467 trillion, with the CASA ratio increasing to 70.61% from 67.30% in the previous year.

The positive financial performance was supported by prudent business management and continuous strengthening of risk management. In 2025, BRI recorded profitability levels with a Return on Assets of 2.7% and a Return on Equity of 17.4%, as well as a net profit of IDR57.132 trillion. These achievements reflect the Company's solid and sustainable performance.

In 2025, BRI also contributed IDR56 trillion to the Government, which included IDR28 trillion in the form of dividends and other non-tax state revenues (PNBP), as well as IDR28 trillion in tax contributions.

On this occasion, allow us to present the Company's management report for the 2025 financial year. In this report, we present BRI's performance throughout 2025, business prospects, and the implementation of good corporate governance.

## About the Company

Rooted in its mandate and national mission to serve the community and drive the national economy, PT Bank Rakyat Indonesia (Persero) Tbk. continues to demonstrate its consistency in providing inclusive and relevant financial services for all segments of society. This commitment is realized through the provision of a comprehensive range of financial products and services for various customer segments, supported by an increasingly strong digital ecosystem.

In carrying out its business activities, the Company offers various banking products and services, including savings products such as BRI BritAma Savings, BRI Simpedes Savings, BRI Business Savings, BRI Savings Plan, BRI Junio, BRI Giro, and BRI Deposits, as well as card and electronic money products consisting of BRI Debit, BRI Credit Card, and BRIZZI by BRI.

In addition, on the financing side, the Company provides various loan products, including BRI KUR, BRI KPR, BRI KKB, BRI Multipurpose Loan, BRI Investment Loan, and BRI Working Capital Loan. The Company also offers various investment and insurance services, including BRI Investment, BRI Bancassurance, BRI Custodian, BRI Trustee, and BRI Trustee services, as well as transaction and business services, including BRI Trade Finance, BRI Remittance, BRI Money Changer, BRI EDC, and the BRILink Agent network.

Meanwhile, in digital banking services, the Company provides the mobile banking (superapps) application BRImo to facilitate customers in conducting various banking transactions, as well as Qlola by BRI as an integrated transaction platform that provides cash management, trade finance, and foreign exchange services. The Company also provides other digital services such as BRI eBuzz, as well as wealth management services through BRI Prioritas and BRI Private.

To further strengthen its service coverage, BRI is also supported by an extensive network in collaboration with business partners across various regions. Domestically, BRI operates 1 Head Office, 18 Regional Offices, 18 Regional Audit Offices, 454 Branch Offices, and 6,885 Sub-Branch Offices (comprising 555 KCP, 490 Cash Offices, 5,082 BRI Units, and 758 Teras BRI), as well as 6 Teras BRI Keliling and 4 Teras BRI Kapal, all of which are distributed across Indonesia. Meanwhile, BRI's international network consists of 6 Overseas Branch Offices and 3 Overseas Sub-Branch Offices, located in New York, Cayman Islands, Singapore, Taipei, Timor-Leste, and Hong Kong.

As part of its commitment to serving customers and expanding financial inclusion, BRI also integrates the presence of its operational network with branchless banking through **BRILink Agents** spread across Indonesia, supported by competent financial advisors with digital capabilities. The combination of these three elements delivers banking services that are more effective, efficient, and integrated, in line with the development of literacy and the digital service needs of the Indonesian people.

From an organizational perspective, BRI is led by the President Director and Vice President Director, supported by 11 Directors and 5 Senior Executive Vice Presidents (SEVPs) in carrying out the Company's activities as a banking service provider through its extensive operational network. In conducting its operational activities, BRI has 84,949 employees, with the following educational background composition: 16 employees with Doctoral degrees, 2,255 employees with Master's degrees, 72,416 employees with Bachelor's degrees, 9,465 employees with Diploma degrees, and 797 employees with Senior High School (SLTA) or equivalent education.

## Analysis of the Company's Performance

### Economic Conditions Directly Affecting the Company's Performance

Throughout 2025, global conditions were dominated by persistent volatility, driven by trade dynamics, geopolitical tensions, and various policy shocks. These factors caused markets to repeatedly shift between risk-off phases and relief rally periods, reflecting high uncertainty and sensitivity to external developments. Inflation continued to moderate compared with the peak period of 2022–2023. In the energy market, oil prices throughout 2025 generally showed a downward trend, in line with relatively abundant global supply conditions. Nevertheless, geopolitical developments, particularly the escalation of conflict in the Middle East, temporarily triggered spikes in oil prices and increased the global risk premium, raising concerns over imported inflation while maintaining volatility in international financial markets.

In the United States, economic growth began to slow in line with the lagging effects of prolonged high-interest-rate policies. Although the Federal Reserve began cutting interest rates in 2025, the move was not aggressive as core inflation remained relatively high. US Treasury yields remained at relatively elevated levels, resulting in tighter global liquidity throughout 2025 and making capital flows to emerging markets more selective.

In this context, Indonesia demonstrated relatively strong resilience. Economic growth in 2025 was around 5%, supported by domestic demand and the acceleration of investment in the second half of 2025. The growth structure began to show a shift, where the contribution of investment (GFCF) increased, particularly in downstreaming sectors, infrastructure, energy, as well as export-oriented manufacturing and import substitution.

Household consumption remained the main pillar of the economy, but with increasingly segmented dynamics. Throughout 2025, consumption among the upper-middle class group was more resilient, while the lower-middle and micro segments faced purchasing power pressures due to rising living costs and income adjustments. This was reflected in faster fund turnover in the lower-middle and micro segments, but with relatively more moderate average balances.

From the inflation perspective, price pressures remained relatively controlled and within Bank Indonesia's target range. The stability of food prices and coordination between monetary and fiscal policies helped maintain inflation expectations. However, global energy price volatility remained a risk factor that required vigilance, particularly regarding its impact on subsidies and administered prices.

The Rupiah exchange rate throughout 2025 moved fluctuatively, following the dynamics of the US dollar and global sentiment. The strengthening of the dollar due to still-high US yields, as well as episodes of risk-off, at times pressured the Rupiah. However, strong domestic fundamentals and measured interventions by Bank Indonesia helped keep volatility under control. In general, the Rupiah moved relatively stable, albeit within a wider range compared with the period prior to global monetary tightening.

From the fiscal perspective, the Government continued to maintain the deficit within the stipulated limit, although fiscal space became increasingly limited. Social spending and priority programs continued to be implemented, while financing needs increased in line with the optimization of expenditures. Fiscal discipline throughout 2025 became an important factor in maintaining investor confidence in government bonds and the stability of the domestic financial market.

Indonesia's bond market throughout 2025 reflected a balance between solid domestic factors and volatile external pressures. Yields moved dynamically following the direction of US Treasury yields and foreign capital flows, but generally remained within a manageable range. Inflation stability and policy coordination served as the main supports for market sentiment.

Overall, 2025 can be characterized as a year of consolidation amid a challenging global environment. Indonesia was able to maintain economic growth of around 5%, with controlled inflation and preserved financial system stability. Entering 2026, this momentum provides a relatively strong foundation, although external risks and limited policy space remain factors that need to be carefully anticipated.

## Target Market

BRI consistently positions itself as a bank that focuses on empowering the Micro, Small, and Medium Enterprises (MSMEs) segment as the backbone of the national economy. With an extensive service network reaching remote areas and supported by ongoing digital transformation, BRI continues to strengthen its role as a financial integrator that promotes financial inclusion and drives people-centered economic growth in Indonesia.

BRI has also begun strengthening its positioning as "One Bank For All", referring to a bank capable of serving the comprehensive financial needs of customers across various segments. Through this approach, BRI not only focuses on the Micro segment as its core business, but also promotes the Consumer business as a new source of growth, while developing integrated services for Retail, Small and Medium Enterprises, and selectively for the Corporate segment.

The MSME segment, particularly micro and ultra-micro enterprises, remains BRI's primary target market. Through various financing products, transaction services, and empowerment programs, such as developing MSME ecosystems and expanding access to financing, BRI is committed to continuously enhancing public business capacity and expanding financial inclusion.

To drive new sources of growth, BRI is accelerating its Consumer business through payroll-based and ecosystem-based financing, while also strengthening its gold pawn business through the optimization of BRI's network. These efforts are supported by the digitalization of business processes to enhance efficiency and accelerate service level agreements (SLA), enabling the financing application-to-disbursement process to become faster, simpler, and more integrated.

In addition, BRI also strengthens its business in the Small and Medium Enterprise (SME) segment, which plays an important role in supporting national economic growth, particularly in the trade, manufacturing, and services sectors. This segment is part of BRI's strategy to encourage MSME players to scale up their businesses to become more productive and competitive.

In the Commercial and Corporate segments, BRI adopts a more selective approach, focusing on companies connected to MSME value chains, the national trade ecosystem, and priority sectors that support economic development. This approach enables BRI to build an integrated business ecosystem spanning microenterprises to large corporations.

In line with its ongoing digital transformation, BRI also expanded its market reach through the strengthening of digital services and platform-based financial ecosystems, including the development of the BRImo super app, Qlola by BRI, as well as various other digital solutions. This step aims to improve service quality, expand financial access, and provide a banking experience that is easier, faster, and more secure for all segments of society.

Through this strategy, BRI is committed to continuously strengthening its role as a bank serving all segments of society while remaining a champion of MSME empowerment, thereby contributing sustainably to inclusive national economic growth.

## Strategic Policy Strategies Implemented by the Company

In order to maintain healthy and sustainable growth amid increasingly complex dynamics in the banking industry, in 2025 the Company implemented a strategic transformation agenda through BRlvolution Reignite. This transformation is aimed at strengthening the Company's long-term competitiveness by reinforcing a transaction-based funding structure, enhancing the quality of its core business, and developing sustainable new sources of growth.

The transformation is carried out through the strengthening of the Company's funding franchise in order to build a stronger transaction-based low-cost funding base. The Company enhances its capabilities in acquiring and managing customer transactions through the optimization of digital channels, strengthening relationships with key merchants, and expanding payment ecosystems and QRIS ecosystems across various business segments. The increase in transaction activities is reflected in the growing utilization of the Company's digital services, with transactions through BRlmo continuing to increase and reaching more than IDR7,000 trillion in transaction value throughout 2025. Meanwhile, daily transaction volumes through digital platforms, including BRlmo and Qlola, recorded the highest levels in the Company's history. The increase in transaction activities also strengthened the Company's low-cost funding mobilization, as reflected in the Company's CASA ratio, which reached 70.6% at the end of 2025.

In addition to strengthening its funding structure, the Company also carried out improvements to its core business, particularly in the micro segment, which has long been BRI's key strength. The transformation in this area focuses on improving the quality of growth through strengthened credit discipline, refinement of underwriting processes, and enhancement of human capital capabilities. One of the strategic initiatives undertaken is the remodeling of the Mantri role to enhance the effectiveness of micro portfolio management. Through this approach, the Mantri role is classified into Mantri Tumbuh, focusing on financing expansion; Mantri Briguna, supporting the development of payroll-based consumer financing; and Mantri Recovery, focusing on asset quality management and credit recovery. This restructuring of roles enables the Company to improve network productivity while strengthening risk management in a more structured manner.

On the business process side, the Company also strengthened its risk management capabilities through the enhancement of data-driven pre-screening and underwriting processes, improvements in credit portfolio monitoring systems, and the implementation of early warning indicators to detect potential risks at an earlier

stage. These initiatives are undertaken to ensure higher-quality financing growth while strengthening the long-term resilience of the Company's portfolio. In addition, the Company also implemented the Field Collection function as a new approach in managing non-performing loans in the field, aimed at improving the effectiveness of the credit recovery process and strengthening asset quality management in a more focused and structured manner.

In line with the strengthening of its core business, the Company also develops new sources of growth by strengthening various business segments with long-term growth potential. In the consumer segment, the Company drives financing growth through the strengthening of the payroll loan business, the development of motor vehicle financing, and the expansion of mortgage lending, with a focus on projects developed by top-tier developers in order to maintain the quality of the financing portfolio. In addition, the Company also strengthens its wealth management services through a more segmented approach to deepen relationships with affluent customers and business owners.

In the Commercial/SME segment, the Company develops a transaction-led relationship approach to strengthen the quality of business growth. This strategy is implemented through the enhancement of transaction banking services and the development of cash management solutions to deepen business relationships with customers. The implementation of this strategy also supported financing growth in the Commercial segment, which reached 56.5% year-on-year in 2025.

To strengthen cross-segment service integration, the Company introduced the One BRI Solution initiative, designed to provide integrated financial solutions for customers within their business ecosystems. Through this approach, the Company integrates financing with customers' business value chains, ranging from financing and transaction services to liquidity management, thereby enabling the creation of closed-loop financing within the ecosystem.

Furthermore, the Company also develops new growth opportunities by strengthening the gold business ecosystem through synergy within the BRI Group. Through the development of bullion services, the strengthening of retail gold product portfolios, and the integration of gold investment and financing services through digital platforms, the Company is building an integrated gold ecosystem that has the potential to become one of the Company's new growth engines in the future.

All of these transformation initiatives are supported by the strengthening of various organizational foundations, including the modernization of information technology capabilities, improvements in operational process

effectiveness, strengthening of governance and risk management, and the development of human capital quality. These strengthened foundations ensure that the transformation not only drives business growth but also enhances operational efficiency and service quality for customers.

Through the consistent and focused implementation of the BRIVolution Reignite transformation, the Company not only maintained solid performance throughout 2025 but also strengthened its business foundations to navigate the evolving dynamics of the financial industry in the future. With an increasingly robust business model, more adaptive organizational capabilities, and a more integrated service ecosystem, the Company remains confident in its ability to continue generating healthy, resilient, and sustainable growth for all stakeholders.

### The Role of the Board of Directors in Formulating Strategic Strategies and Policies

The Board of Directors plays an active and collective role in formulating the Company's strategies and strategic policies in a comprehensive and integrated manner. This process takes into account external dynamics, industry conditions, internal performance, and projections of long-term risks and opportunities.

In formulating its strategies, the Board of Directors involves all elements of the organization, including both business lines and supporting (enabler) functions such as the Risk Management Directorate, Finance & Strategy Directorate, Information Technology Directorate, Operations Directorate, Legal & Compliance Directorate, Human Capital Sub-Directorate, and Corporate Transformation Sub-Directorate, to ensure alignment of direction as well as implementation readiness. Through this approach, the strategies established are not only ambitious in terms of growth but also realistic, measurable, and aligned with the organization's capacity.

Strategy formulation is conducted iteratively through management forums and discussions within the Board of Directors, ensuring that each policy has undergone processes of testing, refinement, and cross-functional alignment before being finalized. Each strategy is also reviewed based on the principles of prudence and disciplined risk management, and is communicated transparently to the Board of Commissioners in accordance with the applicable governance provisions.

Through this governance process, the Board of Directors ensures that every strategic direction has a strong and accountable foundation and is capable of addressing both short-term and long-term challenges in a sustainable manner.

### Processes Undertaken by the Board of Directors to Ensure Strategy Implementation

The Board of Directors believes that the quality of a strategy is determined by consistency and discipline in its implementation. Therefore, the Company implements a structured and measurable execution framework to ensure that every strategic direction is translated into concrete and impactful initiatives.

Each strategy is translated into a clear work plan, measurable performance targets, and success indicators that are monitored periodically through management forums and Board of Directors meetings. To ensure the implementation of strategies, the Board of Directors conducts routine evaluations of achievements, risks, and deviations that occur, and takes corrective actions promptly and in a targeted manner when necessary.

In addition, the Board of Directors ensures clarity of roles and accountability at every level of the organization, so that strategy implementation becomes a collective responsibility, not merely a top management initiative. With the support of internal control systems, disciplined risk management, and a strong performance culture, the Company is able to maintain consistency in execution under various conditions.

Through this approach, the Board of Directors ensures that the Company's strategies do not stop at the planning stage, but are realized in practice and deliver sustainable results.

### Analysis of the Company's Performance

#### Operational and Financial Performance

As of December 31, 2025, BRI's total consolidated assets grew by 7.14% to IDR 2,135 trillion. This growth was partly driven by the increase in loan and financing disbursements, which reached IDR 1,521 trillion, representing a 12.32% year-on-year growth. BRI consistently continued to channel loans and financing to the Micro, Small, and Medium Enterprises (MSME) segment, which accounted for 77.49% of BRI's total loan and financing portfolio or IDR 1,179 trillion. Meanwhile, BRI's flagship segment, namely the Micro and Ultra Micro segment, contributed 42.61% of the total loans and financing.

The growth in loans and financing to the MSME segment was also supported by the major contribution of the Ultra Micro Holding, consisting of BRI, Pegadaian, and PNM, which has been established since September 2021. Pegadaian's loans grew by 47.6% to IDR 126.1 trillion, while PNM's loans increased by 0.5% to IDR 50 trillion. On the other hand, loans in BRI's Micro and Ultra Micro segments also recorded positive growth of 3.3%, reaching IDR 648.3 trillion.

Loan growth in the Micro segment, particularly the Kupedes product, experienced a slowdown in line with the Company's focus on quality growth and efforts to improve credit quality. Meanwhile, the People's Business Credit (KUR) product continued to record positive growth as a key driver in increasing more inclusive financing by providing access to financing for customers who had previously not obtained commercial financing facilities. In 2025, BRI disbursed IDR 178 trillion in KUR, demonstrating BRI's commitment to continue being the Government's main partner in the distribution of KUR to support the national economy.

Growth in the MSME segment on a consolidated basis was also supported by the impressive performance of the Consumer segment, which recorded year-on-year growth of 9.4% to reach Rp228.8 trillion. Growth in the consumer segment was primarily driven by BRIGUNA and Mortgage Loans (KPR), which grew by 9.9% and 13.3% year-on-year, respectively. In addition, BRI continued to support the Government's program to increase public home ownership by distributing 32,209 FLPP mortgage units in 2025. The Commercial, Small, and Medium Enterprise (CSME) segment also recorded strong growth momentum with double-digit growth of 10.3% year-on-year. Meanwhile, loans in BRI's Corporate segment recorded solid growth, reaching IDR 342.5 trillion, or growing 40.2% year-on-year. Growth in this corporate segment was focused on strengthening the wholesale business through the optimization of transaction banking services.

In 2025, BRI also maintained a strategic focus on strengthening retail banking capabilities, particularly in mobilizing low-cost funds through Current Account Saving Account (CASA), which are more stable and sustainable. This strategy delivered results, with BRI's consolidated deposits growing 7.4% to IDR 1,466 trillion, with a CASA ratio of 70.61%, the highest ratio in BRI's history. The growth of this low-cost CASA will continue to be the main focus of BRI's funding sources.

CASA mobilization was supported by the Company's strategy to increase customer transactions in both retail and wholesale segments. In the retail segment, CASA mobilization was driven by transaction optimization through BRILink Agents, mobile banking (BRImo), EDC Merchants, and QRIS, the digital payment platform (BRI API), as well as the expansion of merchant acquiring acceptance. Meanwhile, in the wholesale segment, CASA mobilization was optimized through the development of an integrated digital payment platform for corporate customers, namely Qlola, which provides comprehensive access to BRI's wholesale banking services, such as cash management, trade finance, supply chain management, foreign exchange, investment services, and a financial dashboard.

The strengthening of CASA in the retail segment was also reflected in the increasing customer transactions through BRILink Agents and BRImo, which contributed positively to BRI's profitability performance. Throughout 2025, BRILink Agents recorded 1.2 billion transactions with a total value of IDR 1,746 trillion, representing 9.9% year-on-year growth compared to the previous year. In addition, BRImo also recorded an increase in transaction value of 26.4% year-on-year, reaching IDR 7,077 trillion.

This solid performance was also reflected in the Company's net profit of IDR57.132 trillion. BRI's profitability achievement was driven by the bank-only net profit of IDR 50.4 trillion. The main drivers of BRI's profit growth stemmed from the Company's ability to manage the growth of net interest income, fee-based income, recovery income, as well as operational cost efficiency.

BRI's topline performance also recorded impressive results, with Net Interest Income (NII) on a consolidated basis growing by 5.5% year-on-year. This growth was driven by the management of loan and financing assets offering competitive interest rates, as well as by optimal liquidity management. The interest rate levels applied by BRI are reflected in the Basic Interest Rate of Loan (SBDK) as follows.

#### SBDK Table (Prime Lending Rates) as of December 31, 2025

##### QUANTITATIVE DISCLOSURE

Data Period December 31, 2025	Non-MSME Loans		MSME Loans			KPR/KPA	Non KPR/ Non KPA
	Corporate	Retail	Medium	Small	Micro		
Fund Cost for Loan (HPDK)	3.41	N/A	3.41	3.41	3.41	3.41	3.41
Overhead Cost(%)	1.33	N/A	3.67	3.38	8.29	3.84	3.66
Profit Margin (%)	3.46	N/A	3.17	3.41	2.10	2.65	2.03
Prime Lending Rates (SBDK) (%) (HPDK + Overhead + Margin)	8.20	N/A	10.25	10.20	13.80	9.90	9.10

Note: Effective from January 1, 2025

## QUALITATIVE DISCLOSURE

Category	Credit Category Definition	Credit Category Indicator / Criteria
Corporate	Working capital loans and investment loans for non-MSME and non-retail segments	Total credit ceiling > IDR 500 billion
Retail	N/A	N/A

### Deposit Counter Rate Table as of December 31, 2025

Product	IDR Interest Rate	USD Interest Rate
Current Accounts	0.00% - 1.25%	0.05% - 0.15%
Savings	0.00% - 2.00%	0.08% - 0.25%
Deposits	2.50% - 3.00%	4.00%

Fee-based income and other operating income, including net gold sales income and treasury income, increased to Rp56.1 trillion, representing an increase of 2.6% YoY. On the other hand, BRI also maintained operational cost efficiency, as reflected in the year-on-year growth in operating expenses of 7.7%. This resulted in a consolidated Cost-to-Income Ratio (CIR) of 42.55%.

With strong business growth and profitability, BRI was able to maintain its financial ratios at healthy levels. The Company's Loan to Deposit Ratio (LDR) stood at 91.43% on a consolidated basis and 91.96% on a bank-only basis, indicating that the Company's liquidity remained at an adequate level to support future business growth. BRI's profitability ratios also recorded positive results, reflected in Return on Assets (ROA) After Tax and Return on Equity (ROE) Balance Sheet, which reached 2.74% and 17.44%, respectively.

In terms of asset quality, BRI still faced challenges in resolving the restructured loan portfolio resulting from the COVID-19 pandemic. BRI's Non-Performing Loan (NPL) ratio was recorded at 3.07% in December 2025, slightly increasing compared to the same period in the previous year. This condition was in line with the Company's strategy to accelerate the resolution of restructured loan portfolios resulting from COVID-19.

Nevertheless, the Company continued to maintain an adequate provisioning level, as reflected in the NPL Coverage ratio, which remained at 178.06%. In addition, the Loan at Risk (LAR) ratio also continued its downward trend from 10.70% in 2024 to 9.61% in 2025. This decline was driven by the reduction in the restructured loan portfolio resulting from COVID-19, from IDR 15.6 trillion at the end of 2024 to IDR 7.7 trillion at the end of 2025.

BRI also maintained strong capital conditions, with the Capital Adequacy Ratio (CAR) reaching 23.52% on a consolidated basis and 21.06% on a bank-only basis. This ratio is well above the minimum regulatory requirement of 17.5% (after considering the implementation of Basel III) and above the Company's risk appetite of 19%.

With this adequate capital adequacy ratio, BRI can anticipate key risks in bank management, including market risk, credit risk, and operational risk, while also supporting the Company's long-term sustainable business growth.

## Non-Financial Performance

### IT DIGITAL

BRI prioritizes reliable digital services through the fulfillment of IT Hygiene Factors (Reliability, Availability, Scalability, Security). These efforts support the BRIVolution Reignite strategy by ensuring secure, scalable, and future-proof IT infrastructure. Information Technology (IT) transformation is carried out through three main pillars: Run the Bank to modernize infrastructure, Change the Bank to enhance applications and customer experience, and Transform the Bank to strengthen strategic planning and an adaptive IT organization.

BRI develops various innovations, such as enhancing the gold investment experience in BRImo, adopting cloud technology, and implementing multiple KYC to improve identity reliability and accuracy. BRI also introduced Sabrina, an AI-based virtual assistant that handles millions of customer interactions and achieves high satisfaction levels. In addition, WISE helps frontliners find work guidance quickly and accurately, significantly improving service efficiency.

BRI strengthens all Data Centers through capacity upgrades, device modernization, and the implementation of Tier-III standards to ensure service reliability. This initiative forms the basis for implementing an Active-Active Data Center architecture, including cloud implementation for critical applications such as BRImo and Qlola by BRI. This strategic step reaffirms BRI's commitment to providing a strong, secure IT infrastructure capable of supporting sustainable business growth in the digital era.

## CULTURE

The BRILiaN Way Transformation represents a strategic initiative to strengthen corporate culture as a key driver of performance. We believe that strategy will only be effective when supported by a transformation of mindset and real collective behavior. Through the synergy of an inclusive bottom-up approach and strategic direction from management, the five core values, namely Integrity, Collaborative, Accountability, Growth Mindset, and Customer Focus, now serve as a compass for behavior and decision-making across the organization.

The internalization of these values is carried out systematically by integrating them into the entire Human Capital Cycle, from recruitment to performance management. This approach ensures that the Company's culture is not merely a slogan, but a measurable parameter that directly impacts productivity and operational efficiency. The strong commitment from the management team, along with the active role of Change Agents, serves as the main driving force in maintaining consistent implementation at every level.

With a strong cultural foundation, we are optimistic that the Company will be able to sustain healthy and resilient growth amid the dynamics of the global market. Our focus remains on creating sustainable long-term value for all stakeholders. We believe that the alignment between business strategy and a strong corporate culture will become the Company's key competitive advantage in facing future challenges.

## HUMAN CAPITAL

BRI views Human Capital as the main driver of transformation and the sustainability of the Company's performance. In line with the BRIVolution Reignite transformation agenda, in 2025, BRI focused on strengthening the foundations Human Capital management through the refinement of various hygiene factors to ensure that the talent management system becomes more solid, integrated, and aligned with the strategic direction of the business. Various initiatives are carried out in a structured manner, ranging from improving data quality, enhancing and accelerating recruitment processes, strengthening talent management, succession planning, and performance management, as well as enhancing the capability of Human Capital (HC) as a strategic business partner. This approach serves as an important foundation for BRI in building an organization that is increasingly adaptive,

performance-oriented, and ready to face the continuously evolving dynamics of the industry.

Throughout 2025, BRI recorded a significant acceleration in strengthening its talent pipeline, with the number of talents recruited through the BRI Future Leader Program (BFLP) increased by 685% compared to the previous year, covering nine strategic specializations to address future competency needs. The strengthening of the talent pipeline was also carried out through the BrillianNext program to attract outstanding candidates from Top Graduates of universities with strong academic reputations. At the same time, BRI continued to strengthen the foundation of data-based Human Capital management by optimizing Employee Self Service (ESS) and data governance, including structuring HC data management and mapping HC data variables. To prepare the strategic leadership pipeline, the Board of Directors (BOD) and Regional leaders were systematically and structurally involved in conducting succession planning, resulting in the identification of around 500 Top Talents in Bands 1-3 as part of the talent management process.

To ensure an increasingly agile and performance-oriented organization, BRI enhanced its performance management system to be more objective and transparent through fully KPI-based assessments, complemented by 180-degree behavioral assessments. The capabilities of the Human Capital function continued to be strengthened through capability-building programs, particularly for HCBP, enabling them to become more responsive and solution-oriented to business needs. In addition, RHCBP strengthened their roles as decision-makers at the Regional Office level in aspects such as recruitment, career management, and learning. All these initiatives culminated in strengthening the cultural transformation through the implementation of the Brillian Way across BRI and its Subsidiaries, including the piloting of Lighthouse Branch Offices as role models for cultural implementation, as well as end-to-end measurement of organizational culture to ensure that BRI's values and work behaviors are consistently internalized across all lines of the organization.

The development of employee competencies is a key priority for BRI, as it can drive productivity and support the achievement of the Company's overall performance. In 2025, BRI developed education programs structured in alignment with the employee lifecycle. Accordingly, the education programs have a clear structure while supporting the achievement of the Company's strategic objectives.

In addition, to increase ownership of education at the Regional Office level and ensure that employee capability development in the regions aligns with their specific needs, starting in 2025, BRI implemented the Green Program. The preparation of the curriculum, learning objectives, learning materials, budget calculations, implementation of education, and evaluation of education fall within the scope of each Regional Office.

## DISTRIBUTIONS

Over the past year, BRI has undertaken various enhancements in the distribution function to improve network effectiveness and drive business growth. Improvements began with organizational restructuring, including strengthening the role of Regional Offices under the Network & Retail Funding Director, enhancing the independence of operational and risk management functions, and sharpening the role of business units in the regions to focus more on business development and support for Branch Offices.

BRI also established 74 Area Heads to strengthen the orchestration of business development in the regions. This role clarifies the interaction model between Regional Offices and Branch Offices, enhances cross-segment collaboration, and ensures more focused branch performance management. In line with this, BRI also strengthened the capabilities of its unit leaders to effectively drive business transformation, improve network productivity, and become more adaptive in capturing market potential in their respective areas.

BRI continues to strengthen its national distribution coverage by optimizing all available channels, comprising 7,339 service outlets, 54 e-Buzz units, 6 Teras Keliling, 19,657 e-channels, and 1.19 million BRILink Agents. In addition, BRI operates 4 Teras Kapal units to reach remote areas and islands that have not yet been optimally served by the banking network. In addition to maintaining its extensive network, BRI also optimizes the distribution footprint through the relocation of outlets to high-potential areas and adjustments to branch service capabilities to better align with customer needs, thereby enabling market potential across various regions to be utilized more effectively.

## OPERATIONS

Throughout 2024–2025, the Operations Directorate implemented various strategic initiatives focused on improving process efficiency, strengthening customer experience, and mitigating operational risks. These achievements are reflected in significant improvements in Service Level Agreements (SLA), including the acceleration of RTGS Incoming processing from 1.5 minutes to 0.5 minutes, Trade Finance Transactions from 65 minutes to 20 minutes, and Mass Account Opening, which was successfully reduced from 16 hours to only 10 minutes. Overall, the Operations Directorate succeeded in reducing manual processes by 31%, from 900 processes to 675 processes.

In terms of service, BRI successfully maintained the #2 position in the Bank Service Excellence Monitor (BSEM) MRI and recorded a Net Promoter Score (NPS) of 69.00. The reliability of the e-channel infrastructure also remained optimal, with ATM reliability reaching 99.69% and CRM at 99.61%, both exceeding the set targets. On the credit operations side, improvements in SLIK data quality reached

99.90%, while the implementation of AGF (Auto Grab Fund) has covered 88% of loan accounts, contributing to a 73% reduction in manual overbooking and generating approximately 418 thousand hours of teller free-up time.

Digitalization and automation initiatives have further strengthened operational capabilities, including the implementation of Smart RTGS, which successfully redirected funds amounting to IDR 3.8 trillion, the acceleration of mortgage (KPR) disbursement through BRISPOT reaching 85% with Turn Around Time twice as fast, and the piloting of the Biometric Verification Platform (BVP) to mitigate the risks of fictitious credit and fraud. These achievements provide a strong foundation in supporting the aspiration of the Operations Directorate to deliver a seamless customer experience through operations that are efficient, reliable, and well-controlled in terms of risk.

## REBRANDING

As part of Bank Rakyat Indonesia's long journey, which is entering its 130th year, we recognize the need to strengthen our positioning to ensure that BRI remains a relevant institution and continues to serve as a trusted business partner for all segments of society.

Through this rebranding, BRI renews its identity, becoming more inclusive, modern, and relevant. This transformation reinforces BRI's position as a universal bank that remains rooted in MSMEs, while strengthening the consumer segment as a new source of growth. This initiative also serves as a bridge for BRI to continue expanding its role in supporting inclusive and sustainable economic growth.

In keeping with this transformation, we also reintroduced BRI's commitment through the tagline "One Bank for All." This tagline reflects our aspiration to serve all segments of society comprehensively, from the micro and MSME segments to consumer, commercial, and corporate segments. With an increasingly comprehensive range of products and services supported by a strengthened digital ecosystem, BRI continues to strive to deliver integrated, easily accessible, and relevant services to the evolving needs of customers.

More than merely a change in identity, this rebranding also reinforces BRI's new character as a trusted, progressive, and inclusive institution. We aspire for BRI to be recognized as a brand that is ambitious yet grounded, aspirational yet practical, inclusive, digitally savvy, and world-class, capable of reaching new generations while maintaining our commitment and DNA as a bank that grows together with Indonesia's MSMEs. This transformation reflects BRI's long journey while also demonstrating our readiness to continue serving the public and becoming a reliable financial partner for Indonesia.

## Comparison Between Achieved Results and Targets

In general, BRI on a consolidated basis successfully achieved the performance targets set for 2025, with the following details:

(Consolidated, in IDR Billion)

Description	December 2025		
	Target	Realization	Achieved
Loans and Financing Granted (IDR Billion)	1,462,009	1,521,486	104.1%
CASA Ratio	67.28%	70.61%	105.0%
Net Interest Income (IDR Billion)	150,053	150,498	100.3%
Operating Profit Before Provisions for Loan Losses (PPOP) (IDR Billion)	118,607	119,430	100.7%
Loan at Risk (LAR)*	10.36%	9.61%	107.8%

\*) The calculation of LAR achievement uses the formula Target/Actual.

## Challenges Faced by the Company and Mitigation Measures

BRI's solid performance throughout 2025 was not without challenges arising from the global and domestic environments, as well as dynamics within the banking industry. Various external factors also affected liquidity conditions, asset quality, and financing demand patterns in the banking sector.

From a global perspective, the world economy continued to face uncertainty influenced by geopolitical dynamics, trade tensions between countries, and volatility in energy and food commodity prices. Global monetary policies that remained relatively tight in several advanced economies also exerted pressure on global capital flows and financial market stability. These conditions impacted increased exchange rate volatility and influenced the sentiment of business actors and investors across various countries, including Indonesia.

At the domestic level, Indonesia's economy continued to demonstrate resilience with stable economic growth. Nevertheless, pressure on purchasing power in several segments remained a challenge, particularly among the lower-middle-income groups, which form the primary base of micro and small economic activities. These conditions affected the dynamics of financing demand and required banks to become more selective in extending credit in order to maintain sustainable asset quality.

In addition, the growth of Third Party Funds (DPK) in the banking industry also faced pressure amid increasing competition among financial institutions in mobilizing public funds. Competition for low-cost funding has intensified, prompting banks to continually strengthen their liquidity management strategies while driving innovation in transaction services and digital banking.

From an industry perspective, competition in the banking sector has intensified, particularly in the retail and MSME segments, which remain BRI's primary focus. Competition arises not only from other banking institutions, but also from financial technology (fintech) companies and various digital platforms that are increasingly aggressive in offering technology-based financial services.

Technological developments such as artificial intelligence, data analytics, and business process automation are also driving changes in the financial industry landscape toward service models that are faster, more efficient, and increasingly digital-based. Changes in customer behavior, which increasingly rely on digital services, also present challenges for the banking industry to continuously enhance technological capabilities while ensuring the security and reliability of their digital systems.

Internally, BRI also faces challenges in maintaining a balance between business growth and asset quality, particularly in the micro and MSME segments, which remain the Company's primary focus. This segment offers significant growth potential but also carries inherent risk characteristics that must be managed prudently, especially amid dynamic economic conditions.

In addition, efforts to strengthen the funding structure through increasing low-cost funds (CASA) also present challenges amid intensifying industry competition. The Company continues to enhance digital transaction capabilities and expand its service ecosystem to increase customer engagement and strengthen a sustainable funding base.

The digital transformation continuously carried out by BRI also requires significant investment in the development of technology infrastructure, strengthening cybersecurity, and enhancing human capital capabilities. These efforts form an important part of the Company's long-term strategy to ensure that the transformation it undertakes delivers sustainable value for customers and all stakeholders.

## Key Matters Expected to Occur in the Future and Business Prospects

In recent years, the global economy has moved within an increasingly complex landscape. The world no longer follows a fully linear economic cycle. Geopolitical dynamics, changes in the configuration of international trade, and the acceleration of technological transformation are shaping an economic environment increasingly influenced by structural factors rather than by short-term business cycle fluctuations.

Entering 2026, global uncertainty is expected to continue influencing the world economy. However, supported by relatively strong domestic fundamentals, Indonesia's economy is projected to grow by 5.1%–5.3% in 2026. Domestic demand will remain the main engine of growth, although with a more moderate momentum compared to the post-pandemic recovery period.

In a phase of more moderate growth following the economic recovery period, the quality of growth has become increasingly important. Productivity, structural transformation, and broader job creation will determine the sustainability of economic growth going forward.

From the perspective of household consumption, the segmentation dynamics that began to emerge in 2025 are expected to continue into 2026. Consumption among upper-middle income groups is projected to remain relatively resilient, while lower-middle and micro segments may continue to face more moderate purchasing power pressures. This condition underscores the importance of strengthening productivity in the micro and small business sectors, as well as developing business ecosystems capable of enhancing the community's economic capacity in a more sustainable manner.

In this context, the banking sector plays an increasingly strategic role. Banks not only function as financial

intermediaries but also act as drivers of economic transformation through productive financing, strengthening business ecosystems, and expanding financial inclusion.

In Indonesia, economic transformation cannot be separated from the role of micro, small, and medium enterprises (MSMEs), which absorb the majority of the workforce while serving as a primary source of domestic economic resilience. For BRI, MSMEs are not merely a business segment, but rather the core foundation of the Company's business model. Supported by a nationwide network that reaches even remote areas and extensive experience in serving the grassroots economy, BRI is strategically positioned to strengthen MSME capacity through financing, empowerment programs, and ecosystem development, thereby continuing to drive MSME growth as one of the key pillars of the national economy.

With a solid economic foundation and increasingly strong policy coordination among the Government, Bank Indonesia, and financial sector authorities, we believe that Indonesia's economy will remain on a path of stable and sustainable growth. By leveraging its internal strengths, BRI remains optimistic about its future positive prospects.

## Information Related to the Bank Business Group

### Ownership of Shares by the Board of Directors, Board of Commissioners, and Shareholders within the Bank Business Group

As of December 31, 2025, there was no significant share ownership by the Board of Directors and Board of Commissioners within the BRI Bank Business Group, as previously disclosed in the section on Share Ownership of the Board of Directors and Board of Commissioners.

### Significant Changes in the Bank and the Bank Business Group in 2025

Throughout 2025, there were no significant changes within the Bank and the Bank Business Group. Going forward, BRI remains fully committed to driving the performance and contribution of BRI's Subsidiaries, through increasing net profit and contributions in the form of fee-based income to BRI, enabling the Subsidiaries to become sustainable growth drivers for BRI in the future.

In addition, based on the Decree of the Member of the Board of Commissioners of the Financial Services Authority (OJK) Number KEP-11/KS.1/2025 dated September 16, 2025, OJK designated BRI as the Parent Entity of a Financial Conglomerate, consisting of 22 (twenty-two) Financial Conglomerate Members. Furthermore, on December 23,

2024, the Financial Services Authority (OJK) enacted Financial Services Authority Regulation Number 30 of 2024 concerning Financial Conglomerates and Parent Entities of Financial Conglomerates (POJK on Financial Conglomeration ) and revoking Financial Services Authority Regulation Number 45/POJK.03/2020 concerning Financial Conglomerates. The POJK on Financial Conglomeration requires Financial Services Institutions that meet the criteria of a financial conglomerate to establish a Parent Entity of a Financial Conglomerate. In addition to holding equity participation in Financial Conglomerate Members that are Subsidiaries, BRI also holds non-significant equity participation in several companies that are not members of the BRI Financial Conglomerate.

## Development of the Implementation of Good Corporate Governance

Strengthening integrated compliance and governance capabilities serves as a strategic foundation for BRI Group in responding to continuously evolving market dynamics. Through the alignment of human capital competencies, information technology, and risk management across the entire BRI Group, we build a solid foundation to drive the creation of quality growth.

The implementation of integrated governance is carried out in accordance with applicable regulations, including Financial Services Authority Regulation Number 30 of 2024 concerning Financial Conglomerates. This integration ensures that every innovation developed remains within the corridor of regulatory compliance and good corporate governance, while also creating sustainable added value for all stakeholders. This strategy is a key factor in achieving governance and compliance maturity within the BRI Group environment, as evidenced by the achievement of an integrated governance maturity score of 4.06/5.00 and an integrated compliance score of 3.90/5.00.

In line with the ongoing transformation process and in line with the adoption of international standards, including the ISO Compliance Management System, Anti-Bribery Management System, and Quality Management System, BRI continues to promote information technology innovation as a key instrument for managing compliance risk and governance in a more proactive manner. This collective dedication has resulted in notable recognition, with BRI receiving the Most Trusted Company predicate at the Corporate Governance Perception Index. This recognition not only validates the maturity of the Company's governance and compliance implementation but also strengthens BRI's position as a credible and trusted banking institution in the eyes of global stakeholders.

To further strengthen its presence in the global market, BRI promotes fair and transparent disclosure for all stakeholders through public communication grounded in the principles of good corporate governance. BRI's success in presenting accountable and internationally standardized corporate information has also received positive recognition from external parties, as reflected in BRI's achievement as a Top 5 PLC in Indonesia and ASEAN Asset Class in accordance with the ASEAN Corporate Governance Scorecard criteria.

As part of our commitment to maintaining the integrity of the financial system, BRI continuously strengthens the effectiveness of preventing money laundering, terrorism financing, and proliferation financing of weapons of mass destruction (AML/CFT & CPF). These ongoing efforts are reflected in the "Very Good" rating received from PPAATK in the Financial Integrity Rating on Money Laundering/Terrorist Financing (FIR on ML/TF) 2025 assessment. This achievement demonstrates that BRI's commitment to prevention, policies, and implementation, as well as to AML/CFT reporting obligations, has been implemented at a high level.

## Performance Evaluation of Committees under the Board of Directors and Their Assessment Criteria

In supporting the effectiveness and efficiency of the Bank's management duties and responsibilities, the Board of Directors of BRI is assisted by ten committees that operate under and report directly to the Board of Directors. As of 31 December 2025, BRI has ten committees under the Board of Directors, as follows:

1. Asset and Liability Committee (ALCO)
2. Credit Policy Committee
3. Environmental, Social & Governance (ESG) Committee
4. Human Capital Committee
5. Information Technology Steering Committee
6. Procurement Committee
7. Product Committee
8. Risk Management Committee
9. Transformation Steering Committee
10. Financial Conglomeration Governance Committee

The evaluation procedure for the committees under the Board of Directors is conducted annually by the Board of Directors. The assessment is carried out based on performance outcomes reflected in each committee's contribution to the Company, including the reports and recommendations submitted to the Board of Directors. Based on this evaluation, the Board of Directors considers that all committees performed their duties optimally in 2025.

## Changes in the Composition of the Board of Directors

During 2025, there were changes in the composition of the Board of Directors. These changes were made based on the Company's needs. The changes in the composition of the Board of Directors are as follows:

### COMPOSITION OF THE BOARD OF DIRECTORS BEFORE THE 2025 ANNUAL GMS

The composition of the Board of Directors prior to the 2025 Annual GMS consisted of 12 (twelve) members, comprising 1 (one) President Director, 1 (one) Vice President Director, and 10 (ten) Directors, as follows:

<b>Sunarso</b>	: President Director
<b>Catur Budi Harto</b>	: Vice President Director
<b>Handayani</b>	: Director of Consumer Business
<b>Supari</b>	: Director of Micro Business
<b>Ahmad Solichin Lutfiyanto</b>	: Director of Compliance
<b>Agus Sudiarto</b>	: Director of Risk Management
<b>Agus Noorsanto</b>	: Director of Wholesale and Institutional Business
<b>Agus Winardono</b>	: Director of Human Capital
<b>Amam Sukriyanto</b>	: Director of Small and Medium Businesses
<b>Viviana Dyah Ayu R.K.</b>	: Director of Finance
<b>Arga M. Nugraha</b>	: Director of Digital & Information Technology
<b>Andrijanto</b>	: Director of Retail Funding and Distribution

### COMPOSITION OF THE BOARD OF DIRECTORS AFTER THE 2025 ANNUAL GMS

On March 24, 2025, the 2025 Annual General Meeting of Shareholders resolved to:

1. Honorably dismiss Sunarso as President Director, Catur Budi Harto as Vice President Director, Handayani as Director of Consumer Business, Supari as Director of Micro Business, Amam Sukriyanto as Director of Commercial, Small and Medium Business, Arga Mahanana Nugraha as Director of Digital and Information Technology, Agus Winardono as Director of Human Capital, Agus Sudiarto as Director of Risk Management, Andrijanto as Director of Retail Funding and Distribution, and Viviana Dyah Ayu R.K. as Director of Finance.

2. Change the nomenclature of the positions of the members of the Company's Board of Directors, namely: the former Director of Compliance and Director of Human Capital becoming Director of Human Capital & Compliance; the former Director of Consumer Business becoming Director of Consumer Banking; the former Director of Wholesale and Institutional Business becoming Director of Corporate Banking; the former Director of Micro Business becoming Director of Micro; the former Director of Finance becoming Director of Finance & Strategy; the former Director of Digital and Information Technology becoming Director of Information Technology; the former Director of Commercial, Small, and Medium Business becoming Director of Commercial Banking; and the former Director of Retail Funding and Distribution becoming Director of Network and Retail Funding. Subsequently, the positions of Director of Treasury and International Banking and Director of Operations were added.
3. Reassign the duties of members of the Board of Directors, namely Agus Noorsanto, who was previously Director of Wholesale and Institutional Business, to become Vice President Director, and Ahmad Solichin Lutfiyanto, who was previously Director of Compliance, to become Director of Human Capital & Compliance.
4. Appoint Hery Gunardi as President Director, Hakim Putratama as Director of Operations, Riko Adyitha as Director of Corporate Banking, Aquarius Rudianto as Director of Network and Retail Funding, Farida Thamrin as Director of Treasury and International Banking, Akhmad Purwakajaya as Director of Micro, Alexander Dippo Paris Y. S. as Director of Commercial Banking, Nancy Adistyasari as Director of Consumer Banking, Viviana Dyah Ayu R.K. as Director of Finance & Strategy, Mucharom as Director of Risk Management, and Saladin Dharma Nugraha Effendi as Director of Information Technology.

Thus, the composition of the Board of Directors after the 2025 Annual GMS consists of 13 (thirteen) members, comprising 1 (one) President Director, 1 (one) Vice President Director, and 11 (eleven) Directors, as follows:

<b>Hery Gunardi</b>	: President Director
<b>Agus Noorsanto</b>	: Vice President Director
<b>Ahmad Solichin Lutfiyanto</b>	: Director of Human Capital & Compliance
<b>Viviana Dyah Ayu R.K.</b>	: Director of Finance & Strategy
<b>Hakim Putratama</b>	: Director of Operations
<b>Riko Adythia</b>	: Director of Corporate Banking
<b>Aquarius Rudianto</b>	: Director of Network and Retail Funding
<b>Farida Thamrin</b>	: Director of Treasury and International Banking
<b>Akhmad Purwakajaya</b>	: Director of Micro
<b>Alexander Dippo Paris Y.S.</b>	: Director of Commercial Banking
<b>Nancy Adistyasari</b>	: Director of Consumer Banking
<b>Mucharom</b>	: Director of Risk Management
<b>Saladin Dharma Nugraha Effendi</b>	: Director of Information Technology

**COMPOSITION OF THE BOARD OF DIRECTORS  
AFTER THE 2025 EXTRAORDINARY GENERAL MEETING  
OF SHAREHOLDERS**

On December 17, 2025, the Extraordinary General Meeting of Shareholders (EGMS) 2025 resolved to:

1. Honorably dismiss Agus Noorsanto as Vice President Director, Achmad Solichin Lutfiyanto as Director of Human Capital & Compliance, Mucharom as Director of Risk Management, and Nancy Adistyasari as Director of Consumer Banking.
2. Change the nomenclature of the member of the Board of Directors position from Director of Human Capital & Compliance to Director of Legal & Compliance.

3. Reassign the duties of Viviana Dyah Ayu R.K., who was previously Director of Finance & Strategy, to become Vice President Director.
4. Appoint Achmad Royadi as Director of Finance & Strategy, Mahdi Yusuf as Director of Legal & Compliance, Ety Yuniarti as Director of Risk Management, and Aris Hartanto as Director of Consumer Banking.

Thus, the composition of the Board of Directors after the 2025 Extraordinary GMS consists of 13 (thirteen) members, comprising 1 (one) President Director, 1 (one) Vice President Director, and 11 (eleven) Directors. The composition and basis for the appointment of the Board of Directors are set out in the table below.

<b>Hery Gunardi</b>	: President Director
<b>Viviana Dyah Ayu R.K.</b>	: Vice President Director
<b>Hakim Putratama</b>	: Director of Operations
<b>Riko Adythia</b>	: Director of Corporate Banking
<b>Aquarius Rudianto</b>	: Director of Network and Retail Funding
<b>Farida Thamrin</b>	: Director of Treasury and International Banking
<b>Akhmad Purwakajaya</b>	: Director of Micro
<b>Alexander Dippo Paris Y.S.</b>	: Director of Commercial Banking
<b>Saladin Dharma Nugraha Effendi</b>	: Director of Information Technology
<b>Mahdi Yusuf</b>	: Director of Legal & Compliance
<b>Aris Hartanto</b>	: Director of Consumer Banking
<b>Achmad Royadi</b>	: Director of Finance & Strategy
<b>Ety Yuniarti</b>	: Director of Risk Management

## Closing

On this occasion, the Board of Directors expresses its highest appreciation to all customers, shareholders, and stakeholders for the trust and support continuously given to BRI throughout 2025. The trust of customers, together with the support from the government, shareholders, and other stakeholders, has become an important foundation that enables BRI to remain resilient and maintain sustainable performance amid the dynamics of economic challenges. This support also strengthens BRI's commitment to continuously create long-term value for shareholders while contributing meaningfully to the national economy.

The Board of Directors also expresses its gratitude to all BRILiaN People for their dedication, hard work, and outstanding contributions that have been key to BRI's success. The continuous introduction of innovations and the commitment to delivering the best services have strengthened BRI's role in creating added value for customers, shareholders, and society, and reinforced BRI's position as a financial institution that actively supports national economic growth.

Our highest appreciation is also extended to the Government of the Republic of Indonesia for its continuous support and trust in BRI in carrying out its role as an intermediary institution focused on empowering the people's economy, particularly by strengthening the MSME sector and expanding financial inclusion across various regions of Indonesia.

Finally, the Board of Directors also conveys its appreciation to the Board of Commissioners for their strategic direction and constructive supervision in ensuring the sustainability of the Company's performance. Close collaboration between the Board of Directors, the Board of Commissioners, BRILiaN People, shareholders, the government, and all stakeholders will continue to serve as an important foundation in driving innovation, transformation, and continuous improvement to create sustainable growth and long-term value for all stakeholders.

Jakarta, March 2026  
On behalf of the Board of Director

**Hery Gunardi**  
President Director

# Board of Commissioners' Report

**Kartika Wirjoatmodjo**

President Commissioner

**The Board of Commissioners appreciates the success of the Board of Directors in maintaining profitability and implementing the BRIVolution Reignite transformation strategy in a disciplined manner amid highly challenging conditions throughout 2025.**

## Respected Shareholders and Stakeholders,

We express our gratitude to Almighty God for His blessings and grace, which enabled the Company to record positive performance and achievements in 2025 despite the still challenging economic conditions. Under these circumstances, the Company was able to demonstrate resilience and solid performance.

PT Bank Rakyat Indonesia (Persero) Tbk — hereinafter referred to as “the Company” or “BRI”— remained committed throughout 2025 to carrying out its mission as a value creator for society and the Indonesian economy, while also carrying out its strategic role as an agent of development that consistently supports the Government’s priority programs in promoting national economic growth, empowering micro, small, and medium enterprises (MSMEs), and expanding financial access across the country.

Amid global macroeconomic volatility marked by uncertainty over the direction of major central banks’ interest rate policies, escalating geopolitical tensions in various regions, weakening exchange rates of emerging market currencies, and slower economic growth among several of Indonesia’s key trading partners, the Company was able to respond to these conditions in a prudent and adaptive manner. This resilience is reflected in the strengthening of the Company’s fundamentals throughout 2025. BRI recorded improvements in its funding structure, supported by the growth of retail funds and increasingly solid transactions. In terms of asset quality, the Company also showed an improving trend supported by the strengthening of credit distribution standards as well as the refinement of business processes, operations, and risk management. These measures constitute an important foundation in maintaining the quality of credit growth, strengthening balance sheet resilience, and ensuring the sustainability of the Company’s performance amid the evolving dynamics of the economic cycle.

At its 130th anniversary, BRI entered a new phase in its BRIVolution Reignite transformation journey, reaffirming its new positioning. This spirit was reflected in the launch of the corporate rebranding on December 16, 2025, marking the renewal of the Company’s visual corporate identity.

Through this new identity, BRI reaffirmed its commitment to continuous transformation and innovation as a universal bank serving all segments of society, while maintaining the MSME ecosystem as the backbone of its core business. Through an ecosystem approach that integrates all segments with the micro segment within a connected supply chain, BRI not only strengthens the competitiveness of MSMEs within a larger, integrated, and sustainable value chain, but also delivers increasingly digital-friendly and aspirational products and services to meet the evolving needs of customers in line with market developments and the rapidly advancing digital era.

The Board of Commissioners actively carried out supervisory functions and provided regular guidance to the Board of Directors throughout 2025. Such supervision and advisory were conveyed through the Board of Commissioners’ Report, which includes, among others, the assessment of the Board of Directors’ performance, views on the business prospects prepared by the Board of Directors, views on the implementation of Corporate Governance, evaluation of the performance of committees under the Board of Commissioners, as well as the composition and changes in the composition of the Board of Commissioners.

## Performance Evaluation of the Board of Directors

### Frequency and Methods of Providing Advice to the Members of the Board of Directors

In accordance with the mandate of the Company’s Articles of Association, the Board of Commissioners is tasked with supervising the management of the Company and providing advice to ensure that the Company’s management is carried out in a prudent and accountable manner and in compliance with the applicable regulations.

To optimize the implementation of these functions, the Board of Commissioners consistently holds meetings as a forum for supervision and the provision of advice.

Meetings of the Board of Commissioners consist of Board of Commissioners Meetings, which include Internal Meetings of the Board of Commissioners and meetings of the Board of Commissioners attended by the relevant Director in charge and/or Senior Executive Vice President (SEVP), as well as Joint Meetings of the Board of Directors and the Board of Commissioners, namely meetings of the Board of Commissioners together with the Board of Directors and SEVP. Through these forums, the Board of Commissioners discusses the Company's condition, the implementation of strategies and business plans, as well as other material issues that require joint attention and in-depth discussion. Every directive and recommendation resulting from these meetings is formally documented through letters from the Board of Commissioners to the Board of Directors as part of a structured check-and-balance mechanism.

Further examination of strategic issues is also carried out through meetings of the Committees under the Board of Commissioners in accordance with the respective scope of duties of each Committee. Working visits to business units and operational regions are also conducted to obtain direct insights into the implementation of strategies, the effectiveness of internal controls, and the quality of the Company's policy implementation in the field.

In exercising its authority, the Board of Commissioners provides opinions, responses, approvals, or decisions on proposals submitted by the Board of Directors, which are formalized in the form of approval letters or decision letters in accordance with the Company's Articles of Association and applicable laws and regulations.

Throughout 2025, the Board of Commissioners held 21 (twenty-one) joint meetings with the Board of Directors (Rakomdir) and 74 (seventy-four) Internal Meetings of the Board of Commissioners (Rakom). These meetings focused on deliberating the Company's strategic and critical matters, including requests for approval and the adoption of resolutions within the scope of the Board of Commissioners' authority.

Approvals granted throughout 2025 included, among others, the Company's Work Plan and Budget (RKAP) and strategic plans contained in the Bank Business Plan, corporate actions within the authority of the Board of Commissioners, provision of funds to related parties, the Sustainable Finance Action Plan, review and approval of the Risk Appetite Statement, Recovery Plan, and Resolution Plan, as well as other decisions falling under the authority of the Board of Commissioners in accordance with the Articles of Association and applicable regulations.

As part of the ongoing supervisory function, the Board of Commissioners periodically provides written responses to the Board of Directors regarding the Company's quarterly performance achievements, which include reviews of strategy implementation and recommendations for necessary improvements. Throughout 2025, the Board of Commissioners delivered written responses to quarterly performance through the following letters:

1. Letter No. R.11-KOM/02/2025 dated February 11, 2025 regarding the Response to the Fourth Quarter 2024 Performance of PT BRI (Persero) Tbk.
2. Letter No. R.49-KOM/04/2025 dated April 30, 2025 regarding the Response to the First Quarter 2025 Performance of PT BRI (Persero) Tbk.
3. Letter No. R.88-KOM/08/2025 dated August 5, 2025 regarding the Response to the Second Quarter 2025 Performance of PT BRI (Persero) Tbk.
4. Letter No. R.121-KOM/10/2025 dated October 29, 2025 regarding the Response to the Third Quarter 2025 Performance and the 2026 RKAP of BRI.

The Board of Commissioners continuously performs an active supervisory function over the Company's risk-based strategy at each process level (risk process-based oversight), in accordance with its duties and authority. Throughout 2025, the Board of Commissioners provided adequate advice, direction, and recommendations to Management based on the results of such oversight, including on the implementation of strategies, the execution of the Company's policies, and the granting of certain approvals in accordance with applicable regulations and its authority. The advice, directions, and recommendations provided include, among others:

### Supervision by the Board of Commissioners over the Formulation and Implementation of Strategy by the Board of Directors

The Board of Commissioners continuously performs active supervision over the Company's strategy using a risk-based approach at each process level (risk process-based oversight) in accordance with its duties and authorities. Throughout 2025, the Board of Commissioners provided advice, guidance, and recommendations to Management based on the outcomes of such oversight, including with respect to the implementation of the Company's strategies and policies, as well as granting certain approvals in accordance with applicable regulations and within the scope of its authority. The advice, guidance, and recommendations provided include, among others, the following:

## Supervision of Strategy Formulation

Throughout the 2025 financial year, the Board of Commissioners carried out active supervision over the process of formulating the Company's Work Plan and Business Plan, as well as other corporate strategic initiatives, among others by:

1. Conducting in-depth discussions on macroeconomic assumptions, credit growth projections, funding strategies, the IT Strategic Plan and Architecture, Governance and Security Systems of BRI applications, as well as Funding Transactions & Distribution strategies.
2. Providing strategic input related to strengthening the micro and MSME core business as BRI's competitive advantage, governance of BRI's People's Business Credit (KUR), and governance of Micro Business KPIs down to the Micro Loan Officer level.
3. Emphasizing the importance of balancing growth and asset quality through strengthened risk management and prudential banking principles.
4. Directing that the Company's strategy align with shareholder policies and support the national development agenda.

The Board of Commissioners ensures that the strategies established by the Board of Directors have undergone comprehensive, data-based assessments and have taken into account external conditions, including global financial market volatility and developments in banking sector regulations.

## Supervision of Strategy Implementation

In carrying out its oversight of strategy implementation, the Board of Commissioners provides strategic direction and recommendations to the Board of Directors to undertake measured and timely mitigation actions, including the following:

1. **Strategic Aspects**, including supervision over the formulation of strategies for each business segment within the Company, macroeconomic projections, human capital strategy and roadmap, IT strategic plan and enterprise architecture, transformation of the branch network, early fraud detection, strengthening risk management across business segments, governance and performance of e-channels, progress of the implementation of Internal Control over Financial Reporting (ICoFR), as well as the implementation progress of Environmental, Social and Governance (ESG) initiatives and green financing.
2. **Credit Aspects**, including follow-up on the management of Loan at Risk (LaR), review of high-risk debtors across each segment and product, supervision of the restructured debtor portfolio, and assessment of the quality and portfolio of earning assets. The Board of Commissioners also directed that the implementation of credit relaxation and restructuring policies be carried out

in accordance with OJK regulations and internal policies in a disciplined and targeted manner, while taking into account the business prospects of the debtors.

3. **Funding Aspects**, including supervision over BRI's condition and strategy in managing liquidity positions and securities positions.
4. **Policy Aspects**, including active supervision of Human Capital Policy, General Policy on Equity Participation, General Risk Management Policy, Policy on the Write-off of Non-Performing Loans to Micro, Small, and Medium Enterprises, as well as review of the Risk Appetite Statement (RAS), Recovery Plan, and Resolution Plan, to ensure that all policies remain relevant, prudent, and aligned with applicable regulations.
5. **Compliance, Anti-Fraud, and AML/CFT/PF Aspects**  
The Board of Commissioners places serious attention on strengthening compliance, anti-fraud measures, and the prevention of money laundering as key pillars in maintaining the integrity and reputation of the Company. In this regard, the Board of Commissioners actively supervises and provides direction to the Board of Directors to continuously strengthen customer identification systems, enhance the effectiveness of transaction monitoring, intensify coordination with relevant authorities, and consistently implement the Zero Fraud Program across all organizational levels to reinforce stakeholder trust in the Company's governance practices.
6. **Internal Audit and Internal Control Aspects**  
The Board of Commissioners recommends that the internal audit function continue to be optimized so that it not only detects potential irregularities at an early stage but also acts as a catalyst for strengthening corporate governance, internal controls, and the implementation of a strong risk culture.
7. **Financial Conglomeration Aspects**

In terms of financial conglomerate, the Board of Commissioners, as the supervisory organ of the Financial Conglomeration Holding Company, oversees the policies and management implemented by the Board of Directors, including oversight of the transformation of Financial Conglomeration Members in line with the strengthening of BRI's financial conglomerate governance framework, including the implementation of POJK 30/2024. The Board of Commissioners provides strategic direction to ensure that each Financial Conglomeration Member, particularly subsidiaries, consistently identifies and follows up on strategic issues within their respective entities, conducts evaluations and enhances the maturity of integrated governance with priority given to entities that still have maturity gaps, and optimizes integration and strategic alignment among Financial Conglomeration Members covering governance, risk management, internal control, and human capital aspects in order to strengthen the ecosystem and increase sustainable contributions to the performance of the BRI Group.

## Strengthening Corporate Governance and Risk Management

The Board of Commissioners ensures that all strategies implemented by the Board of Directors are based on the principles of Good Corporate Governance (GCG), supported by an adequate internal control system and an integrated risk management framework aligned with the scale, complexity, and risk profile of the Company. The Board of Commissioners' oversight focuses on compliance with regulatory requirements and supervisory authority provisions, strengthening risk culture across all levels of the organization, and maintaining transparency and accountability in every strategic decision-making process. Based on the results of its supervision throughout 2025, the Board of Commissioners assessed that the Board of Directors has managed the Company in a prudent, adaptive, and responsive manner in addressing the business environment, while maintaining a balance between achieving business growth targets and managing risks in a measured manner. The Board of Commissioners will continue to encourage the strengthening of governance and risk management as the foundation of the Company's sustainability in creating long-term value for all stakeholders.

Referring to Financial Services Authority Regulation (POJK) No. 5/POJK.03/2016 concerning the Bank Business Plan, the Board of Commissioners is required to supervise the implementation of the Bank Business Plan, which includes, among others, management policies and strategies. The results of such supervision are set out in the Report on the Supervision of the Implementation of the Bank Business Plan, which is submitted to the Financial Services Authority (OJK) every semester. During the reporting period, the Board of Commissioners has submitted the supervision reports as follows:

1. Report on the Supervision of the Board of Commissioners of PT BRI (Persero) Tbk for the Second Semester of 2024, No. R.22-KOM/02/2025, dated February 17, 2025.
2. Report on the Supervision of the Board of Commissioners of PT BRI (Persero) Tbk for the First Semester of 2025, No. R.87-KOM/08/2025, dated August 5, 2025.

In addition to the reporting described above, as mandated by the Regulation of the Minister of State-Owned Enterprises No. PER-2/MBU/03/2023 dated 3 March 2023 concerning Guidelines for Corporate Governance and Significant Corporate Actions of State-Owned Enterprises, the Board of Commissioners is required to prepare an annual report on the implementation of its supervisory and advisory functions to the Board of Directors. The Board of Commissioners has fulfilled this obligation through the submission of Letter No. R.31-KOM/02/2025 dated 28 February 2025 regarding the submission of the Board of Commissioners' supervisory report of PT Bank Rakyat Indonesia (Persero) Tbk for 2024.

## Economic Conditions Directly Affecting the Company's Performance

Throughout 2025, the global economy faced heightened uncertainty, marked by escalating geopolitical risks in the Middle East, tensions between the United States and Venezuela, and evolving import tariff policies that increased pressure on global supply chains and trade. Nevertheless, global economic performance demonstrated stronger resilience than initially expected, particularly supported by improvements in the second half of 2025. The International Monetary Fund (IMF) revised its global economic growth projection upward to 3.3% from the previous estimate of 2.8%, in line with persistent disinflation trends, monetary easing by several major central banks, and accelerated investment in the technology sector, particularly artificial intelligence.

Looking ahead, global economic growth in 2026 is expected to moderate amid persistent geopolitical risks and the potential fragmentation of global supply chains. However, the continued disinflation trend and a more accommodative monetary policy stance are expected to support global economic stability.

Indonesia's economy demonstrated solid resilience despite the challenging global landscape. Based on official data from Statistics Indonesia (BPS), Indonesia's GDP grew by 5.10% in 2025, up from 5.03% in 2024, with GDP at current prices reaching IDR23,821.1 trillion and GDP per capita at IDR83.7 million, equivalent to USD5,083.4. Growth was primarily supported by household consumption, which grew by 4.98%, and stronger investment, which increased to 5.09%, while exports of goods and services recorded the highest growth at 7.03% year-on-year.

Indonesia's inflation rate in 2025 was recorded at 2.92% year-on-year, remaining within Bank Indonesia's target range of 2.5±1%. This condition provided room for Bank Indonesia to reduce the BI Rate five times throughout 2025, with a cumulative reduction of 125 basis points from 6.00% to 4.75%, in order to support economic growth while maintaining exchange rate and financial system stability.

From a fiscal perspective, the Government's policy stance in 2025 functioned as a stabilizing buffer, focusing on maintaining public purchasing power and sustaining household consumption momentum amid declining income levels among certain segments of society. By the end of 2025, the Government strengthened support for the national economy through an additional fiscal stimulus of approximately IDR48 trillion, primarily delivered through social assistance programs, labor-intensive programs, and labor incentives.

Looking forward, Indonesia's economic growth in 2026 is projected to gradually strengthen and remain within the range of 5.1%–5.3%, in line with Bank Indonesia's projections, supported by continued global and domestic monetary easing and sustained expansionary fiscal support. With strong policy coordination and gradual improvements in domestic demand, Indonesia's economy is expected to remain on a positive and sustainable growth trajectory.

Amid global and domestic macroeconomic conditions characterized by uncertainty, Indonesia's banking industry demonstrated stable and resilient performance throughout 2025. The resilience of the banking industry was reflected in positive growth in assets, loans, and third-party funds, as well as well-maintained asset quality and capital adequacy.

From an asset perspective, the banking industry recorded total assets of IDR13,646.42 trillion as of December 2025, increasing by IDR1,185.46 trillion or 9.51% year-on-year. This growth was driven by continued strong loan expansion, with total industry loans reaching IDR8,693.97 trillion, increasing by IDR862.41 trillion or 11.01% year-on-year. This loan growth indicates that demand for financing in Indonesia remained strong despite ongoing global economic and geopolitical uncertainties.

On the funding side, third-party funds (DPK) in the banking industry recorded positive growth. As of December 2025, total industry DPK reached IDR10,057.54 trillion, increasing by IDR1,220.30 trillion or 13.81% year-on-year, primarily driven by a 12.79% year-on-year growth in current accounts.

The credit quality of the banking industry also showed improvement. The Non-Performing Loan (NPL) ratio as of December 2025 was recorded at 2.05%, relatively stable compared with the same period in the previous year and well below the regulatory threshold of 5%. The amount of loans restructured due to the COVID-19 pandemic continued to decline in line with the national economic recovery, reflecting structural improvements in portfolio quality.

However, the banking industry faced several challenges throughout 2025, particularly related to liquidity conditions. The Loan to Deposit Ratio (LDR) was recorded at 85.35% as of November 2025, declining by 3.32% compared with 88.57% in December 2024. This more accommodative liquidity condition was partly influenced by the Ministry of Finance regulation issued in September 2025 regarding the placement of excess budget balance funds (Saldo Anggaran Lebih/SAL) amounting to IDR200 trillion in Himbara banks.

In terms of profitability, liquidity conditions also put pressure on the Net Interest Margin (NIM), which declined slightly by 6 basis points but remained at a relatively strong level of 4.56% as of December 2025. The banking industry continued to record net profit of IDR262.18 trillion through December 2025, with the industry's Return on Assets (ROA) remaining stable at 2.51%.

The banking industry also maintained strong capital conditions as a buffer against various uncertainties. The Capital Adequacy Ratio (CAR) stood at 25.89% as of December 2025, declining by 80 basis points compared with the same period of the previous year. The capital level, which remains well above the regulatory minimum requirement, demonstrates that the Indonesian banking industry has a solid foundation to continue supporting sustainable national economic growth.

Within the framework of the Asta Cita agenda, the Government has formulated a series of strategic programs aimed at promoting sustainable and inclusive economic growth. As an agent of development, BRI actively supports these programs through the distribution of People's Business Credit (KUR), Ultra Micro Financing (UMi), social assistance programs, Housing Finance Liquidity Facility (FLPP), and various other government credit schemes to expand access to financing and strengthen the domestic economic foundation. The Board of Commissioners views these programs as an effective catalyst to strengthen the fundamentals of the national economy. Synergy between the Government's fiscal policies in supporting the business sector—including the MSME ecosystem—and Bank Indonesia's pro-growth monetary and macroprudential policies, supported by BRI's active role, will be able to drive national economic growth and strengthen the resilience of the banking industry.

## View on the Performance of the Board of Directors

As mandated by prevailing laws and regulations as well as the Company's Articles of Association, the Board of Commissioners consistently performs its supervisory and advisory functions toward the Board of Directors to ensure that the Company is managed in accordance with the principles of good corporate governance. The Board of Commissioners recognizes that the challenges faced throughout 2025 required prudent and measured responses. In this context, the Board of Commissioners actively maintained intensive communication and coordination with the Board of Directors to discuss various strategic and significant issues, including supervision of the implementation of the 2025 Bank Business Plan, the direction of the Company's development through the BRIVolution Reignite transformation, and the strengthening of internal control systems.

Despite various external challenges, the Company recorded solid performance throughout the 2025 financial year. BRI's total consolidated assets grew by 7.2% year-on-year to IDR2,135.4 trillion, driven by strong credit expansion. Loans and financing increased by 12.3% year-on-year to IDR1,521.5 trillion, surpassing the national banking industry's credit growth of 9.6%. This growth was largely contributed by the MSME segment, which continues to dominate the Company's loan portfolio, reaffirming BRI's consistency as an agent of

development in strengthening the people's economy. The Company also consistently served as the primary distributor of People's Business Credit (KUR), with total disbursement reaching IDR178.1 trillion to 3.8 million debtors throughout 2025.

Asset and loan growth were supported by a stronger and healthier funding structure. Third-party funds (DPK) grew by 7.4% year-on-year to IDR1,466.8 trillion, with the CASA ratio increasing to 70.61% from 67.30% in the previous year, reflecting the success of the Transform the Funding Franchise strategy in strengthening the low-cost funding base through optimization of digital channels and deeper integration of transaction ecosystems. BRImo users reached 45.9 million (+18.9% year-on-year) with transaction value totaling IDR7,076.9 trillion (+26.4% year-on-year), while the AgenBRILink network reached more than 1.19 million agents with transaction volume reaching IDR1,746.2 trillion, further strengthening service outreach across the country.

Asset quality remained a primary focus. The consolidated NPL ratio was maintained at 3.07% at the end of 2025, while the Loan at Risk (LaR) ratio improved significantly from 10.70% to 9.61%. Provisions were maintained at adequate levels, with LAR Coverage at 56.81% and NPL Coverage at 178.06%, demonstrating the Company's readiness to anticipate potential risks. The Special Mention Loan (SML) ratio also improved to 3.84% from 4.82% in the previous year, supported by strengthened early warning systems, strengthened data-driven monitoring, as well as disciplined restructuring and recovery measures.

In terms of income, consolidated Net Interest Income (NII) reached IDR150.5 trillion, increasing by 5.5% year-on-year, with the consolidated Net Interest Margin (NIM) maintained at 7.81%. Improvements in the cost of funds through CASA growth were able to offset yield pressures, thereby maintaining profitability. Pre-Provision Operating Profit (PPOP) grew by 2.6% year-on-year to IDR119.4 trillion, reflecting strong core income capacity. The efficiency ratio (Cost to Income Ratio/CIR) was recorded at 42.55%, remaining within the Company's guidance corridor.

The performance of BRI Group's Subsidiaries also contributed increasingly significantly. Total assets of Subsidiaries grew by 23.3% year-on-year to IDR267.0 trillion, while net profit increased by 16.1% year-on-year to IDR10.4 trillion, contributing 18.2% to total consolidated profit. Synergies among entities within the BRI Group continue to be strengthened through an integrated ecosystem approach, including the development of Second Engines of Growth in the Consumer and CSME segments, as well as Bullion services through Pegadaian.

The Company's capital position remained strong with a Capital Adequacy Ratio (CAR) of 23.52%, providing sufficient room to support sustainable expansion of productive lending.

Overall, BRI Group recorded consolidated net profit of IDR57.13 trillion, supported by comprehensive improvements in fundamental performance.

The Board of Commissioners appreciates the success of the Board of Directors in maintaining profitability and executing the BRIVolution Reignite transformation strategy with discipline amid the highly challenging conditions throughout 2025. The Board of Commissioners recognizes that this positive financial performance is inseparable from continuous collaboration and transformation across various aspects, including human capital, business, operations, technology, as well as the strengthening of Environmental, Social, and Governance (ESG) practices.

Based on the results of its supervision throughout 2025, the Board of Commissioners assessed that the Board of Directors has formulated strategies that are realistic and based on the Company's competitive advantages, implemented these strategies in a disciplined manner while maintaining quality growth, and managed risks adequately.

Going forward, the Board of Commissioners will continue to strengthen its active strategic oversight, particularly in ensuring the acceleration of digital transformation, strengthening the ultra-micro ecosystem, and integrating sustainability aspects into the Company's business model. The Board of Commissioners advises the Board of Directors to continue advancing BRI's transformation journey by maintaining effective communication and collaboration across all levels of the organization, including with regulators and relevant stakeholders, thereby not only achieving sustainable growth but also creating long-term value for all stakeholders.

## View on the Business Prospects Prepared by the Board of Directors

The dynamics and challenges of the global and domestic economy—marked by geopolitical uncertainty, trade tariff policies, pressures on public purchasing power, accelerated digital transformation, and climate change issues—are projected to continue in the coming years. In response to these challenges and as part of the Company's efforts to create healthy, competitive, and sustainable growth, BRI launched the BRIVolution Reignite transformation program in 2025. This transformation is built upon two main pillars: Transform the Funding Franchise to strengthen a more efficient funding structure based on low-cost funds, and Revamp Existing Core and Build New Core to strengthen the core business while developing new growth engines in the consumer, commercial, and bullion services segments. These pillars are supported by the development of world-class foundations, which include strengthening human capital, risk management, technology and digital capabilities, distribution, operations, and corporate rebranding.

The Board of Commissioners views that the business prospects prepared by the Board of Directors for the upcoming period have adequately taken into account macroeconomic dynamics, the direction of regulatory policies, as well as potential global and domestic risks. The relatively stable outlook for national economic growth supported by the industrial downstream agenda, strengthening of MSMEs, infrastructure development, and digital transformation—provides opportunities for the Company to continue expanding productive financing. Nevertheless, potential global and domestic risks, changes in global interest rates, exchange rate pressures, and the risk of global economic slowdown remain factors that must be carefully anticipated.

As part of the overall supervisory process, the Board of Commissioners has approved the Bank Business Plan (RBB) for 2026–2028. The business prospects prepared by the Board of Directors are considered sufficiently relevant in aligning external trends and global and domestic macroeconomic assumptions with the Company's capabilities and strategic positioning. The strategic plan has been formulated with destination statements for each phase that are aligned as part of the BRIVolution Reignite transformation journey, in line with the Company's vision to Deliver Sustainable Values and Integrated Solutions to Achieve Indonesia's Aspiration. The Company has also established measurable guidance for 2026, including loan growth of 7%–9%, Net Interest Margin (NIM) in the range of 7.4%–7.8%, credit cost of 2.9%–3.2%, and a Cost-to-Income Ratio (CIR) of 41%–43%, reflecting the commitment to maintaining a balance between growth and quality.

The Board of Commissioners also emphasizes the importance of maintaining a balance between accelerated growth and portfolio quality, while ensuring that business expansion remains within the Company's risk appetite and capital capacity. Strengthening risk culture, governance discipline, and readiness to face various stress test scenarios must continue to form an integral part of the Company's strategy implementation going forward.

The Board of Commissioners consistently advises the Board of Directors to implement the transformation in a holistic manner—not only in business and funding aspects but also in the comprehensive alignment of strategy and organizational structure—supported by strengthened risk management and the enhancement of risk culture embedded across all levels of employees. By taking into account the driving factors as well as the challenges encountered in the implementation of previous transformation initiatives as valuable lessons, the Board of Commissioners believes that the Board of Directors will be able to execute the strategy effectively and competitively. The Board of Commissioners has approved the Bank Business Plan for 2026–2028 as well as the Company's Work Plan and Budget for 2026 as prepared by the Board of Directors.

## View on the Implementation of Bank Governance

BRI remains committed to consistently implementing corporate governance across all levels of the organization in accordance with applicable regulations and best practices in corporate governance implementation within the financial industry, thereby supporting sustainable performance and protecting the interests of all stakeholders. In carrying out its supervisory function, the Board of Commissioners seeks to ensure that the management conducted by the Board of Directors complies with prevailing laws and regulations and provides the necessary advice on every strategic action in order to achieve the Company's objectives.

The Board of Commissioners assessed that throughout 2025, the Company consistently and sustainably implemented the principles of Corporate Governance. The application of the principles of transparency, accountability, responsibility, independence, and fairness was clearly reflected in strategic decision-making processes, financial reporting, risk management, and relationships with stakeholders. The check-and-balance mechanism between the Board of Commissioners and the Board of Directors operated effectively through meeting forums, the submission of written recommendations, and approval processes within the respective authorities, all of which were formally documented as part of supervisory accountability.

Internal control functions, internal audit, external audit, and the compliance function demonstrated increasingly strong and integrated roles throughout 2025, including within the context of the BRI Group financial conglomeration. The implementation of Internal Control over Financial Reporting (ICoFR) continued to be strengthened to maintain the integrity and accuracy of financial reporting. The enhancement of the Whistleblowing System, which is now managed by an independent party, further reinforces the violation reporting mechanism by ensuring confidentiality, anonymity, and protection for whistleblowers. Follow-up on audit findings was carried out in a disciplined manner and monitored through digital dashboards as well as effective communication with responsible parties for implementing the recommendations. In the area of integrated risk management, the Company has prepared and updated the Risk Appetite Statement, Recovery Plan, and Resolution Plan in accordance with regulatory provisions.

BRI continuously enhances governance practices through policy updates, improvements in management processes, and the optimization of outcomes that contribute to increasing the Company's value in the eyes of stakeholders. Oversight of governance implementation is reflected through inputs provided on policies and processes, including anti-bribery management systems, the management of the Whistleblowing System, and the effectiveness of

the compliance culture. The Company's commitment to achieving zero data breach for five consecutive years also reflects the strength of its cybersecurity governance, which remains a key priority in the digital era.

The Board of Commissioners observes that governance and compliance culture has become increasingly embedded across all levels of the organization. Nevertheless, strengthening risk awareness, ensuring consistent implementation of policies across all business units, and enhancing the quality of documentation and monitoring remain areas requiring continuous attention to ensure governance standards that are increasingly robust and adaptive to changes in the business environment.

As part of its efforts to evaluate and assess Corporate Governance internally, BRI refers to Financial Services Authority Regulation (POJK) No. 17 of 2023 concerning the Implementation of Governance for Commercial Banks, SEOJK No. 13/SEOJK.03/2017, and other applicable regulations. Internal evaluation and assessment are conducted through a self-assessment process every semester. The results of the self-assessment form part of the bank soundness assessment submitted to the regulator. The Company's implementation of governance is based on the five fundamental principles of Corporate Governance and is carried out through periodic assessments of 11 (eleven) Corporate Governance factors as stipulated by the regulator. This assessment is not limited to the parent company but is also conducted together with Subsidiaries within the context of the BRI Group financial conglomerate, reflecting the comprehensive implementation of Corporate Governance across the aspects of governance structure, governance process, and governance outcome.

In 2025, the Company's Corporate Governance was also assessed by external parties, further reinforcing BRI's position as one of the companies with the highest governance standards in the region, with the following results:

1. ASEAN Corporate Governance Scorecard (ACGS) — BRI received the Top 3 Public Listed Company in Indonesia and ASEAN Asset Class recognition in the ACGS ranking organized by the ASEAN Capital Market Forum (ACMF), reflecting the Company's consistency in meeting the highest governance standards in the ASEAN region.
2. Corporate Governance Perception Index (CGPI) — BRI once again participated in the CGPI assessment organized by The Indonesian Institute for Corporate Governance (IICG) and received the Most Trusted Companies title with an index score of 95.31, reaffirming the high level of trust in the Company's governance practices.
3. S&P Global Corporate Sustainability Assessment (CSA) — BRI achieved a score of 74 in the 2025 S&P Global CSA and became a member of the Sustainability Yearbook for four consecutive years (2023–2026). In addition, BRI

received an ESG Low Risk rating from Sustainalytics and an "A" rating from MSCI, reflecting the Company's ongoing commitment to Environmental, Social, and Governance (ESG) principles.

These recognitions serve as clear evidence that the implementation of Corporate Governance within the Company has been effective and continues to improve year by year, thereby strengthening the confidence of shareholders, investors, regulators, and all stakeholders in the integrity and quality of BRI's governance practices.

The implementation of Corporate Governance within the Company has been well established, as reflected in the following components.

### Implementation of the Compliance Function

The implementation of BRI's Compliance Function refers to Financial Services Authority Regulation (POJK) No. 46/POJK.03/2017 concerning the Implementation of the Compliance Function for Commercial Banks, as well as POJK No. 17 of 2023 concerning the Implementation of Governance for Commercial Banks. The Board of Directors is committed to ensuring compliance with all applicable laws and regulations. As part of this commitment, the Compliance Function Work Unit consistently plays a role in identifying potential compliance risks and providing recommendations to ensure that all policies, procedures, and business activities of the Company comply with regulatory requirements, both at the strategic and operational levels. The Board of Commissioners ensures that regular reporting on the implementation of the compliance function is carried out transparently, so that policy decisions are consistently based on prudential principles and in line with regulatory provisions.

The Board of Commissioners together with the Board of Directors continues to encourage the optimal implementation of the compliance function across all levels of the organization with continuously improving quality. In this regard, the Board of Commissioners consistently provides advice to the Board of Directors and all employees to strengthen the compliance culture, adhere to Standard Operating Procedures (SOP) and operational technical guidelines, and conduct ongoing monitoring and supervision. The Board of Commissioners also emphasizes that the Board of Directors should promptly fulfill commitments and follow up on audit findings issued by external parties or regulators. In addition, the Board of Commissioners ensures that the implementation of Anti-Money Laundering (AML), Counter-Terrorism Financing (CTF), and Counter-Proliferation Financing of Weapons of Mass Destruction (CPF) policies remains a top priority in supporting sound and responsible banking services in accordance with regulatory standards.

Considering the increasingly dynamic changes in external regulations and the growing complexity of the Company's business scope, the Board of Commissioners directs that every new regulation issued by the regulator be subject to impact analysis and periodic evaluation of its implementation. This is particularly important for regulations related to BRI's governance as a financial conglomerate, where the quality of implementation must be monitored holistically both at BRI as the parent company and across all related Subsidiaries.

The Board of Commissioners also observed that the trend of fraud within the Company continues to increase despite various preventive and enforcement measures that have been undertaken, including the involvement of law enforcement authorities. In this regard, the Board of Commissioners has directed the Board of Directors, through the Compliance and Human Capital functions, to strengthen compliance policies and monitoring comprehensively, build a stronger risk culture across all levels of the organization, and accelerate and enhance the effectiveness of service level agreements (SLA) and follow-up procedures for case handling to ensure the creation of a tangible deterrent effect for all parties.

The Company's compliance risk profile in 2025 was rated at level 2 (Low to Moderate). The Board of Commissioners assessed that the implementation of the Company's compliance function has generally been effective. Nevertheless, the Board of Commissioners continues to encourage greater awareness of compliance culture across all levels of the organization, particularly in the areas of reporting compliance and fraud control. Such strengthening includes proactive preventive measures (ex-ante) to minimize potential violations, as well as curative actions (ex-post) as measurable and accountable corrective efforts, in order to maintain the trust of all stakeholders in the integrity and reliability of the Company's operations.

## Anti-Fraud Strategy

BRI has established an Anti-Fraud Strategy policy aligned with OJK Regulation No. 12 of 2024 concerning the Implementation of Anti-Fraud Strategies for Financial Services Institutions, which has been translated into the Company's internal policies. The policy reflects management's commitment to controlling fraud through a comprehensive internal control system and demonstrates the serious attention of both the Board of Commissioners and the Board of Directors by implementing a zero-tolerance principle toward any form of fraud, whether originating from internal or external parties.

Throughout 2025, the Board of Commissioners actively provided recommendations to strengthen controls related to fraud incidents in order to reduce potential losses and reinforce ongoing preventive measures. Management has continuously improved the implementation of the Anti-Fraud Strategy

across its four pillars: prevention, detection, investigation and enforcement, as well as monitoring and evaluation.

Under the Prevention Pillar, the Company implemented the signing of integrity pacts starting from the Board of Commissioners and Board of Directors through to all employees, conducted employee awareness and customer awareness programs through education and socialization initiatives, identified potential vulnerabilities through control weakness analysis, and strengthened the Know Your Employee (KYE) program to detect employees with high-risk potential based on specific parameters.

Under the Detection Pillar, the Company receives and follows up on complaints through the Whistleblowing System (WBS), which is currently managed by an independent party, conducts surprise inspections, and enhances the supervisory dashboard and Fraud Detection System (FDS) through the addition of critical indicators.

Under the Investigation, Reporting, and Enforcement Pillar, the Company conducts investigations and reports fraud incidents to the Regulator in accordance with applicable regulations, carries out recovery processes, and imposes sanctions on fraud perpetrators.

Under the Monitoring, Evaluation, and Follow-Up Pillar, the Company organizes the Risk Management Forum (FMR) to discuss the handling of both internal and external fraud cases, implements fraud recovery programs, and cooperates with law enforcement authorities in addressing fraud perpetrators.

The Board of Commissioners has monitored and evaluated the Anti-Fraud Strategy on a semi-annual basis, including providing input to the Board of Directors regarding the strengthening of strategies across all pillars, as well as monitoring corrective actions and recovery efforts related to fraud incidents. Based on the results of this oversight, the Board of Commissioners provided several strategic directives to the Board of Directors.

First, considering that the largest internal fraud modus remains related to invalid documentation in the credit approval process, the Board of Commissioners directed management to strengthen controls in the first line of defense, improve document verification and validation processes, and reinforce a culture of compliance and accountability among all personnel involved in the credit process.

Second, the Board of Commissioners emphasized that although a zero-tolerance policy has been established, the effectiveness of sanction enforcement must continue to be evaluated so that execution can be faster, firmer, and capable of creating a tangible deterrent effect. Sanctions must clearly reflect the Company's commitment to the

zero-tolerance principle, thereby fostering an organizational culture that upholds integrity.

Third, the Board of Commissioners recommended strengthening the roles of the second line and third line of defense within credit operations, particularly during the stage after approval but before disbursement, to ensure stricter verification and validation of credit documentation. In implementing this recommendation, the Board of Commissioners also emphasized the need to consider the geographical characteristics of BRI's operational units, especially those located in remote areas, to ensure effective controls across the entire operational network.

The Board of Commissioners considers that efforts to address fraud cannot stand alone but must be integrated with the strengthening of the Anti-Money Laundering (AML), Counter-Terrorism Financing (CTF), and Counter-Proliferation Financing of Weapons of Mass Destruction (CPF) frameworks, as well as legal governance and the overall compliance function. This integrated approach is necessary to ensure that all lines of defense within the Company operate synergistically in safeguarding operational integrity and maintaining the trust of all stakeholders.

The Board of Commissioners continuously urges the Board of Directors and all BRILiaN personnel to remain vigilant toward evolving fraud schemes, safeguard the Company's reputation, and uphold the trust of the public and shareholders as the most valuable assets for the Company's long-term sustainability.

## Gratification Control

BRI remains committed to managing gratification control through the implementation of its Anti-Bribery and Gratification Control Policy. This policy serves as a guideline for all BRI personnel to prevent gratification and bribery practices that could harm the Company and contradict the principles of Good Corporate Governance (GCG). This commitment is realized by establishing a conducive control environment in accordance with the Board of Directors' Circular Letter on Anti-Bribery and Gratification Control at BRI.

The Company has established the BRI Gratification Control Unit, which develops work programs, provides information services, and facilitates gratification reporting. Additionally, BRI continuously enhances anti-fraud detection using big data analytics to improve the effectiveness of monitoring and prevention of activities that do not align with corporate governance principles. Throughout 2025, the Company has implemented various gratification control programs, including:

1. Gratuity Control Commitment - The Board of Commissioners, the Board of Directors, and all employees signed BRI's anti-gratuity commitment through the code of ethics declaration and the signing of integrity pacts.

2. Reinforcement of Regulations - In order to strengthen the implementation of Corporate Governance principles and prevent corruption within BRI, the Board of Commissioners, the Board of Directors, and all BRI employees across Indonesia are required to comply with the Company's gratuity-related policies. These include the prohibition of giving gratuities, the prohibition and obligation to refuse gratuities, as well as the obligation to report any gratuity-related violations through the Whistleblowing System (WBS).
3. Education and Socialization Programs - As part of internalization efforts to enhance understanding of the Anti-Bribery and Gratuity Control Policy, the Gratuity Control Unit, in collaboration with BRI Corporate University, conducted an e-learning socialization program through the BRISmart application on Anti-Bribery and Gratuity Control, targeted at all BRI employees.
4. Reporting of Gratuity Acceptance or Rejection - During 2025, the Gratuity Control Unit received 12 gratuity reports, which were subsequently processed in accordance with applicable regulations. This included forwarding reports to the Corruption Eradication Commission (KPK) as mandatory gratuity reports, as well as categorizing other reports that fall under non-mandatory reporting categories.

The Board of Commissioners views that the implementation of gratuity control within the Company has been carried out effectively. The Board of Commissioners also emphasizes that internal gratuity control must continue to receive ongoing attention to ensure that BRI's business processes are conducted in accordance with applicable business ethics and to uphold the value of integrity.

## Whistleblowing System

As part of its commitment to the implementation of Good Corporate Governance and the strengthening of the detection pillar of the Anti-Fraud Strategy, the Company provides a violation reporting channel through the Whistleblowing System (WBS). This mechanism is designed as a strategic instrument to identify potential fraud and violations at an early stage, mitigate reputational risks, and promote an organizational culture that upholds integrity and accountability.

In 2025, the Company implemented significant enhancements to the governance of the WBS by transferring the management of the system to an independent third party. This step was taken to strengthen the protection of whistleblowers' confidentiality, ensure impartial handling of complaints, and increase stakeholder trust in the credibility and effectiveness of the reporting mechanism. The WBS reporting channels are accessible through various media, providing convenience and flexibility for both internal and external reporters of the Company.

The Board of Commissioners regularly monitors and evaluates the effectiveness of the WBS implementation. In carrying out this function, the Board of Commissioners is supported by the Audit Committee, the Internal Audit Work Unit (SKAI), and other related units in conducting the evaluation, analysis, and follow-up of all complaints received. Each report is handled in accordance with the principles of transparency, objectivity, and full protection for whistleblowers, including safeguards against retaliation from reported parties.

The Board of Commissioners assesses that the management of the Whistleblowing System (WBS) throughout 2025 has shown notable progress, particularly in terms of management independence and the quality of complaint handling. All reports received during 2025 have been followed up in accordance with the applicable procedures, and the outcomes have been reported periodically to the Board of Commissioners through the Audit Committee. The integration of the WBS with the Corruption Eradication Commission (KPK) has been maintained as a reflection of the Company's joint commitment to combating corruption. The Board of Commissioners has also directed the Board of Directors to continue expanding the socialization and education of the WBS to all BRILiaN personnel as well as external stakeholders, so that this reporting mechanism becomes more widely recognized, trusted, and embedded as an integral part of efforts to foster a clean, professional, and high-integrity working environment.

## Risk Management Implementation

Amid increasing global and domestic economic uncertainty that may give rise to various risks, the Board of Commissioners consistently enhances the intensity of its oversight over the effectiveness of risk management implementation to ensure the realization of sound and sustainable business growth.

The Company has established an integrated Governance, Risk Management & Compliance (GRC) framework to control risks and ensure compliance across all business pillars and supporting functions, so that the achievement of performance targets goes hand in hand with operational excellence. The Company's risk management framework is based on four main pillars: active supervision by the Board of Directors and the Board of Commissioners; adequacy of policies, procedures, and risk limit determination; adequacy of risk identification, measurement, monitoring, and control processes supported by adequate information systems; and a comprehensive internal control system.

In performing its active oversight function, the Board of Commissioners is assisted by the Risk Management Oversight Committee to ensure that the Company's risk management practices meet the adequacy requirements of risk management procedures and methodologies. Oversight

is conducted through meetings with the Director in charge of Risk Management as well as other relevant Directors depending on the discussion topics, and through direct discussions with the Risk Management Work Unit in reviewing reports submitted by the Board of Directors. Throughout 2025, the Board of Commissioners reviewed and approved, among others, the Risk Management Policy, Risk Appetite Statement, Recovery Plan, Resolution Plan, Loan Portfolio Guideline, Quarterly Risk Profile, AML-CTF-CPF framework, Bank Soundness Level, and the Anti-Fraud Strategy.

As the Holding Company of the BRI Financial Conglomeration, the implementation of Integrated Risk Management constitutes a crucial aspect in identifying and managing risk exposures arising from conglomeration activities in a comprehensive manner. At the supervisory level, the Board of Commissioners is assisted by the Integrated Governance Committee with an approach that encompasses capital management and risk management across both operational and business domains throughout BRI's organizational structure and the members of the Financial Conglomeration. The Company has established the BRI Financial Conglomeration Integrated Governance Guidelines as a form of compliance with prevailing regulations, including the implementation of POJK 30/2024, the application of which continues to be refined in line with the increasing number of Subsidiaries within the conglomeration structure.

The Board of Commissioners assesses that the implementation of the Company's risk management system throughout 2025 has been carried out effectively and in a proactive manner. This is reflected in the maintenance of the Composite Risk Profile Rating at the Low to Moderate level and the Bank Soundness Rating at the Healthy level based on the results of the self-assessment of key banking risks as of the fourth quarter of 2025. This achievement indicates that the Company has been able to effectively maintain a balance between business growth and risk control. The Board of Commissioners advises the Board of Directors to consistently maintain the risk profile rating and bank soundness level at an optimal level, not only at BRI as the parent entity but also across all entities within the BRI Group, as a foundation for sustainable value creation for all stakeholders.

## Internal Control System

All BRI management and employees share responsibility for ensuring the implementation and continuous enhancement of a reliable and effective internal control system. Oversight of the implementation of the internal control system is carried out by the Board of Commissioners through periodic meetings with the Board of Directors and Executive Officers to review the effectiveness of the internal control system and to provide direction for strengthening controls across all Company activities.

The Internal Audit Work Unit (SKAI) periodically reports audit findings from both internal and external auditors, including the status of follow-up actions. On a regular basis, SKAI also conducts Internal Control Assessments to ensure that the internal control system—covering the five main components based on The Committee of Sponsoring Organizations of the Treadway Commission (COSO) Internal Control–Integrated Framework—has been effectively implemented. These components include the Control Environment, Risk Identification and Assessment, Control Activities and Segregation of Duties, as well as Accounting, Information, and Communication Systems.

The Board of Commissioners plays an active role in overseeing and fostering a strong control culture within BRI. In carrying out this responsibility, the Board of Commissioners is supported by the Audit Committee to ensure that risk management remains within the established risk appetite, supported by governance processes and systems that are implemented effectively and adequately. Through the Audit Committee, regular monitoring is conducted on the effectiveness of the internal control system as well as the follow-up actions and improvements on issues that may reduce control effectiveness.

Based on the reviews conducted throughout 2025, including the evaluation of the Summary of Internal Audit Findings (SKAI), the Board of Commissioners concluded that the Company's internal control system has been implemented in accordance with prevailing control principles and has generally functioned effectively. Nevertheless, the Board of Commissioners identified several areas that require further strengthening and has provided the following directives to the Board of Directors:

First, enhancing the effectiveness of surprise audits conducted by SKAI through increasing the frequency and expanding the scope of examinations. These audits should not be limited to cash-related aspects but should also cover credit processes, compliance with business procedures, and system controls that may pose operational risks. This enhancement should also be supported by adequate auditor manpower in terms of both quantity and competence.

Second, strengthening coordination between SKAI and relevant work units to ensure that all internal audit findings are followed up comprehensively and in a timely manner in accordance with the agreed corrective action plans.

Third, consistently implementing the Zero Fraud Program through the development of a strong integrity culture, improving the effectiveness of internal control systems, and enforcing a zero-tolerance policy toward any form of fraud across all levels of the organization. SKAI is expected to enhance the effectiveness of risk-based auditing, particularly in areas with a high risk of fraud.

Fourth, optimizing the overall audit function so that it not only detects potential irregularities at an early stage but also acts as a catalyst for strengthening corporate governance, internal control, and the implementation of a sound risk culture through constructive audit recommendations.

Fifth, strengthening the early warning system mechanism in risk management, including monitoring key debtors not only based on internal performance evaluations but also supported by comparative analysis of industry conditions and trends. This approach is intended to enable sharper risk identification and earlier detection of potential risks.

In line with business developments, the Company continues to strengthen its internal control system through the implementation of the Internal Control over Financial Reporting (ICoFR) roadmap in accordance with the established transformation journey. This implementation aims to ensure the reliability of consolidated financial statements, improve the efficiency and effectiveness of business processes through stronger internal controls, maximize data and information accuracy, strengthen the adequacy of existing policies, and foster a risk-aware culture. ICoFR is also designed to provide reasonable assurance as an early warning system, enabling all lines of defense to function synergistically in implementing combined assurance, thereby enhancing value creation for stakeholders.

The Board of Commissioners urges Management to remain committed to strengthening the internal control system and ensuring that the implementation of ICoFR is carried out consistently not only at the parent company level but also across all subsidiaries, in order to support stronger integrated governance across all entities within the BRI Group.

## Corporate Social Responsibility and ESG

BRI has developed a sustainability strategy with the aspiration to become a Catalyst for Sustainable Growth, focusing on three main pillars: Sustainable Growth, Social Impact, and Responsible Leadership. The Company's commitment to sustainable business practices is reflected through various strategic programs and initiatives implemented throughout 2025, which are not only oriented toward economic value creation but also toward generating positive impacts for society and the environment.

In driving long-term value creation through sustainable governance practices, BRI conducts the identification of material issues using the Double Materiality Analysis (DMA) method. This approach evaluates issues that are most relevant and have significant impacts on both the Company's financial performance (financial materiality) and its social and environmental impacts (impact materiality), with the involvement of key stakeholders. Throughout 2025, the Company obtained input from a wide range of stakeholders,

including management and employees, investors, customers, the Government, suppliers, non-governmental organizations, and other relevant parties. Disclosures related to materiality are presented by adopting the IFRS S1 and IFRS S2 reporting frameworks in the Company's 2025 Sustainability Report.

BRI continues to strengthen the integration of Environmental, Social, and Governance (ESG) aspects into the Company's strategy and business activities to ensure sustainable growth. This commitment is reflected through enhanced management of environmental and social risks within business processes, the implementation of decarbonization strategies through emissions management and climate risk analysis, as well as the development of a financing portfolio for Environmentally Sustainable Business Activities (KUBL) that supports more environmentally friendly economic activities. The Company views these initiatives as an important part of maintaining business resilience amid the dynamics of the transition toward a low-carbon economy.

At the same time, BRI continues to expand its contribution to improving public welfare through strengthening financial inclusion and enhancing financial literacy. Various initiatives have been implemented to expand access to financial services, particularly for MSMEs and communities across Indonesia, including those in 3T regions (Disadvantaged, Frontier, and Outermost Regions), while also encouraging healthier financial management practices among customers. These efforts are accompanied by strengthened customer protection measures through the implementation of transparency principles, data security safeguards, and effective complaint-handling mechanisms, ensuring that the banking services provided are not only inclusive but also responsible and oriented toward the best interests of customers.

All of these initiatives are supported by the strengthening of the Company's governance framework, the implementation of business ethics, and human capital management that focuses on the development of employee competence, integrity, and well-being. BRI believes that a strong governance foundation is key to maintaining stakeholder trust and ensuring the long-term sustainability of the Company.

As a structured manifestation of the Company's commitment to social and environmental responsibility, BRI implements the BRI Peduli program, which aims to become a driver of shared value creation that empowers communities, stimulates economic activity, and restores the environment. The program is implemented through four main initiatives: BRI Peduli Flagship Program, Work Unit Initiatives, Disaster Emergency Response, and Stakeholder Programs. These initiatives cover the economic dimension through MSME empowerment and financial literacy programs extending to 3T regions; the environmental dimension through programs such as Jaga Sungai Jaga Kehidupan, Grow & Green, and

various green initiatives that support the achievement of Net Zero Emissions targets; and the social dimension through the AURA program, which empowers women entrepreneurs.

In supporting the Company's consistency in implementing the Sustainable Finance Roadmap, the Board of Commissioners actively conducts oversight through meetings with the Board of Directors as well as field visits. This includes providing approval for the Sustainable Finance Action Plan (RAKB) for the short-term period of 2026 and the long-term period of 2026–2030, to ensure that the implementation of the programs is carried out consistently and that a sustainability culture has been adopted across BRI's work units. The Board of Commissioners appreciates the Company's consistency in integrating sustainability principles into its core business strategy, including the implementation of the BRI Peduli program, and has directed that these initiatives continue to be strengthened so that they deliver measurable and sustainable impacts for society, while further reinforcing BRI's position as a responsible financial institution in the eyes of all stakeholders.

## Performance Assessment of Committees Under the Board of Commissioners

To support the active role of the Board of Commissioners in carrying out its duties and responsibilities, the Board of Commissioners has established four committees, namely:

### 1. Audit Committee

The Audit Committee reports to the Board of Commissioners and provides independent opinions on matters requiring the attention of the Board of Commissioners in accordance with the principles of Corporate Governance and applicable laws and regulations. The Audit Committee's oversight activities include evaluating and ensuring the effectiveness of the internal control system, including the implementation of both internal and external audits and their follow-up actions, assessing the effectiveness of the independent auditor, monitoring compliance with regulations within the Company, ensuring the effectiveness of the Whistleblowing System (WBS) as a transparent reporting channel, monitoring and providing input on the design and preparation of the Internal Control over Financial Reporting (ICoFR) implementation process as well as the implementation of integrated internal controls, and performing other duties as detailed in each section relating to the Board of Commissioners' committees.

The Board of Commissioners believes that the Audit Committee performed its duties and responsibilities effectively throughout 2025, having held 28 (twenty-eight) meetings during the year.

## 2. Nomination and Remuneration Committee

The Nomination and Remuneration Committee reports to the Board of Commissioners and supports the effective execution of the Board of Commissioners' duties and responsibilities relating to the nomination and remuneration of members of the Board of Directors and the Board of Commissioners, in accordance with applicable laws and regulations and the principles of Corporate Governance. The appointment and dismissal of members of the Nomination and Remuneration Committee are carried out by the Board of Commissioners.

To support the effectiveness of the Board of Commissioners' oversight function, the Nomination and Remuneration Committee carries out, among others, the following activities: providing constructive advice and recommendations on the nomination system and procedures for the Company's management and the selection of management talent within BRI and its Subsidiaries; providing input on the results of strategic human capital policy reviews; evaluating the talent pool list; providing recommendations on proposals for the appointment of Subsidiary management in accordance with its authority; formulating the structure, policies, and remuneration levels for members of the Board of Directors and the Board of Commissioners; as well as performing other duties as detailed in each section of the Board of Commissioners' Committees.

The Board of Commissioners is of the view that the Nomination and Remuneration Committee has carried out its duties and responsibilities effectively throughout 2025, having held 21 (twenty-one) meetings during the year.

## 3. Risk Management Oversight Committee

The Risk Management Oversight Committee reports to the Board of Commissioners and assists in evaluating and ensuring that the implementation of risk management within the Company meets the adequacy requirements of risk management procedures and methodologies. The monitoring activities carried out by the Committee include evaluating and analyzing the Company's quarterly risk profile reports, monitoring the semi-annual Bank Soundness Level, providing recommendations or opinions on credit proposals above certain thresholds that require consultation with the Board of Commissioners, conducting analyses and providing recommendations on key issues within BRI, as well as performing other duties as detailed in each section relating to the Board of Commissioners' committees.

The Board of Commissioners considers that the Risk Management Oversight Committee has performed its duties and responsibilities effectively throughout 2025, having held 24 (twenty-four) meetings during the year.

## 4. Integrated Governance Committee

The Integrated Governance Committee reports to the Board of Commissioners and carries out oversight responsibilities related to the implementation of comprehensive and effective governance that applies the principles of transparency, accountability, responsibility, independence (or professionalism), and fairness in an integrated manner across the Financial Conglomeration.

The monitoring activities conducted by the Integrated Governance Committee include overseeing the continuous improvement of policies, procedures, and practices at all levels of the Company to ensure the effectiveness of internal controls, compliance functions, and integrated risk management implementation.

The Board of Commissioners believes that the Integrated Governance Committee has performed its duties and responsibilities effectively throughout 2025, having held 21 (twenty-one) meetings during the year.

The implementation of the committees' work plans is carried out, among others, through Committee Meetings by inviting relevant Directorates, Subsidiaries, Divisions, and Work Units, either directly or indirectly, to evaluate the reports submitted. These reports are subsequently reviewed by each Committee, and the results of the review are submitted in writing to the Board of Commissioners.

Each year, the Board of Commissioners conducts a self-assessment of the effectiveness of the performance of the committees under its supervision. Based on the implementation reports of each committee's work plan, the Board of Commissioners concludes that throughout 2025, the committees under the Board of Commissioners have performed their duties and responsibilities effectively and have provided views, recommendations, and inputs that support the Board of Commissioners in carrying out its active oversight of the Company's operations.

## Changes in the Composition of the Board of Commissioners

Throughout 2025, one (1) change occurred in the composition of the Board of Commissioners. The changes in the composition of the Board of Commissioners are described as follows:

### COMPOSITION OF THE BOARD OF COMMISSIONERS BEFORE THE ANNUAL GENERAL MEETING OF SHAREHOLDERS ON MARCH 24, 2025

The composition of the Board of Commissioners prior to the AGMS held on March 24, 2025 consisted of ten (10) members, comprising 1 (one) President Commissioner, 1 (one) Vice President Commissioner/Independent Commissioner, 2 (two) Commissioners, and 6 (six) Independent Commissioners, as follows:

<b>Kartika Wirjoatmodjo</b>	: President Commissioner
<b>Rofikoh Rokhim</b>	: Vice President Commissioner/ Independent Commissioner
<b>Rabin Indrajad Hattari</b>	: Commissioner
<b>Awan Nurmawan Nuh</b>	: Commissioner
<b>Dwi Ria Latifa</b>	: Independent Commissioner
<b>Heri Sunaryadi</b>	: Independent Commissioner
<b>Paripurna Poerwoko Sugarda</b>	: Independent Commissioner
<b>Agus Riswanto</b>	: Independent Commissioner
<b>Nurmaria Sarosa</b>	: Independent Commissioner
<b>Haryo Baskoro Wicaksono</b>	: Independent Commissioner

Independent Commissioner, Haryo Baskoro Wicaksono as Independent Commissioner, Agus Riswanto as Independent Commissioner, and Heri Sunaryadi as Independent Commissioner

2. Appointed Kartika Wirjoatmodjo as President Commissioner, Parman Nataatmadja as Vice President Commissioner/Independent Commissioner, Helvi Yuni Moraza as Commissioner, Edi Susianto as Independent Commissioner, and Lukmanul Khakim as Independent Commissioner.

Thus, the composition of the Company's Board of Commissioners following the AGMS held on March 24, 2025 consists of six (6) members, comprising 1 (one) President Commissioner, 1 (one) Vice President Commissioner/Independent Commissioner, 2 (two) Commissioners, and 2 (two) Independent Commissioners, in accordance with the applicable regulations, as follows:

<b>Kartika Wirjoatmodjo</b>	: President Commissioner
<b>Parman Nataatmadja</b>	: Vice President Commissioner/ Independent Commissioner
<b>Awan Nurmawan Nuh</b>	: Commissioner
<b>Helvi Yuni Moraza</b>	: Commissioner
<b>Edi Susianto</b>	: Independent Commissioner
<b>Lukmanul Khakim</b>	: Independent Commissioner

#### COMPOSITION OF THE BOARD OF COMMISSIONERS AFTER THE ANNUAL GENERAL MEETING OF SHAREHOLDERS ON MARCH 24, 2025

Based on the resolutions of the Annual General Meeting of Shareholders (AGMS) held on March 24, 2025:

1. Honorably dismissed Kartika Wirjoatmodjo as President Commissioner, Rabin Indrajad Hattari as Commissioner, Dwi Ria Latifa as Independent Commissioner, Rofikoh Rokhim as Vice President Commissioner/Independent Commissioner, Paripurna Poerwoko Sugarda as Independent Commissioner, Nurmaria Sarosa as

## Closing

As closing statement, the Board of Commissioners would like to express its gratitude for the trust and confidence extended by the shareholders and stakeholders. The Board also extends its appreciation to the Board of Directors, management, and all BRILiaN personnel for their dedication and valuable contributions.

The Board of Commissioners recognizes BRI's achievements are inseparable from the support of all stakeholders, including shareholders, regulators, business partners, as well as the dedication of all BRILiaN personnel. As BRI marks its 130<sup>th</sup> anniversary with a renewed identity and an even stronger spirit of transformation, the Board of Commissioners will continue to strengthen its strategic oversight function to ensure that the Company remains adaptive, resilient, and capable of creating sustainable value.

With 130 years of service to the nation and a continuously strengthened transformation journey, the Board of Commissioners believes that BRI possesses all the necessary resources not only to grow further but also to create broader and more meaningful impacts on Indonesia's economy—aligned with the Company's vision: Deliver Sustainable Values and Integrated Solutions to Achieve Indonesia's Aspiration.

# Company Brand

The BRI logo is as follows:

Philosophy of Tagline:

**"Bank Rakyat Indonesia"**

Reflecting **"Universal"** character for all levels of Indonesian society. Furthermore, the tagline represents product diversity and financial services owned by BRI. Based on BRI's national mandate and mission which are known as The People's Bank. With the existence of 'Bank Rakyat Indonesia' philosophy it is hoped that BRI can become a consumer-oriented brand representation of the Brand Idea that is: **'supporting every ambition throughout Indonesia'**

The meaning of logo:

The newest BRI logo is designed while maintaining distinctive and easily recognizable icon as a symbol of strength and brand equity that has been firmly established in the minds of customers. Improvements were made by smoothing the curves on the icon and wordmarks to present a more friendly, dynamic and modern character.

The choice of a brighter blue color is an evolution of BRI's signature color which reflects the progressive spirit, adaptive to digital development, and BRI's readiness to face the future. Overall, the combination of these elements reflects the balance between BRI's heritage values with the vision as a universal bank that is modern, relevant, and oriented toward customer needs.

The blue color will remain at the core of BRI's identity, bridging tradition with a modern image. Nusantara Blue is enriched with a secondary blue palette to reflect **progressive** and **customer-centric values**. A combination of Blue and White will be applied to create an aesthetic that is calm, contemporary, and firmly reflects BRI's identity.

Corporate Colour

The main blue color remains the fundamental element in the Company's brand identity, which reflects the continuity of BRI's values and heritage as well as strengthening relevance amidst current development. As the corporate color, blue reflects the stability, trust and integrity that have been rooted in the corporate journey, and has been transformed to support BRI's future growth direction. This main color is reinforced by a secondary color palette in the form of richer shades of blue, which is designed to represent the company's values which are progressive, inclusive and oriented towards the needs of customers and stakeholders.

In its implementation, the combination of blue and white creates a balanced, spacious and modern visual arrangement. This visual approach not only reflects respect for the Company's foundation and journey, but also emphasizes BRI's commitment to continuing to transform in a sustainable manner, in line with the implementation of good corporate governance and long-term growth strategies.

Corporate Font

BRI uses the Inter Font. A sans serif typeface designed specifically for digital displays. This letter is easy to read and very flexible to use. Its clean and modern appearance reflects BRI's confidence in offering banking solutions, while remaining friendly and easily accessible to various groups. With a wide choice of thicknesses and styles, Font Inter helps maintain consistency and flexibility across all BRI media, strengthening recognition and trust in every interaction.

Corporate Supergraphics

Supergraphic that represents stability, trust and strength as a trusted financial institution in the community. BRI is evolving from a traditional institution to a progressive and digital financial ecosystem, while still maintaining trust and closeness with the community. This supergraphic can be implemented in various visual image and video media.

# Brief History of The Company

**The history of PT Bank Rakyat Indonesia (Persero) Tbk ("BRI", "Bank", or "Company") started in 1895 in Purwokerto, Central Java, by Raden Bei Aria Wirjaatmadja, originally to manage mosques' cash, to be distributed to the public using a simple scheme.**

PT Bank Rakyat Indonesia (Persero) Tbk (hereinafter referred to as "BRI") was established and started its commercial operations on December 18, 1968 based on Law no. 21 of 1968. On April 29, 1992, based on Government Regulation of the Republic of Indonesia ("Government") No. 21 of 1992, the legal entity form of BRI was changed to a Limited Liability Company (Persero). The transfer of BRI to become a Limited Liability Company was documented by deed No. 133 dated July 31, 1992 before Notary Muhani Salim, S.H. and was ratified by the Minister of Justice of the Republic of Indonesia with Decree No. C2-6584. HT.01.01.TH.92 dated August 12, 1992, and announced in the State Gazette of the Republic of Indonesia No. 73, Supplement No. 3A dated September 11, 1992. BRI's Articles of Association were later amended by Deed No. 7 dated September 4, 1998 before Notary Imas Fatimah, S.H., article 2 concerning "Term of Establishment of the Company" and article 3 concerning

"Aims and Objectives and Business Activities" to comply with the provisions of Law of the Republic of Indonesia No. 1 of Brief History of The Company 1995 concerning "Limited Liability Company" and was ratified by the Minister of Justice of the Republic of Indonesia with Decree No. C2- 24930. HT.01.04.TH.98 dated November 13, 1998, and was announced in the State Gazette of the Republic of Indonesia No. 86, Supplement No. 7216 dated October 26, 1999 and deed No. 7 dated October 3, 2003 before Notary Imas Fatimah, S.H., related to the company's status and adjustment to the Capital Market Law and was ratified by the Minister of Justice and Human Rights of the Republic of Indonesia with Decree no. C-23726 HT.01.04. TH.2003 dated October 6, 2003 and had been announced in the State Gazette of the Republic of Indonesia No. 88, Supplement No. 11053 dated November 4, 2003.

Based on Bank Indonesia Decree No. 5/117/DPwB2/PWPwB24 dated October 15, 2003, regarding the "Appointment Deed of BRI as a foreign exchange commercial bank", BRI was designated as a foreign exchange bank through the Letter of the Monetary Board No. SEKR/BRI/328 dated September 25, 1956.

Based on deed No. 51 dated May 26, 2008 before Notary Fathiah Helmi, S.H., amendments were made to the Articles of Association of BRI, related to make adjustments to the provisions of Law of the Republic of Indonesia No. 40 of 2007 concerning "Limited Companies" and Regulation of the Capital Market and Financial Institutions Supervisory Agency ("Bapepam-LK") (its function was transferred to the Financial Services Authority since January 1, 2013), No. IX.J.I concerning "The Principles of the Articles of Association of Companies Conducting Public Offerings of Equity Securities and Public Companies", which obtained approval from the Minister of Law and Human Rights of the Republic of Indonesia with Decree No. AHU-48353.AH.01.02.Year 2008 dated August 6, 2008 and had been announced in the State Gazette of the Republic of Indonesia No. 68, Supplement No. 23079 dated August 25, 2009.

Furthermore, BRI's Articles of Association were amended several times. The latest amendments were documented before the Notary Deed of Fathiah Helmi S.H., No. 3 dated March 9, 2021, regarding to several provisions of the Articles of Association of BRI, which received the Acceptance of

Amendments to the Articles of Association from the Minister of Law and Human Rights of the Republic of Indonesia with Decree No. AHU-AH.01.03-0159493 dated March 12, 2021, and the last time was amended in Deed Number 4 Dated October 6, 2021 which was made before Notary Fathiah Helmi, SH in Jakarta and had received Notification of Amendment to the Articles of Association from the Minister of Human Rights Law of the Republic of Indonesia Number AHUAH.01.03-0457763 dated October 07, 2021. The changes were made in order to comply with OJK Regulation ("POJK") No. 15/ POJK.04/2020 concerning the Plan and Implementation of the General Meeting of Shareholders ("GMS") of a Public Company and POJK No. 16/POJK.04/2020 concerning the Implementation of the Electronic Public Company GMS, as well as paid-in capital.

Furthermore, BRI's Articles of Association are documented in Notarial Deed No. 32 dated April 22, 2024, of Notary Fathiah Helmi, S.H., in Jakarta regarding amendments to the Articles of Association from the Minister of Law and Human Rights of the Republic of Indonesia No. AHU-AH.01.03-0092097 dated April 23, 2024. The changes were made in the context of compliance with the OJK Regulation ("POJK") No. 15/ POJK.04/2020 regarding the Plan and Organizing of Public Companies' General Meeting of Shareholders ("GMS") and POJK No. 16/POJK.04/2020 regarding the Electronic Holding of Public Company GMS, as well as paid-in capital.

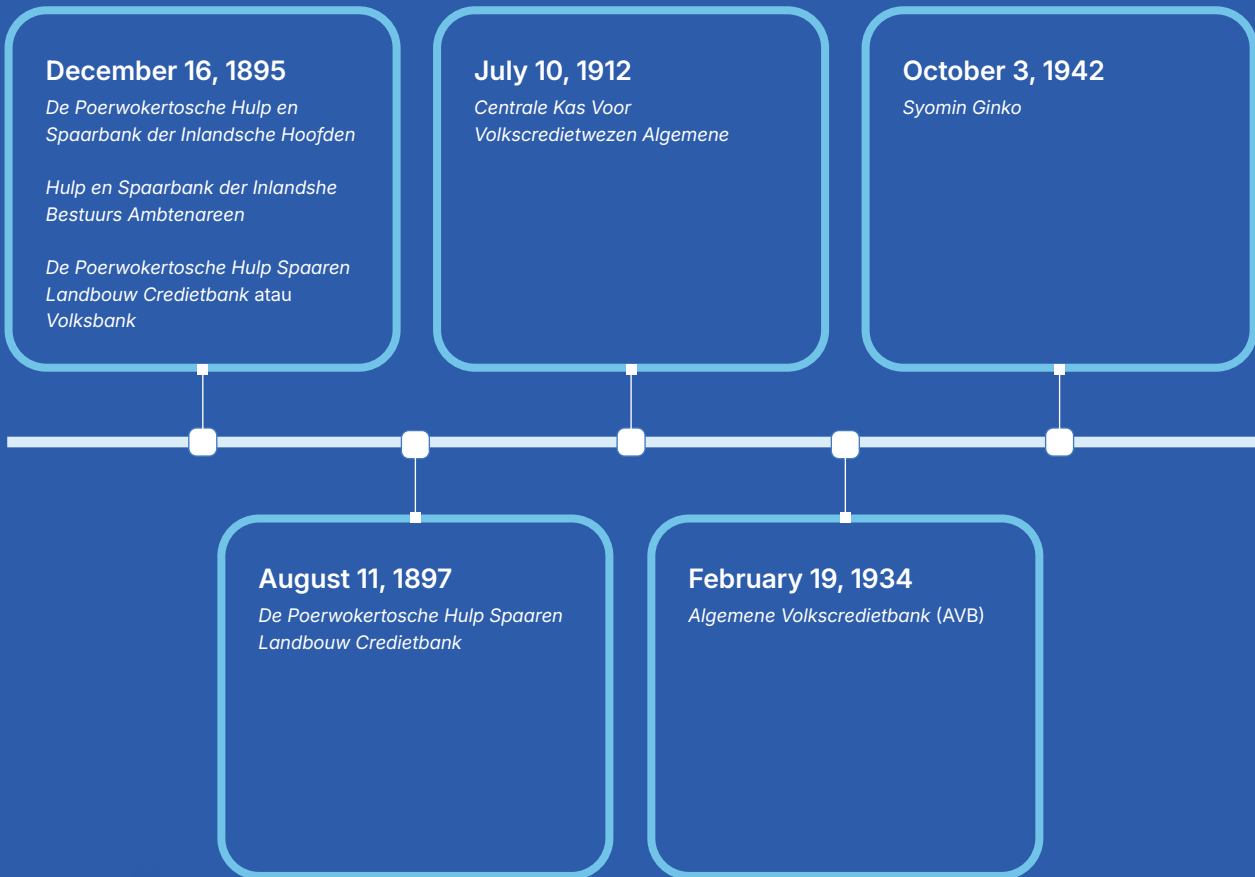

In 2025, amendments to the Articles of Association of PT Bank Rakyat Indonesia (Persero) Tbk were stipulated in Deed No. 15 dated April 22, 2025, drawn up before Fathiah Helmi, S.H., a Notary in Jakarta, and have been acknowledged through the Receipt of Notification of Amendment to the Articles of Association issued by the Minister of Law of the Republic of Indonesia as stated in Letter No. AHU-AH.01.03-0126510 dated May 8, 2025.

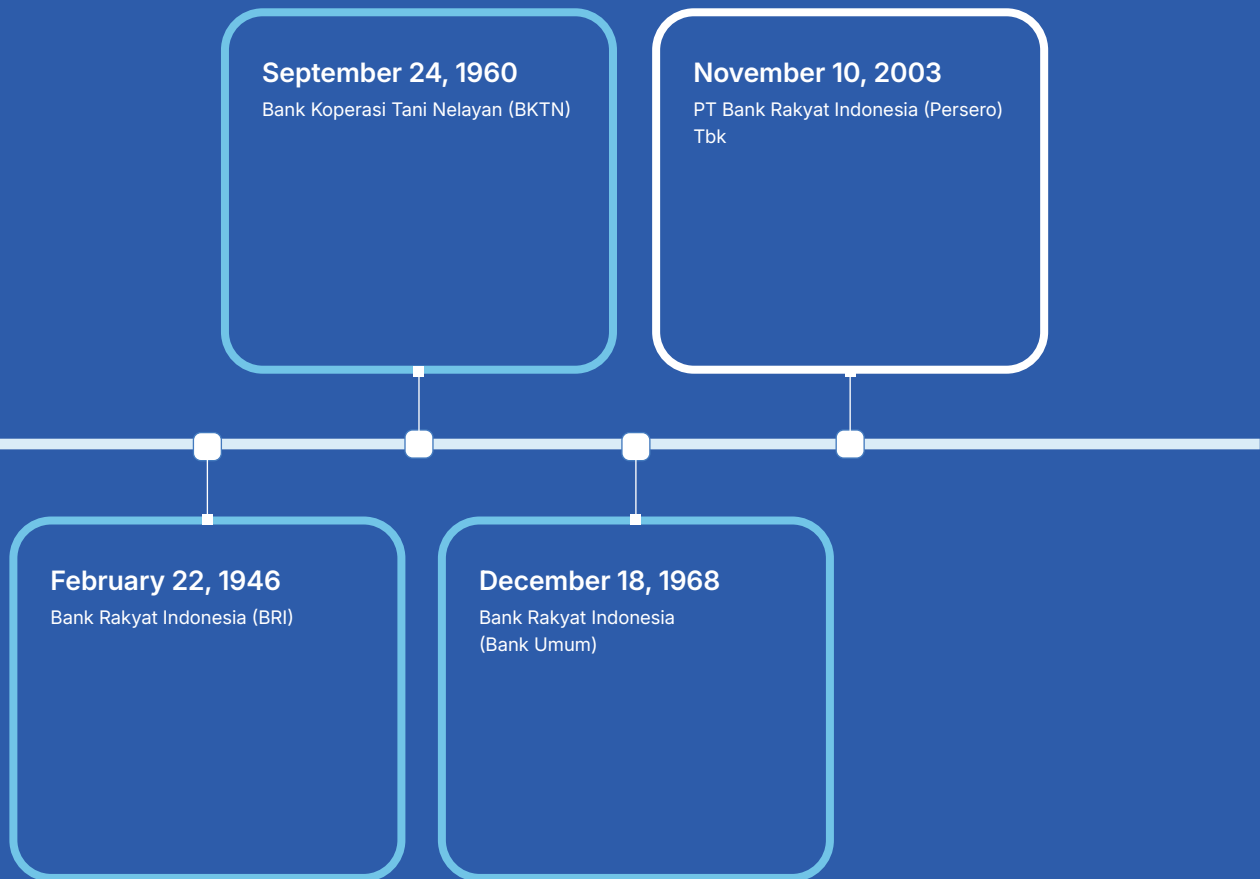

The latest amendment to the Articles of Association of PT Bank Rakyat Indonesia (Persero) Tbk was stipulated in Deed No. 6 dated February 6, 2026, drawn up before Fathiah Helmi, S.H., a Notary in Jakarta, and has been acknowledged through the Receipt of Notification of Amendment to the Articles of Association issued by the Minister of Law of the Republic of Indonesia as stated in Letter No. AHU-AH.01.03-0038855 dated February 11, 2026. Based on Article 3 of BRI's Articles of Association, the scope of BRI's activities is to conduct business in the banking sector and to optimize the utilization of BRI's resources in order to deliver high-quality and highly competitive services, generate profits, and enhance the Company's value in accordance with the principles governing Limited Liability Companies.

The Government of the Republic of Indonesia is the controlling shareholder of BRI.

# Vision, Mission and Corporate Culture

## VISION

**Deliver Sustainable  
Values and Integrated Solutions  
to Achieve Indonesia's Aspiration**

Creating sustainable value and integrated solutions  
to realize Indonesia's aspirations

**Reviews of Vision and Mission  
by The Board of Commissioners  
and Board of Directors**

In 2025, BRI introduced a new vision and mission, which were approved by the Board of Commissioners and the Board of Directors. The updated vision and mission were formally endorsed during the Joint Meeting of the Board of

Commissioners and the Board of Directors held on November 25, 2025, as part of the agenda for the approval of the Bank's strategic plan.

# MISSION

Providing trusted, integrated and innovative financial solutions for all segments of society and business actors, in order to strengthen national economic resilience and accelerate the achievement of Indonesia's aspirations.

Become a home for the nation's best talent by creating an inclusive, adaptive and high performance-based work environment, thus making BRI an Employer of Choice in the financial industry.

Increasing shareholder value and trust through sustainable profitability growth, operational efficiency and superior corporate governance (Good Corporate Governance).

Become a catalyst for sustainable economic growth through support for MSMEs, the green economy and digital-based innovation, in order to create broad societal prosperity and Indonesia's global competitiveness.

## Corporate Culture

### BRI One Culture

BRI One Culture is used as a guideline for implementing and building a performance driven culture (performance-based company culture) in achieving the company's vision. BRI One Culture is based on the Brilliant Way which functions as the main values and behaviors that are internalized in the daily work activities of all BRILiaN people.

### Core Values

On July 14, 2025, BRI officially established the Brilliant Way as a work culture that guides the behavior of BRILian people in carrying out their roles, duties and responsibilities. The Brilliant Way reflects the character and main values (values) of Brilliant People as the main driver of the Company's performance and transformation.

The Brilliant Way was formulated through a collaborative and participatory process between the Board of Directors together with Brilliant personnel, thereby confirming BRI's commitment to strengthening corporate culture as a strategic pillar for accelerating transformation and achieving the Company's long-term aspirations.

The Brilliant Way consists of 5 (five) main values, namely Integrity, Collaborative, Accountability, Growth Mindset, and Customer Focus. Each of these values has 3 (three) main behaviors that are expected to be carried out by all BRILiaN People with the following details.

## Employee Value Proposition

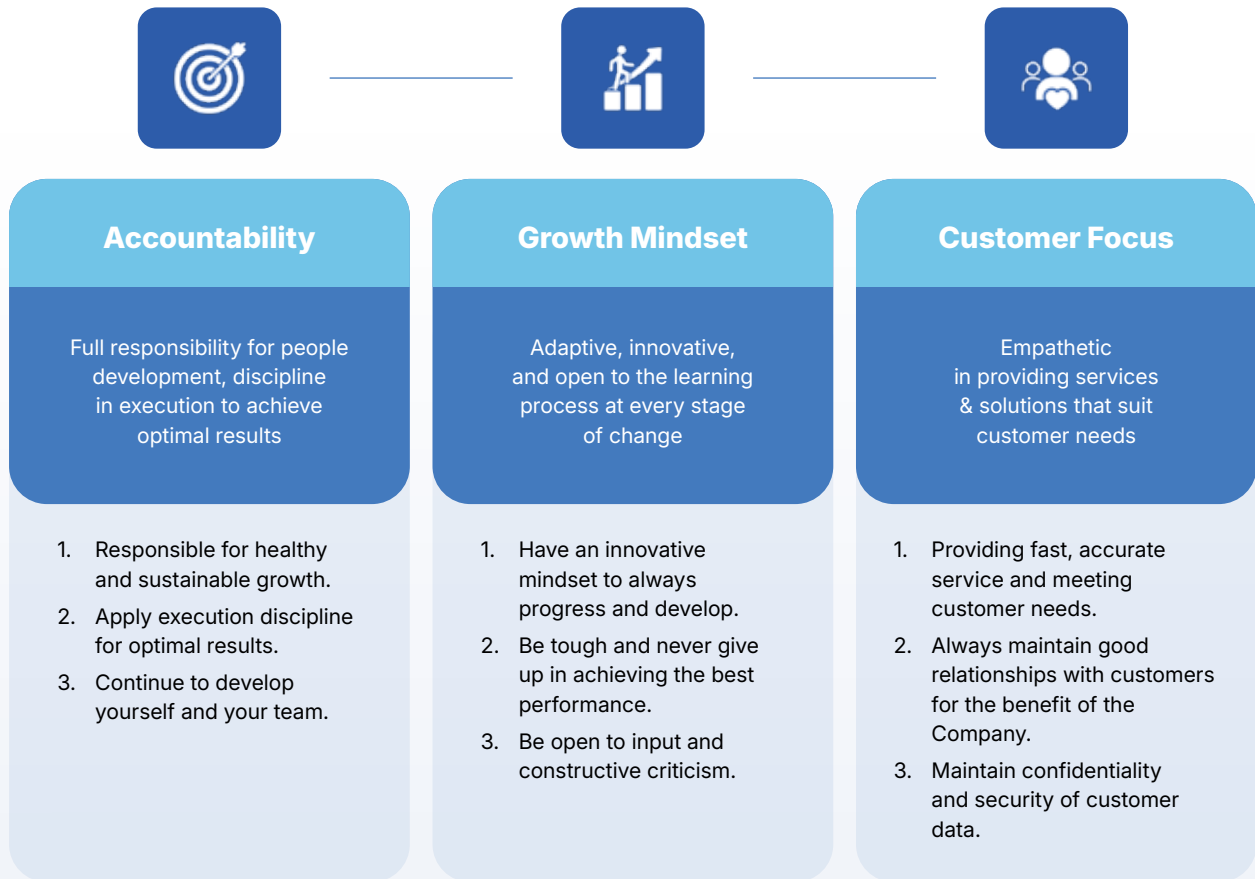

→

BRI has also formulated and established unique attributes that can provide visualization or images that can increase interest in the best external talent (Star Talent) and build employee loyalty and engagement in the BRI Group (Employee Value Proposition). The Employee Value Proposition determined is **"Memberi Makna Indonesia"** (Providing Meaning to Indonesia), where these attributes are formulated by considering living values, attractive values, and ideal values that live and develop at BRI.

BRI Group's Employee Value Proposition is translated into 3 (three) aspects, namely:

# Brilian Way

## Learn

BRI Group is a place to learn and develop for every Insan BRILiaN, forming superior individuals who are tough, dynamic, and relevant to current developments.

## Grow

For every Insan BRILiaN, planning the future is not just a hope. The opportunity to achieve a career at BRI is wide open for every Insan BRILiaN who is able to demonstrate consistently superior performance.

## Contribute

BRI Group creates people who bring change, stars of life who change the economic life of society with enthusiasm, without giving up. Together, creating and making life more meaningful.

# Business Activities

## Board of Commissioners Education and/or Training

A description of the education and/or training for the Board of Commissioners is presented in the Corporate Governance Chapter.

## Changes in The Composition of Members of The Board of Commissioners and The Reasons for The Changes

During 2025, there have been changes in the composition of the Board of Commissioners. These changes were made based on the Company's needs. The changes in the composition of the Board of Commissioners are as follows:

### Composition of The Board of Commissioners Before The Annual GMS

The composition of the Board of Commissioners before the 2025 Annual General Meeting of Shareholders (AGMS) dated March 24, 2025, was 10 (ten) people consisting of 1 (one) President Commissioner, 1 (one) Vice President Commissioner/Independent Commissioner, 2 (two) Commissioner and 6 (six) an Independent Commissioner. The composition and basis for appointment of the Board of Commissioners can be seen in the table below.

Table of Composition and Basis for Appointment of the Board of Commissioners Before the Annual GMS

Name	Position	Executor	Basis of Appointment	Effective date
Kartika Wirjoatmodjo	President Commissioner	OJK	Annual GMS dated February 18, 2020	July 3, 2020
Rofikoh Rokhim	Vice President Commissioner/ Independent Commissioner	OJK	Extraordinary GMS on October 7, 2021	November 30, 2021
Rabin Indrajad Hattari	Commissioner	OJK	Annual GMS on February 18, 2020	July 27, 2020

Name	Position	Executor	Basis of Appointment	Effective date
Awan Nurmawan Nuh	Commissioner	OJK	Annual GMS on March 13, 2023	December 8, 2023
Dwi Ria Latifa	Independent Commissioner	OJK	Annual GMS on February 18, 2020	January 20, 2021
Heri Sunaryadi	Independent Commissioner	OJK	Extraordinary GMS on October 7, 2021	February 8, 2022
Paripurna Poerwoko Sugarda	Independent Commissioner	OJK	Annual GMS on March 1, 2022	August 8, 2022
Agus Riswanto	Independent Commissioner	OJK	Annual GMS on March 1, 2022	August 8, 2022
Nurmaria Sarosa	Independent Commissioner	OJK	Annual GMS on March 1, 2022	August 8, 2022
Haryo Baskoro Wicaksono	Independent Commissioner	OJK	Annual GMS on March 1, 2022	August 8, 2022

## Composition of The Board of Commissioners After The 2025 Annual GMS

On March 24, 2025, the 2025 Annual General Meeting of Shareholders decided:

1. Honorably dismissed the following individuals as Company Management:
  - a. Kartika Wirjoatmodjo as President Commissioner
  - b. Rabin Indrajad Hattari as Commissioner
  - c. Dwi Ria Latifa as Independent Commissioner
  - d. Rofikoh Rokhim as Vice President Commissioner/Independent Commissioner
  - e. Paripurna Poerwoko Sugarda as Independent Commissioner
  - f. Nurmaria Sarosa as Independent Commissioner
  - g. Haryo Baskoro Wicaksono as Independent Commissioner
  - h. Agus Riswanto as Independent Commissioner
  - i. Heri Sunaryadi as Independent Commissioner
2. Appointed the following individuals as Company Management:
  - a. Kartika Wirjoatmodjo as President Commissioner
  - b. Parman Nataatmadja as Vice President Commissioner/Independent Commissioner
  - c. Helvi Yuni Moraza as Commissioner
  - d. Edi Susianto as Independent Commissioner
  - e. Lukmanul Khakim as Independent Commissioner

Thus, the composition of the Board of Commissioners after the Annual GMS on 2025 was 6 (six) people consisting of 1 (one) President Commissioner, 1 (one) Vice President Commissioner/Independent Commissioner, 2 (two) Commissioner and 2 (two) an Independent Commissioner. The composition and basis for appointment of the Board of Commissioners can be seen in the table below.

**Table of Composition and Basis for Appointment of the Board of Commissioners after the Annual GMS**

Name	Position	Executor	Basis of Appointment	Effective date
Kartika Wirjoatmodjo	President Commissioner	OJK	<ul style="list-style-type: none"> <li>• Annual GMS dated February 18, 2020</li> <li>• Annual GMS dated March 24, 2025</li> </ul>	July 3, 2020
Parman Nataatmadja	Vice President Commissioner/Independent Commissioner	OJK	Annual GMS on March 24, 2025	September 15, 2025
Awan Nurmawan Nuh	Commissioner	OJK	Annual GMS on March 13, 2023	December 19, 2025
Helvi Yuni Moraza	Commissioner	OJK	Annual GMS on March 24, 2025	December 8, 2023
Edi Susianto	Independent Commissioner	OJK	Annual GMS on March 24, 2025	October 24, 2025
Lukmanul Khakim	Independent Commissioner	OJK	Annual GMS on March 24, 2025	December 19, 2025

## Competency Development

### Policies

The development of employee competencies is a top priority for BRI as it can drive productivity and support the overall performance of BRI. In 2025, BRI will develop an education program that is structured to adapt the worker cycle. Thus, the education program has a clear structure while supporting the achievement of the company's strategic goals.

Apart from that, in order to increase education ownership in the Regional Office area and to ensure that the development of worker capabilities in the region is in line with needs, starting in 2025 BRI will implement the Green Program. Curriculum preparation, learning objectives, teaching materials, budget calculations, educational implementation, and educational evaluation are the scope of each Regional Office.

## Types of Competency Development

Types of Competency Development		Training Objectives
BFLP	BRILian Future Leader Program	Training program to prepare new talents to become leaders in facing current and future business challenges.
BNLP	BRILian Next Leader Program	Training program for career development of BRI best permanent employees to become BRI future leadership candidates in facing current and future business challenges.
BLDP	BRILian Leadership Development Program	BRI Human Capital Development Program is to prepare employees to become Great Leaders through sustainable and comprehensive leadership development that places emphasis on strengthening character, national insight, global insight, business/banking insight, and technological insight.
BLRP	BRILian Leader Retirement Program	BRI Human Capital Development Program is to prepare employees before entering retirement by providing them with the knowledge, insight and skills needed to undergo retirement.
BSDP	BRILian Specialist Development Program	Technical competency development program for comprehensive onboarding places emphasis on specific knowledge and skills according to the competency requirements required to become a specialist in a particular field tailored to the company's needs
BBAP	BRILian Banking Associate Program	Educational program to prepare new workers in Marketing, Frontline and Administration positions (permanent, contract and outsourced) so they can work in accordance with operational standards applicable at BRI.
COP	Community of Practice	The community formed in the context of organizing distribution and use of knowledge assets activities
E-Learning	Electronic Learning	Education method by optimizing the use of the internet/technology as a means of delivering material, exams, interaction between teachers and education participants, interaction between education participants and so on. E-Learning can use platforms developed internally, or Massive Open Online Courses (MOOC).
PC	Public Course	Educational programs that are not initiated by BRI internally in order to improve employee competency.
SER	Certificate Education	Training program for mandatory certification activities in accordance with the provisions set by the regulator and other certification determined by the Company.
SOS	Dissemination	Activities to convey information regarding policies, regulations, activity programs, and/or important information related to the company's business development through presentation activities in each business unit.
V	Green Program	The program is held based on the results of a training needs analysis carried out by the work unit with the aim of closing competency gaps that are local/regional needs.

## Evaluation of Competency Development Implementation

In evaluating the effectiveness of competency development, BRI uses several assessment aspects, including:

1. Evaluation of Business Impact
  - a. Assessment of the implementation of educational programs on the performance of participants and organizations related to productivity, profitability, employee engagement, contribution margin, and others.
  - b. In 2025, the evaluation results for 10 positions in 2024 are "Positive Impact" on business.
2. Evaluation of Effectiveness
  - a. Assessment of the implementation of the education program based on reactions, satisfaction, and the level of mastery of the material by the education participants on the quality of the material or content, the quality of the teachers, learning methods and other matters directly related to the implementation of the education program.
  - b. The results of the 2025 effectiveness evaluation are as follows:
    - Measuring the increase in knowledge and skills is carried out after the implementation of education with the average evaluation result 97,4. (eva 1 - 3).
    - Measurement of participant evaluation includes material aspects, accommodation, subject matter experts (SME) and facilitators with an evaluation value of 97,8. (eva 1 - 2).

### 3. Evaluation of Efficiency

- a. Assessment of the efficiency of education program implementation based on the number of completions of education programs by participants, cost per education participant, number of educational programs available and others.
- b. Percentage of employee who have completed their education:
  - In class and/or E-learning: 100% of the total BRI employees 77,739 employees.
  - In Class: 96.3% of the total BRI employees 81,848 employees.

## Competency Development Cost

In 2025, competency development expenses decreased following the implementation of efficiency measures in the delivery of education programs through a cluster-based approach at Work Units, without reducing the effectiveness and quality of the programs.

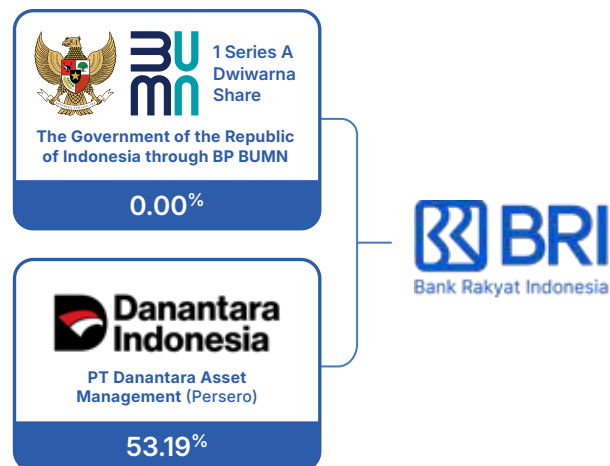

Table of Competency Development Cost

(in IDR billions)

2025	2024	2023
627	795	992

## Main and Controlling Shareholders

The main and controlling shareholder of BRI is the Government of the Republic of Indonesia through the ownership of 1 Series A Dwiwarna Share (0.00%) through the State-Owned Enterprises Management Agency and 80,610,976,875 Series B Shares through PT Danantara Asset Management (Persero). Accordingly, there is no individual controlling shareholder, either directly or indirectly.

# Shareholder's Composition

Shareholder composition is presented as follows:

Table of BRI Shareholder Composition as of January 1, 2025

Shareholder Classification	Number of Shareholders	Number of Shares (shares)	Ownership

# List of Members of the Financial Conglomerate, Subsidiaries, Associated Companies and Joint Venturance Companies

## Members of the Financial Conglomerate

On December 23, 2024, the Financial Services Authority (OJK) promulgated Financial Services Authority Regulation No. 30 of 2024 concerning Financial Conglomerates and Financial Conglomerate Holding Companies (Financial Conglomerate POJK), and revoked Financial Services Authority Regulation No. 45/POJK.03/2020 concerning Financial Conglomerates. The Financial Conglomerate POJK requires Financial Services Institutions that meet the criteria of a financial conglomerate to establish a Financial Conglomerate Holding Company.

Based on the criteria stipulated in the Financial Conglomerate POJK, the Bank meets the requirements to serve as a Financial Conglomerate Holding Company. Furthermore, pursuant to the Decree of the Member of the Board of Commissioners of the Financial Services Authority No. KEP-11/KS.1/2025 dated September 16, 2025, OJK has designated BRI as a Financial Conglomerate Holding Company with 22 (twenty-two) Financial Conglomerate Members. The Bank's Financial Conglomerate Members consist of:

1. The Bank's Subsidiaries;
2. Pension Funds established by the Bank;
3. Pension Funds established by the Bank's Subsidiaries; and
4. Companies under the Bank's Subsidiaries as determined by OJK.

In addition to holding equity investments in Financial Conglomerate Members that are the Bank's Subsidiaries, the Bank also holds non-significant equity investments in several companies that are not part of BRI's Financial Conglomerate Members.

# Stock Issuance Chronology

## 2003 INITIAL PUBLIC OFFERING (IPO)

On 31 October 2003, BRI exercised Initial Public Offering with a total of 3,811,765,000 Registered Ordinary Shares Series B to domestic and foreign investors. The total shares was a divestment of 2,047,060,000 shares of the Republic of Indonesia and 1,764,705,000 shares issued from the portfolio.

The initial public offering was in accordance with the effective registration statement issued by Bapepam - now OJK (Letter of Bapepam Chairman No. S-2646/ PM/2003) dated 31 October 2003. The shares were offered at a nominal value of IDR500.00 per share. traded on 10 November 2003. with offering price of IDR875.00 (IDR87.50 adjusted with stock split in 2011 and 2017) and registered in Jakarta Stock Exchange (now Indonesia Stock Exchange).

Following the initial public offering, BRI issued two types of shares: Golden Shares Series A and Ordinary Shares Series B. Golden Shares Series A are issued and owned by the Republic of Indonesia and are not transferable to any parties.

On 10 November 2003 BRI exercised oversubscription option of 381,176,000 Ordinary Shares Series B of the Republic of Indonesia (divestment) and over-allotment option of 571,764,000 Ordinary Shares Series B of the Republic of Indonesia (divestment) on 3 December 2003. The divestment was listed at the Jakarta Stock Exchange (now Indonesia Stock Exchange).

## 2011 STOCK SPLIT 1:2

Based on the Bank's Extraordinary General Meeting of Shareholders ("EGMS") held on 24 November 2011, the shareholders have approved to exercise a stock split from previously IDR500 per share to IDR250 per share (Ratio 1:2). The share price prior to stock split on 10 January 2011 was IDR9.300.00 and changed to IDR4.800 at the closing of trading on 11 January 2011. With such stock split, the total shares outstanding prior to the stock split was 12,334,581,000 shares and at the stock split was 24,669,162,000 shares as of 11 January 2011. There was no changes on the shares ownership composition by the Government or Public prior to and after the stock split.

### Stock Split in 2011

Description	Shareholders (Total Shares Outstanding)					Total Shares Outstanding
	Government		Public		Nominal	
	Number of (shares)	%	Number of (shares)	%	IDR	
Before Stock Split	7,000,000,000	56.75	5,334,581,000	43.25	500	12,334,581,000
After Stock Split	14,000,000,000	56.75	10,669,162,000	43.25	250	24,669,162,000

## 2004-2010 SHARE OWNERSHIP PROGRAM FOR MANAGEMENT (MANAGEMENT STOCK OPTION PROGRAM)

Based on the Extraordinary General Meeting of Shareholders' decision on October 3, 2003, BRI's shareholders approved the stock purchase options for management or Management Stock Option Plan (MSOP). The number of shares issued in BRI's MSOP was 588,235,250. The implementation of the MSOP was carried out in three phases with the MSOP Phase I and II exercise periods ended on November 9, 2008 and November 9, 2009, while the Phase III MSOP ended on November 9, 2010.

The three stages of MSOP refer to Bapepam-LK Regulation No. IX.D.4 and IDX Regulation No.1-A Lamp. JSE Board of Directors Decree No. Kep.305/BEJ/07-2004 concerning Securities Listing. MSOP shares that have been exercised until the end of all MSOP stages are 569,876,000 shares. Until the end of the exercise period, there were still 18.3 million non-exercised shares consisting of 4.3 million MSOP Phase I, 5.2 million MSOP Phase II and 8.8 million MSOP Phase III shares. With the end of the MSOP exercise in 2010, the composition of government share ownership changed from 59.07% in 2004 to 56.75% in 2010.

**STOCK BUY-BACK IN 2015-2016**

BRI exercised stock buyback during 3 months. from 12 October 2015 until 12 January 2016 with a total purchase of 221,718,000 shares at an acquisition price of IDR2.419 trillion. The initial target of buyback was planned at IDR2.5 trillion provided that the number of BRI shares buyback does not exceed 20% of the total paid-up capital and at least 7.5% of paid-up capital. Following the BRI's IPO and oversubscribed as well as allocated options. the Government of Republic of Indonesia holds 59.50% shares of BRI.

**Stock Buy Back in 2015-2016**

Total Number of shares	Average Purchase Price	Increase in Earnings per Share
221,718,000 shares	IDR10,910/shares	IDR9.5/shares

Note: before stock split 1:5

In performing the stock buyback and/or bonds. the Bank complies with the prevailing external regulations. among others:

- Law No. 40 of 2007 on Limited Liability Company.
- OJK Regulation No. 2/POJK.04/2013 on Stock Buyback by Issuers or Public Companies in Significantly Fluctuating Market Conditions.
- OJK Circular Letter No. 22/SEOJK.04/2013 on Other Conditions as Significantly Fluctuating Market Conditions of Stock Buyback by Issuers or Public Companies in Significantly Fluctuating Market Conditions.
- Bank Indonesia Regulation No. 15/12/DASP/2013 regarding the Procedures for the Auction of Government Securities in the Primary Market and the Administration of Government Securities.

The source of buyback funds was the Bank's internal cash and there was an assurance that the funds would not impact the Bank's financial condition required to finance its activities. All buy back transactions have been administered to the OJK on January 13, 2016. The buyback shares are planned to be used the Management/Employee Share Ownership Program.

**2017 STOCK SPLIT 1:5**

Based on Pursuant to the Extraordinary General Meeting of Shareholders ("EGMS") held on October 18, 2017. the shareholders approved a stock split from IDR250 per shares previously to IDR50 per shares (Ratio 1:5). The share price prior to stock split on November 9, 2017 was IDR16,450 and were changed to IDR3,280 at the closing of trading on November 10, 2017. Thus. the total shares outstanding prior to the stock split was 24,669,162,000 shares and at the stock split was 123,945,810,000 shares as of November 10, 2017. There were no changes on the shares' ownership composition by the Government or Public prior to and after the stock split. The shares listing chronology in relation with this corporate action are as follow:

**Stock Split in 2017**

Description	Shareholders (Total Shares Outstanding)					Total Shares Outstanding
	Government		Public		Nominal	
	Number of (shares)	%	Number of (shares)	%	IDR	
Before Stock Split	14,000,000,000	56.75	10,669,162,000	43.25	250	24,669,162,000
After Stock Split	70,000,000,000	56.75	53,345,810,000	43.25	50	123,345,810,000

**STOCK OWNERSHIP PROGRAM FOR EMPLOYEES (EMPLOYEE STOCK OPTION PROGRAM/ESOP) 2019**

Based on the General Meeting of Shareholders (GMS) Decision dated March 23, 2016 on Agenda 5 (five), shareholders approved the transfer of shares resulting from the buyback which were held as treasury stock in the context of implementing the Management and Employee Share Ownership Program. The GMS granted power and authority to the Board of Commissioners to determine the Share Ownership Program after obtaining written approval from Dwiwarna series A shareholders. In line with the Ministry of State-Owned Enterprises (BUMN) Letter which supports the implementation of share ownership for BRI Employees/ Employee Stock Ownership Program (ESOP), BRI in 2016. In 2019, BRI has implemented an ESOP in the form of a Bonus Share

for phase I. The Treasury Shares that have been used for the ESOP phase I have been transferred to each employee on May 23 and 24, 2019 in the form of a Stock Script totaling 143,415,500 shares. The transfer of treasury shares for the ESOP that is meant was reported to the OJK in May 2019.

#### **STOCK OWNERSHIP PROGRAM FOR EMPLOYEES (EMPLOYEE STOCK OPTION PROGRAM/ESOP) IN 2020**

#### **SHARE BUYBACK (BUYBACK) IN 2022-2023**

At the Annual General Meeting of Shareholders (AGMS) on March 1 2022, BRI has obtained shareholder approval to carry out a share buyback (Buyback) with a Buyback value of up to IDR 3 trillion carried out through the Indonesian Stock Exchange (BEI), either in stages or all at once and completed no later than 18 months from the AGMS approval, namely on March 1, 2022 to August 31, 2023. The shares resulting from the Buyback will be used for the employee and/or Directors share ownership program. and the Company's Board of Commissioners. The implementation of the buyback also referred to Financial Services Authority Regulation (POJK) No. 30/POJK.04/2017.

In the period April 2022 to January 2023, BRI has carried out buybacks of 647,385,900 shares with an average acquisition price of IDR4,634.02 per share.

#### SHARE BUYBACK (BUYBACK) IN 2024-2025

In the period from September 2023 to September 2024, BRI implemented a share buyback program in accordance with Financial Services Authority Regulation (POJK) No. 30/POJK.04/2017. The implementation of the program had obtained approval through the Annual General Meeting of Shareholders (AGMS) held on 13 March 2023. From the implementation of the buyback, the Company successfully repurchased 293,932,300 shares at an average acquisition price of Rp5,103.22 per share.

#### SHARE BUYBACK (BUYBACK) IN 2025-2026

In 2025, BRI once again implemented a share buyback program in accordance with POJK Number 29 of 2023, as approved at the Annual General Meeting of Shareholders (AGMS) held on 24 March 2025. As of 31 December 2025, the program had been realized through the repurchase of 132,321,300 shares, with an average acquisition price of IDR3,687.12 per share.

#### TRANSFER OF THE REPUBLIC OF INDONESIA'S SHARES

On March 22, 2025, the Government of the Republic of Indonesia transferred ownership of 80,610,976,875 Series B shares, representing 53.19% of the Company's total issued and fully paid-up shares, through an inbreng mechanism to PT Biro Klasifikasi Indonesia (Persero) (currently PT Danantara Asset Management (Persero)).

The transfer of shares owned by the Government of the Republic of Indonesia, as stipulated in the Deed of Share Subscription through Contribution in Kind to a Limited Liability Company No. 121 dated March 22, 2025, drawn up before Jose Dima Satria, S.H., M.Kn., Notary in Jakarta, constitutes the implementation of the prevailing laws and regulations, namely Law No. 1 of 2025 concerning the Third Amendment to Law No. 19 of 2003 concerning State-Owned Enterprises and Government Regulation No. 15 of 2025 concerning the Addition of State Capital Participation of the Republic of Indonesia into the Share Capital of PT Biro Klasifikasi Indonesia (Persero) for the establishment of an Operational Holding.

The Government of the Republic of Indonesia remains the Controlling Shareholder of the Company (Ultimate Beneficial Owner) through the direct ownership of 1 Series A Dwiwarna share with special rights held by the Minister of State-Owned Enterprises. In relation to the aforementioned transfer, the composition of the Company's share ownership as of March 24, 2025, based on the Statement Letter issued by the Company's Securities Administration Bureau, PT Datindo Entrycom, is as follows:

#### Shares with a nominal value of IDR50.- (fifty Rupiah) per share

Description	Number (shares)	Nominal (IDR)	%
<b>Authorized Capital</b>			
Series A Dwiwarna Share	1	50	
Series B Shares	299,999,999,999	14,999,999,999,950	
<b>Total Authorized Capital</b>	<b>300,000,000,000</b>	<b>15,000,000,000,000</b>	
<b>Issued and Fully Paid Capital</b>			
Series A Dwiwarna Share			
The Government of the Republic of Indonesia	1	50	0.00
Series B Share			
PT Biro Klasifikasi Indonesia (Persero) (currently PT Danantara Asset Management (Persero))	80,610,976,875	4,030,548,834,750	53.19
Other Shareholders with ownership of less than 5% <sup>*)</sup>	70,948,024,728	3,547,401,236,400	46.81
<b>Total Issued and Fully Paid Capital</b>	<b>151,559,001,604</b>	<b>7,577,950,080,200</b>	<b>100.00</b>
<b>Shares in the Portfolio</b>	<b>148,440,998,396</b>	<b>7,422,049,919,800</b>	

<sup>\*)</sup> Including treasury shares totaling 902,207,000 shares

Subsequently, on January 5, 2026, PT Danantara Asset Management (Persero) transferred ownership of a portion of the Company's Series B Shares amounting to 806,109,768 shares or 0.53% of all shares that have been issued and fully paid up by the Company through a share ownership transfer transaction based on the Agreement on the Transfer of State-Owned Shares of the Republic of Indonesia in the Form of Series B Shares in SOEs to SOE Regulatory Agency Number PERJ-1/BPU/01/2026 and Number LGL1.001/PERJ/DIDAM.DO/2026 dated January 5, 2026 between the Head of SOE Regulatory Agency and PT Danantara Asset Management (Persero).

The aforementioned share transfer constitutes the implementation of Law No. 16 of 2025 concerning the Fourth Amendment to Law No. 19 of 2003 concerning State-Owned Enterprises.

The Government of the Republic of Indonesia is the Controlling Shareholder of the Company (Ultimate Beneficial Owner) through the ownership of 1 Series A Dwiwarna share with special rights and 806,109,768 Series B shares through BP BUMN, as well as the ownership of 79,804,867,107 Series B shares through PT Danantara Asset Management (Persero).

In relation to the aforementioned transfer, the composition of the Company's share ownership as of January 7, 2026, based on the Statement Letter issued by the Company's Securities Administration Bureau, PT Datindo Entrycom, is as follows:

#### Shares with a nominal value of IDR50.- (fifty Rupiah) per share

## Information Available on The Website

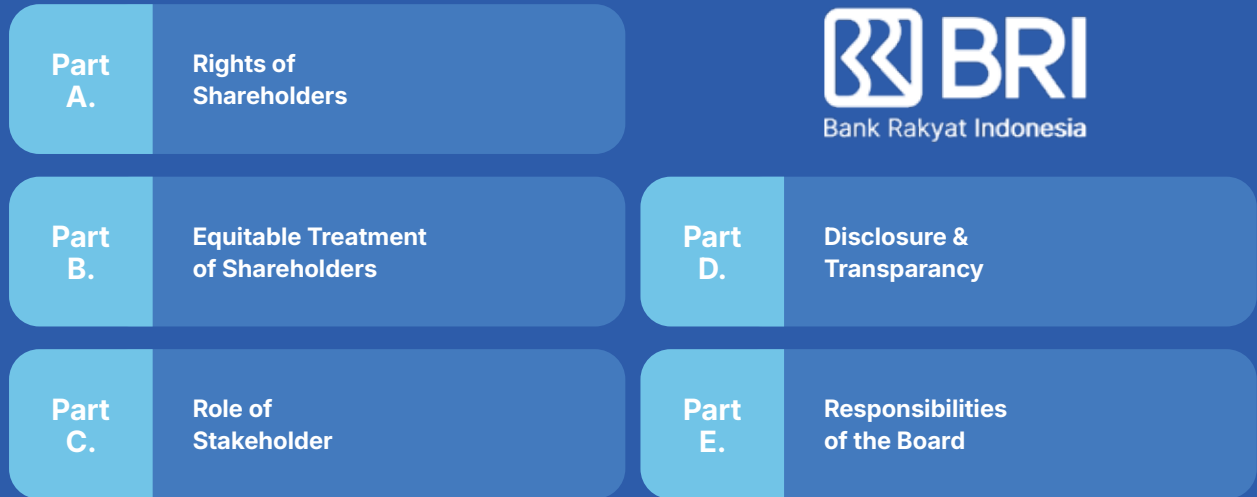

As a public company BRI provides easy access to information to all stakeholders through the official website of Bank BRI at [www.bri.co.id](http://www.bri.co.id) which is based on OJK regulation No. 8/POJK.04/2015. The OJK regulation requires the website of the issuer company to include information, namely:

The information on the BRI website consists of:

- General information about BRI, including: History of BRI, Vision and Mission, General Issuer Information, Management, and Information for Investors.
- Information about savings products, including: Savings, Deposits, and BRI Giro.
- Information about loan products, including: Micro Loans, Retail Commercial and Medium Loans, and BRIGuna.
- Information about international products, including: BRI Trade Finance & Services, BRIFast Remittance, Financial Institutions, BRI Money Changer, Overseas Offices.
- Information about banking services, including: Business Services, Financial Services, Institutional Services, E-Banking, and Treasury.
- Information about consumer products, including: Credit Cards, Home Ownership Loans, and Motor Vehicle Loans.
- Information about banking investments, including: DPLK, ORI & SR, Trustee Services, Custodian Services.
- Information about Priority Services, including: Service Products & Privileges, Mutual Funds, BRIPrioritas Cards, Outlets, Customer Criteria.
- Information about Auctions, including: Asset Auctions, Procurement Auctions.
- Information about GCG, including: General Meeting of Shareholders, Articles of Association, GCG Structure and Policies, Code of Ethics, ASEAN Corporate Governance Scorecard, Audit Committee including the Audit Committee Charter, Nomination and Remuneration Committee, Whistleblowing System, and Shareholder Rights.
- The Careers section offers job opportunities for those interested in joining as employees through BRI's e-recruitment menu.
- The Investor Relations section provides an overview, Financial Information (including Quarterly Financial Statements), GCG, Services for Shareholders, Events, and News.
- The subsidiary section provides general information about subsidiaries and links to their respective websites.
- In addition to the above, the BRI website also includes Group Company Structure, Profiles of the Board of Commissioners and Board of Directors, media briefing, and Information for Shareholders.

BRI's website also meets ASEAN Corporate Governance Scorecard (ACGS) standards which include:

**Overall, the BRI Website reflects BRI's commitment to upholding the principles of openness and transparency.**

# Management Discussion and Analysis on Bank Performance

"BRI's ability to identify opportunities amid global economic dynamics enabled the Bank to deliver very strong performance in 2025. The highest CASA ratio in history at 70.6% serves as evidence that the transformation has been progressing in line with its intended direction. Provisioning remained adequate, with LaR Coverage recorded at 56.81%, while the Bank maintained a strong capital position with a CAR of 23.52%."

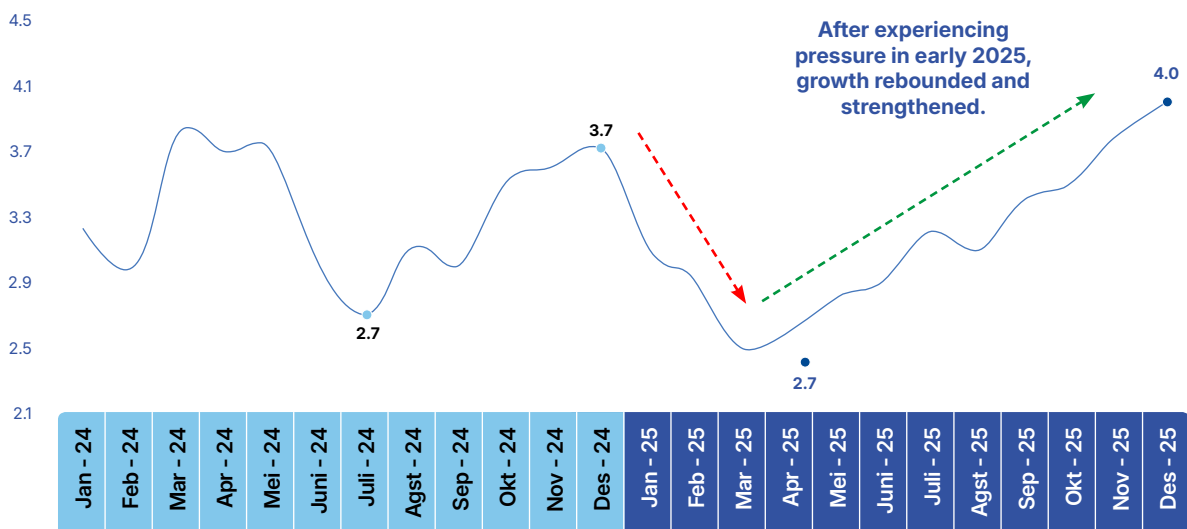

# Economic Review

## Global Economic Analysis

Global economic performance in 2025 demonstrated stronger resilience than initially projected, despite heightened global uncertainty arising from geopolitical risks and the import tariff policies of the United States. This improvement was particularly evident in the second half of 2025, as reflected in the strengthening of global economic growth, which increased to 4.0% on a Seasonally Adjusted Annualized Rate SAAR basis in December 2025, from its lowest level of 2.5% in March 2025 (Figure 1).

**Figure 1. Estimated Global Economic Growth by Bloomberg (% SAAR)**

Source: Bloomberg (accessed on January 30, 2026).

In line with these developments, several international institutions have revised their projections for global economic growth in 2025. In the January 2026 edition of the World Economic Outlook (WEO), the International Monetary Fund (IMF) revised upward its projection for global economic growth in 2025 to 3.3%, from 2.8% in the April 2025 WEO report. Similarly, the Organisation for Economic Co-operation and Development (OECD) updated its 2025 global economic growth projection to 3.2% in December 2025, higher than its March 2025 projection of 3.1%.

The improvement in global economic growth performance in 2025 was supported by several key factors. The global disinflation trend remained persistent, with global inflation declining from 5.8% in 2024 to 4.1% in 2025, thereby supporting households' real purchasing power. In line with the persistent global disinflation trend, the global monetary policy stance tended to become more accommodative, as reflected in the lower average value of the Global Monetary Policy Tracker Index (GMPTI) in 2025 compared to the previous year.

The average GMPTI value was recorded at -5.1 throughout 2025, lower than the -3.4 average recorded in 2024, indicating a broader monetary policy easing. Several major central banks reduced their policy rates throughout 2025, including the United States by 75 basis points (bps) to 3.75%, the United Kingdom by 100 bps to 3.75%, and the European

Union by 100 bps to 2.15%. In addition to monetary easing, support for growth also stemmed from increased investment in the technology sector, particularly those related to the development of artificial intelligence (AI).

In line with the improvement in global economic performance and the easing of monetary policy, global financial market conditions also improved in the second half of 2025. This development was reflected in the decline in global financial market volatility, both in equity and bond markets, in line with the downward trend of the VIX and MOVE indices. The improvement in market sentiment was also accompanied by a decline in credit risk, as reflected in the improvement of credit default swap (CDS) spreads across various countries, and supported the return of portfolio capital flows to emerging markets, with a strengthening net inflow trend since mid-2025.

Looking ahead, despite the improvement in global economic conditions in the second half of 2025, global economic growth in 2026 is projected to moderate. Various international institutions project a moderation in growth (Table 1), amid persistently high global uncertainty, particularly related to elevated geopolitical risks in the Middle East, escalating tensions between the United States and Venezuela, evolving trade tariff policies, as well as the potential fragmentation of global supply chains.

Despite persistent global risks, several factors continue to support global economic stability. The ongoing disinflation trend has provided room for many countries to implement more accommodative monetary policies. This condition helps maintain liquidity and stability in financial markets. Meanwhile, domestic demand in several countries remains relatively strong.

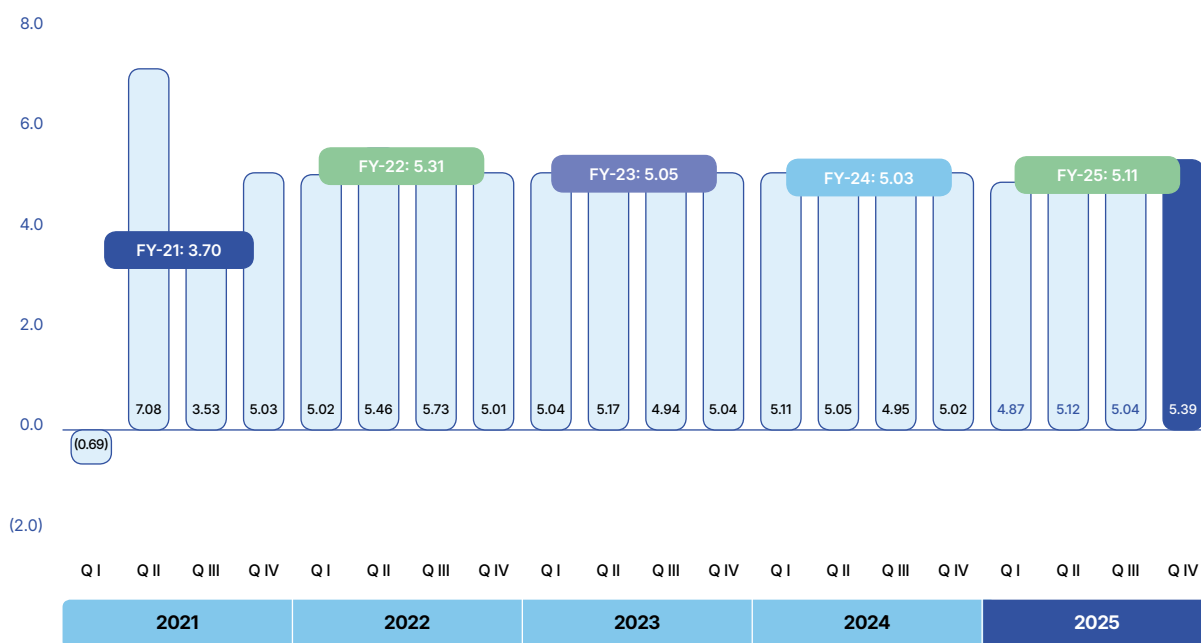

## Domestic Economic Analysis

In 2025, Indonesia's economic growth remained robust at 5.11%, slightly higher than 5.03% recorded in the previous year. The two main contributors to national Gross Domestic Product (GDP)—household consumption and investment—which together account for more than 80% of national GDP, continued to demonstrate relatively solid performance throughout 2025. Growth in household consumption and investment in 2025 was recorded higher than in the previous year (Figure 2), indicating that non-government domestic demand remained resilient. Export performance also remained solid and showed an upward trend, despite the persistently high level of global economic uncertainty.

Furthermore, although household consumption exhibited relatively solid growth throughout 2025, its performance still faced challenges in terms of the quality of growth. The strengthening of consumption has not occurred evenly and has tended to be driven primarily by middle- to upper-income groups. Meanwhile, the purchasing power of lower- to middle-income groups remains relatively constrained and has not yet fully recovered compared to the pre-pandemic normal period of 2016–2018. This condition was reflected in the limited increase in real income, partly due to weak job creation in low-wage sectors, thereby constraining the scope for further expansion in household consumption.

### Indonesia's Economic Growth (%yoy)

### Indonesia's GDP Distribution (%)

\*Numbers in the green boxes represent the contribution of each component to GDP growth in Q4-2025.

Source: Statistics Indonesia (BPS), (accessed February 5, 2026).

From the price perspective, domestic inflation throughout 2025 showed a normalization trend after experiencing deflation in February 2025, although the level remained relatively low by historical standards and remained well under control. Indonesia's inflation in 2025 was recorded at 2.92% yoy, higher than the 1.57% yoy recorded in 2024, yet still within Bank Indonesia's (BI) inflation target range of 1.5%–3.5%. The relatively low inflation level by historical standards was mainly attributable to still-limited demand pressures, as reflected in core inflation, which remained below the pre-pandemic average of around 3%. Meanwhile, inflation in the volatile food category showed an upward trend, thus remaining a potential risk to real purchasing power going forward.

From the foreign exchange perspective, the movement of the Rupiah exchange rate throughout 2025 tended to remain under pressure, despite the weakening of the US Dollar Index. The Real Effective Exchange Rate (REER) indicator suggests that the Rupiah remained undervalued relative to the currencies of peer countries, indicating that the exchange rate depreciation has occurred at a relatively deeper level from a fundamental perspective. With the currency already trading below its equilibrium value, the risk of further Rupiah depreciation is expected to remain relatively limited, while also opening the opportunity for gradual appreciation going forward.

With inflation remaining within BI's target range and the Rupiah exchange rate fundamentally positioned at an undervalued level, pressures on macroeconomic stability remain manageable. This condition provides room for Bank Indonesia to adopt a more accommodative monetary policy stance to support economic growth. Throughout 2025, BI reduced the BI-Rate by 125 basis points (bps), from 6.00% to 4.75%. This monetary easing policy was aimed at lowering financing costs, encouraging credit expansion, and strengthening the transmission of monetary policy to the real sector, while maintaining exchange rate and financial system stability.

From the fiscal perspective, the government's policy stance in 2025 was primarily directed as an economic buffer. Its main focus was to safeguard purchasing power and support household consumption, particularly among groups experiencing income pressures. Toward the end of 2025, the government introduced additional stimulus of around IDR48 trillion. This support was delivered through social assistance programs, labor-intensive programs, and various employment incentives. While the direct impact of the stimulus on growth may be limited and highly dependent on the speed of its implementation, overall fiscal policy continues to play an important role in maintaining domestic demand and preventing a deeper slowdown.

Furthermore, in light of these developments, Indonesia's economic growth projection for 2025 expected to be relatively stronger than the initial projection at the beginning of the year, supported by maintained macroeconomic stability and improving momentum in the second half of 2025. The BRI Leading Economic Index (LEI) has also begun to show signs of recovery since August 2025, although its level remains slightly below the historical average, indicating that the improvement in economic momentum is gradual and not yet fully robust.

In 2026, Indonesia's economic growth is projected to strengthen gradually to the range of 5.1%–5.3%. This improvement is supported by monetary policy easing, both globally and domestically, as well as continued fiscal support through various strategic government programs. However, several risks remain to be monitored, including elevated global uncertainty, pressures on the purchasing power of lower- to middle-income groups, and potential volatility in financial markets. If policy coordination remains solid and domestic demand continues to improve, Indonesia's economy is expected to maintain positive growth and sustain its long-term resilience.

Indicator	2025	2024	2023	2022

## Banking Industry Analysis

Amid persistent uncertainty in both global and domestic macroeconomic conditions—characterized by elevated benchmark interest rates, particularly in the United States, and expectations that such conditions may persist longer than previously anticipated—the Indonesian banking industry continued to demonstrate stable and resilient performance.

As of December 2025, total assets of the banking industry reached IDR13,646.42 trillion, increasing by IDR1,185.46 trillion or 9.51% year-on-year (yoy). This growth was primarily driven by total loans, which expanded by IDR862.41 trillion, or 11.01% yoy, reaching IDR8,693.97 trillion. This growth indicates that credit demand in Indonesia remained strong despite ongoing economic and political uncertainties. On the funding side, third-party funds also recorded solid growth. As of December 2025, total third-party funds in the banking industry amounted to IDR10,057.54 trillion, increasing by IDR1,220.30 trillion or 13.81% yoy. This growth was mainly supported by current accounts, which increased by IDR524.81 trillion or 19.07% yoy.

In 2025, credit quality also showed improvement, as reflected in the Non-Performing Loan (NPL) ratio, which stood at 2.05% in December 2025, improving from 2.08% in December 2024. The NPL level also remained well below the regulatory threshold of 5%.

Uncertainty in global macroeconomic conditions, combined with relatively weak purchasing power—particularly in the mass market segment—also contributed to volatility in banking liquidity conditions, especially during the first half of 2025. Nevertheless, liquidity conditions improved in the second half of 2025, supported by several factors, including the placement of Excess Budget Balance (Saldo Anggaran Lebih/SAL) funds amounting to IDR200 trillion with Himbara banks, the acceleration of the government's strategic programs, the provision of stimulus packages to encourage economic growth and strengthen purchasing power, as well as Bank Indonesia's more expansionary monetary policy, as reflected in lower interest rates and the declining yield of Bank Indonesia Rupiah Securities (SRBI) auctions. The improvement in liquidity conditions was reflected in the Loan-to-Deposit Ratio (LDR) of 85.35%, declining from 88.57% recorded in the same period of the previous year.

From a profitability perspective, tighter liquidity conditions also contributed to a decline in the Net Interest Margin (NIM), although it remained relatively strong at 4.56% as of December 2025. Nevertheless, the banking industry continued to record solid net profit of IDR262.2 trillion, increasing by 2.74% or IDR7.0 trillion compared to December 2024. The industry's ability to maintain profitability was also reflected in a relatively strong Return on Assets (ROA) of 2.51%.

Amid ongoing economic uncertainty, the banking industry continues to maintain a strong capital position. This is reflected in a high Capital Adequacy Ratio (CAR), which stood at 25.89% as of December 2025, although slightly lower than 26.69% recorded in December 2024.

## Analysis of BRI'S Position In The Banking Industry

As a comparison of BRI's performance against the banking industry, the following presents a detailed overview of BRI's growth performance compared with the banking industry average.

**Table of BRI Growth Performance Compared to Banking Industry**

(Bank Only, in % yoy)

Performance	Banking Industry (December 2025)	BRI (December 2025)
Assets	9.5%	<b>5.0%</b>
Loans	9.6%	<b>10.4%</b>
Third-Party Funds	13.8%	<b>7.3%</b>
Demand Deposits	19.1%	<b>19.7%</b>
Savings Deposits	8.2%	<b>7.8%</b>
Time Deposits	14.3%	<b>(3.7%)</b>
Net Interest Income	4.6%	<b>0.8%</b>

Source: BRI Financial Statements, December 2025; Indonesian Banking Statistics, Financial Services Authority (OJK), December 2025.

## Management Discussion and Analysis on Bank Performance

As of December 2025, BRI's bank-only loan portfolio reached IDR1,342.7 trillion, growing 10.4% compared to the same period in the previous year, and remained higher than the banking industry growth of 9.6%. BRI's commitment as an MSME-focused bank continues to be reflected in the composition of its loan portfolio, which remains dominated by the MSME segment, while growth in the corporate segment was also supported by contributions to the government through the distribution of financing for various government programs.

At the same time, BRI's Third Party Funds (DPK) reached IDR1,460.1 trillion, representing a growth of 7.3%, slightly below the banking industry's growth of 13.8%. The relatively lower growth in DPK compared to the industry reflects BRI's strategy to continuously strengthen its liability structure by focusing on the growth of Current Account and Savings Account (CASA), in line with BRI's Retail Funding Transformation strategy aimed at lowering the cost of funds. BRI's CASA recorded significant growth of 12.7%, enabling

the Bank to achieve a CASA ratio of 70.89%, the highest level in its history. The efficiency of the liability structure is also reflected in BRI's time deposits, which declined by 3.7%, while time deposits in the banking industry grew by 14.3%. The optimization of the liability structure, coupled with strong loan growth, enabled BRI to maintain an optimal Loan to Deposit Ratio (LDR) of 91.96%, higher than the industry level of 85.35%.

In terms of asset quality, BRI recorded a Non-Performing Loan (NPL) ratio of 3.29%, slightly higher than the banking industry average of 2.05%, in line with the Bank's efforts to resolve problematic assets, particularly in the micro segment, which was also affected by weakening purchasing power in 2025. Nevertheless, BRI continued to record solid profitability with a Return on Assets (ROA) of 2.64%, higher than the banking industry average of 2.51%. In addition, BRI maintained a strong capital position, with a Capital Adequacy Ratio (CAR) of 21.06%, well above the minimum regulatory requirement.

**Table of Comparison of BRI's Financial Ratios with the Banking Industry**

(Bank Only, in %)

Ratio Performance	BRI (December 2025)	Banking Industry (December 2025)
Current Account and Savings Account (CASA) Ratio	<b>70.89%</b>	63.24%
Capital Adequacy Ratio (CAR)	<b>21.06%</b>	25.89%
Non Performing Loan (NPL) Gross	<b>3.29%</b>	2.05%
Return on Assets (ROA)	<b>2.64%</b>	2.51%
Loan to Deposits Ratio (LDR)	<b>91.96%</b>	85.35%

# Operational Review

## Bank's Strategic Plan

In the midst of tenacious global indecision due to rising geopolitical risks and the dynamics of international trade policies, the global economy demonstrated greater resilience throughout 2025 compared to initial projections. Improved global economic growth in Quarter 2 of 2025, supported by a disinflationary trend and a more accommodative global monetary policy stance, contributed to relatively more conducive financial market conditions. Nevertheless, various global risks still required careful monitoring as they had the potential to impact the future economic growth prospects.

At the national level, Indonesia's economy was projected to grow relatively steadily in the 5.0% range by 2025, with household consumption and investment remaining the key drivers of economic growth. However, the quality of growth was hindered by several challenges, particularly in terms of purchasing power among lower-middle-class households. Controlled inflation and the relaxation of monetary policy provided a space for the banking sector to further optimize its intermediation function, while government fiscal policy played a crucial role in maintaining public purchasing power and stabilizing domestic demand.

Throughout 2025, considering these dynamics, BRI implemented an adaptive and measurable strategy to maintain sound and sustainable business growth. The Company focused on strengthening its business fundamentals through sound funding structure management, selective and quality credit growth, and disciplined risk management. Correspondingly, transformation and strengthening of internal capabilities were continuously conducted across key business segments, such as Micro, SME, Consumer, and Subsidiaries, to respond to the dynamics of customer needs and evolving market opportunities.

Furthermore, BRI consistently optimized growth opportunities stemming from domestic demand and business ecosystem development, supported by the utilization of digital technology, improved service quality, and strengthened human resource capabilities. At the same time, the Company maintained operational efficiency and the implementation of good corporate governance as the key foundation for maintaining long-term performance sustainability.

Through the implementation of this strategy, BRI strived to maintain a balance between growth, quality, and business resilience during 2025, so it created sustainable added value for stakeholders amidst a continuously evolving and dynamic economic landscape.

The Bank's Strategic Plan encompasses a comprehensive long-term strategy (corporate plan) and medium and short-term strategies (business plan), explained as follows

### Long-Term Strategy

In 2025, BRI implemented its long-term strategy under the Corporate Plan 2025–2029, reinforced by a transformation agenda through the strengthening of its business fundamentals, namely BRIVolution Reignite. This transformation is directed through two main focus areas. First, Transform the Funding Franchise, which aims to position BRI as a leading funding bank in Indonesia. This initiative is pursued through strengthening CASA across all segments, optimizing BRImo and digital channels, enhancing the effectiveness of e-channels, as well as refreshing the Bank's branding to reinforce BRI's perception as the primary transaction bank for both individuals and business actors.

Second, Revamp Existing Core and Build New Core, which focuses on creating sustainable and profitable loan growth. This initiative includes the revitalization of micro banking, as well as the strengthening of consumer lending and the commercial segment.

All transformation initiatives were supported by the rebuilding of world-class foundations, encompassing the strengthening of human capital, the implementation of prudent and integrated risk management, the enhancement of information technology and infrastructure, as well as rebranding and the refinement of distribution and operational functions to ensure effective execution, business resilience, and the creation of long-term value for all stakeholders.

Furthermore, BRI is currently undertaking the alignment of its Long-Term Plan (RJP) 2026–2030, which will serve as the foundation for the Company's transformation direction in the next phase. This alignment process is carried out to ensure that BRI's strategy remains relevant and adaptive to macroeconomic

dynamics, developments in the financial services industry, as well as shareholders' expectations. Through the formulation of this long-term plan, BRI is committed to strengthening its competitiveness and maintaining sustainable growth, while continuously creating long-term value for all stakeholders.

## Short and Medium Term Strategy

BRI's medium-term strategy is formulated as part of the Company's ongoing commitment to maintaining healthy, balanced, and sustainable business growth amidst the ever-evolving economic dynamics and banking industry. The strategic direction focuses on strengthening business fundamentals, increasing quality profitability, and enhancing organizational capabilities to ensure the Company's long-term sustainability of its performance and performance competitiveness.

Considering the dynamics of the external and internal environment, the Company must always be adaptive and responsive in dealing with various challenges, while capably optimizing available business opportunities. In doing so, in the short- and medium-term period of 2025–2027, the Company has set a strategic direction focused on strengthening the liability structure, strengthening and refining the core business, especially in the Micro segment, as well as developing new capabilities and sources of growth in the Consumer and Commercial segments.

The implementation of this short- and medium-term strategy is supported by strengthening the Company's key enablers, particularly in the areas of network and distribution, human resources, and risk management. This strengthening of these enablers is further elaborated through a series of strategic initiatives as follows:

1. **Transform the Funding Franchise**
  - a. Solidifying the role and function of regional office supervision to increase the productivity of branch offices and relationship managers.
  - b. Improvement and modernization of transaction banking capabilities in the retail and wholesale segments.
  - c. Developing a customer base in the emerging affluent segment as a source of sustainable funding growth.
  - d. Strengthening cross-segment collaboration and synergy with Subsidiaries to increase value chain penetration and optimize the Group's added value.
2. **Revamp The Existing Core and Build A New Sustainable Core**
  - a. Reviewing and refining micro-business models with an emphasis on asset quality control.
  - b. Affirming the Company's position in the payroll business, and developing pawn and bullion services.
  - c. Strengthening risk management in the small segment, increasing productivity in the medium and commercial segments, and accelerating commercial business development.

### 3. Build A World Class Foundation

- a. Enhancement of the distribution model through the interaction framework between regional offices and branch offices, evaluation of the managerial capabilities of regional offices, as well as realignment of priorities and business processes.
- b. Comprehensive human resource transformation that includes competency model development, recruitment process improvement, performance management, mentorship programs, and capability enhancement.
- c. Consolidation end -to-end corporate risk management through the development of credit risk monitoring models and systems, strengthening operational controls, strengthening risk culture, and enhancing digital and cyber risk management capabilities.

The Company's entire strategy is focused on five key business pillars: Micro, Commercial, Consumer, Corporate, and Retail Funding. The implementation of these strategies in each pillar is supported by a simplified organizational structure and operational centralization, a comprehensive transformation of human resources, firming integrated risk management, and increasing the productivity and effectiveness of the work network.

A summary of the Company's 2025-2027 business development strategy is presented as follows:

- a. **Micro**

The strategy focuses on maintaining market share and profitability by refining the micro-business model to remain relevant to dynamic customer needs. This effort is being implemented through strengthening the capabilities and leadership of marketing staff, managing high-quality pipelines, and implementing increasingly disciplined loan risk management. Acceleration of the development of the pawn and gold businesses integrated within the BRI Group ecosystem as a source of sustainable growth.
- b. **SME**

The strategy focuses on measurably increasing market share through optimizing territorial strategies and value chain-based acquisitions, using a loan-follow-transaction approach.
- c. **Consumer**

The strategy focuses on selective and quality consumer credit growth through strengthening payroll-based financing, developing mortgage (KPR) and vehicle loans (KKB) businesses, and accelerating the development of pawn and gold businesses integrated into the BRI Group ecosystem as a source of sustainable growth.
- d. **Wholesale**

The strategic focus is the development of corporate financing that can create added value and support the business ecosystem of other segments, as well

as transforming transaction banking services by strengthening cash management capabilities, digital trade finance, and treasury services to increase the contribution of transaction-based businesses.

**e. Retail Funding and Transaction**

The focus of the Retail Funding and Transaction strategy is directed at strengthening the sustainable retail funding

base through increasing CASA contributions and transaction activities, by optimizing the payroll business, marketing capabilities, and productivity, utilizing digital channels, mainly BRImo as a super app, and strengthening BRI Group synergy to expand the funding ecosystem and cross-selling opportunities amidst external and internal challenges faced by the Company.

## Marketing Aspect

### Marketing Strategy

To perform a sustainable effort to improve business performance in terms of revenue, fundraising, and loan disbursement, BRI consistently implemented an Integrated Marketing Communication strategy across channels and segments, both at digital and physical interaction points. Marketing activities were not only focused on one-way communication, but were developed into a brand experience that allowed customers to interact directly with the products, services, and values offered by BRI. Through a measured and experience-based marketing approach, BRI had successfully maintained a competitive position in various product categories and continuously strengthened brand equity.

Meanwhile, conducting its marketing approach to customers, BRI has communicated through various channels. One of the communication channels that had been used was organizing events and marketing activities. These activities not only function as a means of increasing acquisition and transactions, but also as a strategic instrument in building loyalty and long-term relationships with customers. This approach was designed as a means of promoting BRI products and services, as well as an experiential touchpoint that strengthens brand awareness, consideration, and engagement for both existing and prospective customers.

Through relevant and valuable direct experiences, this strategy was aligned with the customer life journey and supports BRI's long-term sustainability and business growth agenda. This approach strengthened the role of events as a strategic medium in building emotional closeness, increasing product understanding, and encouraging active customer involvement.

As part of its marketing performance management and evaluation, BRI consistently monitors its Customer Touch Point research or Brand Health Tracking (BHT). This research serves as the basis for measuring the effectiveness of marketing communications activities, including events and marketing activities, on perceptions, image, and level of interest in the brand. BRI's products, services, and service brands across various segments. The evaluation results are used to ensure that every marketing activity remains relevant to the dynamics of customer needs and the evolving competition in the banking industry.

Synchronously, during 2025, BRI held a series of flagship events designed to reach the MSME and consumer segments in a more focused and impactful manner, which were part of BRI's 2025 programs, as follows:

**1. BRI UMKM EXPO(RT) 2025**

The 2025 BRI UMKM EXPO(RT) was held as a strategic platform to strengthen BRI's role in driving the growth of national MSMEs. This event was designed not only as an exhibition of MSME products but also as an experiential touchpoint connecting businesses, consumers, and BRI financial solutions within a single and integrated ecosystem.

As part of its efforts to expand market access and encourage the increase in the scale of MSME businesses, BRI optimized the implementation of the 2025 BRI UMKM EXPO(RT) through a structured and results-oriented business matching program. This program brought together more than 1,000 MSMEs fostered by BRI with 560 potential buyers from 34 countries, including buyers from both domestic and international markets, opening up opportunities for broader cross-border trade cooperation. This reflected the effectiveness of BRI's role as an enabler in connecting MSMEs with global market access, while strengthening BRI's position as a bank that

not only provided financing but also supported export acceleration and the sustainability of MSME businesses.

In terms of participation and transaction activity, the 2025 BRI UMKM EXPO(RT) also recorded high visitor enthusiasm, with a total of 69,440 on-site visitors. This high number of visitors contributed to brand strengthening and engagement, and significantly increased transactions and the economic turnover of MSMEs during the event.

Overall, the achievements in business matching, potential dealing, and visitor and sales performance underscored the strategic role of the 2025 BRI UMKM EXPO(RT) as a marketing activation tool that directly impacted MSME business growth. This event was an integral part of BRI's strategy to strengthen the national MSME ecosystem, encourage exports, and create sustainable added value for customers and the Indonesian economy.

## 2. BRI Consumer Expo

The 2025 BRI Consumer Expo was an integrated event designed to present BRI financial solutions relevant to customers' lifestyle needs and financial cycles. The event was designed as a one-stop financial experience, connecting BRI's financing products, savings, and transaction services into a single, easily accessible ecosystem for both customers and prospective customers.

Through the 2025 BRI Consumer Expo, BRI provided visitors with a hands-on experience to learn about, compare, and utilize a variety of superior consumer products. This approach aimed to increase brand awareness, consideration, and purchase intention, while strengthening BRI's positioning as a solution-oriented, competitive, and adaptive bank that addressed consumer

needs across various life stages. This event also served as a strategic tool to drive new customer acquisition and deepen relationships with existing customers.

The 2025 BRI Consumer Expo was held in several major cities serving as centers of economic and consumer activity, such as Jakarta, Bandung, and Surabaya. In addition, this activity is also carried out at the Marketing Gallery of BRI's partner developers, including Agung Sedayu Group, Sinarmas Land, Podomoro Group, Ciputra Group, as well as Marketing Galleries in 13 other cities. The selection of these cities reflected BRI's strategy of bringing financial solutions closer to potential consumer segments in urban areas with high levels of financing and transaction needs. Through a physical presence in various cities, BRI confirmed product familiarity while increasing the effectiveness of direct marketing communications to target audiences.

To increase the attractiveness and encourage the realization of transactions during the event, BRI presented several financing and transaction promotion programs, including:

1. KPR BRI program offered special interest rates to support customers' housing ownership needs.

2. Automobile Loan Program (KKB) with competitive and affordable vehicle financing solutions.
3. The Travel Hot Deals program supported customers' travel needs through transactions using BRI products and payment instruments.

A series of programs was designed to directly encourage purchasing decisions while affirming the utilization of BRI's financing products and transactions. Through the 2025 BRI Consumer Expo, BRI successfully exhibited the effectiveness of events as a marketing activation tool that

could increase engagement and brand consideration, and made a real contribution to the growth of BRI's consumer financing business.

Apart from the foregoing programs, BRI actively performs a range of initiatives designed to boost awareness, consideration, conversion, and loyalty to customer across various segments, in the form of activation activities and campaigns delivered through mass media, social media, digital platforms, and other channels to effectively reach the target audience for each product.

## Market Share

BRI's position compared to the banking sector can be evaluated from the total asset, the total amount of third-party funds, and the total of the disbursed loans.

Table of BRI's Market Share compared to Banking Industry

(bank only, in IDR billion)

Description	Information	December 2025	December 2024	Growth yoy (%)
Assets	Banking Industry	13,646,417	12,460,955	9.5%
	BRI	1,931,536	1,840,395	5.0%
	<b>Market Share (%)</b>	<b>14,15%</b>	<b>14,77%</b>	
Loan	Banking Industry	8,693,972	7,831,558	11.0%
	BRI	1,342,674	1,215,847	10.4%
	<b>Market Share (%)</b>	<b>15,44%</b>	<b>15,52%</b>	
Third Party Funds	Banking Industry	10,057,543	8,837,242	13.8%
	BRI	1,460,089	1,360,134	7.3%
	<b>Market Share (%)</b>	<b>14,52%</b>	<b>15,39%</b>	

Source: BRI Financial Statements, December 2025; Indonesian Banking Statistics, Financial Services Authority (OJK), December 2025.

As of December 2025, BRI's total assets reached IDR1,931.5 trillion, representing 5.0% year-on-year growth, slightly below the banking industry asset growth of 9.5% year-on-year. Nevertheless, BRI continued to maintain a strong market share of 14.15%.

During the same period, BRI's total loans grew by 10.4% year-on-year to IDR1,342.7 trillion, broadly in line with the banking industry's loan growth of 11.0% year-on-year, which reached IDR8,694.0 trillion, allowing BRI to maintain a solid market share of 15.44%.

From a funding perspective, BRI's Third-Party Funds (TPF) amounted to IDR1,360.1 trillion, growing 7.3% year-on-year, below the banking industry growth of 13.8%, which reached IDR10,057.5 trillion. As a result, BRI's market share slightly declined to 14.52%. The relatively lower growth in third-party funds compared to the industry was driven by BRI's focus on CASA growth, which reached IDR1,035.0 trillion, increasing 12.7% year-on-year, thereby raising BRI's CASA ratio to 70.89%, up from 67.54% in 2024 and marking the highest level in the Bank's history. Meanwhile, the banking industry CASA ratio stood at 63.24%, slightly declining compared to 63.39% in 2024.

## Customer Complaint Handling

In addition to effective marketing strategies, customer engagement needs to be continuously maintained and improved as an effort to improve customer experience for the services provided, which is expected to drive BRI's business growth. BRI continues to strive to maintain consistent customer-centric services through standardizing service quality across its entire network, including complaint management services that are ready to provide business services and business support for business units to resolve customer complaints with 24-hour operational hours, 7 (seven) days a week through the Contact BRI service.

Customer convenience in accessing BRI Contact services is the focus of improvement in improving BRI Contact services, by developing a self-service complaint menu, namely by presenting a Help Center that can be accessed through the BRImo application and the BRI Virtual Assistant "Sabrina" via the WhatsApp application at 0812 1214 017. In addition, BRI has also presented a toll-free Voice Over Internet Protocol (VOIP)-based service through the BRImo application for customers to serve complaint handling that can be accessed by customers and the public.

BRI continuously improves its business processes and customer complaint resolution speed by implementing Artificial Intelligence (AI) and Robotic Process Automation (RPA) to monitor the Service Level Agreement (SLA). Since 2024, BRI has also introduced Customer Handling Management innovations to enhance complaint handling quality, focusing on people, processes, and systems. On average, the Average Handling Time (AHT) for complaints has improved by 11%, and the Service Level Agreement (SLA) response time has accelerated by 22%. The First Contact Resolution (FCR) rate, where complaints are resolved immediately on the first attempt or First Contact Resolution (FCR), increased by 3% compared to the pre-implementation period. From the customer's perspective, surveys indicate that the willingness to recommend BRI's complaint handling or Net Promoter Score (NPS) services increased by 9.64%, while customer satisfaction with complaint resolution services or Customer Satisfaction Index (CSI) improved by 7.87% following the implementation

BRI presents Sabrina as part of its conversational banking initiative with expanded capabilities, so that it not only acts as a Virtual Assistant but also acts as a Virtual Relationship Manager (Virtual RM) in supporting account management and fulfilling customers' banking needs comprehensively. Supported by Large Language Model (LLM) technology, Sabrina provides integrated services that include creating

and checking complaint status, checking account balances and mutations, checking credit card limits and bills, service reservations at BRI Branch Offices, and providing information on ATM locations, Branch Offices, and BRILink Agents. Furthermore, Sabrina also acts as an entry point for sales activities through the facility of submitting and checking the status of credit card applications, as well as delivering product recommendations and promotional programs from BRI merchants. During 2025, Sabrina served 45% of interactions from all BRI Contact channels with a user satisfaction level of 87.37%.

BRI's efforts to maintain service quality consistency in meeting various customer transaction needs have been recognized in the "Bank Service Excellence Monitor (BSEM) 2025" survey. This survey, conducted by MRI Research Institute in collaboration with Infobank Magazine, highlights improvements in several aspects of BRI's services as follows:

1. The Best Conventional Bank in Service Excellence for 15 Consecutive Years (Diamond)
2. The Best Conventional Bank in Service Excellence for 5 Consecutive Years (Golden)
3. The Best Conventional Bank in Service Excellence - Digital Channel
4. The Best Conventional Bank in Service Excellence - E-mail
5. The Best Conventional Bank in Service Excellence - Live Chat
6. The 2<sup>nd</sup> Best Conventional Bank in Service Excellence
7. The 2<sup>nd</sup> Best Conventional Bank in Service Excellence - Contact Center
8. The 2<sup>nd</sup> Best Conventional Bank in Excellence - Digital Branch
9. The 2<sup>nd</sup> Best Conventional Bank in Excellence - Chatbot
10. The 2<sup>nd</sup> Best Conventional Bank in Excellence - Call Center
11. The 2<sup>nd</sup> Best Conventional Bank in Excellence - Social Media

In addition, to encourage service innovation both individually and organizationally in providing the best complaint services, BRI also actively participates in the Contact Center competition both at the Asia Pacific and National levels. In The Best Contact Center Asia Pacific Competition, BRI won a Bronze medal for the Technology Innovation category. Meanwhile, in The 2025 Indonesian Best Contact Center, BRI achieved the Runner Up with the acquisition of 43 medals consisting of: 12 (twelve) Platinum medals, 15 (fifteen) Gold medals, 10 (ten) Silver medals, and 6 (six) Bronze medals.

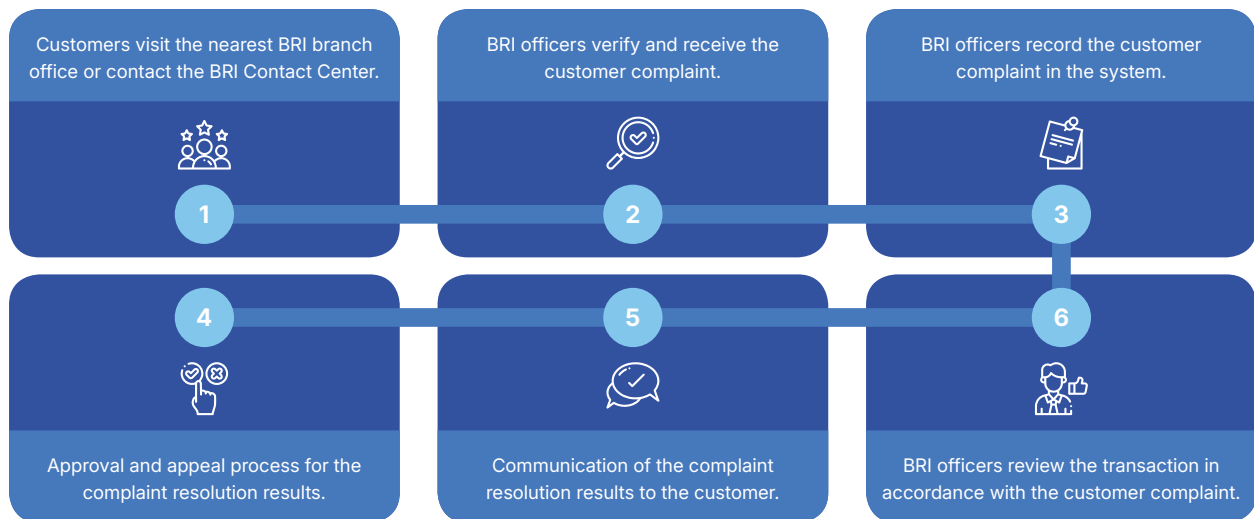

To manage customer complaints, BRI follows established procedures to provide fast, accurate, and satisfactory solutions to customers. In 2025, BRI resolved customer complaints as follows:

**Table of Complaint Management Publication in 2025**

No	Type of Financial Transactions	Completed		On Process		Not Completed		Total Complaints
		Total	Percentage	Total	Percentage	Total	Percentage	
1.	Credit Card	3,387	99.62%	13	0.38%	0	0.00%	3,400
2.	Other Bank Products/ Services	1,729	99.94%	1	0.06%	0	0.00%	1,730
3.	Deposits	46,164	100.00%	2	0.00%	0	0.00%	46,166
4.	ATM/CRM	647,196	100.00%	7	0.00%	0	0.00%	647,203
5.	E-banking	561,390	99.95%	268	0.05%	0	0.00%	561,658
6.	Non-Collateral Loans	1,254	99.44%	7	0.56%	0	0.00%	1,261
7.	Loans (Working Capital, Investment, Consumer)	856	99.88%	1	0.12%	0	0.00%	857
<b>Grand Total</b>		<b>1,261,976</b>	<b>99.98%</b>	<b>299</b>	<b>0.02%</b>	<b>0</b>	<b>0.00%</b>	<b>1,262,275</b>

To provide an optimal service experience, BRI has successfully resolved 99.98% of all customer complaints from the total number of complaint tickets. For tickets still in process, BRI is committed to ensuring their resolution in accordance with the Service Level Agreement (SLA) and compliance with consumer protection regulations. Therefore, BRI will continue to strive to deliver the best services to customers by maintaining speed and quality in complaint resolution.

Customer complaints will be processed according to the following flow:

BRI has established standard procedures for managing customer complaints, which are implemented in a structured, transparent, and effective manner. At each stage of complaint handling, BRI implements a Service Level Agreement (SLA) as a service promise and a commitment to ensuring that follow-up and resolution of complaints are carried out in a timely, measurable manner, and in accordance with applicable regulations.

The complaint process begins with the customer submitting the complaint through the nearest BRI office or through

the BRI Contact service. Next, officers conduct an initial verification to ensure the completeness of the information and the validity of the complaint. Once the complaint is deemed complete, officers record and document the complaint in the Customer Relationship Management System. Based on the verification and analysis results, officers then take steps to resolve the complaint in accordance with established provisions, procedures, and SLAs. Once the resolution process is complete, the results of the complaint handling are communicated to the customer in a clear and timely manner. As part of its efforts to improve service quality, BRI also

receives and follows up on customer feedback regarding the resolution of complaints submitted.

During the resolution process, customers may either agree or disagree with the complaint resolution outcome:

- If they agree, the complaint is considered resolved.
- If they disagree, they can appeal the complaint resolution to BRI.
- If the customer remains dissatisfied after the appeal process, they may seek resolution through court or

out-of-court settlements. Out-of-court resolutions can be conducted through mediation or arbitration with the Regulator, the Financial Services Sector Alternative Dispute Resolution Institution (LAPS SJK), or other relevant institutions.

Customer complaints will be resolved within the designated timeframe, provided that all supporting documents have been fully received by BRI.

**Table of Types and Timeframes for Complaint Resolution**

Types of Complaints	Complaint Resolution Timeframe
Verbal Complaints	<p><b>5 (five) business days.</b></p> <p>Notes:</p> <ul style="list-style-type: none"> <li>• Requests for information regarding products and/or services used by the customer and/or BRI's internal policies on provided products/services.</li> <li>• Customer complaint procedures.</li> <li>• Other relevant product/service information that customers need to know</li> </ul>
Written Complaints	<p><b>10 (ten) business days .</b></p> <p>The resolution period may be extended by an additional 10 business days if:</p> <ul style="list-style-type: none"> <li>• The BRI branch receiving the complaint is different from the branch where the issue occurred.</li> <li>• The complaint requires a special review of BRI documents.</li> <li>• Other circumstances beyond BRI's control affect the resolution process</li> </ul>

Resolution of complaints beyond the above time frame may be carried out by BRI if:

- The complaint resolution requires follow-up by another party; and/or
- The follow-up conducted by another party affects the complaint resolution time frame by BRI.

If BRI requires supporting documents for a complaint submitted verbally by the customer, BRI has the right to request the customer to submit the complaint in writing along with the necessary supporting documents.

BRI will handle written complaints if the customer has completed the supporting documents, including:

- a. Customer/representative identification, which must at least include:
  - Full name of the customer and/or customer representative;
  - Residential address as stated in the customer and/or representative's identification document, and any other residential address (if applicable); and
  - Contact phone number of the customer and/or representative.
- b. Type and date of the transaction;
- c. The issue being reported;
- d. Other documents, such as a power of attorney (if the customer authorizes a representative to handle the complaint) or any documents directly related to the reported issue.

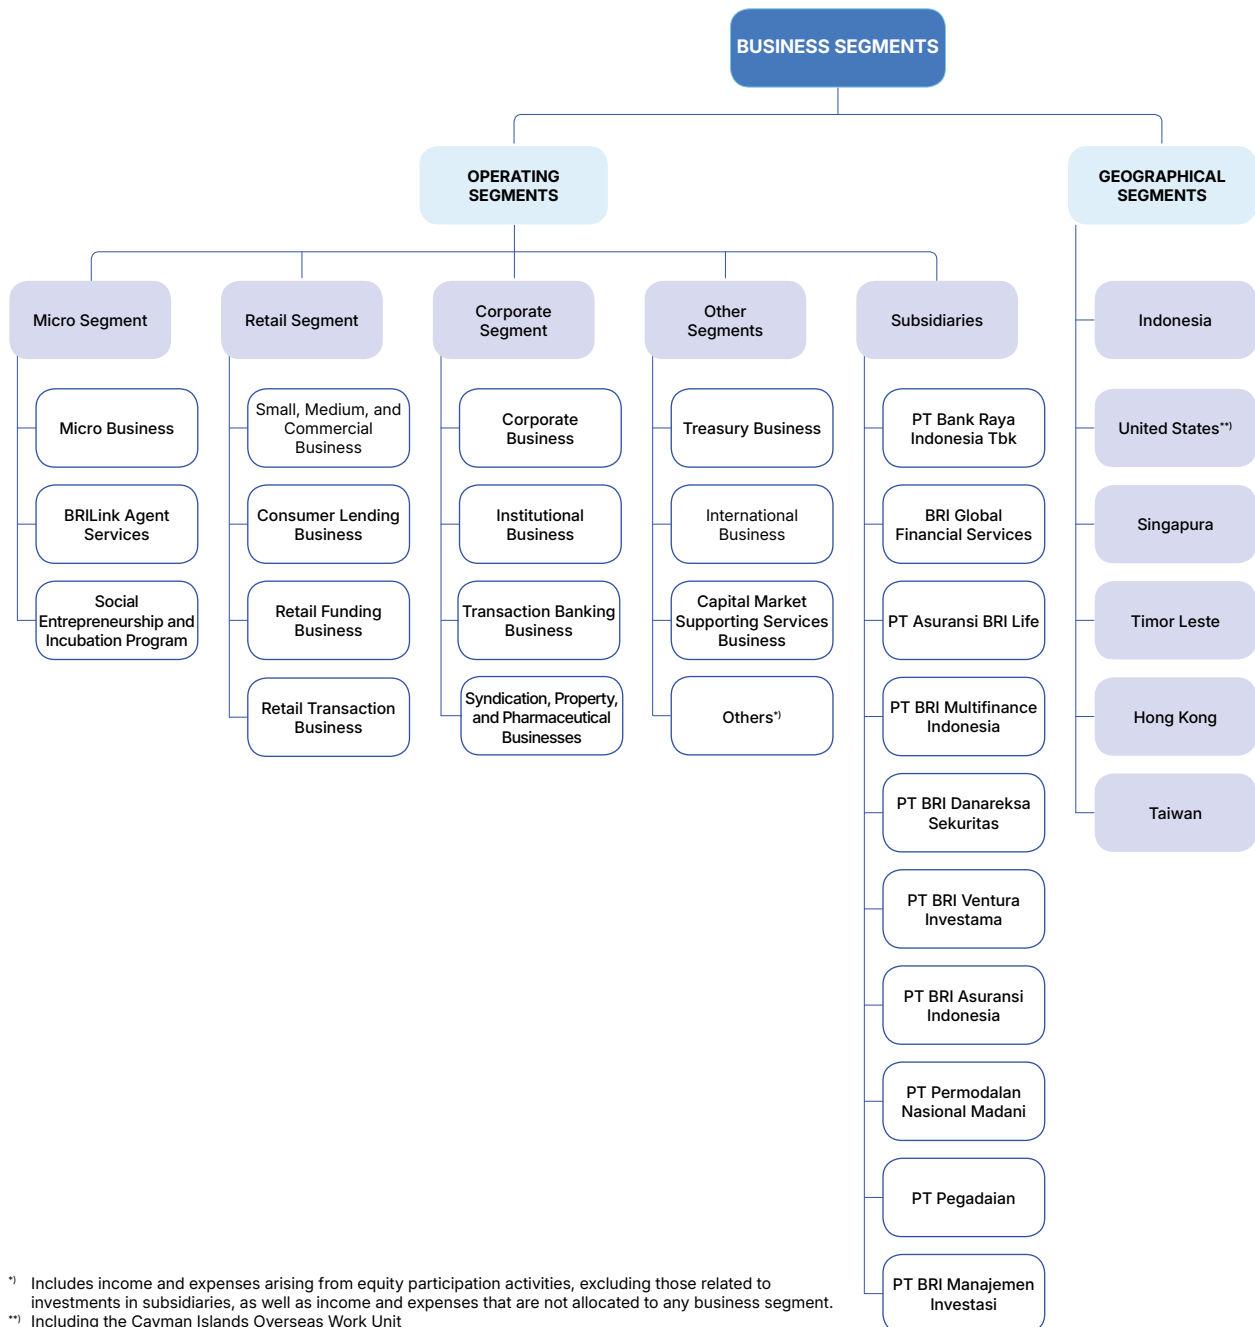

BRI has the right to refuse to handle customer complaints if:

- a. The customer does not complete the required supporting documents within the specified timeframe.
- b. The complaint has already been resolved by BRI. A resolved complaint includes:
  - Complaints that have reached an agreement; or
  - Complaints that did not reach an agreement.
- c. The complaint is not related to any actual or potential material loss that is reasonable and directly stated in the agreement and/or transaction documents.
- d. The complaint is not related to BRI's products and/or services, except in cases of collaboration with other parties.
- e. The complaint is currently being processed or has already been ruled on by a civil court.

## Operational Review Per Business Segment

A segment refers to a distinct portion of BRI and its subsidiaries that either focuses on delivering a specific product (operating segment) or offers a product within a particular economic context (geographical segment), with associated risks and returns that differ from those of other segments. BRI and its subsidiaries classify their business segments according to consolidated internal reports presented to the operational decision maker, specifically the Board of Directors. BRI has recognized and shared financial data according to its

primary business activities (operating segments), which are categorized into micro, retail, corporate, others, and subsidiaries, along with geographical segments. The geographical segments encompass the supply of goods or services in a distinct economic climate, which poses different risks and returns compared to operating segments in other economic settings. BRI's geographical segments are organized according to regions, including Indonesia, the United States, Hong Kong, Singapore, Timor Leste, and Taiwan.

<sup>1)</sup> Includes income and expenses arising from equity participation activities, excluding those related to investments in subsidiaries, as well as income and expenses that are not allocated to any business segment.  
<sup>2)</sup> Including the Cayman Islands Overseas Work Unit

## Operating Segment

### Operating Segment Explanation and Productivity

For the managerial interest, BRI is disorganized into 5 (five) operational segment based on the following products, as follows:

- Micro Segment
- Retail Segment
- Corporate Segment
- Other Segments
- Subsidiaries

### Micro Segment

The micro segment focuses on serving the needs of banking products and services for individual customers and small-scale entrepreneurs to strengthen community businesses. This micro segment encompasses Micro Business, AgenBRILink Services, and Social Entrepreneurship & Incubation Programs.

#### MICRO BUSINESS PERFORMANCE SUMMARY

Throughout 2025, BRI's Micro Business focused on accelerating asset quality recovery, as well as enhancing business processes, risk management, and human capital empowerment. The gradual recovery process has begun to show positive results and is expected to remain within the targeted trajectory going forward.

The Micro Business remains a key focus for the Company's future business growth. Despite the challenging environment, the micro segment continued to record the largest contribution among all business segments. Going forward, in line with the ongoing improvement process, its contribution to the Company's profitability is expected to become increasingly optimal.

Nevertheless, from a portfolio perspective, the Bank continued to extend loan disbursements to ensure customers maintain access to financial services. Credit disbursement is conducted selectively, while maintaining a balance between expansion and asset quality. This is supported by strengthening the early warning system, controlling collectibility downgrades, and optimizing collection and restructuring efforts to maintain NPL stability and ensure long-term business sustainability.

The 2025 micro segment strategy focused on eight key pillars:

1. Strengthening the credit culture as the foundation for healthy micro business growth, among others through the structuring and control of daily activities as well as the enhancement of human capital quality.

2. Enhancement of business process quality through the digitalization of business processes and the refinement of governance over operational and credit processes.
3. Optimizing Mantri productivity through healthy management ratios and ticket sizes.
4. Firming early collection and downgrade risk control.
5. Ecosystem-based expansion through the integration of PNM, Pegadaian, and MSME Naik Kelas.
6. Developing business clusters and value chain financing.
7. Optimizing BRILink Agents as an extension of financial inclusion services.
8. Increasing digital transaction literacy and penetration in villages and productive communities.

Transforming the ecosystem into a new growth engine through strengthening BRILink Agents, Rumah BUMN (State-Owned Enterprise House), Desa BRILian (BRILian Village), and collaboration across BRI Group entities, which not only expanded access to financing but also encouraged financial literacy, increased digital transactions, and the development of cluster- and community-based MSMEs.

Going forward, the 2026 strategic direction is geared toward healthier and more inclusive growth through strengthening credit governance, improving the quality of productive financing, optimizing the village ecosystem and business clusters, synergizing with ministries and BRI Group, and accelerating the digitalization of business processes to ensure that micro-businesses remain a key pillar of BRI's sustainable growth.

## MICRO BUSINESS

In 2025, BRI's Micro Business performance was focused on accelerating asset quality recovery, accompanied by the revitalization of business processes, enhancement of risk management, and the empowerment of human capital to ensure the long-term sustainability of the micro segment. Nevertheless, amid this process, the Bank continued to ensure that customers maintained adequate access to financial services. Despite the challenging economic conditions, BRI continued to extend credit while adhering to the principles of selectivity and prudence, enabling loan growth to maintain both strong profitability and sound asset quality.

In 2025, BRI recorded Micro loan disbursements totaling IDR284.54 trillion, consisting of Kupedes amounting to IDR105.44 trillion, KUR amounting to IDR158.84 trillion, and BRIGuna Micro amounting to IDR20.26 trillion. This achievement demonstrates BRI's continued presence within the community and its commitment to supporting economic growth, particularly in the micro sector. Going forward, the Bank remains committed to consistently strengthening its role as the primary partner for micro entrepreneurs in Indonesia by continuously providing financial services that are relevant, accessible, and integrated.

Looking ahead, to further enhance granularity in identifying growth potential, BRI will strengthen its measurement tools and monitoring indicators to better understand the conditions and expectations of micro entrepreneurs regarding national economic developments, including the strengthening of the BRI Micro and SME Index (BMSI). This index is used to measure business activity, sentiment, and optimism among MSME players, thereby serving as the basis for the Company in formulating micro business policies and approaches that are more adaptive to evolving economic conditions.

BRI has designed various strategies to increase financial service penetration during 2025, including through the development of a micropayment transaction system. One of the main steps is to collaborate with merchants to encourage the implementation of cashless transactions through the use of BRI's Quick Response Code Indonesian Standard (QRIS) instrument. In line with the continued growth of digital

transactions, BRI provides secure payment solutions for the public. BRI is equipped with the necessary infrastructure readiness to educate the public on non-cash transactions. The Bank is committed to continuously enhancing public literacy on non-cash transactions, particularly through QRIS, in order to further expand the adoption of this integrated payment system. BRI believes that by providing simple and secure payment solutions through QRIS, micro businesses can optimize their business potential, which will contribute to national economic growth and improve people's welfare

In addition, as an enabler to accelerate the achievement of inclusive economic growth, BRI integrated conventional networks, hybrid networks, and digital networks with Holding UMI, through Senyum Co-Location, BRILink Agents, ATM e-channels, and CRMs distributed throughout Indonesia. In 2025, micro business loan products offered to micro customers included Kupedes, BRIGuna Mikro, People's Business Loan (KUR Mikro), and Mortgage Loan Program (KPP).

Products and Services of Micro Business are as follows:

1. **Kupedes**  
It is a general loan with loan as much as IDR500 million per debtor within maximally 120 months that can be used for working capital purpose and/or investment to individual debtor having satisfied the requirements.
2. **KUR Mikro**  
It is a financing facility for newly micro entrepreneur with loan as much as IDR10 million – IDR100 million per debtor that can be Working Capital Loan (KMK) with a maximum loan term of 3 (three) years and/or Investment Loan (KI) with a maximum loan term of 5 (five) years.
3. **Mortgage Loan Program (KPP)**  
This is an investment and/or working capital financing facility provided to micro, small, and medium-sized enterprises, whether individuals or business entities, to support the achievement of priority housing programs. Mortgage Loan Program, distributed to the micro segment, such as loan investment with a loan limit between IDR10 million and IDR500 million.
4. **BRIGuna Mikro**  
It is micro multipurpose loan aimed at the fixed income segment.

Table of Micro Business (Productivity) Performance

Description	2025	2024	Growth	
			IDR	%
(1)	(2)	(3)	(4) = (2)-(3)	(5) = (4)/(3)
<b>Outstanding (OS) Loans</b> (in IDR billion)	<b>470,772</b>	<b>491,220</b>	<b>(20,448)</b>	<b>(4.16%)</b>
Kupedes	175,595	200,223	(24,628)	(12.30%)
KUR Mikro	235,389	231,294	4,095	1.77%
BRIguna Mikro	59,787	59,703	84	0.14%
<b>Debtors</b> (in million people)	<b>12,39</b>	<b>13,08</b>	<b>0,68</b>	<b>(5.24%)</b>
Kupedes	3,94	4,50	0,57	(12.39%)
KUR Mikro	8,02	8,11	0,09	(1.16%)
BRIguna Mikro	0,43	0,46	0,03	(7.12%)

In 2025, the outstanding loans of BRI's Micro Business reached IDR470.77 trillion, remaining the largest among all business segments within BRI in nominal terms. Kupedes recorded outstanding loans of IDR175.60 trillion with a total borrower base of 3.94 million customers. Meanwhile, KUR recorded outstanding loans of IDR235.39 trillion, serving 8.02 million borrowers, followed by BRIguna, a payroll-based lending product, which recorded outstanding loans of IDR59.79 trillion with nearly half a million borrowers under management.

From an asset quality perspective, in 2025 BRI continued to accelerate the resolution of non-performing loans, as reflected in the increase of the Non-Performing Loan (NPL) ratio from 2.85% in 2024 to 3.93% in 2025. Nevertheless, initiatives aimed at improving credit quality have begun to show positive results, as reflected in the Special Mention Loan (SML) ratio, which declined from 6.20% in 2024 to 5.60% in 2025. This improvement represents a positive signal that the strategies and initiatives implemented have gradually delivered favorable outcomes in enhancing credit quality.

Overall, despite ongoing asset quality improvement initiatives, the alignment of business processes, and the challenging economic environment, the Micro segment continued to record solid profitability, accompanied by sustained improvements that continue to deliver positive outcomes. Going forward, the Micro segment is expected to

further increase its contribution to BRI, while simultaneously strengthening its contribution to the broader community.

#### Micro Business Strategy in 2025

Microbusiness is BRI's core competency, built sustainably through long experience, an extensive service network, and human resource capabilities that reach down to the closest level to business actors. Amidst ever-changing and increasingly complex economic dynamics, future microbusiness management demands a more disciplined, adaptive, and sustainability-oriented approach. Changing customer behavior, the rise of alternative technology-based financial services, and the demand for quality growth are driving BRI to comprehensively strengthen the fundamentals of its microbusiness.

In line with its micro-business development direction, which focuses on sound and sustainable growth, BRI established the 2025 micro-business strategy that emphasized strengthening fundamentals, improving loan culture, and enhancing portfolio quality and organizational productivity. This strategy was implemented through several key steps, as follows:

1. Confirmation of the loan culture as a foundation for sound micro-business growth, through the arrangement and control of daily activities that were systematically designed and monitored by work unit leaders, to ensure that business processes operated disciplinarily, consistently, and suitably with the prudential principles.

2. Improving the quality of business processes, such as through the improvement of the revitalization policy of all marketing personnel in the micro segment, both for Micro Loan Officer and Micro Business Manager (MBM) positions
3. Enhancing the quality of human capital, among others through the replotting of BRI Unit Heads based on the alignment of behavioral competencies with the characteristics of their respective areas (urban and rural), the addition of functions and responsibilities of the Operational and Service Supervisor (SOL) at BRI Units to strengthen operational and service functions at the unit level, as well as the implementation of Field Collection to accelerate the recovery of written-off loans and strengthen credit quality control.
4. Improvement of operational and loan process governance, including the satisfaction and arrangement of operational service functions to ensure the separation of roles between operational service activities and credit management, so that service quality and risk control could operate more optimally.
5. Implementation of the prudential principle in credit decision-making, along with the enhancement of the accuracy of customers' business assessments, in order to minimize potential risks from the early stages of loan disbursement.
6. Adjustment of business target allocation based on regional potential and quality, through target allocation that considered market potential, saturation level, and loan portfolio quality in each business unit, so that business growth could be managed more proportionally and sustainably.
7. Strengthening credit recovery activities and credit quality control through the optimization of recovery efforts on written-off borrowers, as well as enhanced collection activities by increasing the focus on handling problematic debtors, as part of efforts to maintain asset quality and mitigate the formation of new non-performing loans.

#### **Competitive Advantage and Micro Business Innovation**

In 2025, the improvement of loan performance and third-party fund of micro business was an integral part of BRI's attempts in designing various innovations. The innovations were as follows:

##### **1. Extensive and Integrated Service Network**

Indonesia's topography as an archipelagic country with more than 17,000 islands presents unique challenges in the distribution of financial services. In this regard, BRI possesses a competitive advantage through its extensive and integrated service network, enabling customers—particularly those in the micro and ultra-micro segments—to gain access to banking products, financial services, and beyond banking services. At the Group level, BRI operates more than 15,000 service units across Indonesia, including more than 6,300 BRI Micro Units & Teras, 4,100 Pegadaian branches, and more than

4,600 PNM branches. BRI's commitment to expanding financial services for the public is also reflected in the expansion of its service network through 6 BRI Teras Mobile units, 4 Teras Kapal units, and more than 1.19 million BRILink Agents, extending financial services reach to even the most remote areas. BRI also operates 1,035 Senyum Co-location units, which integrate services from BRI, PNM, and Pegadaian as part of the Ultra Micro (UMi) Holding, providing integrated financial access across these entities. Complementing this network, the BRI Group is supported by more than 74,000 financial advisors, consisting of 27,000 BRI Mantri officers, more than 3,000 Pegadaian marketing personnel, and more than 43,000 PNM account officers.

##### **2. Digitalized Business Process**

To enhance productivity and strengthen risk management in the micro segment, BRI has implemented the digitalization of business processes, including the development of the BRISPOT loan underwriting application. BRISPOT acts as a catalyst for improving synergy and productivity among BRI Micro Loan Officer officers through the digitalization of both credit and non-credit activities within an integrated platform. To support sustainable growth, in 2025 BRI continued to enhance BRISPOT through improvements in pipeline quality and the addition of daily activity planning features.

##### **3. Senyum Mobile**

Holding UMi aims to combine key entities that can better develop the ultra-micro segment. The ultra-micro ecosystem will assist in the journey of the ultra-micro segment upgrading to the micro segment. The ultra-micro ecosystem will play an important role in improving the landscape of the ultra-micro segment in Indonesia. Therefore, BRI creates the Senyum Mobile application, which is an integrated digital sales platform used by marketers to market products across entities (BRI, PNM, and Pegadaian).

##### **4. Executive Dashboard**

The Executive Dashboard is an innovative platform designed to support integrated, data-driven regional development, with a continuously evolving, phased approach. Starting in 2021, the platform has leveraged BRI's internal data, including savings, loans, loan quality, social assistance, managed accounts, and churn-out modeling, to build a robust data foundation. In 2022, the platform was designed to enhance insights by identifying regional profiles by adding data on financial literacy percentages, loan amounts, and the number of account holders in each region. Furthermore, the Executive Dashboard integrates smartphone penetration data per region, providing a more in-depth analysis of local potential and needs. In 2025, the executive dashboard was further enhanced, enabling the identification of business potential by region down to the village level.

With the Executive Dashboard, business activities can be tailored to community transaction patterns and regional potential, enabling more precise and efficient business operations. This platform is a strategic solution that combines technology and data to create sustainable growth opportunities, empower villages, and increase financial inclusion in the territory of Indonesia.

#### **Business Prospects and Micro Business Strategy in 2026**

The Micro Business segment will continue to remain the largest portfolio segment within BRI and plays a strategic role in supporting national economic growth. Indonesia's economic structure, dominated by micro and ultra-micro businesses, provides significant room for future growth. Furthermore, Indonesia's demographic projection, dominated by a productive-age population, also contributes to the sustainability of micro business activities in the medium to long term. Consistent with this, various economic indicators and business sentiment indicate that MSMEs have growth potential, despite challenges such as changing consumer behavior, purchasing power dynamics, and increasing competition in the financial services industry.

In recent years, the microbusiness landscape has undergone increasingly rapid and complex changes. Technological advancements and open access to information have altered transaction patterns, business management, and microbusinesses' preferences for utilizing financial services. Furthermore, the emergence of various technology-based financing alternatives and financial services has intensified competition, both with formal financial institutions and non-banking entities. This situation requires BRI to pursue not only quantitative growth but also to ensure the quality, productivity, and sustainability of its overall microbusiness portfolio.

Entering 2026, BRI views the prospects for its micro business as remaining positive, with the caveat that growth must be built on a stronger and more disciplined foundation. Following a phase of consolidation and restructuring in 2025, BRI is focusing on efforts to return to sound and sustainable growth by strengthening its micro business fundamentals, improving its portfolio quality, and structuring its work culture and governance. This approach is believed to enhance the resilience of BRI's micro business in dealing with economic dynamics, while creating long-term value for the Company and its stakeholders.

In line with the positive prospects for micro businesses and the need to build more sound and sustainable growth, BRI has drafted strategic steps in developing the 2026 micro businesses, as follows:

1. Strengthening loan culture as the key foundation for micro business growth, through increasing business process discipline, more structured control of daily activities, and strengthening the role of work unit leaders in ensuring consistent application of prudential principles across the entire micro business network.
2. Improving the quality and productivity of the micro-loan portfolio by directing financing growth to segments and products with more manageable risk and return profiles, and ensuring that portfolio growth is measuredly performed and oriented to long-term sustainability.
3. Enhancement of governance and loan decision-making processes, including consistent implementation of On The Spot (OTS) throughout the loan approval process, fulfillment of operational service functions to clarify the separation of roles between services and loans, and strengthening the quality of post-realization analysis and monitoring.
4. Strengthening asset recovery and quality control activities by increasing the effectiveness of field collection, accelerating the handling of problematic debtors, and strengthening coordination of the management of the Small and Medium Loan (SML) and Non-Performing Loan (NPL) segments at all levels of the organization.
5. Optimizing business target allocation based on regional potential and quality, by considering market characteristics, saturation levels, and loan quality conditions in each business unit, so that business growth can be achieved more proportionally and in line with risk management capacity.
6. Optimizing the BRILink Agen partnership as an enabler to increase the productivity and Advisors' control coverage so that Advisors can focus more on mentoring and empowerment.
7. Develop digital business models supported by personalized scoring to enhance more prudent market penetration.
8. Strengthening BRI Group synergy to increase fee-based income from the sale of micro bancassurance products of subsidiaries.
9. Enhancement of operational systems, including BRISPOT, to improve productivity and strengthen risk management in the micro business segment, among others through strengthening the pipeline and credit risk scoring.

## BRILINK AGEN SERVICE

BRILink Agen is a collaborative model introduced by BRI aimed at broadening the reach of its financial services to the public. This business model incorporates social values focused on empowering communities, promoting financial inclusion, ensuring economic equality, and enhancing understanding of banking through its role as a Smart Agent under the

regulation of OJK. Simultaneously, it fosters economic values by providing partners with additional income, creating mutually beneficial economic collaborations, diversifying partner enterprises, and expanding the banking network for operational efficiency

**Table of BRILink Agent Service Performance (Productivity)**

Description	2025	2024	Growth	
			IDR	%
(1)	(2)	(3)	(4) = (2)-(3)	(5) = (4)/(3)
BRILink Agent	1,193,835	1,064,219	129,616	12.18%
BRILink Agent Mekaar	456,127	437,575	18,552	4.24%
BRILink Agent Non Mekaar	737,708	626,644	111,064	17.72%
Fee Base Income (IDR million)	1,709,562	1,656,288	53,274	3.22%
CASA (IDR million)	27,309,136	25,632,996	1,676,140	6.54%
Volume of Transactions (IDR million)	1,746,170,031	1,589,038,749	157,131,282	9.89%
Deposit Referral	165,650	153,142	12,508	8.17%

By December 31, 2025, a total of 1,193,835 BRILink Agents operated across Indonesia. This total comprised 334,725 BRILink EDC Agents and 859,110 BRILink Mobile Agents, distributed over 66 thousand villages in the country. Additionally, 456,127 members of PNM Mekaar had become BRILink Agents, demonstrating the synergy between BRI and the BRI Group. BRILink Agents also refer MSME loan and were responsible for distributing Social Assistance (Bansos) within communities. Besides providing loan referrals for BRI UMi partners, BRILink Agents assisted in the establishment of savings accounts via a referral system for the basic saving account type, known as Tabunganku. BRILink Agents significantly contributed to achieve genuine financial inclusion for all segments of Indonesian.

BRILink's sales volume increased up to IDR1,746 trillion, with a growth of 9.89%, generated by BRILink Agents throughout Indonesia. BRI earned fee-based income of IDR1.71 trillion at the end of December 2025, increasing 3.22% from IDR1.65 trillion in the same period in 2024. Furthermore, BRILink Agents also increased their low-cost funds (CASA) by IDR27.31 trillion, growing 6.54% from 2024.

### BRILink Agent Strategies in 2025

In 2025, BRILink Agents responded to the evolving dynamics of the banking industry by undertaking a business model transformation aimed at positioning BRILink Agents as the spearhead in building an integrated payment ecosystem. Under this transformation, BRILink Agents are positioned as ecosystem payment centers, focusing on becoming

community-based payment hubs that provide consumers with convenience and accessibility for daily financial transactions. In addition, BRILink Agents are expected to serve as solutions to address BRI customers' needs at the business entity level through enhanced payment features and expanded payment capabilities.

BRILink Agents serve as UMi lifestyle providers by expanding access to everyday products and services while supporting the empowerment of communities and MSMEs in Indonesia. BRILink Agents can also play a role within the logistics ecosystem as package drop-off points and payment centers. In addition to selling primary goods, BRILink Mekaar Agents are able to facilitate daily transactions for Mekaar group members, thereby acting as an enabler of a cashless ecosystem for BRI Ultra Micro services. Furthermore, BRILink Pawn Agents function as enablers for pawn services, enabling customers across the BRILink Agent network to access pawn-related services.

### AgenBRILink Competitive Advantage and Innovation

By leveraging more advanced digital technology and continuously developing its ecosystem, BRILink Agents are expected to expand their agent network to reach all segments of society, from urban to rural areas. A focus on empowering MSMEs, developing the logistics ecosystem, and enhancing capabilities in financing and goods distribution will significantly contribute to Indonesia's digital economy. BRILink Agents will continuously catalyze change in the microfinance sector, introducing solutions that are more

adaptive and responsive to customer needs in the digital era. Through the implementation of strategic initiatives, BRILink Agents are committed to continuously delivering added value, creating economic opportunities, and supporting sustainable development through increasingly innovative and inclusive services in 2026 and beyond.

#### **BRILink Business Prospects and Strategies in 2026**

In 2026, BRILink Agents will continue their transformation as integrated payment ecosystem centers and serve as key enablers within Indonesia's digital financial ecosystem. As the frontline distribution channel for BRI Group products and strategic partners, BRILink Agents will expand their role in supporting inclusive economic growth by providing more efficient and accessible payment solutions and financial services to all segments of society.

BRILink Agents will evolve into a one-stop solution for a wide range of services and products required by communities and MSMEs. BRILink Agents will serve as a shopping hub that facilitates transactions for goods and products at competitive prices. In addition, BRILink Agents will introduce BRIMOLA, enabling agents to serve as gas distribution bases and retailers, providing household gas supplies practically and affordably. BRILink Agents will also expand their role as logistics agents through the BRILink Logistics feature, providing package drop-off and pick-up points to support more efficient goods distribution.

#### **1. BRILink Agents as Payment Ecosystem Centers**

BRILink Agents will further strengthen their position as digital payment ecosystem centers, enabling communities to conduct daily financial transactions fast, securely, and conveniently. Through the enhancement of more advanced payment features, BRILink Agents will provide greater accessibility for BRI customers and partners across various sectors, including FMCG, logistics, and e-commerce, to perform transactions directly through the extensive agent network spread throughout Indonesia. In addition, BRILink Agents will continue to develop payment solutions for charitable contributions, including zakat, infaq, qurban, and sadaqah, thereby facilitating public participation in social initiatives through a trusted agent network.

#### **2. BRILink Agents as Community Lifestyle Providers**

As part of a broader transformation, BRILink Agents will strengthen their role as connectors between partners and communities. BRILink Agents will offer various services, for transactions and merchandise purchases, while providing broader access for communities to obtain daily necessities. BRILink Agents will actively serve as sellers, buyers, and dropshippers, thereby supporting the economic empowerment of local communities and MSMEs across Indonesia.

#### **3. BRILink Agents as Financing Enablers**

As financing and refinancing agents in collaboration with BRI Finance, BRILink Agents will expand their role in providing financing solutions that are more accessible to customers, including microfinancing and refinancing for communities and MSMEs. By strengthening capabilities in the financing sector, BRILink Agents will support economic empowerment through financial solutions that are more adaptive to customer needs.

#### **4. BRILink Agents as a Logistics Ecosystem**

BRILink Agents will expand their role in the logistics sector by serving as strategic package drop-off points through the BRILink Logistics feature. BRILink Agents will become key partners in supporting the logistics ecosystem and goods distribution across Indonesia, helping to accelerate delivery processes and enhance distribution efficiency.

#### **5. BRILink Agents as UMi Lifestyle Providers**

BRILink Agents will further strengthen their transformation into ultra-micro (Umi) lifestyle providers by expanding access to daily products and services for communities. BRILink Agen Mekaar services will continue to expand, providing products and services to Mekaar group members while supporting the transition toward safer and more efficient cashless transactions. In addition, BRILink Agen Mitra Umi and BRILink Agen Gadai will serve as enablers for pawn and microfinancing services for all BRILink Agent customers.

#### **6. Social and Economic Value Proposition**

BRILink Agents will further strengthen their role as a sales channel for partners and BRI subsidiaries. By reinforcing networks and collaboration across various industry sectors, BRILink Agents will help generate significant social and economic value, while opening new opportunities for a broader range of products and services from BRI Group and its strategic partners. BRILink Agents will introduce customer touchpoints, payment collection services, and cross-selling initiatives to enhance customer engagement and expand product offerings to customers.

#### **7. Expansion of Partnerships for Cash Management Solution**

BRILink Agents will continue to expand partnerships for cash pick-up services and corporate deposit collection as part of comprehensive cash management solutions for business partners. By increasing the number of partners and broadening the geographic coverage of these services, BRILink Agents will deliver more efficient financial solutions and facilitate companies and MSMEs in managing their cash flow effectively.

## SOCIAL ENTREPRENEURSHIP & INCUBATION PROGRAM

Program managed by the Social Entrepreneurship & Incubation Program encompasses the allocation of Government Initiatives (such as Social Assistance and Kartu Tani (Farmer Cards) and empowerment initiatives (including MSMEs Upgrading program, BRILiaN Village, and BUM Desa, and Business Clusters). Each service is further detailed in the following descriptions:

### 1. Social Assistance Program (Bansos)

It is Governmental program collaborated with Ministry of Social Affairs of the Republic of Indonesia for the allocation of aid funds intended for the poor, underprivileged, and/or those susceptible to social risks. In 2025, the government, through the Ministry of Social Affairs of the Republic of Indonesia, distributed four (4) types of social assistance programs, namely the Family Hope Program (PKH), the basic Food Program (Program Sembako), the Basic Food Program economic Stimulus for the Second Quarter of 2025, and the Temporary Direct Cash Assistance for Public Welfare (BLTS-Kesra). The assistance funds were distributed on a non-cash basis through the banking system. Recipients of the aid can withdraw the funds through bank tellers, BRI e-channels, or BRILink Agents.

### 2. Kartu Tani/Banking

This is a co-branded debit card developed in partnership with the Ministry of Agriculture, designed for farmers to redeem subsidized fertilizer at designated fertilizer kiosks, and it can also be utilized for standard banking transactions.

### 3. Kusuka Card

It is a co-branded debit card developed in collaboration with the Ministry of Marine Affairs and Fisheries. It serves as a single identity card for business actors in the marine and fisheries sector and is issued across six (6) subsectors, namely marine spatial management, fishing, fish transportation, aquaculture, fish processing, and fish marketing.

### 4. MSMEs Upgrading

BRI facilitates the enhancement of MSME capacity and capability through a range of initiatives, allowing MSMEs to elevate their business operations and compete more effectively. To aid the development of MSMEs capacity and capability, BRI offers diverse empowerment platforms, as follows:

#### a. LinkUMKM

It is an integrated online empowerment platform that provides various business development facilities for MSME (Micro, Small, and Medium Enterprises) entrepreneurs, accessible to the general public. It offers several useful features for MSME capacity development, including Assessment for Business Growth, Expert Consultation, and Product Showcase.

#### b. SEOs House

It is a platform for developing MSME (Micro, Small, and Medium Enterprises) capabilities as part of a collaboration among state-owned enterprises (BUMN) to build a digital economic ecosystem. Its goal is to enhance MSME capacity and capability, enabling them to become Go Modern, Go Digital, Go Online, and Go Global. Additionally, SEOs House serves as a millennial basecamp, a banking program information center, a co-working space, and a disaster response task force.

### 5. BRILiaN Village and Village-Owned Enterprises

#### a. BRILiaN Village

BRILiaN Village is a village empowerment program aimed at creating role models for rural development through excellent leadership practices and a collaborative spirit to optimize village potential based on Sustainable Development Goals (SDGs). The implementation of the BRILiaN Village evaluates and develops four (4) key aspects that serve as the pillars of empowerment for BRILiaN Village, namely:

1. BUMDesa and or Village Cooperatives, as the economic driving force of the village.
2. Digitalization, implementing digital products and activities in the village.
3. Sustainability, Building a resilient and sustainable village.
4. Innovation, Encouraging creativity in creating innovation.

#### b. Village-Owned Enterprises (BUMDesa)

BUMDesa are village business entities whose capital is wholly or predominantly owned by the village to manage assets, services, and other business activities for the benefit of village welfare. BUMDesa are established through village deliberation forums and regulated under village regulations. BUMDesa functions as drivers of the village economy by developing local potential, creating employment opportunities, increasing village income providing social and economic services that benefit the community, legal entity established by village to manage its business, utilize its assets, develop its productivity and investment, provide services, and/or serve other business types for welfare of village community.

### 6. Business Cluster

BRI Business Cluster is an empowerment program for business groups formed based on similar types of businesses within a specific region, aimed at enhancing the capacity and capabilities of all cluster members. The empowerment program provided by BRI to its fostered Business Clusters includes training and mentoring, support in business infrastructure and facilities, market expansion for cluster products. The management of Business Cluster data is conducted digitally through the "Klasterku Hidupku" application.

Table of Social Entrepreneurship & Incubation Performance (Productivity)

Description	2025	2024	Growth	
			IDR	%
(1)	(2)	(3)	(4) = (2)-(3)	(5) = (4)/(3)

<b>CLUSTER</b>				
Number of Fostered Clusters	42,682	38,574	4,108	10.65%
Empowerment (Infrastructure and Training)	3,000	2,433	567	23.30%

Total social assistance disbursement in 2025 reached IDR28.80 trillion, representing an increase of 35.85% compared to IDR21.19 trillion in 2024. The increase in social assistance disbursement in 2025 was supported by additional distributions beyond the regular assistance programs (PKH and Basic Food Program) through two (2) programs, namely the Basic Food Program- Economic Stimulus II 2025 and BLTS-Kesra. Another contributing factor to the increase in social assistance disbursement in 2025 was the transfer of social assistance distribution from Bank Tabungan Negara (BTN) to BRI, particularly in Denpasar City, Bangli Regency, and Klungkung Regency.

On the other hand, under the Kartu Tani/Perbankan program, the number of cards issued in 2025 decreased compared to 2024. This decline was attributable to the issuance of Minister of Agriculture Regulation No. 10 of 2022 dated 6 July 2022 concerning the reduction in the types of subsidized fertilizers and commodities, as well as an instruction from the Ministry of Agriculture to suspend new account openings and the issuance of Kartu Tani/Perbankan for newly registered farmers. The total of Kartu Tani/Banking printed in 2025 reached 5,180,297 cards, with a fertilizer volume of 1,128,006 tons, and a transaction value of IDR2.37 trillion.

The number of Kusuka Cards printed in 2025 increased by 10.19%, or 51,856 cards, distributed across 33 provinces throughout Indonesia, compared to 2024. Through the Kusuka Card program, it is expected to enhance financial literacy and inclusion among business actors in the marine and fisheries sector, of which 53.70% are engaged in the fishing subsector.

During the 2024–2025 period, LinkUMKM users recorded significant growth. The number of users increased by 4.34 million, or 40.79%, reflecting a strong expansion of the user base and broader adoption of the platform's services. In line with this growth, the number of scorings also increased by 3.51 million, or 44.20%, indicating higher utilization of this feature among LinkUMKM users.

The higher growth in the number of scorings compared to user growth indicates that not only has the user base expanded, but the intensity of utilization of the MSME scoring feature for business upgrading assessment has also increased, reflecting deeper measurement of MSME levels. Overall, this data underscores the strengthening role of LinkUMKM as a platform that is increasingly relevant and actively utilized within the MSME ecosystem.

In line with the strengthened role of SEOs House in promoting MSME empowerment, the number of SEOs House members recorded a significant growth of 22.09%, increasing from 4333,304 members in 2024 to 529,0344 members in 2025. This increase reflects the expanding reach of SEOs House in providing

access to mentoring, assistance, and capacity-building support for MSME entrepreneurs across various regions.

This growth was accompanied by increased MSME capacity-building activities, as reflected in SEOs House training programs, which rose by 21.96%, from 14,947 training sessions in 2024 to 18,218 sessions in 2025. This increase reaffirms SEOs House role as an MSME empowerment center that not only focuses on competency enhancement but also promotes competitiveness and inclusive business sustainability.

As of December 2025, the Desa BRILiaN program had successfully integrated 5,245 villages into BRI's empowerment ecosystem. This achievement underscores BRI's sustained commitment to strengthening village-based economic fundamentals as part of its long-term growth strategy. The Desa BRILiaN program has also driven increased financial inclusion, as evidenced by a 25.25% growth in the number of savings accounts in Desa BRILianN and a 5% increase in the number of BUMDesa accounts. This performance demonstrates that BRI's financial services are reaching more remote village areas.

Business Clusters recorded growth of 10.64%, increasing from 38,574 clusters in 2024 to 42,682 clusters in 2025. Meanwhile, empowerment initiatives (infrastructure support and training) grew by 23.30%, from 2,433 initiatives in 2024 to 3,000 initiatives in 2025.

### Strategy of Social Entrepreneurship & Incubation Program in 2025

An overview of the strategy for the Social Entrepreneurship & Incubation Program implemented in 2024 is outlined as follows:

#### 1. Social Assistance

- The implementation of the PKH Social Assistance and Basic Food distribution is conducted in line with the regulations and directives established by the Ministry of Social Affairs of the Republic of Indonesia.
- Participating in enhancing financial inclusion accessible to beneficiary families.

#### 2. Kartu Tani (Farmer Cards)/Banking

The redemption of subsidized fertilizers using the Kartu Tani/Banking Card is integrated with the fertilizer quote database in the Ministry of Agriculture's e-RDKK system. In 2025, it was also integrated with the subsidized fertilizer stock database of PT Pupuk Indonesia, thereby eliminating potential data discrepancies and preventing misallocation in distribution.

#### 3. Kartu Kusuka (Kusuka Cards)

The development of an integrated system through API integration between the Ministry of Marine Affairs and Fisheries and BRI enables the exchange of business actor data, thereby ensuring that the mass account opening process can be conducted efficiently and monitored by each respective party.

4. **MSME Upgrading (Link UMKM and Rumah BUMN/ SEOs House)**

a. **LinkUMKM**

Actively promoting the integrated online empowerment platform - LinkUMKM through a series of publications in online media, placement of communication materials in strategic locations, and active participation in MSME-themed activities (such as bazaars and exhibitions). In addition, BRI's marketing personnel proactively introduce LinkUMKM to prospective customers and assist customers, thereby enhancing their financial literacy, capacity, and capabilities.

b. **SEOs House**

Expansion of outreach to assisted MSMEs through a partnership between SEOs House and local government, communities, and universities, enabling a greater number of MSME entrepreneurs to join as SEOs House members. Through this approach, the visibility of SEOs House role at the regional level is enhanced, thereby encouraging more MSME entrepreneurs to become members, as they recognize the tangible and sustainable benefits available to support their business development.

5. **BRILiaN Village and BUMDesa**

a. There were 918 new fostered villages having been empowered by the Desa BRILiaN Program.

b. Comprehending financial literacy and inclusion from villages having joined the Desa BRILiaN Program by increasing the utilization of BRI's products and services in villages.

c. Expansion of market access for leading village products.

6. **Business Cluster**

a. New Business Cluster acquisition program.

b. Empowerment Program (training and assistance with facilities and infrastructure) to 567 Clusters.

c. Market expansion program for Cluster products.

**Competitive Advantage and Innovation of Social Entrepreneurship & Incubation Program**

The detail of the competitive advantage and innovation of the Social Entrepreneurship & Incubation Program is as follows:

1. **Social Assistance**

a. BRI serves as the social assistance distributing bank with the largest allocation compared to Himbara and BSI, having distributed social assistance across 235 cities/ regencies throughout Indonesia.

b. The digitalization of Family Welfare Cards (KKS) distribution to Beneficiary Families (KPM) is done through web and mobile applications (Makna Application), which serve as a means to monitor the delivery of KKS to Work Units and its subsequent distribution to KPM.

2. **Kartu Tani (Farmer Cards)/Banking**

Of 38 provinces in Indonesia, 25 provinces are the operational areas of the BRI Kartu Tani/Banking, so BRI is the leading provider of the Kartu Tani/Banking program

3. **Kartu Kusuka (Kusuka Cards)**

As one of the banks collaborating with the Ministry of Marine Affairs and Fisheries in the issuance of the Kusuka Card, BRI accounted for 59% of the total Kusuka Cards printed across 33 provinces. Through synergy with stakeholders, supported by Bri's extensive network of work units reaching coastal areas, the Kusuka Card serves as a means to expand access to banking facilities for Indonesia's marine and fisheries ecosystem.

4. **MSME Upgrading (Link UMKM and Rumah BUMN/ SEOs House)**

a. **LinkUMKM**

LinkUMKM serves as an integrated online empowerment platform that can be accessed by users anytime and anywhere, offering features that support MSME development. These include the MSME Naik Kelas self-assessment tool, online training modules, coaching and mentoring services, access to SEOs House, and a showcase feature (digital catalog).

b. **SEOs House**

SEOs House has become a hub for MSME development across various regions, enabling more inclusive and equitable access to empowerment programs. BRI's SEOs House is directly connected to BRI's products and services (KUR, Kupedes, Ultra Mikro, BRImo), ensuring that MSMEs are not only mentored but also incubated toward becoming bankable. This integration of business development support and financial literacy serves as a key differentiation compared to other empowerment programs.

5. **BRILiaN Village and BUMDesa**

a. Strengthening BRI's role (social value) in village empowerment initiatives.

b. Enhancing engagement between BRI and assisted villages.

c. Improving village financial literacy and inclusion through empowerment programs (capacity and capability building for village officials and BUMDesa assisted by BRI).

d. Promoting improved community welfare through the development and strengthening of leading village business sectors that generate added value, competitiveness, and sustainable economic growth.

6. **Business Cluster**

a. Strengthening BRI's role (social value) in business group empowerment activities.

b. Improving time, cost, and workforce efficiency at work units in serving collective needs.

c. Enhancing the effectiveness of marketing BRI's products and services.

d. Facilitating work units in monitoring and evaluating business actors.

e. Serving as a new growth source for generating business pipelines.

### Business Prospects and Strategies of Social Entrepreneurship & Incubation Program in 2026

An outline of the business prospects and strategies for the Social Entrepreneurship & Incubation Program that will be launched in 2026 is presented as follows:

#### 1. Social Assistance

- a. Coordinating and establishing synergy with the Ministry of Social Affairs of the Republic of Indonesia (Kemensos RI) and other stakeholders to ensure the successful distribution of Social Assistance in 2026, in line with the Government's target of timely, accurate, and administratively compliant disbursement.
- b. Strengthening collaboration with Kemensos RI in poverty alleviation efforts through the Empowerment Program for Graduated Beneficiary Families (KPM), initiated by Kemensos RI.

#### 2. Kartu Tani (Farmer Cards)/Banking

- a. Coordinating with the Ministry of Agriculture, PT Pupuk Indonesia, and other stakeholders to expand the implementation of subsidized fertilizer redemption using the kartu tani/ banking card.
- b. Providing comprehensive banking products and services to farmers and Complete Fertilizer Kiosks.
- c. Strengthening BRI's business presence across the subsidized fertilizer ecosystem from upstream to downstream.

#### 3. Kartu Kusuka (Kusuka Cards)

Establishing synergy with the Ministry of Marine Affairs and Fisheries through the utilization of the Kusuka Card for the distribution of assistance or subsidies in the marine and fisheries sector.

#### 4. MSME Upgrading

##### a. LinkUMKM

In 2026, the number of LinkUMKM users is expected to continue increasing inline with the platform's ongoing innovations, including enhancements to the LinkUMKM mobile application interface, improvements in user experience and user interface, the addition of new training modules, and the refinement of supporting features.

##### b. SOEs House

Entering 2026, SOEs House will focus on strengthening its role as a collaboration hub and strategic partnership platform with universities, local governments, communities, businesses, and digital and technology partners. This strengthened partnership scheme is aimed at expanding MSMEs' access to financing, markets, technology, supply chain (value chain) opportunities, and other strategic partners.

#### 5. BRILiaN Village and BUM Desa

BRI aims to involve 1,000 additional fostered villages in the BRILiaN Village Program. The organization will focus to enhance the financial literacy and inclusion to achieve the independence and sustainability of assisted villages. The strategy for the BRILiaN Village Program by 2026 is as follows:

- a. Conduct continuous outreach in collaboration with regional offices, branch offices, and unit offices regarding the Desa BRILiaN program to expand village understanding and participation.
- b. Establish coordination and synergy with relevant ministries and local government agencies to support the promotion of the Desa BRILiaN Program while introducing BRI's products and services
- c. Promote the Desa BRILiaN Program through various communication channels, including digital media, social media, and print media, to increase awareness and enhance the program's attractiveness among potential villages.
- d. Coordinate with the BRILink Group to optimize assistance for BUMDesa so they can serve as active and productive BRILink Agents.
- e. Conduct evaluation and monitoring of inclusion improvements resulting from the implementation of the Desa BRILiaN Program, as well as the optimization of BUMDesa and Village Cooperative businesses.

#### 6. Business Cluster

Intensification of the cluster empowerment program to support sustainable micro business development, through initiatives including:

- a. Establishing coordination and synergy with relevant ministries and local government agencies to support the socialization of the business cluster empowerment program while introducing Bri's products and services.
- b. Enhancing the business capacity of cluster members by conducting training programs both offline and online.
- c. Providing production facilities and infrastructure support to business groups to improve productivity.
- d. Conducting evaluation and monitoring of inclusion improvements arising from the implementation of the business cluster empowerment program.
- e. Promoting the business cluster empowerment program through various communication channels, including digital media, social media, and print media, to increase awareness and enhance the program's attractiveness among potential business groups.

## Retail Segment

The Retail sector is designed to cater to the requirements of entrepreneurs, specifically Small and Medium Enterprises (SMEs), by providing a wide range of banking products and services that encompass both consumer and commercial banking. This segment primarily concentrates on the advancement of Small & Medium Enterprises (SMEs), the Consumer Credit Business, Saving Business and Retail Banking Services to assist customers in expanding their businesses across different industries.

## SUMMARY OF THE COMMERCIAL, SMALL & MEDIUM ENTERPRISE (CSME) DIRECTORATE PERFORMANCE

In 2025, the Commercial, Medium, and Small (CSME) segment will focus on balancing growth and portfolio quality through organizational refinement and network strengthening, aggressive yet prudent credit growth, end-to-end credit process improvements, and credit quality management. This strategy will be implemented through pipeline optimization and ecosystem-based value chain development, region-based acquisitions, and transaction activities to deliver faster, more integrated, and more relevant end-to-end financing solutions tailored to customer needs.

The implementation of this strategy is reflected in performance throughout 2025. Outstanding credit in the CSME segment reached IDR295.11 trillion, a 10.47% year-on-year growth from IDR267.12 trillion the previous year. Growth was primarily driven by the Commercial segment, which increased to IDR61.13 trillion, followed by growth in the Medium segment to IDR21.34 trillion, growth in the Small segment to IDR177.98 trillion, and distribution of Small Business Credit (KUR) of IDR17 trillion, in line with the established target.

The strengthening of the strategy throughout 2025 is reflected in four main aspects. First, strengthening a more agile and integrated organization through the establishment of a Commercial Business Center (CBC) and sharpening the role of Relationship Managers (RM) per segment, resulting in a more efficient decision-making process from acquisition to post-disbursement, faster

customer service, and more competitive product and pricing structures. Second, more targeted expansion in sectors with stable business prospects, such as the state budget, energy, healthcare, education, and wholesale trade, as well as optimizing ecosystem monetization to accelerate growth in the Commercial segment while strengthening Medium-sized business expansion while maintaining risk discipline. Third, implementing a quality-first approach in the Small segment through more targeted expansion, strengthening the New Credit Underwriting process through BRISPOT, and early intervention with at-risk customers to maintain portfolio quality. Fourth, accelerating the handling of non-performing loans through the implementation of RM Quality and the Accelerated Loan (LAR) handling program with relief programs and KI Solusi products.

Entering 2026, the business development strategy will align with the initiatives implemented in 2025, sharpening initiatives in each segment. Commercial and Medium are growing aggressively while maintaining quality in the Small segment, while also increasing marketing efficiency and effectiveness through process refinements and strengthening organizational capabilities and Human Capital. The strategic focus remains on providing solutions relevant to customer needs, offering products with competitive structures and pricing, and providing increasingly personalized service, while adhering to prudential banking principles.

### COMMERCIAL, MEDIUM AND SMALL BUSINESS

BRI classifies Commercial, Medium, and Small Businesses based on credit limits. Small Businesses are loans up to IDR5 billion, Medium Businesses are loans above IDR5 billion up to IDR25 billion, and Commercial Businesses are loans above IDR25 billion up to IDR1 trillion. Commercial, Medium, and Small Business products include:

#### 1. Investment Credit (KI)

KI is a facility provided to companies and/or individuals to finance long-term funding needs for the purchase, construction, expansion, and renewal (renovation) of productive fixed assets, along with the associated costs. This product offers several advantages, including installments and credit terms tailored to the borrower's cash flow capabilities, and dynamic monthly interest rates based on the customer's portfolio at BRI.

#### 2. Working Capital Credit (KMK)

Providing credit facilities to individuals, non-individuals, or business entities for the purpose of financing current assets and/or replacing business debt, as well as temporarily financing routine company operations, down payments, cash reserves, refinancing working capital, or other working capital components, to finance the customer's business activities, or financing net capital, which is the difference between current assets and current liabilities used to finance business activities (working capital).

In addition to general working capital loans, there are also ecosystem-focused working capital loans specifically for financing needs in the value chain segment, with the following explanation:

- a. **Distributor Financing**  
A KMK facility for distributors, used solely for purchasing products from principals for resale. The advantages of this product include competitive interest rates, collateral flexibility, and the ability to conduct transactions online through Corporate Billing Management on QLola.
- b. **Supplier Financing**  
A working capital loan (KMK) facility provided to vendors or suppliers to finance working capital requirements for project completion based on a contract or similar document from the principal. This product offers competitive interest rates and collateral flexibility.
- c. **Invoice Financing**  
A Work Loan (KMK) facility for vendors or suppliers to finance accelerated repayment of receivables from the principal for partial or full completion of work based on invoices or similar documents. This product offers competitive interest rates, collateral flexibility, and online transactions through Corporate Billing Management on QLola.
- d. **Investment Financing (KI Mitra)**  
An investment credit facility provided to principal partners for the purchase, construction, expansion, renewal (renovation), including refinancing of fixed assets and associated costs, to support the vendor/partner's business or venture. This product offers several advantages, including a credit term tailored to the debtor's cash flow and flexibility in sharing the borrower's own funds.
3. **Government Program Credit**
- a. **Small KUR**  
Small KUR is a credit/financing for working capital and/or investment to individual/personal debtors, business entities and/or business groups that are productive and feasible but the additional collateral is not sufficient with a loan amount above IDR100 million to IDR500 million with a low interest rate and receives a subsidy from the Government.
- b. **Warehouse Receipt Subsidy Scheme (SSRG)**  
Credit provided by SSRG distributors to SSRG recipients with collateral in the form of warehouse receipts and interest subsidies from the government.
- c. **KPP Supply Side**  
Investment and/or working capital loans provided to micro, small, and medium-sized enterprises (MSMEs) in the form of individuals or business entities to support priority housing programs. Financing can be provided under working capital and/or investment credit schemes.
- d. **Agricultural Machinery Business Credit (KUA)**  
Investment credit specifically for the purchase of Agricultural Equipment and Machinery which is used as an Agricultural Equipment and Machinery tax provided by BRI to Agricultural Equipment Credit Recipients who receive interest subsidies from the Government.
- e. **Labor-Intensive Industrial Credit**  
Investment credit combined with working capital credit to individual/personal debtors or productive business entities in the labor-intensive industry.
- f. **SPPG Investment Credit (MBG)**  
In addition to financing the productive sector, BRI also supports the agenda of strengthening human resource quality through financing related to the Free Nutritious Meals (MBG) program. In its implementation, MBG financing is disbursed in accordance with the request of the Nutrition Fulfillment Service Unit (SPPG) as the program implementing entity, while prioritizing the principles of prudence and good governance. This financing support is expected to strengthen the smooth operation of nutrition fulfillment services and support the sustainability of the nutritious food supply chain.

Table of Small, Medium, and Commercial Enterprise Performance (Productivity)

Description	2025	2024	Growth	
			IDR	%
(1)	(2)	(3)	(4) = (2)-(3)	(5) = (4)/(3)
<b>OUTSTANDING</b> (in IDR million)				
Small Loans	177,976,551	173,401,907	4,574,644	2.64%
Medium Loans	21,337,997	15,947,930	5,390,067	33.80%
Kredit Commercial	61,131,770	39,050,779	22,080,991	56.54%

Description	2025	2024	Growth	
			IDR	%
(1)	(2)	(3)	(4) = (2)-(3)	(5) = (4)/(3)
People's Business Loans (KUR)	34,660,056	38,744,103	(4,084,047)	(10.54%)
<b>Small, Medium, and Commercial (CSME)</b>	<b>295,106,374</b>	267,144,719	27,961,655	10.47%
<b>TOTAL DEBITUR</b> (people)				
Small Loans	216,770	221,049	(4,279)	(1.94%)
Medium Loans	3,245	2,849	396	13.90%
Kredit Commercial	1,275	1,109	166	14.97%
People's Business Loans (KUR)	210,303	231,639	(21,336)	(9.21%)
<b>Small, Medium, and Commercial (CSME)</b>	<b>431,593</b>	456,646	(25,053)	(5.49%)

Total outstanding CSME loans in 2025 will reach IDR295.11 trillion, a 10.47% increase compared to 2024. This growth will be driven primarily by aggressive growth in the Commercial segment. In 2025, targeted lending to the SME (Small and Medium) segment will be implemented, leveraging value chain potential and focusing on transactional business models. This strategy will positively impact the SME segment's business performance through the end of 2025, as reflected in the positive growth in the SME segment's loan portfolio, which will outperform the market.

### COMMERCIAL, MEDIUM, AND SMALL BUSINESS STRATEGIES IN 2025

In 2025, the Commercial, Medium, and Small business development strategy will focus on generating higher-quality growth through strengthening the organizational structure, targeted portfolio expansion, and comprehensive business process improvements. This initiative is designed to ensure segment management is more focused, effective, and remains aligned with prudent banking principles. In summary, the Commercial, Medium, and Small segment strategy throughout 2025 includes:

#### 1. Sharpening the Organization and Strengthening the Network

BRI is adjusting its organizational structure to ensure each segment has a clearer focus and more accountable management.

- **Commercial:** Establishment of a Commercial Business Center (CBC) to integrate all Commercial segment business processes into a single, dedicated organization, enabling faster and more targeted end-to-end financing solutions.
- **Medium:** Management of the Medium segment, previously managed at the branch level, was strengthened at the regional level through the assignment of RM Medium and DH Medium, aimed at improving coordination effectiveness,

implementation uniformity, and strategy consistency across regions.

- **Small:** Appointment of RM Small with a division of focus between Growth & Quality. RM Small focuses on quality portfolio growth based on regional potential and customer transaction activity, while RM Quality and TL Quality handle non-performing portfolios in a more targeted manner to enable more precise and consistent credit quality improvements.

#### 2. Aggressive and Prudent Credit Growth

Portfolio expansion is directed at segments and sectors that have the potential for sustainable growth, while maintaining quality and risk aspects.

- **Commercial and Medium:** Growth is prioritized in sectors with stable business prospects, such as the state budget, energy, healthcare, education, and wholesale trade. This sector selection takes into account the characteristics of businesses that are more resilient to changing economic conditions. This focused acquisition strategy with targeted sectors has proven to increase ticket size (loan tiering) and demonstrates improved acquisition booking quality year over year.
- **Small:** Growth is executed in a targeted manner, focusing on the value chain and actively transacting deposit customers at BRI, while maintaining market share and aligning with industry developments. Focus is placed on each region according to existing industry potential to maintain good credit quality, so that growth acceleration remains aligned with the desired risk profile.
- **An ecosystem-based business approach,** implementing a growth strategy for the Commercial segment, strengthens cross-unit collaboration to optimize the potential of principal customers and their value chain within a single business ecosystem.

### 3. End to End Business Process Improvement

Process improvements are carried out comprehensively to increase speed, consistency, and accuracy in credit decision making with adequate risk mitigation.

- **Credit underwriting digitization.** Business process improvements through the new BRISPOT credit underwriting system are implemented through improved pre-screening, accelerated credit decision-making processes, and digital documentation standardization. This modernization aims to create a more streamlined, accurate process that adheres to risk mitigation principles.
- **Pipeline management strengthening.** The pipeline is focused on quality deposit customers, with pipeline screening based on risk profiles. Furthermore, improvements in data quality, model parameters, and validation processes are being implemented to ensure the pipeline is more accurate, measurable, and contributes to healthy growth.

### 4. Existing Portfolio Quality Management

Portfolio quality management is carried out through more structured, measurable, and recovery-oriented interventions.

- **Accelerated LAR (Larger Loan) handling program.** The arrears relief program, as well as KI Solutions, are implemented to expedite loan settlement for selected customers, with criteria and regular evaluations to ensure their effectiveness.
- **Role of RM Quality.** The RM Quality function is strengthened to conduct early monitoring and collection of customers showing potential cash flow impairments, allowing for faster implementation of mitigation measures and a tangible impact on improving portfolio quality.

### Competitive Advantage and Innovation of Commercial, Medium, and Small Businesses

In 2025, the development of the Commercial, Medium, and Small businesses will be directed towards becoming more responsive to customer needs by offering relevant solutions, competitive product structures, and a more personalized service experience. Portfolio quality improvements, particularly in the Small segment, will be implemented through improvements to New Credit Underwriting BRISPOT to make the assessment process more accurate, faster, and prudent. This quality improvement will serve as the foundation for BRI to develop a more streamlined and targeted business process for providing CSME financing products while maintaining portfolio health.

At the same time, growth in the Medium and Commercial segments is being aggressively pursued by maximizing regional potential, leading sectors, and value chain-based opportunities. Focusing on sectors with strong cash flow profiles and sustainable prospects allows BRI to offer competitive product and pricing structures, tailored to specific customer needs, and maintaining a balance between growth and risk. An ecosystem approach, through leveraging partnerships within the value chain, fosters a more comprehensive understanding of customer business activities, resulting in more contextual and impactful financing solutions.

Strengthening data-driven pipeline management ensures a more focused acquisition and relationship development process, prioritizing opportunities that match needs and have good conversion potential. Organizational transformation through the establishment of Commercial Business Centers (CBC) and the sharpening of dedicated organizations in each segment to shorten coordination flows and improve service integration, so that BRI can provide end-to-end solutions with faster responses, higher accuracy, and a more personalized service touch across all Commercial, Medium, and Small segments.

### Business Prospects and Business Strategies for Commercial, Medium, and Small Enterprises In 2026

In 2026, the business development strategy will align with the initiatives implemented in 2025 by sharpening initiatives in each segment. Commercial and Medium will continue aggressive growth and maintain quality in the Small segment, while increasing marketing efficiency and effectiveness through process refinements and strengthening organizational capabilities. The strategic focus remains on providing solutions relevant to customer needs, offering products with competitive structures and pricing, and providing increasingly personalized service, while adhering to the principles of prudent banking.

#### 1. Sharpening the Organization and Strengthening the Network

BRI is adjusting its organizational structure to ensure each segment has a focused focus and more accountable credit management.

- **Commercial:** Expansion of the Commercial business service network by adding CBC to increase market share and improving risk and operation functions to support speed of execution while adhering to prudential banking principles.
- **Small & Medium:** Strengthening the Head Office Organization by establishing dedicated Business teams according to the Small (Expansion and Quality) and Medium (Medium business handling) segments,

as well as implementing the formation of a Flying Team through the formation of EBO in handling non-performing loans, especially handling Loans at Risk (LAR) in the Performing Lending (PL) portfolio.

## 2. Aggressive and Prudent Credit Growth

- **Commercial:** Growth is focused on priority sectors aligned with the government, such as the state budget, energy, food, and education, so that commercial portfolio expansion can be more targeted, high-quality, and aligned with industry dynamics.
- **Small & Medium:** Small & Medium growth is focused on leveraging the business ecosystem, both through a value chain-based approach and a quality pipeline from existing customers to banks with optimal funds and transactions. The growth focus of Small & Medium is also aligned with government programs, including acquisitions in the Free Nutritional Meal (MBG) program and Housing Credit Program (KPP) from the supply side.

## 3. End to End Business Process Improvement

- The BRISPOT revamp aims to accelerate the acquisition of Commercial, Medium, and Small businesses, making the credit initiative process more seamless and faster, with tailored products tailored

to customer needs. It also improves the Pipeline Management System in the small segment for a more prudent process that produces a high-quality pipeline.

- Improvements to the Architecture Policy in each Commercial, Medium, and Small segment serve as a basis for harmonizing business policy directions, ensuring loan product distribution aligns with customer needs and business potential in each region.

## 4. Portfolio Quality Management

- Strengthening Risk Control through an Enhanced Early Warning System (EWS) in the Commercial, Medium, and Small Segments, using customer CASA criteria and timely payments, as well as an Enhanced Credit Risk Rating to strengthen the underwriting process. In addition, a Stop and Go system will be implemented to evaluate credit decisions from both the decision-making and initiator sides.
- Digitizing the Credit Monitoring Process with the Development of a Dashboard in the Commercial, Medium, and Small Segments to oversee the acceleration of sustainable and quality growth that can provide insight in decision-making and business action plans.

### CONSUMER BUSINESS PERFORMANCE SUMMARY

In 2025, BRI's Consumer segment continued to record healthy and sustainable growth. The performance of the consumer business was primarily driven by the growth of salary-based loans and housing loans (KPR) or mortgages. Salary-based loans and mortgages recorded growth of 9.90% yoy and 13.30% yoy, respectively. BRI remains committed to delivering the best services to all customers through continuous innovation across its banking platforms.

BRI has consistently developed various customer touchpoints to serve customers' needs in the consumer segment. The Consumer business has sharpened its business focus and improved business processes, enabling the consumer segment to become a key pillar of BRI's growth with some efforts:

1. Developing digital-based products and services to ease customers' access.
2. Strengthening relationships with existing customers of BRI, leveraging the significant potential within this group. This was supported by using data analytics to understand customer behavior and offer personalized products and services based on their needs.

3. Enhancing efficiency in every business process, while focusing on customer orientation and good corporate governance principles.

The improvement and transformation of worker competencies and business processes based on digital technology supported optimal worker productivity. By using AI-based data analytics, product and program offerings became more targeted, enhancing efficiency. These factors become key contributors to the growth of consumer business performance in 2025.

The results can be seen from the consumer business performance of BRI, which has grown positively in terms of assets, liabilities, and fee-based income. On the assets side, consumer loans grew by 10.59% yoy, supported by the growth of BRlguna loans at 9.92% yoy, and mortgage loans (KPR) at 13.30% yoy. In terms of liabilities, the wealth management business could grow non-Third Party Funds Under Management (FUM) by 34.34% yoy and encourage growth in fee-based income from investments by 19.69%.

## CONSUMER BUSINESS

BRI's consumer business offers products that make it easier for individual customers to meet various consumption needs, such as purchasing homes, vehicles, travel, education, and other consumer goods. BRI's consumer credit provides competitive interest rates with a fast and secure process. The consumer credit products available at BRI in 2025 include:

### 1. Payroll Loan (BRiguna)

Payroll loan is a loan facility provided to prospective debtors with repayment sources derived from fixed income (such as salary or pension). The types of BRiguna include BRiguna Karya, BRiguna Pra Purna, and BRiguna Purna.

### 2. Housing Credit Program (KPP)

KPR is a loan facility provided for financing the ownership of residential properties. It can be used for purchasing new or pre-owned properties, takeovers, construction, and renovations. The eligible property types include residential houses, shophouses (ruko), officehouses (rukan), and ready-to-build plots.

### 3. Credit Cards and Digital Lending

BRI Credit Card is a loan-based, unsecured payment instrument that collaborates with major payment networks and can be used for transactions at merchants or cash withdrawals within the principal's network. BRI credit Cards are available in various product variants to serve diverse customer segments, ranging from mass market, mass-affluent, affluent, to commercial clients. In its development, BRI has launched multiple co-branded credit card products in partnership with strategic partnership present in various product variants to serve the needs of diverse segments, ranging from the mass market, mass affluent, affluent, to commercial clients. In its development, BRI has launched multiple co-branded credit card products in partnership with strategic partners to expand penetration across various digital ecosystems, including travel, e-commerce, lifestyle, payments, and business solutions, leveraging open banking models and API-based integration. To enhance customer service and improve Service Level Agreement (SLA) efficiency, BRI has digitized the entire credit card business process, from acquisition and underwriting to portfolio management and collections. BRI Credit cards are also compatible with QRIS transactions through the BRImo application.

Table of Consumer Loan Business Performance (Productivity)

(in IDR millions)

Description	2025	2024	Growth	
			IDR	%
(1)	(2)	(3)	(4) = (2)-(3)	(5) = (4)/(3)
BRiguna Loans	149,231,264	135,793,674	13,437,590	9.90%
Mortgage (KPR)	66,341,479	58,552,166	7,789,313	13.30%
Credit Card, Digital Lending, KKB, and Other	9,198,923	8,896,664	302,259	3.40%
Total Consumer Loan Business	224,771,666	203,242,504	21,529,162	10.59%
Funding Under Management (FUM)	242,087,443	205,072,210	37,018,233	18.05%

Business growth focused on top-tier debtors in each region, optimized by business opportunities within the debtor ecosystem. This strategy has driven the expansion of the consumer credit segment, particularly BRiguna and KPR, allowing them to grow competitively. BRiguna loans in 2025 reached IDR149.23 trillion, recording positive growth of 9.90%. Similarly, mortgage loans (KPR) grew by 13.30%, increasing from IDR58.55 trillion in 2024 to IDR66.34 trillion in 2025.

The growth of BRiguna loans in 2025 was supported by the optimization of eligible leads from payroll customers and the digitalization of processes. BRiguna loan applications can be submitted via mobile devices, while digital loan agreements enable customers to apply fully digitally through the BRImo Super App without the need to visit a BRI branch or work

unit. BRiguna also offers various attractive and competitive programs. Total BRiguna loan disbursements in 2025 amounted to IDR35.7 trillion.

Meanwhile, mortgage loan growth was supported by several initiatives, including business process re-engineering through the digitalization of loan application and loan origination processes via BRISPOT, as well as the development of the HOMESPOT digital platform as a mortgage ecosystem engine, along with the BRI Property Expo mortgage marketing program held in various major cities throughout 2025. In addition, BRI's FLPP mortgage program has disbursed 32,209 units, with total outstanding mortgages of IDR16.16 trillion in 2025. BRI's commitment is demonstrated by the growth in mortgage disbursement over the past five years, averaging 13%, exceeding the industry

average. BRI is the only Book IV bank with positive mortgage market share growth in 2025.

BRI remains committed to driving solid growth in other consumer loans (credit cards, digital lending, and KKB). In 2025, credit card and digital lending grew IDR302.26 billion or 3.40% compared to 2024. This growth was driven by an increase in ETB acquisition penetration from 21% to 52% year-on-year, achieved through optimization of deposit leads, pre-washed schemes, and digital acquisition channels. Additionally, the growth was supported by a 140% increase in QRIS CC transaction volume on BRIImo.

### Consumer Business Strategy for 2026

Ongoing digital transformation is pursued through the strengthening of retail banking capabilities and the enhancement of operational efficiency through the refinement of business processes to drive the growth of the consumer business. In this regard, development efforts are focused on optimizing the potential of BRI payroll customers as a source of high-quality growth. To achieve these consumer business aspirations, BRI continues to focus on increasing market share through selective growth and targeted expansion, leveraging various programs such as BRIGuna Loans, maintaining strong relationships with government ministries, Subsidized Housing Loans (KPRS), and BRI Expo Mortgage Programs (KPR BRI Expo). These initiatives are implemented with a prudent risk management approach to prevent deterioration in credit quality and to encourage improvements in loan collectibility.

### Competitive Advantages and Innovations in Consumer Business

Enhancing services and convenience remains a key driver of consumer credit growth, supported by the digitalization of BRIGuna and KPR credit processes. Efficiency improvements will be achieved through business process enhancement, including BRIGuna Digital and HOMESPOT. With a vast customer base and an extensive network across Indonesia, business process digitalization is crucial to ensuring sustained growth. This initiative aims to simplify consumer credit services while maintaining prudent risk management. Currently, BRIGuna holds the highest market leader, while BRI's KPR ranks among top five largest mortgage providers in Indonesia.

### Business Prospects and Consumer Loan Strategy for 2026

Digital technology and data advancement have transformed how the banking industry interacts with customers. Increasing competition necessitates a deeper understanding of customer needs and behaviors. As one of Indonesia's largest banks, BRI must enhance its capability to manage customer data optimally to provide relevant product offerings and strengthen customer loyalty. BRI's Consumer Business encompasses a wide range of products and services, including consumer loans, credit cards, and wealth management solutions. Its business strategy will align with BRI Group's long-term aspiration for 2025-2029: The Most trusted Lifetime Financial Partner for Sustainable Growth. BRI

Consumer Business will adopt the theme The Most Trusted Consumer Bank with Personalized Customer Experience to achieve the aspiration while considering internal and external conditions for 2026-2030. To support the achievement of these aspirations and considering BRI's internal and external conditions, from 2026-2030 BRI's consumer business will carry the theme Grow Stronger, Built to Last, Lead the Market with a focus on 4 pillars (enablers), namely targeted source of growth, robust risk management, operational and service excellence, and elevate people and organization, which ultimately aim to enhance expansion and business process efficiency.

To achieve the outlined objectives, BRI implemented the following strategic initiatives:

1. BRI leveraged predictive analytics and integrated data leads into digital platforms such as BRISPOT to enhance marketing effectiveness, efficiency, and prudence, especially consumer loan products, (BRIGuna, KPR, credit cards, digital lending, and KKB), as well as wealth management product (investment and insurance). BRI optimized its Customer Relationship Management (CRM) tools to ensure the availability and quality of data leads, so BRI maximized the potential of core customer partnerships. It focused on prudent improvement of user experience and acceleration process, digitalization and integration (BRIImo, PA, partners), lead management, and business process and product improvements.
2. BRIGuna and KPR served as the primary engines for portfolio growth to expand market share. In 2025, BRIGuna focused on accelerating its business among employees in State-Owned Enterprises (BUMN), Hospital, and reputable private companies, while maintaining its Business as Usual (BAU) strategy for government employees and retirees. Meanwhile, for KPR, to strengthen partnerships with top-tier national developers, BRI committed to developing a comprehensive mortgage ecosystem platform (Homespot.id). This platform accommodated stakeholders in the property sector. Expansion will focus on high-yield products with well-managed risk profiles (BRIGuna for private-sector mid-to high-income earners and pensioners, as well as Tier 1 mortgages), supported by a base of high-quality and healthy leads.
3. The demographic shift in the customer base has positioned Gen Z as a new economic force that prioritizes speed, transparency, and ease of digital access, while the affluent segment remains a key driver of transaction volume and value through its high level of spending. Penetration of Existing to Bank (ETB) customers will be one of the acquisition focuses to further increase customer product holding, including within the High Net Worth Individual (HNWI) segment. In response to these developments, in 2026 BRI Credit Card will focus its strategy on revamping the product proposition for affluent and mass cards to enhance their relevance and competitiveness, supported by the strengthening of a seamless customer journey in BRIImo, as well as the optimization of activation and transactions through personalized campaigns based on data analytics.

## RETAIL FUNDING & RETAIL TRANSACTION PERFORMANCE SUMMARY

In an effort to win the retail banking competition and in line with the 2025 initiative, "Transform The Funding Franchise," BRI continues to focus on strengthening its capabilities in retail funding and retail transactions by enhancing the BRImo SuperApp. These efforts include increasing the number of users, adding superior features, and maintaining system reliability to further enable customers to conduct seamless transactions. In addition, BRI aims to enhance BRImo customer loyalty by introducing a variety of new feature options.

The BRImo Super App has become increasingly popular and has been used by 45.9 million customers, recording more than 5.6 billion transactions throughout the year with a transaction volume of IDR7.08 trillion. This transaction growth is also in line with BRImo's strategy to continuously drive innovation through the utilization of technology to deliver more inclusive and efficient banking services, while providing greater value to customers, both in terms of feature development and partnerships with various strategic partners. BRImo transactions can now go beyond borders with the introduction of international transaction features, such as account opening using overseas mobile phone numbers, fund transfers to more than 100 countries, and QR payments in four countries—Singapore, Malaysia, Thailand, and Japan. The addition of lifestyle features also enables customers to purchase airline tickets, train tickets, as well as concert and football match tickets. Investment

features, including gold savings and mutual funds, are also available. These initiatives reflect BRI's commitment to providing easy and comprehensive access to customer services.

In addition, BRI remains focused on ensuring that customer transactions continue to circulate within the BRI ecosystem by increasing the share and productivity of EDC and QRIS merchants. Various initiatives have been undertaken to strengthen merchant acceptance, including partnerships with strategic partners, expanding merchant distribution in urban areas, enhancing monitoring tools, and introducing superior features to position BRI merchant transactions as the primary payment choice.

Through the various initiatives undertaken throughout 2025 to enhance retail funding, Retail Savings growth was evenly distributed throughout the year. This demonstrates that the efforts, strategies, and policies implemented to ensure that customer transactions remain within the BRI ecosystem and to enhance quality acquisition have successfully generated stable and sustainable growth. In 2025, savings increased by IDR42.2 trillion, representing 2.5 times growth compared to the nominal increase recorded in the previous year. BRI remains optimistic that this positive growth trend will continue in the future.

### RETAIL FUNDING BUSINESS

BRI offers a diverse range of retail funding products to meet the needs of all customers. Information on the types of retail third-party fund products is presented as follows:

#### 1. BRI Savings

BRI offered various savings account products such as:

##### **BRI BritAma Savings**

BritAma is a savings account designed for individual customers, equipped with digital banking facilities and an online real-time system that enables seamless transactions anytime and anywhere. Additionally, this account comes with complimentary personal accident insurance coverage.

##### - **BritAma Bisnis**

The necessity for higher transaction limits for retail funding customers, both individuals and non-individuals, can be satisfied with BritAma Bisnis, which also offers free monthly administration fees.

##### - **BritAma Mitra**

A specialized savings account tailored for corporate partner customers. BritAma Mitra provides payroll services for employees as one of its key features.

##### - **BritAma Rencana**

A term savings account designed for customers interested in investment or financial planning. It features Automatic Fund Transfer (AFT), allowing customers to set their preferred transfer date and target amount. Additionally, this account offers an optional life insurance facility.

##### **BRI Junio Savings**

It is a savings account designed to instill a saving habit and introduces digital transactions to children from an early age. This account is bundled with a specially designed debit card featuring an attractive design.

### BRI Simpedes Savings

Simpedes is a savings product for individual and non-individual customers in Indonesian Rupiah, equipped with digital banking facilities and an online real-time system to facilitate convenient and seamless transactions.

### 2. BRI Deposits

An investment option available in various currencies, including Rupiah and foreign currencies, offering competitive interest rates with placement periods ranging from one to 36 months. This product is available for individual and non-individual customers seeking higher returns than regular savings accounts. Deposits can be opened via BRImo or at BRI branch offices, with two interest payment options: direct transfer to the customer's account or reinvestment into the principal deposit (add-on) in addition, BRI Time Deposits can serve as a credible placement instrument for Foreign Exchange Export Proceeds (DHE) for exporters. BRI

also introduced scrippless deposits to accommodate customers with multiple deposit certificates. Instead of physical documents, email notifications are given as ownership proof, allowing customers to manage their deposits more effectively and efficiently.

### 3. BRI Debit

It is a payment card that facilitates both financial and non-financial transactions. It can be used for offline transactions at BRI or other banks' EDC machines and supports online transactions through debit online (for merchants within the Mastercard network) and direct debit (for BRI-affiliated merchants). In addition to physical debit cards, BRI now offers virtual debit cards, which can be issued directly through SuperApp BRImo. These virtual debit cards enable secure transactions at merchants, websites, or applications within the Visa network.

Table of Retail Funding Business Performance (Productivity)

(in IDR billion)

Description	2025	2024	Growth	
			IDR	%
(1)	(2)	(3)	(4) = (2)-(3)	(5) = (4)/(3)
Total Third Party Fund	934,491	892,201	42,291	4.74%
Total CASA	701,759	643,658	58,101	9.03%
Savings	584,893	542,667	42,226	7.78%
Current Accounts	116,866	100,992	15,875	15.72%

The Total Retail third-party funds (DPK) in 2025 reached IDR934.49 trillion, an increase of 4.74% (yoy) compared to IDR892.20 trillion in 2024. This growth was primarily driven by a 8.96% yoy increase in the Current Account and Savings Account (CASA), supported by savings growth of 7.78% year-on-year, equivalent to an increase of IDR42.23 trillion.

### Retail Funding Strategy for 2025

The Retail Funding strategy focuses on diversifying sources of growth by enhancing collaboration across business segments and subsidiaries. This includes business expansion through ecosystem-based payroll acquisition, corporate and company management penetration, as well as the optimization of low-cost funding driven by transaction acceleration and digital channels. In addition, the strategy emphasizes deeper regional market penetration and the strengthening of sales force capabilities and productivity.

### Competitive Advantages and Innovations in Retail Funding

The acceleration of service transformation through the synchronization of enhanced operational standards and platform improvements represents a critical step in strengthening the Company's digital ecosystem. This initiative is projected to exponentially expand the customer base and enhance customer loyalty, ultimately optimizing a transaction-based and sustainable low-cost funding structure.

### Business Prospects and Strategies for Retail Funding in 2026

In achieving Bank Rakyat Indonesia's 2026 aspiration, "Transform Funding Franchise," the Retail Funding business in 2026 will continue to focus on the same strategic direction as in 2025, with ongoing refinements and sustained emphasis on diversifying sources of growth, as well as strengthening collaboration across business segments and subsidiaries.

## RETAIL TRANSACTION BUSINESS - RTC

BRI continues to strengthen its digital payment ecosystem, as reflected in the increasingly comprehensive penetration of its transaction products. These range from its flagship mobile banking solution, BRImo, to various payment acceptance products such as EDC Merchant and QRIS. The integration of these services represents a key strategy in optimizing transaction volume growth to support more sustainable CASA growth.

### 1. EDC Merchant

BRI's EDC Merchant service now offers enhanced payment features designed to facilitate seamless transactions. In addition to accepting domestic debit and credit cards, it also supports cross-border payments, enabling the acceptance of various international card networks. The addition of contactless features on BRI EDC merchant ensures a more efficient and modern payment process, benefiting both domestic customers and international visitors.

### 2. QRIS

BRI continues to strengthen its digital payment channel offerings through QRIS. In addition to dynamic and static QRIS, BRI has introduced QRIS API solutions for integration with cashier (POS) systems, as well as the innovative QRIS Tap feature. Furthermore, BRI QRIS now enables cross-border transactions in four countries:

Singapore, Malaysia, Thailand, and Japan. This feature expansion is designed to provide greater flexibility for merchants and enhanced convenience for customers, directly contributing to increased transaction volumes and improved productivity within the digital ecosystem.

### 3. BRImo

BRImo is a financial super app designed to fully support BRI's digital service performance by providing a comprehensive daily transaction platform. It offers international transfer services to more than 100 countries, as well as seamless cross-border QR payment capabilities. BRImo also features a range of investment solutions, providing customers with convenient options such as gold investment services (gold savings, gold buying and selling, gold installment, and gold pawn) and mutual fund subscriptions. BRImo has successfully integrated urban lifestyle services through entertainment ticket payment features, including football match tickets, padel court bookings, and concert tickets. By penetrating various popular activities within the community, BRI aims to accelerate digital transaction growth while strengthening BRImo's position as a comprehensive financial and lifestyle solution.

Table of Retail Business Transaction Performance (Productivity)

Description	2025	2024	Growth	
			IDR	%
(1)	(2)	(3)	(4) = (2)-(3)	(5) = (4)/(3)
BRImo (million)	45.9	38.6	7.32	18.9%
BRImo Transaction (billion)	5.62	4.31	1.28	29.5%
BRImo Transaction Volume (IDR Trillion)	7,077	5,541	1,536	27.7%

In terms of retail transaction business performance in 2025, particularly for BRImo, the number of BRImo users increased by 18.96% year-on-year, while transaction volume grew by 27.71% year-on-year. This growth was supported by the increasingly diverse and user-friendly features available on the BRImo platform. Through continuous innovation, BRImo continues to strengthen its position as the preferred digital platform for the public, enabling users to meet their financial transaction and lifestyle needs in a manner that is practical, secure, and efficient.

### Retail Transaction Business Strategy for 2025

The Retail Transaction strategy in 2025 focuses on strengthening sustainable transaction growth through enhancing digital channel productivity, accelerating penetration of potential merchants, and reinforcing BRImo adoption within the urban lifestyle segment. This strategy is supported by simplified digital onboarding processes, strengthened capabilities, and strategic collaboration within the BRI Group ecosystem, aimed at increasing

customer engagement and driving sustainable CASA-based transaction contributions.

### Competitive Advantages and Innovations Retail Transaction Business in 2025

Throughout 2025, BRI strengthened its competitive advantage in the banking industry through a holistic and inclusive transformation of its payment ecosystem, with a strategic focus on enhancing transaction innovation. This was realized through the strengthening of BRImo's capabilities as a financial super app, offering a wide range of new features. On the payment acceptance side, including EDC and QRIS, BRI successfully upgraded its EDC Merchant infrastructure to support contactless technology and expanded QR payment features to enable cross-border transactions in four countries, such as Singapore, Malaysia, Thailand, and Japan. Additionally, the introduction of the QRIS Tap feature has further enhanced transaction efficiency and convenience for both business partners and customers.

### Business Prospects and Strategies for Retail Transaction Business in 2026

In achieving Bank Rakyat Indonesia's 2026 Aspiration, "Transform The Funding Franchise," the Retail Transaction business in 2026 will continue the strategic direction

implemented in the previous period as part of efforts to strengthen sustainable performance. This will be carried out through ongoing refinements while maintaining a focus on diversifying sources of growth and enhancing collaboration across business segments and subsidiaries.

### Corporate Segment

The Corporate Segment comprises the Corporate Business, Institutional Business, Transaction Banking Business, as well as the Syndication.

#### CORPORATE BANKING BUSINESS PERFORMANCE SUMMARY

Amid global economic dynamics and increasingly intense industry competition, the Corporate Banking Business recorded solid performance in 2025, while continuing to uphold the principles of quality growth and risk discipline. Integrated transformation through human capital strengthening, digital acceleration, and ecosystem orchestration was the foundation for maintaining growth momentum while building a more resilient and sustainable business structure.

As of December 2025, the Corporate segment loan portfolio reached IDR352.02 trillion, growing 38.3% compared to IDR254.24 trillion in December 2024. This growth was supported by financing aligned with government priority programs, particularly in priority sectors and related ecosystems. Asset quality remained strong through the application of prudent principles, while the funding structure was strengthened through an increase in transaction-based CASA and disciplined pricing that continued to support the growth of third-party funds.

In terms of banking transactions, Corporate Banking continuously optimized cash management, trade finance, foreign exchange, virtual accounts, liquidity management, and supply chain financing services. This strategy focused on improving operating account management to drive transaction-based CASA growth, optimizing pricing, strengthening solution-led engagement, and combining an ecosystem-based approach with cross-selling to ensure growth aligned with increased profitability and sustainable cost efficiency. QLola by BRI further strengthened its role as an integrated primary transaction platform for corporate customers. Throughout 2025, the number of users grew 36.3% year-on-year, with an increase in active users of

48.06%. Transaction value increased 36.29% year-on-year, and transaction frequency rose 33.77%, reflecting QLola's increasingly dominant role in customer financial operations and its contribution to increasing fee-based income and operational efficiency.

Institutional Business (Ministries and Institutions, the Indonesian National Armed Forces (TNI), and the Indonesian National Police (Polri) also demonstrated positive performance throughout 2025. BRI maintained its market leadership position with a 53.98% share of work units and a 55.67% share of payroll. This achievement underscored Corporate Banking's strategic role in supporting public sector financial services while strengthening the funding base and institutional business ecosystem.

#### The 2026 Strategy Course

Entering 2026, the Corporate Banking Directorate is focusing its strategy on strengthening quality growth and sustainable competitiveness through four key priorities:

- Driving Quality Growth through Strategic Client Acquisition and Digital Excellence**

Focusing on strategic sectors such as the global supply chain, digital economy, healthcare, renewable energy/ESG, energy and mining, FMCG, and related ecosystems. Strengthening transaction-based banking (trade finance, cash management, foreign exchange, structured finance, syndication, and supply chain financing) to increase corporate CASA and reduce the cost of funds, supported by accelerated process digitalization and the development of QLola's capabilities as an integrated corporate platform.

## 2. Integrating Ecosystem and Elevating Customer Excellence

Corporate Banking acts as a catalyst for opening the cross-directorate value chain through the One BRI Solution approach, orchestrating the ecosystem from Corporate to SMEs, Micro, and Ultra Micro, and enhancing a seamless end-to-end customer journey.

## 3. Human Capital Transformation

Developing world-class bankers with competencies in core credit, corporate finance, transaction banking, digital, leadership, and ESG, while encouraging cross-functional exposure to ensure

HR readiness to face the increasingly dynamic and complexities of corporate business.

## 4. Robust Risk and Control

Implementing selective growth discipline, strengthening data-based early warning systems, and enhancing governance and internal controls to maintain asset quality and business sustainability.

This strategy serves as the foundation for Corporate Banking to continue sound, competitive, and sustainable growth, while strengthening its strategic role as a key catalyst for BRI Group growth.

## CORPORATE BUSINESS

The Corporate Segment at BRI is managed by the Corporate Banking Directorate which includes Corporate Business, Institutional Business, Transaction Banking Business, and Syndication Business. The scope of Corporate Business products and services includes deposit management, providing various types of financing facilities, various transaction banking services, and business banking services, as well as end-to-end banking services to meet the various needs of corporate customers through an ecosystem approach. To focus more on exploring and meeting customer needs from upstream to downstream, since 2025, BRI has divided the management of corporate segment exposure into several groups. Some of these groups include Corporate Banking Group 1, Corporate Banking Group 2, Corporate Banking Group 3, and Corporate Banking Group 4. Institutional customer management is carried out by the Institutional Business Group to meet transaction needs and optimizes the management of institutional funds. There is also a Wholesale Transaction Banking Group, which manages the development of cash, trade, and wholesale digital platform products.

In 2025, the Corporate Banking Business initiated a more structured and impactful transformation phase as a strategic response to global economic slowdown, margin pressures, and intensifying competition in acquiring high-quality corporate clients. This transformation was comprehensively designed through three integrated strategic initiatives.

1. Project Garuda was the key foundation for Human Capital transformation through the development of world-class corporate and transaction bankers. This program strengthened core competencies in the fields of core credit, corporate finance, and transaction banking to ensure the readiness of Corporate Banking people to face the complexity of global business and increasingly sophisticated customer needs.
2. In terms of digital, Project Palapa was realized through strengthening QLola as an integrated corporate platform. QLola was developed as a single interface for corporate customers to access end-to-end transaction banking, trade finance, cash management, and treasury services solutions, thereby improving client experience, process efficiency, and BRI's competitiveness in the corporate market.
3. Project Cakrawala was focused on strengthening the role of Corporate Banking through an ecosystem approach. Corporate Banking took the role as a catalyst that connects large corporate customers to the MSME segment, to create integrated and sustainable growth in BRI Group segments.

Through this transformation, the Corporate Banking Business continues to strengthen a more solid, digital-driven, and ecosystem-based business foundation. This initiative not only enhances asset quality, expands wallet share, and increases CASA and transaction-based fee-based income, but also generates a multiplier effect on cross-segment growth within the BRI Group.

Table of Corporate Segment Performance (Productivity)

(Bank Only, in IDR millions)

Description	2025	2024	Growth	
			Nominal	%
(1)	(2)	(3)	(4) = (2)-(3)	(5) = (4)/(3)
Loans	352,023,981	254,239,892	97,784,089	38.46%
Savings	525,597,204	467,933,609	57,663,595	12.32%
Current Accounts	333,263,052	275,040,174	58,222,878	21.17%
Deposits	192,334,152	192,893,435	(559,283)	0.29%
Fee Based Income	3,888,420	3,170,934	717,486	22.63%

Based on the performance table above, the Corporate segment loan portfolio in 2025 amounted to IDR352.02 trillion, increasing 38.46% from IDR254.24 trillion in 2024. Meanwhile, deposits in 2025 reached IDR525.60 trillion, which were dominated by current accounts (giro) amounting to IDR333.26 trillion. This performance is in line with the Corporate Segment's focus on continuously strengthening CASA, as reflected in the increasing portion of current account, which grew 30.88% year-on-year to IDR347.59 trillion. Meanwhile, fee-based income from the Corporate Business segment reached IDR3.89 trillion in 2025, growing 22.63% compared to the previous year.

#### Corporate Business Strategy for 2025

The Corporate Banking Business continues to deepen its business transformation by focusing its strategy on strengthening business fundamentals through quality loan growth, reduction of cost of funds, ecosystem strengthening, and enhancement of fee-based income. The key focus was directed at optimizing the funding structure through increasing CASA from corporate customers' operating accounts, expansion into new and expansive sectors, and new-to-bank. This strategy was carried out in a disciplined manner with an integrated ecosystem approach through the adoption of the QLola platform, which was supported by increased human capital capabilities to ensure sound, selective, and sustainable growth.

To implement this course, the Corporate Banking's 2025 business strategies were focused on:

#### 1. Quality Credit Growth and Funding Optimization

Loan expansion on corporate customers with strong fundamentals, high transaction potential, and downstream to MSMEs, including new-to-bank customers. In line with this, efforts to reduce the cost of

funds (CoF) are carried out by increasing CASA based on operating account management, encouraging integrated transaction banking solutions, and optimizing pricing in a disciplined manner. This approach ensured optimal profitability and built a more sound and efficient funding structure.

#### 2. Ecosystem-Based Approach

Encouraging domination of the value chain from anchor clients to open business opportunities for vendors, distributors, and other business partners. Product bundling strategies, cross-selling, and integration of financing and transaction solutions were conducted to increase wallet share and strengthen CASA based on ecosystem activities.

#### 3. Acceleration of Digital Transaction Platform (QLola)

Accelerating the adoption of QLola as an integrated primary transaction platform, including end-to-end cash management, trade finance, treasury, and other digital solutions. Increasing the adoption of QLola was focused on deepening operating account management and strengthening low-cost funds based on customer transaction activities.

#### 4. Strengthening Relationship and Seamless Customer Experience

Strengthening Relationship Manager capabilities in a solution-led engagement and proactive cross-selling approach, as well as ensuring that the onboarding and servicing processes were more standardized and efficient to increase customer retention and loyalty.

Through this strategy, the 2025 Corporate Banking not only encouraged business volume growth, but also strengthened portfolio quality, more efficient funding structures, and integration of ecosystems and digital platforms as the foundation for sustainable growth.

### Competitive Advantages and Corporate Business Innovations

In maintaining competitiveness amid increasingly intense competition and industry margin pressures, the Corporate Banking Business continues to pursue continuous improvements by strengthening employee capabilities and promoting differentiation based on solutions, ecosystems, and digital capabilities. Competitive advantage is built not only on business scale, but also on the ability to deliver integrated solutions that are relevant, agile, and value-adding for corporate clients.

Corporate Banking's innovation service strengthened structured finance, syndication, ESG-linked financing, and supply chain solutions capabilities to increase wallet share and provide comprehensive financial solutions for customers. End-to-end data and process integration through QLola and other digital platforms ensured a seamless, scalable service experience and provided better visibility and control over cash flow and financial exposure, so it supported faster and more informed business decisions. The approach confirmed Corporate Banking's commitment to continuously innovate, maintain relevance, and ensure customers receive more effective, efficient, and competitive services. In addition, this advantage was the foundation for maintaining relevance, strengthening customer loyalty, and encouraging sustainable growth for BRI Group.

### Business Prospects and Corporate Business Strategy for 2026

A description of the Corporate Business's 2026 business prospects and future business strategies is as follows:

#### 1. Business Prospects

Entering 2026, global economic growth is projected to slow below historical trends, around  $\pm 3.3\%$ , (IMF), due to the prolonged weakening of global trade and investment. Domestically, although Indonesia's growth remains solid at around  $\pm 5\%$ , the manufacturing PMI is below the expansion level ( $< 50$ ), indicating that production activity and real demand have not been completely strong. In the banking industry, competition for quality corporate customers (prime customers) is increasingly intense, prompting the relaxation of non-price terms such as more flexible covenants, transaction bundling, and more competitive structured banking, while margin pressure is reflected in the compression of KBMI 4 bank profitability, even though business volume is relatively stable. This condition requires BRI Corporate Banking to prioritize selective growth based on asset quality, strengthening transaction-based CASA, optimizing fee-based income, and disciplined risk management to maintain sustainable profitability.

#### 2. Corporate Business Strategy

The onward challenges provide momentum for BRI Corporate Banking to emphasize its strategic differentiation by encouraging quality and sustainable growth through strengthening strategic customer acquisition, ecosystem integration, transforming HR capabilities, and strengthening overall risk management.

##### a. Driving Quality Growth through Strategic Client Acquisition and Digital Excellence

- Focus on acquiring quality corporate customers in key growth sectors (global supply chain and downstreaming, digital economy, healthcare, renewable energy/ESG, FMCG, to encourage sustainable growth, strengthen asset quality, and increase CASA and fee-based income.
- Digitalization of business processes and increasing transaction banking capabilities through integration of cash solutions, trade finance, treasury, ESG-linked financial solutions, structured finance, syndication, and supply chain solutions to increase wallet share.
- Mastery of operating accounts to build transaction-based CASA.

##### b. Integrating Ecosystem, Elevating Customer Excellence

- Supported by the strength of the BRI Group's network and integrated capabilities, Corporate Banking acts as a catalyst for opening cross-directorate value chains through the One BRI Solution approach, orchestrating financing needs, transactions and liquidity management as a whole in every link of the business chain (principal, supplier, to buyer), thereby creating a connected, efficient ecosystem and forming close-loop transactions from the corporate to micro segments.
- Digital initiative to present integrated corporate solutions, with QLola as the main platform in transforming Corporate Banking services through the use of AI and data analytics.

##### c. Human Capital Transformation

- Signed human capital curriculum and development program for fit-for future world class Corporate Bankers in the fields of core credit, corporate finance, transaction banking, digital, leadership, and ESG.

- Cross-functional exposure to strengthen collaboration and business acumen, as well as targeted competency development to ensure HR readiness to face the increasingly dynamic complexity of corporate business.

d. **Robust Risk and Control Framework**

- Strengthening the early warning system and sector-based monitoring portfolio.
- Comprehensive integration of credit risk, portfolio risk, and operational risk management.

**INSTITUTIONAL BUSINESS**

BRI plays a significant role in institutional business by providing banking products and services for state institutions funded by the State Budget (APBN). The banking solutions offered include deposit management services (current accounts and time deposits), salary and performance allowance distribution for civil servants (ASN), social assistance distribution, state revenue collection (taxes, non-tax state revenue, and others), and digital banking services (QLola, virtual account,

government marketplace, collaboration platforms), and others), as well as value chains (vendor financing, domestic/foreign loans, bank guarantees, and more) and other banking services tailored to meet the needs of institutions, thereby serving the entire business ecosystem. The institutional clients served include Government Ministries/Agencies, the Military (TNI), the Police (POLRI), State Insurance Agencies, Public Service Agencies, and State Universities.

**Table of Institutional Business Performance (Productivity)**

(in IDR million)

Description	2025	2024	Growth	
			IDR	%
(1)	(2)	(3)	(4) = (2)-(3)	(5) = (4)/(3)
Current account	52,902,628	44,327,501	8,575,127	19.34%
Deposit	74,276,190	63,342,352	10,933,838	17.26%

In 2025, Institutional Business Current Accounts reached IDR52.90 trillion, growing by 19.34% compared to IDR44.33 trillion in 2024. This increase aligns with the Company's strategy to boost low-cost fund collection through transaction-based activities by optimizing institutional client businesses. Meanwhile, Institutional Business Time Deposits in 2025 amounted to IDR74.28 trillion, increasing by 17.26% yoy

**Institutional Business Strategy in 2025**

BRI's Institutional Business aligns with stakeholder policy directions as a key source of business growth. This includes various strategic programs such as Free Nutritious Meals Program (MBG), Red and White Village and Sub-district Cooperatives (KDKMP), People's Schools (Sekolah Rakyat), food security, energy security, free nutritious meals, downstream investment, Export Proceeds (DHE), and others. Institutional Business focuses on growing CASA (current accounts), maintaining Cost of Fund (DPK) efficiency, acting as a bridge for other BRI business segments to engage value chain in institutional business, and establishing digital banking platform collaborations with institutional clients.

**Institutional Business competitive Advantage and innovation**

Institutional Business has collaborated in digitized state financial services through various products, including the virtual account of a Ministry/Agency work unit supported by the QLola transaction platform, the Government Credit Card (KKP) or Indonesia Credit Card (KKI), and active involvement in the digitalization of financial platforms across Ministries/Agencies.

**Business Prospects and Institutional Business Strategy for 2026**

The business prospects of Ministries/Institutions remain promising, as many untapped opportunities are available. BRI has been strong in the Employee Expenditure and Social Assistance Expenditure for Ministries/Institutions. Going forward, BRI has planned to work on the capital and goods expenditure value chain for Ministries/Institutions, including vendor financing, bank guarantees, employee loans, DPLK (Financial Services Institutions), custodians, and trustees, transforming them into a business ecosystem within the related business sectors. In addition, BRI is increasingly building various government digital platform collaborations,

because they are the largest component in the transformation of state financial management. The Institutional Business will also enhance performance by optimizing the flow of state budget (APBN) funds from upstream to downstream, which has not yet been fully optimized. Starting from budget disbursement by Central Ministries/Agencies through to

the end beneficiaries, the entire process will be managed more effectively to create a sustainable ecosystem. BRI's Institutional Business has become increasingly efficient by successfully increasing CASA and maintaining the Cost of Fund (DPK) amid intense interest rate competition.

## TRANSACTION BANKING BUSINESS

The Transaction Banking Business has played a crucial role as one of the main pillars in ensuring the continuity of BRI's operations in 2025 and in the future. The significant role of transaction banking is to accelerate fund collection and increase fee-based income. The target segment for transaction banking business is companies and/or institutions with complex financial transaction needs that are closely related to liquidity management.

The products and services offered by the Transaction Banking Business include the following:

### 1. QLola by BRI

It is a banking financial service solution based on the internet, featuring a user interface or in the form of web services connected to the client's system. The services offered can be platform-based. Platform-based service features include receivables, liquidity, payment, supply chain, trade, and guarantee features, with advantages such as user friendly, real-time, and sufficient security features (hard and soft tokens). Meanwhile, non-platform-based transaction features include web services and virtual accounts (BRIVA), which support

general financial transaction needs or can be customized according to the client's requirements.

### 2. BRI Current Account

This is a deposit product that serves the transactional needs of clients, with facilities for withdrawals through vouchers (cheques/bilyet giro) and can also be accessed via ATM or digitally through QLola Cash (Qcash).

### 3. BRI Trade Finance

This is a comprehensive and integrated export-import service for exporters/importers, either through Letters of Credit (L/C), Non-L/C, or Domestic Documented Credit Letters (SKBDN). These services are also fully integrated end-to-end with the QLola platform as a digital trade feature.

### 4. BRI Bank Guarantee

This is a bank guarantee service (contingency) both local and international, in the form of facilities provided to customers, including insurance guarantees, non-cash loans, cash collateral, and counter-guarantees. These services are also fully integrated end-to-end with the QLola platform, featuring Digital BG.

Table of Transaction Banking Performance (Productivity)

(in IDR millions)

Description	2025	2024	Growth	
			IDR	%
(1)	(2)	(3)	(4) = (2)-(3)	(5) = (4)/(3)
Trade Finance Volume and Bank Guarantee	813,999,244	1,100,371,827	(286,372,583)	(26.03%)
Trade Finance Revenue and Bank Guarantee	3,510,649	3,224,516	286,133	8.87%
Cash Management Volume (include QLola Cash Management)	14,044,889,677	9,733,442,971	4,311,446,706	44.30%
Revenue Cash Management (Incl. BRIVA, BI-Fast & Other CM)	2,465,869	1,909,837	556,032	29.11%

The performance of Transaction Banking in 2025 has generally shown improvement. This can be seen from the volume of trade finance and bank guarantees, which increased by 8.87%. The growth in trade finance and bank guarantees was supported by various improvements in operational procedures, and products, and the digitization of trade and guarantee services on the QLola platform. Customer transactions through the QLola platform, particularly cash management, also increased during 2025. Cash Management Revenue increased by 29.11%, along with an increase in Cash Management Volume (including BRIVA, QLola Cash Management and others) by 44.30%.

#### Transaction Banking Business Strategy for 2025

The Transaction Banking Business Strategy for 2025 was To Accelerate the Future by Developing Best in Class Product, which included:

1. Driving Targeted Revenue Expansion through Export Proceed (DHE) and QLola Optimization.  
Strengthening business foundations through tactical programs to increase acquisition and utilization of Giro DHE and QLola transactions, while building a more diversified pipeline of new segments and existing customers.
2. Building Critical Talent and Digital-Driven Commercial Capabilities.  
Completing talent needs through fulfilling strategic positions, implementing regional transaction banking hiring and upskilling programs, as well as establishing a task force to encourage increased activation and cross-selling of QLola.
3. Completing Core Digital Remediation and Platform Readiness.  
Finishing QLola's fundamental improvements, including remediation of existing issues and mobile application development, as well as continuing the digitalization of BRIsport Lending until completion.
4. Embedding Structured Performance Management and Risk-Aligned Execution  
Building a more disciplined framework through implementing sales metrics models, optimizing fee-based income identification, routine risk and control forums, and leadership alignment.

#### Competitive Advantage and Innovation in Transaction Banking

The competitive advantage and innovation in Transaction banking focus on product digitization and integrated solutions, one of which is the QLola platform. QLola is an innovative integrated corporate solution platform that simplifies clients' access to various BRI products and services with a single login. The single sign-on access features of QLola include cash and trade products, supply chain management, foreign exchange, investment services, financial dashboards, and other services. The goal of the competitive advantage and innovation in Transaction Banking products is to have superior value propositions in the market, making it increasingly reliable for generating fee-based income and low-cost funding derived from transactions. Combining competitive advantages and innovations in Transaction Banking products and services provides clients with greater convenience, security, and efficiency, thereby supporting overall business growth.

#### Business Prospects and Strategy for Transaction Banking in 2026

The Role and Strategy of the 2026 Transaction Banking Business are as follows:

1. Capturing Supply Chain to Expand Transaction Banking Footprint.  
Strengthening market penetration through optimizing wallet share in strategic areas and accelerating customers acquisitions in priority sectors.
2. Strengthening Advisory and Analytics Capabilities.  
Establishing stronger advisory and analytical capabilities through the formation of a Treasury Advisory Team, strengthening the data analytics function, and developing a more proactive and responsive client service model.
3. Establishing an End-to-End Integrated Digital Transaction Ecosystem.  
Accelerating digital transformation through the development of QLola as an integrated platform for Cash, Trade and FX solutions, equipped with superior features that support cross-border transaction needs and client activity monitoring.
4. Embedding Structure Market Activation and Client Service Management.  
Improving the go-to-market approach through strengthening solution selling materials, more targeted branding activation, and implementing voice of client as a structured feedback mechanism.

## SYNDICATION, PROPERTY, AND PHARMACEUTICAL BUSINESSES

The Syndication, Property, and Pharmaceutical Businesses, together with the Non-Bank Financial Services, Multinational Company, and Digital and Services Group, manage portfolios focused on several business lines and strategic industry sectors, including the following:

1. The syndication business management services are managed by the Syndication Business Department, covering arranger and loan structuring functions, as well as agency services (facility agent, escrow account agent, and security agent services).
2. The Financial Institution Department plays a role in managing business in the non-bank financial services sector, such as Special Mission Vehicles, the Ministry of Finance, insurance and guarantee institutions, capital markets, and others.
3. The Multinational Company Department manages businesses related to foreign investment in Indonesia, including the multifinance sector and Foreign Direct Investment (FDI).
4. The Pharmaceutical and Property Department focuses on managing businesses in the property and pharmaceutical sectors in Indonesia.
5. The Digital and Services Department manages businesses in the digital and other services sectors, including financial technology, economic zone management, and the BRI Group ecosystem.

BRI actively participates in the banking syndication market at both national and international (Asia Pacific) levels. BRI's Syndication Department possesses strong competencies and experience in initiating and leading syndicated loans (as arranger and loan structuring) as well as managing syndicated loans through agency services. The high level of trust placed in BRI to act as Mandated Lead Arranger throughout 2025 serves as concrete evidence of BRI's active role in providing financing across various sectors, including infrastructure, manufacturing, energy, oil and gas, petrochemicals, plantations, and mining. This is also aligned with BRI's syndication business focus and strategy to support green financing and multi-sector strategic government projects in order to achieve equitable and sustainable development throughout Indonesia.

For other businesses beyond Syndication, we play an active role in providing comprehensive banking financial services, including the provision of credit facilities (cash loans and non-cash loans), corporate fund management, transaction support through QLola products, as well as other financial services tailored to customer needs. The comprehensive solutions offered by BRI contributed to the Bank's overall performance in generating fee-based income, increasing Loan assets, and growing deposits as a source of funding, with the following productivity:

Table of Syndication, Property, and Pharmaceutical Business Productivity

(in IDR millions)

Description	2025	2024	Growth	
			IDR	%
(1)	(2)	(3)	(4) = (2)-(3)	(5) = (4)/(3)
Fee Based Income	334,515	288,042	46,473	16.13%
Outstanding loan	21,738,236	18,719,869	3,018,367	16.12%
Total Savings	100,328,963	41,946,561	58,382,402	139.18%

During 2025, the Syndication, Property, and Pharmaceutical Businesses recorded total fee-based income of IDR334.52 billion, increasing by IDR46.47 billion or 16.13% compared to the achievement in 2024. The majority of this fee-based income

was generated from the provision of syndicated loan services and the extension of credit facilities to customers to support operational activities in the business sectors managed by the Syndication, Property, and Pharmaceutical Businesses.

The total loan portfolio managed by the Syndication, Property, and Pharmaceutical Businesses as of 2025 amounted to IDR21.74 trillion, growing by 16.12% or IDR3.02 trillion compared to the previous year. On the other hand, total deposits in 2025 reached IDR100.33 trillion, reflecting a significant increase of 139.18% or IDR58.38 trillion compared to 2024.

#### Focus and Strategy of the Syndication, Property, and Pharmaceutical Businesses in 2025

The Syndication, Property, and Pharmaceutical Businesses also played an active role in supporting corporate loan disbursement through syndicated financing schemes, selectively targeting flagship projects, including Government priority projects (Astacita of the President of the Republic of Indonesia) in infrastructure, plantations, and mining downstream projects.

To support this strategy, the enhancement of the capabilities and competencies of relationship business managers in the syndication business, particularly in understanding corporate business profiles and financing through Green Loan schemes structured in accordance with Asia Pacific Loan Market Association (APLMA) standards, strengthened the arranger and agency functions in capturing business opportunities, expanding networks, and improving overall transaction efficiency.

On the other hand, the Syndication, Property, and Pharmaceutical Businesses are maximizing portfolio growth for existing, high-performing customers and focusing on business expansion within Indonesia's top-tier multifinance ecosystem. The Syndication, Property, and Pharmaceutical Businesses

have also penetrated the digital and services sectors, including the Indonesian data center ecosystem and digital wallets, as well as exploring business opportunities and development with multinational companies and industrial estates in Indonesia.

#### Competitive Advantages and Business Innovations of the Syndication, Property, and Pharmaceutical Business

The enhancement of the quality of BRI's banking products and services, supported by the improvement of the capabilities and competencies of BRI Employees, constitutes a competitive advantage over competitors. Fast, solution-oriented services that are able to meet customer needs represent an innovation to support future business growth. In the syndication sector, BRI's agency business has expanded its services as an agent for offshore lenders in financing activities in Indonesia. In other sectors, BRI continues to deepen penetration within customer ecosystems through product innovation and integrated solutions to drive sustainable business growth, as well as expanding collaboration with various stakeholders, including the Government, associations, and other institutions, in developing future business opportunities.

#### Business Outlook and Strategy of the Syndication, Property, and Pharmaceutical Business in 2026

In 2026, Corporate Banking 4 (CB4) Group will implement several key strategies to capture business opportunities, including accelerating the acquisition of high-performing customers (top-tier clients), focusing on CASA growth and increasing the utilization of BRI's digital platforms in customer business transactions, actively participating in the initiation and management of syndication business services, and creating new business opportunities through collaboration with multinational companies.

### Other Segments

Other segments include Treasury & International Banking, which cover business activities in Treasury and International Banking, including Overseas Offices (UKLN), as well as Capital Market Services (Investment Services) and Others, which consist of income and expenses arising from equity participation activities other than investments in subsidiaries, as well as income and expenses that are not allocated to any business segment.

#### Summary of Treasury & International Banking Business Performance

The Treasury & International Banking (TIB) Business comprises three main pillars, namely Treasury Business, International Business, and Investment Services (Capital Market Support Business), supported by liquidity and funding management enabler activities that strengthen BRI's bank-wide funding structure. This also includes overseas channels consisting of Overseas Offices (UKLN) and Bank Representatives (BR). TIB continues to optimize its crucial role in ensuring efficient bank liquidity management, serving as a profitability center derived from non-loan transactions, providing expertise in capital market services, facilitating bank lines and correspondent banking relationships,

strengthening BRI's overseas network, and delivering solutions for customers across other business segments.

To support the achievement of the BRIvolution Reignite framework as the foundation for sustainable transformation, the TIB has also adaptively transformed its role from merely balancing the Bank's liquidity to becoming a profit generator. This transformation is carried out through more efficient liquidity management, strengthened product penetration, and expanded coverage areas to enhance competitiveness and support the Bank's business through non-core activities.

Throughout 2025, global economic dynamics marked by significant challenges and turbulence led to highly volatile market movements. Nevertheless, the TIB was able to capitalize on this volatility as an opportunity to generate profit. The combination of treasury business activities through securities and foreign exchange (FX) transactions, agile and efficient liquidity management, expansive international business operations, as well as adaptive capital market support services resulted in notable achievements in 2025, as outlined below:

**Table of Treasury & International Banking (TIB) Business Income**

(in IDR billion)

Component	2025	2024	2023	2022	2021
<b>Total Interest Income</b>	<b>19,108</b>	<b>17,630</b>	<b>16,639</b>	<b>16,230</b>	<b>14,945</b>
Treasury Interest Income	17,399	16,238	15,637	15,839	14,886
International Business Interest Income	1,709	1,392	1,002	391	59
<b>Total Fee Based Income (FBI)</b>	<b>1,149</b>	<b>943</b>	<b>775</b>	<b>644</b>	<b>548</b>
International Business FBI	757	583	452	357	276
Investment Services FBI	392	360	323	287	272
<b>Total Treasury Income</b>	<b>5,423</b>	<b>3,270</b>	<b>2,310</b>	<b>2,609</b>	<b>4,925</b>
Spot and Derivatives Income	2,041	1,115	428	1,018	1,736
Capital Gain	3,382	2,155	1,882	1,591	3,189
<b>Overseas Unit Profit</b>	<b>1,002</b>	<b>643</b>	<b>340</b>	<b>499</b>	<b>467</b>
<b>Total</b>	<b>26,682</b>	<b>22,373</b>	<b>20,052</b>	<b>20,079</b>	<b>20,884</b>

The year-on-year (yoy) performance improvement was driven by the growth of all business activities within the TIB amid relatively volatile market movements throughout 2025. Total Treasury Income recorded an all-time high of IDR5.42 trillion, supported by income from foreign exchange transactions (Spot and Derivatives), which grew by 83.05% yoy, and income from securities transactions (capital gains), which increased by 56.94% during the same period.

Total Fee-Based Income (FBI) also recorded positive growth of 21.84% yoy, mainly contributed by revenues from international banking activities and capital market services (investment services). International business activities include correspondent banking, money changer services,

and remittance services, supported by the provision of bank lines and strong risk management to expand counterparty access. Meanwhile, investment services activities comprise custodian services, investor fund accounts (RDN), trustee services, bond trustee services (wali amanat), and pension fund management (DPLK).

Non-loan interest income within the TIB also grew by 8.38% yoy amid the global trend of declining interest rates. This reflects the optimal management of non-loan assets within the TIB Directorate. The solid performance was further strengthened by the strong contribution from Overseas Units (UKLN), which recorded the highest profit in the past five years, reaching IDR1 trillion, or growing by 55.52% yoy.

### TREASURY BUSINESS

Treasury products and services constitute one of BRI's main pillars in realizing its role as a comprehensive one-stop financial solution for individual and corporate customers. BRI continuously develops Treasury products and services that are customer-driven, while adhering to internal and external regulations and upholding prudential principles and risk management.

Amid the dynamics and challenges of economic conditions throughout 2025, BRI Treasury consistently provided financial solutions that were appropriate, relevant, and value-added for customers. In general, customer needs include foreign exchange (forex) transactions, money market, fixed income, and hedging-related transactions.

### 1. Foreign Exchange

Trading between one currency and another with a specific settlement date. Foreign exchange products include Today Transaction (TOD), TOM, and Spot transactions.

### 2. Money Market

According to Bank Indonesia Regulation (PBI) Number 6 of 2023 concerning the Money Market and Foreign Exchange Market, the Money Market is part of the financial system related to the issuance and trading of financial instruments or debt securities with maturities of no more than one (1) year in Rupiah and foreign currencies, playing a role in monetary policy transmission, financial system stability, and payment system efficiency.

### 3. Fixed Income

Investment products with fixed income rates in the form of debt securities or bonds trading services, issued by the Government or private entities through primary or secondary markets.

### 4. Derivative Product

Transactions based on a contract or payment agreement whose value is derived from underlying instruments such as interest rates and exchange rates. These transactions may be conducted in the form of forwards or other derivative instruments, either with or without the movement of funds or instruments.

Table of Treasury Business Revenue

(Bank Only, IDR million)

Description	2025	2024	Growth	
			IDR	%
(1)	(2)	(3)	(4) = (2)-(3)	(5) = (4)/(3)
Security Gain	3,409,979	2,154,744	1,255,235	58.25%
Forex Gain	1,901,348	1,114,871	786,477	70.54%
<b>Total Treasury Revenue</b>	<b>5,423,159</b>	<b>3,269,615</b>	<b>2,153,543</b>	<b>62.45%</b>

In 2025, Treasury activities adapted to global and domestic economic challenges. This was reflected in the increase in non-interest income in 2025, supported by the reprofiling of Treasury assets and dynamic foreign exchange portfolio management by leveraging market volatility and momentum, amid the declining trend in The Fed's policy rate and Bank Indonesia's benchmark rate. In 2025, the 10-year benchmark government bond yield closed at 6.07%, compared to 7.02% in December 2024. This condition presented both opportunities and challenges in maintaining performance from securities trading activities while continuing to prioritize prudent portfolio and risk management. Accordingly, deeper penetration of existing products and marketing of new products to customers became key focuses to drive sustainable non-interest income as a source of Treasury revenue.

Treasury business development in 2025 focused on strengthening the capabilities and quality of marketing personnel to increase Client-based transactions supported by customer-driven products as solutions for customer

needs are expected to be the cornerstone of Treasury performance in 2024, amidst uncertain market and economic conditions, ensuring Treasury's continued contribution to BRI's performance under various liquidity, market, and economic conditions.

### Treasury Business Strategy for 2025

In 2025, Treasury's business strategy focuses on several key areas, including:

1. Adaptive asset and liability management, considering liquidity, market, and credit risks, while supporting core business growth. To meet liquidity needs and capitalize on market conditions, BRI issued non-third party funds instruments, including sustainable thematic securities.
2. Treasury-linked transactions based on Loan pipelines, trade finance, and funding, whereby each realized transaction did not stop at facility disbursement but also created embedded Treasury product opportunities, thereby increasing transaction volumes, deepening customer relationships, and contributing sustainable income for BRI.

3. The establishment of a Regional Treasury Team as an initiative to strengthen customer proximity and improve the effectiveness of Treasury transaction acquisition and management. This initiative aimed to increase business penetration in individual, High Net Worth Individual (HNWI), and corporate segments through a more focused, responsive, and customer-oriented approach.
4. Enhancement of business services and exploration of Treasury products supported by continuous digitalization processes in line with customer needs (customer-driven products), through optimization and utilization of various digital channels such as BRImo, QLola (QCash), APIs, other e-channels, and enhancement of BRlfx. These efforts were reinforced by increased collaboration with related Business Units in developing new products and services, as well as strengthening human capital quality to support sustainable Treasury business growth.
5. Developing structured products and interest rate-based derivative products as a means of exploring new products to meet customer needs.

#### Treasury Business Competitive Advantages and Innovations

BRI's competitive advantage, with a network spread across all regions in Indonesia, is one of the key drivers for increasing Treasury's client base, especially in the retail segment. The establishment of the Regional Treasury Team (RTT) by BRI has served as a positive catalyst in expanding service coverage and enhancing the effectiveness DNA of Treasury services to customers. In addition, BRI Treasury continuously develops human capital capabilities as part of its commitment to strengthening the foundation of optimal and sustainable Treasury activities that are aligned with future business needs. In 2025, BRI Treasury received several awards for its performance and contributions to the financial market, including:

1. The Asset Triple A Awards for Sustainable Finance – Best Issuer for Sustainable Finance
2. Alpha Southeast Asia - Best FX Bank for Hedging requirements (Corporates and FIs) 2025.
3. Alpha Southeast Asia – Best FX Bank for Structured Products: Treasury Yield Enhancements 2025.
4. Asian Banking and Finance Wholesale Banking Awards – Indonesia Domestic Foreign Exchange Bank of the Year
5. Asian Banking and Finance Wholesale Banking Awards – Indonesia Domestic Green Financing Bank of the Year
6. LSEG FX Award Indonesia 2025 – Best State Bank
7. Bank Indonesia – Best Supporting Bank for Rupiah Money Market Development
8. Bank Indonesia – Best Policy Transmission Partner Bank for Rupiah Monetary Operation Target Achievement

9. Bank Indonesia – Appreciation of JIBOR Contributing Banks
10. KEHATI ESG Award 2025 – Best Debt and Project Financing - Issuer/Borrower 2025

BRI continues to foster an innovative culture, including enhancing Treasury activities that align with visi in 2025 of becoming a Market Leading Bank in Treasury and Global Services with Sustainable and Meaningful Contribution to BRI Group. Several innovation activities carried out throughout 2025 are as follows:

1. Enhancement of repo margin management through the use of Tri-Party Agent (TPA) repo to strengthen risk mitigation, transparency, and business process efficiency.
2. Selective optimization of corporate securities portfolios as underlying repo transactions to support liquidity management, accompanied by improved Treasury core system infrastructure capabilities
3. Utilization of Bank Indonesia Floating Rate Notes (BI-FRN) to optimize excess liquidity while considering measured interest rate risk.
4. Enhancement of operational risk management aspects through business process efficiency in transaction services for the utilization of Natural Resources Export Proceeds, integrated into the Treasury system.
5. A funding plan for issuing non-DPK instruments is used to meet BRI's liquidity needs. The issuance of non-DPK funding is conducted tentatively while still considering the growth of DPK, loans, and market conditions. This includes the issuance of Long Term Notes (LTN) for Tapera credit financing and Green Bonds for MSME financing, and Commercial Papers (SBK) to support short-term bank financing and deepen Indonesia's financial market.

#### Business Prospects and Treasury Strategy for 2026

The 2026 Treasury business strategy aims to support BRI's core business to become Market-Leading in Treasury Activities, Driving Sustainable Growth and Meaningful Contributions Across the BRI Group. Amid global dynamics characterized by economic policy uncertainty and rising geopolitical risks, as well as limited interest rate cuts compared to 2025, BRI Treasury will optimize an adaptive and agile approach to proactively capture market opportunities while maintaining measured risk management. BRI Treasury will focus on active and agile portfolio management, accompanied by client base expansion by segment and region, particularly through strengthened coverage in Medan, Surabaya, and Jakarta. In addition, BRI Treasury will actively develop products and innovations aligned with client needs and economic growth, including serving as Main Bank for Special Accounts of Export Proceeds (Reksus DHE) and developing structured products.

## INTERNATIONAL BUSINESS

BRI has the capability and experience to serve customers' financial activity needs including products and services in the International Business sector. The development of International Business at BRI is supported by Correspondent Banking, Cross Border Payment, and Banknotes services, as well as by the Overseas Channel Management and Development Department, which supervises all BRI Overseas Business Units, and the Bank Line Management Department as a supporting unit for International Business services.

BRI's International Business services are also supported by overseas operational units located in New York-USA, Cayman Islands, Singapore, Hong Kong, Dili-Timor-Leste, and TaipeiTaiwan. Additionally, BRI's Head Office has representatives abroad to facilitate referral business for BRI's Head Office products and services, Overseas Business Units, and BRI Group, as well as to communicate with all BRI stakeholders (customers, shareholders, regulators, etc.) in form of BRI bank representatives located in Malaysia, South Korea, Japan, Hong Kong, China, Saudi Arabia, the UAE, Germany, and the USA

BRI's International Business is supported by professional personnel who hold internationally recognized product specialist certifications, such as Certified International Trade Finance (CITF), Certificate for Specialists in Demand Guarantees (CSDG), and other relevant certifications that are regularly renewed. BRI's International Business collaborates with more than 1,200 correspondent banks worldwide, providing services in more than 140 foreign currencies, and partnering with over 100 remittance companies globally. These services are further supported by operational units across 38 provinces in Indonesia. BRI also facilitates foreign exchange trading transactions in 22 foreign currencies across all operational units.

BRI offers comprehensive and up-to-date international business products and services, including the following:

### 1. Correspondent Banking Business Product

- a. Bank guarantee issuance under counter guarantee, which is an Issuance of local bank guarantees to bouwheer based on a counter guarantee received from a correspondent bank.
- b. LC/SKBDN refinancing business, which is a short-term financing by a funding bank for L/Cs issued by BRI (issuing bank).

- c. LC/SKBDN confirmation business, which is an additional guarantees from BRI provided to beneficiaries for LC/SKBDN issued by a counterpart bank (issuing bank).
- d. Trade asset participation business, which is an acquisition of part or all receivables (bank risk or country risk) with underlying trade finance based on a master risk participation agreement.
- e. Banker acceptance, which is a short-term liquidity facility provided by BRI as a lender or funding bank to a counterpart bank with an underlying trade LC/ Non-LC.
- f. Bank-to-bank forfaiting business, which is an acquisition of receivables (payment claims) without recourse based on underlying trade finance transactions under Uniform Custom Rules for Forfaiting (URF).
- g. Bank loan, which is a loan facility provided by BRI to Correspondent Banks to meet liquidity needs in either rupiah or foreign currency.

### 2. Cross-Border Payment Business Products

Cross-border payment (fund transfer) can be defined as the movement of funds across countries from the originator of payment to the beneficiary of payment. This service includes incoming Cross Border Payment (Cooperation and Non-Cooperation) and Outgoing Cross Border Payment integrated with BRI digital channels.

#### a. Incoming Cross Border Payment (partnership and commercial)

- Incoming partnership-based is a fund transfer service from abroad to Indonesia using the BRIfast application through BRI's overseas counterpart channels, primarily sourced from remittances of Indonesian migrant workers (PMI).
- incoming non-partnership-based is a fund transfer service from abroad to Indonesia using the SWIFT platform, typically linked to underlying trade transactions (export-import).

#### b. Outward Cross Border Payment

This service enables fund transfers abroad in foreign currencies, including domestic transfers using foreign currencies.

- c. **Global MT 940 and MT 101 Services**

A service facility to accommodate SWIFT service needs for non-bank multinational companies, especially those that have a network of business units in Indonesia.
3. **Banknotes Business Products**
  - a. **Banknotes Purchase and Sale Transactions:** These are transactions for the purchase and sale of foreign banknotes (UKA) physically through money changers, supported by marketing staff who have certification in the relevant field.
  - b. **Cash Withdrawal and Deposit of Banknotes:** These are transactions involving the withdrawal and deposit of banknotes into and from foreign currency savings accounts of customers, served at the operational units of BRI.
  - c. **Same Currency Transactions:** These are transactions where banknotes are bought and/or sold to other banks/ counterparts with the same currency payment and competitive exchange rates.
4. **Overseas Channel Management and Development**

Overseas channel management and development is the department responsible for managing and developing BRI's overseas branches (UKLN), including business planning for foreign operations, fostering business relationships, liaison functions for business and operational needs, and monitoring and evaluating the performance of these overseas branches. The list of BRI overseas branches is as follows:

  - a. **BRI New York Agency**

Established on April 8, 1988, with a foreign agency license, BRI New York Agency is BRI's first overseas branch, serving customer business by facilitating loan transactions, trade finance, treasury, cross-border payments, and settlement in USD. It also helps promote BRI's MSMEs (Micro, Small, and Medium Enterprises) in the U.S. market to domestic banks and other foreign banks. BRI New York Agency also provides USD clearing services to domestic banks and foreign banks.
  - b. **BRI Hong Kong Representative Office**

Established in 1989 as the second overseas working unit, BRI Hong Kong holds a license as a Representative Office. The BRI Hong Kong Representative Office's role is to represent the BRI Group in communicating with all BRI stakeholders in Hong Kong. The BRI Hong Kong Representative Office also helps to promote BRI's MSMEs in the Hong Kong and China markets.
  - c. **BRI Cayman Islands Branch**

BRI Cayman Islands Branch was established in 1992 and holds a Type B license from the Cayman Islands Monetary Authority (CIMA). BRI Cayman Islands Branch focuses on providing Loan facilities for corporate and government financing needs, trade finance services supporting customers' international trade activities, as well as treasury transaction management and execution. This branch supports BRI's strategy in delivering competitive and efficient financial solutions, including funding structure optimization.
  - d. **BRI Singapore Branch**

BRI Singapore Branch (BRISG) was established in 2015 with a wholesale banking license, functioning as BRI's trade finance hub serving trade transactions between Indonesia and Southeast Asia. The opening of the BRI Singapore Branch also supports BRI's effort to follow customer business operating in Southeast Asia (SEA). Its business activities include loan services, trade finance, and treasury related to Indonesian business activities.
  - e. **BRI Timor Leste Branch**

BRI Timor Leste Branch (BRITL) holds a Level B license from Banco Central de Timor-Leste (BCTL) and has been operational in Dili, Timor Leste since March 14, 2017. BRI Timor Leste offers products including Loans, deposits (savings, current accounts, time deposits), treasury services (money market, foreign exchange, securities management), remittance, trade finance, bank guarantees, safe deposit boxes, and financial consultancy services. Transactions are conducted in multiple currencies. Currently, BRI Timor Leste operates three Sub-Branches located in Audian, Hudi Laran, and Fatuhada.
  - f. **BRI Taipei Branch**

BRI Taipei Branch is the official representative of PT Bank Rakyat Indonesia (Persero) Tbk in Taiwan, having obtained a full license as a foreign retail bank from the Banking Bureau – Financial Supervisory Commission, Republic of China (Taiwan), and commenced operations on November 30, 2021. The branch is committed to providing retail and corporate banking services, including deposit products, Loan facilities, trade finance, international remittance services, as well as various financial solutions and other banking products.

## 5. Bank Line Management

Bank line management is a department responsible for managing the limits provided to counterpart banks used for trade finance, , Correspondent Banking Business, and treasury transactions, which can be committed or uncommitted. Some activities performed by this department include:

- Macro conditions and country risk analysis of counterparts.
- Analysis and recommendation for banking line facilities.
- Due diligence on counterpart for bank line facilities.
- Monitoring counterparty performance and bank line utilization to enhance yield.

**Table of International Business Performance (Productivity)**

(in IDR billion)

Description	2025	2024	Growth	
			Nominal	%
(1)	(2)	(3)	(4) = (2)-(3)	(5) = (4)/(3)
Volume International Business (in IDR billion)	<b>2,888</b>	2,792	96	3.44%
Jumlah Transaksi International Business (in IDR billion)	<b>16.98</b>	15.18	2	11.86%
Revenue International Business (in IDR billion)	<b>2,462</b>	1,848	614	33.23%

International Business recorded significant performance growth throughout 2025. International Business revenue reached IDR2.46 trillion, growing by 32.23% compared to IDR1.85 trillion in 2024. This revenue growth was aligned with and supported by increases in transaction volume and transaction frequency as follows.

The International Business transaction volume reached IDR2,888 trillion, representing a 3.44% increase compared to IDR2,792 trillion in 2024, in line with the 11.86% year-on-year growth in international business transactions.

This performance growth was driven by three International Business segments: Correspondent Banking Business, Cross Border Payment Business, and Banknotes Business. Correspondent banking business made the largest revenue contribution from bank-to-bank transactions with underlying trade, such as trade asset participation, refinancing LC/SKBDN, bank-to-bank forfaiting, bankers' acceptance, bank loans, as well as the issuance of bank guarantees based on counter guarantees from correspondent banks and confirmation LC/SKBDN. Banknotes Business contributed revenue from money changer services across operational

Business Units and BRI money changer outlets. Cross Border Payment Business contributed revenue supported by the growth of international trade transactions and cooperation networks with partners worldwide, with the largest transactions originating from the Indonesian Diaspora in countries such as Malaysia, Singapore, Brunei, Taiwan, Hong Kong, South Korea, Japan, the United Arab Emirates, and Saudi Arabia.

### Strategi *International Business* Tahun 2025

Uraian strategi *International Business* Tahun 2025 dijabarkan sebagai berikut:

#### 1. Cross Border Payment Business Strategy

Committed to delivering Incoming and Outgoing Cross Border Payment services through the following initiatives:

- Integration of system networks with global Money Transfer Operators (MTOs) to enhance service capabilities.
- Expansion of outgoing/international transfer service channels through digital SuperApps platforms to increase retail market penetration.

- c. Bank Representatives (BR) act as catalysts for Indonesian-related businesses to utilize BRI's products and services.

## 2. Banknotes Business Strategy

- a. Digitalization of money changer transactions to enhance services at operational units and Money Changer outlets.
- b. Expansion of the retail banknotes market to meet the needs of foreign tourists, Umrah and Hajj pilgrims, and business travelers.
- c. Expansion of services at international airports, international seaports, and cross-border posts with high traffic potential.

## 3. Correspondent Banking Business Strategy

- a. Increasing transaction volumes through the onboarding of new correspondent banks and the optimization of existing correspondent banks, supported by sound risk management practices.
- b. Risk measurement in Correspondent Banking activities by considering market conditions, bank soundness, bank ratings, reciprocal business, and benchmark interest rates.
- c. Provision of alternative funding solutions for BRI's wholesale customers through LC/Non-LC Refinancing Business instruments.
- d. Enhancement of Relationship Manager (RM) capacity through collaboration with BRI Corporate University in product specialist education and certification programs.

## 4. Overseas Channel Management and Development Strategy

- a. Acting as business intermediaries between BRI Head Office, BRI Group, and Overseas Offices.
- b. Enhancing international business and treasury transactions, as well as strengthening BRI New York Agency as a USD clearing service provider in Southeast Asia.
- c. Strengthening the role of BRI Singapore Branch as a Financial and Trade Hub in Southeast Asia.
- d. Digitalization of services to support BRI Taipei Branch as a payment gateway for the East Asian market.
- e. Strengthening BRI Timor Leste's business through segment diversification and the addition of temporary outlets.
- f. Supporting the promotion of Indonesian MSMEs overseas and the implementation of the follow-the-customer business concept.

## 5. Bank Line Management Strategy

- a. Development of the BRISPOT Bank Line application to accelerate the initiation and decision-making processes for bank lines.
- b. Support for bank line facilities to meet the needs of Trade Finance, International Business, and Treasury, while maintaining credit quality.
- c. Banking industry updates for countries with high exposure or elevated risk.
- d. Strengthening policies and risk management through the review of internal regulations aligned with prevailing external regulations.

## Competitive Advantages and Innovations of the International Business

The competitive advantages and innovations of the International Business are outlined as follows:

### 1. Cross Border Payment Business

- a. Competitive Advantages
  - Presence of Bank Representatives and subsidiaries in key destination countries for Indonesian Migrant Workers (PMI), including Malaysia, South Korea, Japan, Hong Kong (China), Saudi Arabia, and the United Arab Emirates.
  - Availability of Bank Representatives and subsidiaries in major destination countries for PMI placements.
  - A network of more than 100 global counterparts to support cross-border transfer services.
  - Outgoing cross-border payment services available through QLola and BRImo, supporting transactions in more than 140 foreign currencies.
- b. Innovations
  - Multiple channels for outgoing transactions through SuperApps BRImo and QLola.
  - Incoming cash disbursement services through BRILink Agents.
  - Incoming transaction applications developed in collaboration with BRI counterparts.

### 2. Banknotes Business

- a. Competitive Advantages
  - A service network at Indonesia's entry and exit points, including airports, seaports, and Cross-Border Posts (PLBN).
  - Competitive exchange rates supported by a fast negotiation process.
  - Professional banknotes stock management, supported by adequate infrastructure and specialized personnel.
  - A broad service network across BRI operational units, including weekend banking services.

- Providing services in 22 major global currencies, namely USD, EUR, AUD, JPY, SGD, GBP, SAR, THB, HKD, CNY, NZD, AED, MYR, BND, CHF, KRW, PGK, CAD, TWD, PHP, INR, and VND.

b. Innovations

- Cashless money changer services through QRIS and BRIVA.
- Development of BRI Money Changer outlets at airports, seaports, and border areas.
- Development of a service ecosystem for Umrah and Hajj travel agencies.

### 3. Correspondent Banking Business

a. Competitive Advantages

- A global correspondent network with more than 1,200 banks worldwide.
- Comprehensive correspondent banking products to support both borrowing and lending needs.
- A wide operational network supported by competent marketing and operational personnel.
- Support from Overseas Offices and Bank Representatives.

b. Innovations

- Implementation of diverse correspondent banking products to support the liquidity needs of domestic and foreign banks.
- Same-day service for the issuance of Bank Guarantees based on Counter Guarantees.

### 4. Overseas Channel Management and Development

a. Competitive Advantages

- Availability of financing, products, and services for export-import businesses.
- Access to global banking services, including USD Clearing Services.
- Digital banking services for both retail and wholesale customers abroad.
- Support for MSME development toward international markets.
- Acting as a business catalyst for other business segments through referral business activities.
- Strong business relationships with banking and non-banking institutions in each respective country.

b. Innovations

- Development of new products and services across BRI's overseas channels.
- Digitalization of banking products and services.
- Collaboration with various institutions to enhance business matching and referral activities.

### 5. Bank Line Management

a. Competitive Advantages

The bank line initiation function is separated from the marketing function (four-eyes principle), allowing for more focused bank line management to enhance services for customers and stakeholders.

b. Innovations

Automation of the bank line initiation process through the development of the BRISPOT Bank Line application.

### Business Outlook and Strategy of the International Business in 2026

The BRI International Business Group continues to enhance productivity amid global uncertainties while maintaining service quality to meet customers' business needs. Efforts to increase revenue contribution are pursued through higher transaction volumes in correspondent banking, cross-border payment, and banknotes businesses. To support these objectives, BRI's International Business has formulated the following strategies for 2026:

#### 1. Cross Border Payment Business

a. Business Outlook

- The incoming remittance business from Indonesian Migrant Workers (PMI) continues to demonstrate strong prospects due to the large and recurring remittance flows, including to rural areas.
- Expansion of the global counterpart network to increase both incoming and outgoing transaction volumes.
- Expansion of the retail-based customer base through BRImo and QLola platforms.
- Increased incoming BRIFast Cash transactions from walk-in customers.

b. Business Strategy

- Penetration of prospective PMI customers during the pre-departure stage as a pipeline for new service users.
- Integration of system networks with Global Money Transfer Operator (MTO) companies to expand service capabilities.
- Development of outgoing remittance services through BRImo (retail segment) and QLola (corporate segment).
- Expansion of new country corridors to capture potential incoming remittance transactions.
- Expansion of remittance services through e-wallets, BRILink Agents, and digital savings platforms.

## 2. Banknotes Business

### a. Business Outlook

- Potential expansion of the service network at entry points to Indonesia via land, sea, and air routes.
- Strengthening of the retail segment supported by BRI's E-Channel services (QRIS and BRIVA).

### b. Business Strategy

- Digitalization of money changer transactions through the development of QRIS and BRIVA transaction services to enhance the effectiveness and efficiency of transaction services.
- Collaboration with AMPHURI to acquire transaction flows from Umrah and Hajj pilgrims as well as travel agencies.
- Establishment of money changer outlets at airports, seaports, and Cross-Border Posts (PLBN).
- Rebranding of potential operational units located in tourism areas and commercial centers.
- Digitalization of transactions through QRIS and BRIVA.

## 3. Correspondent Banking Business

### a. Business Outlook

- Government strategic projects create opportunities for the issuance of Bank Guarantees under Counter Guarantee schemes.
- Potential decline in benchmark interest rates provides opportunities for BRI to increase asset acquisition through secondary market transactions, including participation as a lender in Trade Asset Participation, Refinancing LC UPAS/UPAU, and Interbank Forfaiting transactions.

### b. Business Strategy

- Active participation in strategic projects by providing Bank Guarantee issuance services based on Counter Guarantees from correspondent

banks, while strengthening collaboration with BRI Regional Offices, relevant Wholesale Groups, and BRI Overseas Channels.

- Active front-loading of transactions that generate interest income to optimize yield enhancement in Correspondent Banking Business transactions.

## 4. Overseas Channel Management and Development

### a. Business Strategy

- Exploration of new business opportunities through upgrading the licenses of overseas channels.
- Strengthening existing businesses to optimize assets and liabilities.
- Market expansion into new regions.
- Assessment of potential countries for the establishment of new overseas channels.
- Development of new products for both corporate and retail customers.
- Enhancement of referral business activities and internship programs for BRI employees in overseas channels.
- Implementation of employee internship programs to further enhance BRI's human capital capabilities.

## 5. Bank Line Management

### a. Business Strategy

- Enhancement of the BRISPOT Bank Line application to accelerate bank line initiation and approval processes.
- Optimal support in providing bank line facilities to meet the needs of International Business and Treasury, while maintaining credit quality.
- Business process efficiency through the review of bank line initiation and approval processes.
- Banking industry updates for countries with high exposure or elevated risk levels.
- Strengthening risk mitigation through periodic monitoring of counterparty performance.

## CAPITAL MARKET SUPPORTING BUSINESS

The Investment Services Business focuses on developing investment support services across two business ecosystems, namely the human resources ecosystem for customers and the capital market investment support ecosystem. Within the human resources ecosystem, the Financial Institution Pension Fund (DPLK) assists both corporate and individual customers in preparing for financial well-being during retirement. Within the capital market investment support ecosystem, BRI provides several flagship services, including custodian bank services, trust and corporate services, and trustee services.

The products and services offered by the Capital Market Supporting Business include the following:

### 1. Financial Institution Pension Funds

The Financial Institution Pension Fund of Bank Rakyat Indonesia (DPLK BRI) was established on March 26, 2004, based on the Decree of the Board of Directors of PT Bank Rakyat Indonesia (Persero) Tbk No. B.140-DIR/KUI/TRY/03/2004 dated March 26, 2004, and was approved by the Minister of Finance of the Republic of Indonesia No. KEP-97/KM.6/2004 dated May 24, 2004. Currently, DPLK BRI is one of the largest DPLKs

in Indonesia, with a widespread network and the most comprehensive pension product and program services. To enhance its services, DPLK BRI has obtained ISO 9001:2015 International Certification.

DPLK BRI administers several programs, including:

- BRI Defined Contribution DPLK Program
- BRI Post-Employment DPLK Program
- BRI Health Fund DPLK Program

DPLK BRI has comprehensive and diverse investment options that may be selected by Participants, including the following:

- Money Market
- Fixed Income
- Equity
- Sharia Money Market
- Sharia Balanced Fund

For conventional investment package options, Financial Institution Pension Funds BRI also has a Combination feature where participants can determine their own desired combination according to each participant's risk profile.

## 2. Custodian Service

BRI has conducted custodian services since 1996 based on operational license through the Decree of the Chairman of Bapepam No. 91/PM/1996 dated April 11, 1996, and has been appointed as Sub Registry for Government bond transactions and SBI Scripless administration by Bank Indonesia.

Custodian services include:

- Safe keeping services and portfolio valuation
- Settlement handling
- Income collection services, including tax payment
- Corporate action and proxy services
- Reporting services
- Custody services for Unit Link and DPLK
- Custodian services for asset securitization
- Global custodian services for securities issued overseas

To enhance its services, BRI Custodian has become a direct member of Euroclear, holds Sharia Custodian Certification, provides Multi-Share Class features for mutual funds, and has obtained ISO 9001:2015 International Certification.

## 3. Trustee Services

BRI obtained permission to act as Trustee by being registered with BAPEPAM (now the Financial Services Authority) No.08/ STTD WA/PM/1996 dated June 11, 1996. BRI is highly experienced in the trust business and is trusted by various Indonesian State-Owned Enterprises (SOE), banks and other corporations to issue obligations and Medium-Term Notes (MTN). BRI understands its duties as Trust provider to represent and protect the interests of bond or MTN holders in accordance with provisions in the Trust agreement.

Scope of Trustee Services includes:

- Trustee
- Security Agent
- Monitoring Agent

## 4. Trust and Corporate Services

The BRI Trust Services represent custodial services for customers' assets in the form of financial assets held for and on behalf of the customers. BRI was the first bank in Indonesia to obtain approval from Bank Indonesia to provide Trust Services in Indonesia, based on Bank Indonesia Letter No. 15/19/DPB1/PB1-3 dated February 12, 2013, and the confirmation letter from Bank Indonesia No. 15/30/DPB1/PB1-3 dated March 19, 2013.

Scope of BRI Trust Services includes:

- Paying Agent Services
- Loan Agent Services
- Investment Agent Services

BRI currently provides Trust Services for financial transactions related to oil and gas (O&G) projects, including those undertaken by Contractors under Cooperation Contracts (K3S) operating under the supervision of SKK Migas, as well as non-K3S projects.

In addition to providing Trust Services, BRI also offers Corporate Services, such as Paying Agent and Escrow Agent services for sectors outside the oil and gas industry, including infrastructure, energy, trade, and the chemical industry.

Table of Capital Market Supporting Services Business Performance (Productivity)

(in IDR Million)

Description	2025	2024	Growth	
			IDR	%
(1)	(2)	(3)	(4) = (2)-(3)	(5) = (4)/(3)
Fee-Based Income	391,640	360,101	31,539	8.76%
Custodian Management Assets	1,612,600,051	1,412,304,310	200,295,741	14.18%
DPLK Management Assets	30,634,529	26,912,513	3,722,016	13.83%

Fee-based income from the capital market support services business in 2025 reached IDR391.64 billion, an increase of 8.76% compared to 2024, which reached IDR360.10 billion. Custodian assets under administration in 2025 amounted to IDR1,613 trillion, an increase of 14.18% compared to 2024 of IDR1,412 trillion. DPLK assets in 2025 amounted to IDR30.6 trillion, an increase of 13.83% compared to 2024 of IDR26.91 trillion. This achievement is in line with the increased customer penetration and the expansion of the customer base carried out in 2025.

#### Capital Market Supporting Services Business Strategy in 2025

The Capital Market Support Services business in 2025 has the following strategies:

1. Business process digitalization initiatives

- f. Competitive fees, custodian service fees tailored to the complexity of the services provided.
- g. Extensive network, BRI Custodian collaborates with trusted asset managers and the entire BRI network, both domestically and internationally, ready to assist in finding solutions for clients' investment needs.

#### 3. Trustee Services

- a. Trusted to serve as the custodian for over 150 bond issuances and 52 issuers.
- b. Consistently adhering to all regulations since being registered as a trustee in 1996.
- c. Experienced in managing a diverse range of business sectors, including banking, multifinance, infrastructure, real estate, mining, healthcare, energy, media, and more.
- d. Possessing top-tier human resources to effectively perform duties and responsibilities as a trustee.

#### 4. Trust and Corporate Services

- a. Experienced in managing client funds as a paying agent and escrow agent in the real estate and oil & gas sectors.
- b. Experienced as an escrow agent in syndicated/ bilateral loans.

- c. Experienced in managing international clients as an escrow agent or security agent.
- d. Equipped with a reliable and experienced team and infrastructure.
- e. Providing top-tier human resources to provide solutions based on the clients' needs.

### Business Prospect and Strategy for Capital Market Supporting Services Business in 2026

The BRI Capital Market Supporting Business continues to strive to improve the productivity in the midst of rising

business challenges and dynamic situations of national and global economies. BRI's Capital Market Support Services business is also committed to increasing the company's revenue contribution through the enhancement of fee-based income. To achieve this, the Investment Services Division of BRI in 2026 has the following strategies:

1. Business process digitalization initiatives.
2. Enhancing collaboration with related group and subsidiary companies.
3. Enhancing resilience in risk management, compliance, and GCG.

## Subsidiary

The Subsidiaries Business Segment comprises conventional banking, financing, remittance services, life insurance, general insurance, venture capital, securities brokerage, and investment management. BRI has 10 subsidiaries, namely PT Bank Raya Indonesia Tbk (formerly PT Bank Rakyat Indonesia Agroniaga Tbk), BRI Global Financial Services Co. Ltd. (formerly BRI Remittance Co. Limited Hong Kong), PT Asuransi BRI Life, PT BRI Multifinance Indonesia, PT BRI Danareksa Sekuritas (formerly PT Danareksa Sekuritas), PT BRI Ventura Investama, PT BRI Asuransi Indonesia (formerly PT Asuransi Bringin Sejahtera Artamakmur), PT Pegadaian, PT Permodalan Nasional Madani, and PT BRI Manajemen Investasi (formerly PT Danareksa Investment Management). The performance overview of BRI's Subsidiaries is presented as follows.

PT PT Bank Raya Indonesia Tbk, hereinafter referred to as "Bank Raya" or "the Bank," was established by Dana Pensiun Perkebunan (Dapenbun) on September 27, 1989, under the name PT Bank Agroniaga, hereinafter referred to as Bank AGRO. It is expected to play a significant and strategic role in the development of the agribusiness sector in Indonesia, with the Bank's loan portfolio predominantly allocated to the agribusiness sector, both off-farm and on-farm.

Bank AGRO subsequently became a public company listed on the Indonesia Stock Exchange based on Bapepam-LK Letter No. S-1565/PM/2003 dated June 30, 2003, resulting in the company's name change to PT Bank Agroniaga, Tbk. In 2006, Bank AGRO upgraded its status to a Foreign Exchange Commercial Bank based on Bank Indonesia Governor's Decree No. 8/41/Kep. GBI/2006 dated May 8, 2006. Then, on March 3, 2011, with the signing of the Share Acquisition Deed of PT Bank Agroniaga, Tbk. between PT Bank Rakyat Indonesia (Persero), Tbk. (BRI) and Dana Pensiun Perkebunan

(Dapenbun) in Jakarta, BRI officially became the Controlling Shareholder of PT Bank Agroniaga Tbk, and the Bank's name was changed to PT Bank Rakyat Indonesia Agroniaga Tbk, with the commercial name BRI Agro.

On September 27, 2021, the General Meeting of Shareholders (GMS) approved the name change of the Bank to PT Bank Raya Indonesia Tbk, with the commercial name Bank Raya. The Bank received the Approval for the Use of the Business License under the name PT Bank Rakyat Indonesia Agroniaga Tbk to PT Bank Raya Indonesia Tbk through the copy of the Deputy Commissioner of Banking Supervision I, OJK Decision No. Kep-65/PB.1/2021 dated November 1, 2021, via Letter No. S 426/PB.12/2021 dated November 5, 2021. Additionally, the Bank received approval for the logo change from OJK through Letter No. S-250/PB.31/2021 dated November 9, 2021, regarding the Approval of the Bank's Logo Change.

To strengthen the Bank's positioning as the digital bank of the BRI Group, on November 1, 2023, Bank Raya effectively adopted a new logo as its corporate identity, incorporating the words "Bank" and "BRI Group" into the logo. This logo change is in accordance with OJK Letter No. S-83/PB.212/2023 dated November 1, 2023, regarding the Plan to Change the Logo of PT Bank Raya Indonesia Tbk.

In accordance with the Extraordinary General Meeting of Shareholders (EGMS) of PT Bank Rakyat Indonesia Agroniaga Tbk, Deed No. 23 dated September 27, 2021, approval was granted for the amendment of the Company's Articles of Association, Article 1, paragraph (1), to change the Company's name from "PT Bank Rakyat Indonesia Agroniaga Tbk" with the commercial name BRI AGRO, to "PT Bank Raya Indonesia Tbk" with the commercial name Bank RAYA.

Table of PT Bank Raya Indonesia Tbk Performance (Productivity)

(in IDR Millions)

Description	2025	2024	Growth	
			IDR	%
(1)	(2)	(3)	(4) = (2)-(3)	(5) = (4)/(3)
Total Loan	<b>7,715,323</b>	7,125,951	589,372	8.27%
- OS Digital Loan	<b>3,066,598</b>	2,290,476	776,122	33.88%
- Digital Loan Distribution	<b>28,759,174</b>	20,575,738	8,183,436	39.77%
Total Third Party Fund	<b>9,544,986</b>	8,133,782	1,411,204	17.35%
- Digital Fund volume	<b>2,206,120</b>	1,318,967	887,153	67.26%
Total Asset	<b>13,211,298</b>	13,158,236	53,062	0.40%

In 2021, Bank Raya began its transformation into a digital bank by providing digital product services that had the characteristics of a small ticket size (smaller), short term (shorter) and fast digital based services (faster). This transformation aimed to optimally capture business opportunities in the MSME segment in Indonesia, primarily by focusing on providing digital banking services to the micro and small segments. With the transformation process that focused on digital business development, this resulted in changes to the structure of Bank Raya's asset and liability portfolio, such as the composition of digital-based assets and liabilities was increasing compared to the non-digital portfolio.

To be a digital bank that provides digital banking services to the micro and small segments, Bank Raya has implemented several strategic steps for both digital loan and digital savings products. These include strengthening the business fundamentals by introducing innovations that enhance

the value proposition of digital loan products, particularly through integrating digital loan products with partners, especially digital platform providers. Additionally, for digital savings, this includes the development of Raya for Business and Raya for Community. Furthermore, Bank Raya has also optimized business growth through scale-up and scope-up strategies, both within the internal ecosystem and externally within the BRI Group.

In 2025, the performance of Bank Raya's digital products continued to show improvement. This was reflected in the increase in total assets, which rose from IDR13.15 trillion in December 2024 to IDR13.21 trillion, representing 0.40% year-on-year growth. This increase was mainly driven by the growth in total lending, which reached IDR7.71 trillion in December 2025, up from IDR7.12 trillion in December 2024. Meanwhile, total Third-Party Funds (TPF) also recorded growth, increasing from IDR8.13 trillion in 2024 to IDR9.54 trillion, representing 17.35% year-on-year growth.

The performance of Bank Raya's digital products also demonstrated significant growth. Bank Raya's digital loans consistently increased from IDR2.29 trillion in December 2024 to IDR3.06 trillion in December 2025, representing an 33.88% growth yoy. Digital deposit volume also increased from IDR1.32 trillion in December 2024 to IDR2.20 trillion in December 2025, growing by 67.26% yoy.

The growth in digital loans and digital deposits demonstrates that Bank Raya's transformation into a digital bank has been progressing well and has had a positive impact on the structure of Bank Raya's business portfolio. However, the transformation process, which focuses on the development of digital business, has brought changes to the overall portfolio of Bank Raya's business.

#### **PT Bank Raya Indonesia Tbk Strategy in 2024**

Bank Raya's strategy for 2025 was to focus on strengthening its business fundamentals and improving the quality of assets and deposits through the optimization of the internal business ecosystem within the BRI Group. Several strategic steps that were taken during the strengthening period were as follows:

1. Strengthening the value proposition of digital savings products through the development of:
  - a. Raya for Business for fund management, transactions, and payroll for business operators.
  - b. Raya for Youth for fund management and transactions for the younger generation.
  - c. Raya for Community for fund management and transactions for communities.
  - d. Virtual card.
  - e. Financial wealth management through the development of investment features and DPLK (Pension Fund Management).
2. Confirming the value proposition of digital lending products through product enhancements, including:
  - a. Integration of digital lending products with partners, particularly digital platform providers.
  - b. Expansion of the digital lending product structure to meet customer needs.
3. Implementation of hybrid collection by combining technology and human intervention (WA blast, robo calls, and field collection).
4. Continuous development and marketing of Raya Open API and Acquiring QRIS.
5. Developing Laku Pandai services to enhance financial inclusion.

6. Improving embedded finance that integrates banking services, including open API, white labeling, and loan channeling.
7. Integrating technology and business through the development of fraud detection for all digital products.
8. Enhancing the credit scoring engine by utilizing machine learning for digital lending products.
9. Supporting and developing the bank's technology infrastructure through initiatives such as adopting hybrid cloud technology (public and private cloud), upgrading security tools (privileged access management, mobile security, security awareness tools), and other initiatives.
10. Improving governance processes through the formulation and evaluation of supporting policies, including market conduct, partnership feasibility, and other relevant policies.
11. Strengthening the second line of defense through the implementation of Business Risk Management (BRM).
12. Enhancing risk awareness culture through the implementation of a risk culture framework.
13. Creating new sources of growth (new engine of growth), with an initial focus on transaction and savings solutions.
14. Creating and developing new markets beyond the internal business of BRI Group.
15. Scaling up existing business operations and expanding the scope of business beyond the previous period.
16. Collecting customer transaction data to develop customer behavior profiling for use in the credit scoring engine.

#### **PT Bank Raya Indonesia Tbk Competitive Advantage and Innovation**

In seeking to achieve its business targets, Bank Raya has several main strength factors so that it is able to compete in the Indonesian banking industry, as follows:

1. Digital bank with a strong O2O network throughout Indonesia with BRI Group synergy.
2. Digital saving products with various features and conveniences according to people's needs, as well as digital lending products that can meet various customer needs, both to meet consumer needs, bailout funds for productive businesses, invoice/vendor financing, and supply chain financing for micro and small businesses.

3. Bank Raya is part of the BRI Group, so it can optimize the business potential of the BRI Group in the MSME Segment, including for the loan segment through collaboration with the BRILink Agent ecosystem, workers from companies with payroll at BRI, supply chains from BRI Group businesses, as well as for segments savings through Raya collaboration and the BRImo application, cash in cash out transactions via BRI e-channel and BRILink Agent.
4. Increasing technological and information capabilities to support solid business growth, including through the development of big data technology, the development of a Fraud Detection System (FDS), the development of a credit scoring engine with automated machine learning, reliable IT-based services and ISO 27001 Certification certification. IT services with features and security in the form of two factor authentication, transaction notification, biometric authentication, and limit monitoring, as well as developing customer complaint handling through the Sapa Raya Application.
5. Bank Raya has developed the Raya Apps with various outstanding Saku features:
  - a. Saku Utama as the primary account for transactions and receiving money.
  - b. Saku Bujet to help manage financial allocations for various needs.
  - c. Saku Pintar to assist with regular savings through the auto-debit feature.
  - d. Saku Jaga to help allocate unexpected funds with the locking feature and higher interest rates compared to other Saku products.
  - e. Saku Bareng provides access to shared savings and transactions, ideal for communities.
  - f. Saku Bisnis is a specialized account, distinct from personal accounts, designed for managing the customer's business finances.

### Business Prospect and Strategy for PT Bank Raya Indonesia Tbk in 2026

#### 1. Business Prospect

Regarding Bank Raya's business prospects for 2026, the bank has divided its business segments or growth levers into three (3) business segments, as follows:

##### a. Digital Productive Lending

Productive loans play a crucial role in supporting economic activities such as working capital and investments, which directly impact economic growth. An increase in productive loans can help

strengthen productive sectors in Indonesia, provide a stimulus for small and medium-sized enterprises (SMEs), and create new job opportunities. Therefore, for banks, focusing on the distribution of productive loans is a strategic step to support the economy while also enhancing their portfolio in the long term. The distribution of SME loans in Indonesia has also experienced rapid growth, with a CAGR of 5.77% over the past five years. However, this growth still does not cover the loan distribution to all potential SMEs. Around 70% of SMEs have not yet utilized credit products from banks or other financial service providers. With the rise of new players focusing on the SME segment, there is significant potential in targeting SMEs that have not yet accessed formal funding.

##### b. Digital Consumptive Lending

Currently, Bank Raya offers digital loan services in the consumer segment in the form of salary-based loans for employees using payroll from BRI Group, through the Pinang Flexi and Flexi Extra products. Targeting employees with payroll from BRI Group helps mitigate business risks and simplifies the credit scoring process. Market penetration beyond salary-based loans can be achieved through collaborations with partners who are directly involved with customer transactions, both online and offline.

##### c. Funding and Transaction

Currently, digital banks have targeted various market segments with diverse income levels to gather third-party funds. Bank Raya will focus on optimizing the potential of customers from the Gen Z and Millennial segments. Data shows that Gen Z, known as digital natives, contributes significantly, accounting for about 60% of the total digital banking customers in Indonesia. The unique characteristic of this segment is that the majority are workers who already have income. Meanwhile, the Millennial segment is also crucial, contributing around 40% of the total customers, and is characterized by having the highest income and expenditure levels.

#### 2. Strategy

As part of its efforts to achieve the company's Vision and Aspirations, several strategic steps have been outlined to develop the business, primarily focusing on the development of digital productive lending, digital consumptive lending, funding and transactions, as well as value chain business.

**a. Digital Productive**

The bank will develop digital products for the productive sector, with the primary target being the SME segment. Several strategic steps will be taken by the bank in the development of digital productive products, including continuous product development according to customer needs, optimizing product sales through the bank's existing network, and expanding partnership networks that serve as ecosystems for digital productive products, with the following details:

- Product development to serve the needs of customers, particularly the SME segment, through the continuous improvement of existing digital products, beyond banking solutions, embedded finance, and the digitization of sales support systems. This includes the development of AI-based sales tools and data analytics.
- Increasing product sales by optimizing the potential of the BRI Group ecosystem and prudently penetrating the market beyond BRI Group, with the primary target markets being agency businesses, supply chains from both internal and external ecosystems, as well as other SMEs working based on invoices. The acquisition process will be carried out using the Online to Offline (O2O) method, enabling Bank Raya to continuously expand access or touch points through both internal and external ecosystems.
- Expanding the partnership ecosystem as a source of growth for digital productive products. The expansion of the partnership ecosystem will be carried out at the national level, including entities within the BRI Group, state-owned enterprises (SOEs), affiliate companies, private companies, and digital platforms. Additionally, the partnership process at the operational regional level, such as community branches or local partnerships, will continue to expand, with the primary target being communities and key business clusters.

**b. Digital Consumptive**

The bank will develop digital consumptive products with the primary target market being the productive age group with good digital literacy (Gen Z and Millennials). Several strategic steps will be taken, including continuous product development according to customer needs, expanding the partnership ecosystem, and digitizing business processes, with the following details:

- Continuous improvement of existing digital products, specifically payroll-based loans, development of consumptive loan products for non-payroll or mass market (paylater), and embedded finance.
- Expanding the partnership ecosystem as a source of growth for digital consumptive products, which includes entities within the BRI Group, state-owned enterprises (SOEs), affiliate companies, private companies, and digital platforms.
- Digitizing the collection process with a hybrid collection concept that combines technology-based collection processes (AI) and human resources.

**c. Digital Funding and Transaction**

The bank will develop digital funding products and transaction features within the Raya App, aiming to increase the amount of low-cost funding through digital savings and fee-based income from customer transactions in the Raya App. Several strategic steps the bank will take include:

- Improving features to enhance customer convenience and encourage transactions, including wealth management, payment, banking as a service, embedded finance, financial management, and other features.
- Developing the Raya App as an Integrated Banking App by integrating all Bank Raya products and services into the Raya App.
- Expanding collaborations for Cash In Cash Out (CICO) through both the BRI Group ecosystem and external ecosystems.
- Developing agency business, both for Bank Raya's agency business and beyond Bank Raya.

BRI Global Financial Services Company Limited is a subsidiary of PT Bank Rakyat Indonesia (Persero) Tbk, established in Hong Kong on April 7, 2005, under the name BRIngin Remittance. The company was initially acquired by BRI in 2012 and changed its name to BRI Remittance Company Limited. With the expansion of its business, in 2023, the company rebranded as BRI Global Financial Services Company Limited. Currently, BRI Global Financial Services Company Limited operates 4 (four) branches and 1

(one) management office in Hong Kong. The main business of BRI Global Financial Services Company Limited includes remittance services to Indonesia and other countries, money exchange, value-added services related to the parent company's products, forex dealing solutions, and loan/financial services for individuals (Indonesian Migrant Workers/PMI) and SMEs related to Indonesia in Hong Kong.

Table of BRI Global Financial Services Co. Ltd Performance (Productivity)

Description	2025	2024	Growth	
			IDR	%
(1)	(2)	(3)	(4) = (2)-(3)	(5) = (4)/(3)
Total Transaction	880,807	456,538	424,269	92.93%
Nominal Transaction Amount (HKD)	2,448,071,862	1,314,503,597	1,133,568,265	86.23%
Asset (HKD)	29,195,684	20,329,158	8,866,526	43.61%
Asset (IDR Billion)	62.54	42.14	20.29	48.02%

Notes: 1 HKD exchange rate as of 31 Desember 2025 = IDR2,142.30

The assets of BRI Global Financial Services Co. Ltd in 2025 amounted to IDR62.54 billion, representing a 48.02% increase compared to IDR42.14 billion in 2024. This increase was partly driven by financing expansion to remittance companies in Hong Kong amounting to approximately IDR11.5 billion (HKD5 million), or up 94% yoy.

BRI Global Financial Services Company Limited Hong Kong's revenue grew 51.4% year-on-year to IDR45.37 billion in 2025, primarily driven by the forex business and the addition of new partners, thereby increasing the received remittance fees. Furthermore, BRI Global Financial Services Company Limited Hong Kong successfully developed a new growth engine by serving foreign exchange remittance transactions both in Hong Kong and beyond, including Taiwan, South Korea, Japan, Malaysia, Brunei Darussalam, and the United Arab Emirates (UAE). Additionally, with the acquisition of a money lender license, BRI Global Financial Services Co. Ltd can

presently offer loan and trade finance services. The company continues to focus on digitalization, including through the provision of a digital portal (web app) and the RemitGo! app for customers. Digitalizing business processes through these platforms has increased transaction frequency, streamlined transaction flows, enhanced transaction capacity, improved user experience, and elevated service quality, all of which have contributed to the growth in revenue for BRI Global Financial Services Company Limited Hong Kong.

The net profit of BRI Global Financial Services Co. Ltd in 2025 reached IDR15.74 billion, an increase of 85.6% from IDR8.42 billion in 2024. Digitalization also played a role in enhancing business process efficiency, allowing BRI Global Financial Services Co. Ltd to maintain operational expenses and the BOPO (Operational Expenses to Operating Income) ratio throughout 2025.

### Strategy BRI Global Financial Services Company Limited Hong Kong in 2025

Some of the strategies that have been implemented by BRI Global Financial Services Co Ltd Hong Kong 2025 were as follows:

1. Obtaining a money lender license from the Hong Kong authorities, as an effort to develop business (new source engine growth) in the form of lending services for individuals with a target market of Indonesian Migrant Workers, providing short term financing services to remittance companies that need funds during banking holidays, as well as providing trade financing (invoice financing) services to Indonesian related Small Medium Enterprises (SME) importers in Hong Kong .
2. Diversifying sources of income by becoming a forex dealing solution provider for BRI Global Financial Services counterparts and BRI counterparts.
3. Collaborating with counterparts for new corridors, such as Japan, Macau, Taiwan, Korea and the Philippines.

### BRI Global Financial Services Company Limited Hong Kong Competitive Advantage and Innovation

BRI Global Financial Services with its remittance products has been the choice of Indonesian Migrant Workers in Hong Kong for years to send money to their families in Indonesia. Being part of the BRI Group is a competitive advantage for BRI Global Financial Services, BRI Global Financial Services customers are also savings customers of BRI Bank. BRI Bank's network that reaches all corners of Indonesia makes BRI Global Financial Services the main choice for Indonesian Migrant Workers to send money to Indonesia in real time online to their and their families' BRI Bank accounts in Indonesia. With the support of systems and services that are integrated with the Parent Company (BRI), BRI Global. Financial Services can provide additional services to Indonesian Migrant Workers such as balance checking services, printing account books, printing bank statements, and other services to PMIs in Hong Kong. Apart from that, the exchange rate at BRI Global Financial Services is one of the best rates (HKD/IDR) in Hong Kong. BRI Global Financial Services wants to provide the best service and be a one stop solution for Indonesian Migrant Workers in Hong Kong.

The company continues to strive to Innovate to improve services, such as the remitGo! to provide convenience in carrying out transactions anywhere and anytime. Apart from that, by having obtained a money lender license from the Hong Kong authorities, BRI Global Financial Services can also provide loan services to individual customers, especially to Indonesian Migrant Workers who need emergency funds, both in Hong Kong and for remittance purposes to his family in Indonesia. For non-individual customers, currently the Company can provide financing for Indonesian-related Small and Medium Enterprise (SME) business entrepreneurs in Hong Kong. The combination of the company's existing business (money transfers or remittances) from Hong Kong to Indonesia and the loan business with the target market of existing remittance customers, provides its own unique competitive advantage.

### Business Prospect and Strategy for BRI Global Financial Services Company Limited Hong Kong in 2026

Remittances from Hong Kong to Indonesia have shown an increasing trend up to 2024, despite a decline in the East Asia and Pacific region between 2010 and 2021. This upward trend continued in 2024, with remittances reaching USD 503 million in the first quarter and USD 541 million in the second quarter. On the other hand, the shift from conventional to digital remittance transactions in Hong Kong is progressing and steadily increasing. According to Market Insight Hong Kong from Statista.com, the transaction value in the digital remittance market is projected to reach USD 548 million in 2025. The transaction value is expected to show an annual growth rate (CAGR 2025-2029) of 6.92%, resulting in a projected total of USD 716.20 million by 2029. In the digital remittance market, the number of users is expected to reach 148.20 thousand by 2029.

With the aspiration to "Digitize the Business, Expand Business in HK and Other Asian Market, Become Sales Hub for BRI Group's Product in International Market," in 2026 BRI Global Financial Services will focus on the theme "Broadening Network and Partnership to Drive Cutting-Edge Value," progressively designed from expanding partnership networks, global expansion, strengthening core business by becoming the platform of choice for Indonesian workers, to optimizing the business potential of the BRI Group.

On October 6, 2015, BRI signed a share purchase agreement with the shareholders of PT Asuransi BRI Life (formerly PT Asuransi Jiwa Bringin Jiwa Sejahtera) to acquire a 91.001% ownership stake in PT Asuransi BRI Life, hereinafter referred to as BRI Life. The entire series of acquisition activities was completed on December 29, 2015 in accordance with Deed No. 41 of Notary Fathiah Helmi, S.H. so that BR owns 91.001% of BRI Life shares and the remaining 8.999% is owned by the BRI YKP BRI Employee Welfare Foundation). Furthermore, on February 23, 2017, PT Asuransi Jiwa Bringin Jiwa Sejahtera changed its name to PT Asuransi BRI Life (BRI Life). On March 2, 2021, BRI Life officially had a new shareholder, such as FWD Financial Services Pte Ltd which has added capital to BRI Life of 936,458 shares through the issuance of new shares. Thus, after the transaction, BRI Life's shareholder structure was that BRI owned 2,002,022 shares with 63.83% ownership. Then, the ownership of FWD was 29.86% with 936,458 shares, and the BRI Employee Welfare Foundation was 6.31% of 197,978 shares. This change in shareholder structure previously obtained OJK approval through letter no. S-12/ NB.1/2021 dated February 4, 2021. On October 13, 2021 the Shareholders approved the transfer of ownership of shares owned by FWD Financial Services Pte. Ltd. to FWD Management Holdings Limited, so that the structure of BRI Life Shareholders became: BRI 63.83%, YKP BRI 6.31%, and FWD Management Holding Limited 29.86%. The change in Shareholder Structure previously obtained OJK approval through letter No.S.93/NB.1/2021 dated September 29, 2021. In 2022, BRI Life issues 255,549 shares and as part of FWD Management Holdings Limited's commitment to support BRI Life's progress in a manner agreed upon by the Shareholders. The new shares were taken up entirely by FWD Management Holdings Limited. To take part in the new

shares, FWD Management Holdings Limited has deposited IDR770 billion to BRI Life. The issuance of these shares changed the composition of shareholder ownership to BRI 59.02%, FWD Management Holdings Limited 35.14% and YKP BRI 5.84%. The change in share ownership has received approval from the OJK through letter Number 31/NB.11/2022 dated February 28, 2022.

In 2023, BRI Life underwent a change in its shareholder composition. The company increased its paid-up capital by IDR26,358,000,000, from the previous amount of IDR339,200,700,000 to IDR365,558,700,000, with the additional capital subscribed by FWD Management Holdings Limited. The planned change in ownership of PT Asuransi BRI Life received approval from the Financial Services Authority through letter No. S-15/NB.02/2023 dated February 26, 2023. This share issuance resulted in a revised shareholder composition, with BRI holding 54.77%, FWD Management Holdings Limited holding 39.82%, and YKP BRI holding 5.42%.

In 2024, BRI Life once again experienced a change in its shareholder composition. FWD Management Holdings Limited injected additional capital amounting to IDR770 billion for the year 2024, with an amount recorded in the issuance of new shares totaling IDR26,994,600,000. Following this capital increase, the revised shareholder composition is as follows: BRI holds 51.00%, FWD Management Holdings Limited holds 43.96%, and YKP BRI holds 5.04%. The change in BRI Life's share ownership in 2024 has been approved by the Financial Services Authority through letter No. S-2/PD.02/2024 regarding the Approval of the Change in Ownership of PT Asuransi BRI Life, dated January 22, 2024.

Table of PT Asuransi BRI Life Performance (Productivity)

(in IDR millions)

Description	2025	2024	Growth	
			IDR	%
(1)	(2)	(3)	(4) = (2)-(3)	(5) = (4)/(3)
Insurance Service Income	6,122,889	8,879,017	(2,756,128)	(31.04%)
Asset	28,177,449	26,520,605	1,656,844	6.25%
Equity	12,071,617	10,341,827	1,729,790	16.73%

At the end of 2025, BRI Life's equity grew by 16.73% yoy to IDR12.07 trillion. In addition, BRI Life's assets reached IDR28.18 trillion, growing 6.25% yoy. On the other hand, BRI Life's Gross Premium decreased by 11.66% yoy to IDR6.12 trillion, in line with lower claims as well as a decline in bancassurance performance and not yet optimal productivity; however, this did not significantly affect profit achievement in 2025.

#### PT Asuransi BRI Life Strategy In 2025

The projected economic slowdown in 2025 presents a challenging year for BRI Life. In response to these challenges, BRI Life is taking strategic measures to ensure the availability of products and services that meet customer needs, supported by the implementation of digital technology. The key strategies implemented by BRI Life in 2025 to achieve the targets approved by the shareholders are as follows:

##### 1. Penetration on UMi Ecosystem

BRI Life successfully penetrated the Ultra Micro (UMi) segment in 2024 through the implementation of a strategic partnership with PNM. This initiative serves as a key step in achieving sustainable growth while also enhancing financial literacy and inclusion, particularly in relation to life insurance.

##### 2. Penetration on HNW Segment

BRI Life successfully penetrated the High Net Worth (HNW) income segment, or priority customer segment, in 2024 through the launch of the AMORA product. Specifically designed for priority customers, this product represents one of BRI Life's strategic initiatives to achieve sustainable growth by ensuring the availability of products that meet the needs of customers across all segments.

##### 3. BRI Centralized Distribution Referral System

This strategic initiative is part of BRI Life's business process improvements aimed at enhancing the productivity of Bancassurance Financial Advisors (BFA). The initiative was piloted at the end of 2023 to improve lead data, which serves as a key driver for BFA in generating production. This approach ensures a more centralized and systematic flow of data, from the headquarters to the hands of BFA.

##### 4. Revamp Journey on BRImo

This strategic initiative is one of BRI Life's efforts to enhance transactions for purchasing digital insurance products available on BRImo. It aims to improve customer convenience and ease in purchasing insurance products through the BRImo platform.

Beyond these strategies, BRI Life remains committed to amplifying its value by refining business processes across all dimensions, ensuring sustained and resilient business growth.

#### PT Asuransi BRI Life Competitive Advantage and Innovation

BRI Life is committed to providing excellent service to customers. One of the strategies implemented in 2023 is developing services for customers, especially health services through launching a contact center for third-party administrators (TPA) as part of BRI Life's plan to form its own TPA so that claim settlement can run more effectively and efficiently. BRI Life also launched new products that adapt to customer needs in each existing customer segmentation.

BRI Life also ensures the availability of products that meet the needs of customers across various segments. The launch of new products, particularly in the High Net Worth (HNW) and Ultra Micro (UMi) segments, further complements BRI Life's existing product portfolio. In terms of product marketing processes, BRI Life has innovated to enhance the productivity of its sales force through the BRI Centralized Distribution Referral System, which integrates the systems of BRI Life and BRI to provide lead data, serving as a well-organized resource for the sales force.

In order to achieve sustainable business practices, BRI Life has also implemented a green office policy in line with regulations to reduce the use of paper, electricity, and fossil fuels. Additionally, BRI Life has developed a long-term Environmental, Social, and Governance (ESG) roadmap, aligned with the principles of the Sustainable Development Goals (SDGs).

#### Business Prospect and Strategy for PT Asuransi BRI Life in 2026

In 2026, BRI Life will focus on Sales Quality Improvement, as approved by the Controlling Shareholders of BRI Life. In other words, with a focus on quality enhancement, BRI Life is also targeting sustainable business growth. The following are some of the strategies that BRI Life will implement to achieve the targets approved by the Shareholders:

##### 1. Competitive Products and Marketing

BRI Life remains committed to sustainable growth to provide peace of mind to all its customers. To achieve this, BRI Life strives to ensure it offers superior and competitive products and marketing strategies. The three key development indicators focused on are: product-driven to customer-led, brand awareness and

clear segmentation, and the healthcare ecosystem and sustainable practices. These three areas are crucial in positioning BRI Life as more competitive, relevant, and sustainably growing. Additionally, these focuses further strengthen BRI Life's long-term relationships with its customers and other stakeholders.

**2. Invest in People**

The development of human resources, both in terms of career progression and competencies, is key for BRI Life in managing its operations for sustainable growth with good corporate governance. Two development indicators being focused on are sales talent management and succession planning, and advancement in human resources with a focus on automation and efficiency. These areas are crucial because BRI Life can enhance the quality and resilience of its internal talent while building a more efficient and adaptive organization. This is essential for long-term growth and success in a dynamic business environment.

**3. Digital Adaptive**

Strengthening technological support in product development and dynamic, agile, and resilient business operations is key for BRI Life to face future business challenges. The two development indicators being focused on are a strong integration between digital technology and life insurance, and digital experience as

a service standard. These indicators are crucial for BRI Life to enhance its competitiveness, facilitate innovation, and ensure high-quality services that meet customer expectations in the digital era.

**4. Strong Financial Management**

Financial strength is key for BRI Life to remain on the path of sustainable business growth. The four development indicators being focused on are sustainable revenue and net income, best practice financial management, healthy capital structure, and accountability and accuracy. Overall, the development of these four indicators creates a strong and durable financial foundation, which is essential to support growth, maintain stakeholder trust, and ensure the company remains competitive and adaptive in various economic conditions.

**5. Service Excellent**

BRI Life remains committed to achieving its vision of becoming "The 1st Service Excellent" through efficiency and effectiveness in business processes, as well as creating products that align with customer needs. The two key development focus indicators are customer loyalty and understanding customers' individual needs and preferences. Focusing on these two indicators provides a sustainable competitive advantage. Additionally, BRI Life will be able to grow and thrive in a dynamic and competitive business environment.

PT BRI Multifinance Indonesia, hereinafter referred to as BRI Finance, is a subsidiary of BRI engaged in the financing business. As of December 2025, BRI Finance's assets amounted to IDR5.42 trillion, a decrease of 29.52% compared to IDR7.69 trillion in December 2024. Financing receivables also declined, totaling IDR4.42 trillion, a reduction of 31.47% or IDR2.03 trillion. This decline in assets corresponds with a decrease in consumer financing receivables, which reached IDR2.81 trillion in December 2025, down 42.27% or IDR2.06 trillion from the previous period, which amounted to IDR4.87 trillion

As of December 2025, BRI Finance's total revenue reached IDR1.12 trillion, representing a decline of 11.77% or IDR166.28 billion compared to the previous period of IDR1.31 trillion. This revenue growth was driven by BRI Finance's financing disbursements in 2025, consisting of commercial financing revenue of IDR187.75 billion, consumer financing revenue of IDR564.54 billion, and Operating Lease (OPL) financing revenue of IDR375.75 billion. The decline observed in 2025 was due to reduced purchasing power among the middleclass population, which has shifted to the aspiring middleclass category in Indonesia, leading to limited ability to meet installment payments and an increasing risk of non-performing loans. Therefore, BRI Finance's profit as of December 2025 was recorded at IDR90.95 billion, declining by 12.00% yoy.

Table of PT BRI Multifinance Indonesia Performance (Productivity)

(in IDR millions)

Description	2025	2024	Growth	
			IDR	%
(1)	(2)	(3)	(4) = (2)-(3)	(5) = (4)/(3)
Financing (gross)	4,417,380	6,445,834	(2,028,454)	(31.47%)
Customer financing	2,812,129	4,871,145	(2,059,016)	(42.27%)
Asset	5,419,420	7,689,464	(2,270,044)	(29.52%)

### Strategi PT BRI Multifinance Indonesia Tahun 2025

In 2025, BRI Finance optimized BRI's captive market, serving as a single gateway for BRI's auto loans, to foster healthy company growth. The company focused on expanding its consumer business by leveraging synergies within the BRI Group ecosystem, targeting both customer acquisition and sales channels with the 2025 strategy "Building the Foundation of Synergy with the Parent and Improving Asset Quality" included:

1. Strengthening consumer financing growth.
2. Enhancing collaboration with e-commerce platforms.
3. Improving financial literacy.
4. Implementing joint marketing efforts with the BRI Group.
5. Optimizing the myBRIf application.
6. Advancing business process digitalization.
7. Offering attractive promotions tailored to public needs.
8. Optimizing collaborations in Motor Vehicle Credit (KKB) Joint Financing by launching products with competitive rates.

### PT BRI Multifinance Indonesia Competitive Advantage and Innovation

In accordance with the aspirations of shareholders, BRI Finance had a competitive advantage, namely as a single gateway auto loan for the BRI Group. Furthermore, BRI Finance is committed to focusing on growing its consumer business, which will be maintained at a minimum of 80% in the long term, by continuously developing joint financing through active collaboration with the business owner division at BRI. To achieve this aspiration, BRI Finance acknowledges the challenges of digitalization, accompanied by changes in consumer behavior post-pandemic in the financing industry. These shifts in customer expectations have transformed cooperation patterns, streamlined processes, and demand for more seamless services in line with customer behavior. BRI Finance will increase its investment in information technology through the development and enhancement of various platforms that support internal business activities, including the core financial system to accommodate BRI Finance's operations, the e-General Ledger (eGL) to support financial reporting, various financing acquisition tools

across all segments, and other supporting platforms. BRI Finance will also strengthen its consumer business through massive marketing strategies aimed at both customers and employees of the BRI Group. In order to reinforce the digital transformation that has been implemented, BRI Finance will maximize synergies with its parent company across various sectors, especially within the business group ecosystem.

### Business Prospect and Strategy for PT BRI Multifinance Indonesia in 2026

The preparation of BRI Finance's long-term business plan is aligned with the shareholder's aspiration of "Beat the Industry Profitability." In line with this aspiration, BRI Finance will focus on consumer financing business in collaboration with the BRI Group business owners. Innovations and the exploration of new growth sources will result in an increasingly complex business for BRI Finance. The company will emphasize synergies and cross-selling initiatives that have already been developed within BRI Group, while also focusing on the development of BRI's captive market. The company continues to selectively disburse financing and expand its business while exploring new growth engines through the optimization of a single gateway auto loan. The company will maintain a diversified funding strategy to reduce the cost of funds and offer competitive rates to its debtors. From a service perspective, BRI Finance will maximize its business value chain through strategic partnerships and the development of various platforms to drive transactions via digital channels, such as the myBRIf app, new mobile orders, and others. Additionally, as part of strengthening other excellence enablers, especially human capital, culture, distribution channels, and risk governance, BRI Finance will enhance its risk management and compliance practices as part of its commitment to Good Corporate Governance (GCG). This ensures that the financing disbursed by the company remains prudent and well-monitored. The synergies between BRI Finance and the business group continue to be optimized, both in business and non-business aspects, through resource sharing, data integration, and the exploration of new ecosystem segments.

PT BRI Ventura Investama, hereinafter referred to as BRI Ventures, is a subsidiary of BRI engaged in the venture capital business. BRI's share ownership in BRI Ventures is 99.97% of the total shares issued by the company, while 0.03% is owned by the BRI Workers' Welfare Foundation. BRI Ventures has the aspiration to become a leading Corporate Venture Capital which will be achieved through investment in companies that have high growth potential (startups), with

broad market potential, solid risk management and founders who have sufficient experience in running their businesses. This is in line with helping the BRI Group develop products and services that make it easier for users (customer-centric). BRI Ventures will invest in technology companies both in the scope of financial services (fintech) and other business sectors (non-fintech).

Table of PT BRI Ventura Investama Performance (Productivity)

(in IDR millions)

Description	2025	2024	Growth	
			IDR	%
(1)	(2)	(3)	(4) = (2)-(3)	(5) = (4)/(3)
Total Investment	1,693,953	1,903,833	(209,880)	(11.02%)
Non Performing Investment (NPI) (%)	2.0%	0.0011%	1.9989%	1,817.18%
Total Asset	2,118,362	2,471,125	(352,762)	(14.28%)

In 2025, BRI Ventures recorded total assets of IDR2.12 trillion, decreasing by IDR352.76 billion or 14.28% year-on-year (yoy) compared to 2024. Total investment in 2025 amounted to IDR1.69 trillion, declining by 11.02% yoy compared to the previous year. The decrease in total assets was partly attributable to a 51% yoy decline in the valuation of LinkAja due to weaker business performance, as well as a 42% yoy decrease in Awan Tunai, driven by loan concentration risk. The deterioration in portfolio quality was reflected in an increase in Non-Performing Investments (NPI), which reached 2.0% in 2025.

#### PT BRI Ventura Investama's Strategy for 2025

In achieving its 2025 aspiration, BRI Ventures undertook several initiatives:

1. Optimizing exit opportunities by considering the Internal Rate of Return (IRR) target and potential gain.
2. BRI Ventures has committed to supporting the growth of Indonesian startup businesses through a participation agreement in the Merah Putih Fund funding.
3. As an alternative source of income, BRI Ventures had placed investments in SBI and SBN throughout 2024, amounting to IDR216 billion.

4. To maintain portfolio quality and mitigate investment risks, BRI Ventures had monitored the quality and runway of investees, conducted internal audits, and submitted monitoring reports to regulators periodically.

#### Competitive Advantages and Innovation of PT BRI Ventura Investama

To date, BRI Ventures has successfully managed 2 (two) Venture Funds, namely Dana Ventura Nusantara I (DVSNI) and Dana Ventura Nusantara II (DVSNII). 2024 is a recovery year for BRI Ventures, so to maintain investment quality, for the valuation of venture funds, BRI Ventures has made periodic valuation adjustments based on the development of the company's performance. In addition, during the 2024 period, BRI Ventures, through DVSNII has successfully implemented an accelerator program, namely "Impact Day". This program was attended by 15 Indonesian startups in the impact enterprises category.

### Business Prospects and Strategy of PT BRI Ventura Investama in 2026

In 2025, BRI Ventures focused its investment activities on companies/startups in the fintech and non-fintech sectors that had the potential to increase capabilities, a positive impact on business, and opened access to new ecosystems for the BRI Group. To realize BRI Ventures' vision as a catalyst

for value creation for the BRI Group ecosystem, in 2025, BRI Ventures focused on Business Process Improvement & Strategic Investment Exploration through 2 (two) strategic initiatives:

1. Orchestrate Venture Capital Ecosystem between BRI Group
2. Becoming BRI Group's Innovation Lab

BRI Insurance is part of a subsidiary of the BRI Group engaged in the insurance sector and has the responsibility to create value both in terms of business and improving the image of BRI Insurance with a commitment to providing general insurance protection through a variety of trusted products supported by technological innovation, prudent GCG, and superior human capital to produce optimal and sustainable productivity.

Table of PT BRI Asuransi Indonesia Performance (Productivity)

(in IDR millions)

Description	2025	2024	Growth	
			IDR	%
(1)	(2)	(3)	(4) = (2)-(3)	(5) = (4)/(3)
Gross Premium	4,097,823	3,906,348	191,475	4.90%
Assets	8,158,065	7,721,019	437,046	5.66%
Equity	2,640,467	2,592,763	48,000	1.85%

BRI Insurance's assets in 2025 amounted to IDR8.15 trillion, an increase of 5.66% compared to 2024 of IDR7.72 trillion. BRI Insurance's Gross premium in 2025 amounted to IDR4.09 trillion, an increase of 4.90% yoy compared to 2024 of IDR3.90 trillion. BRI Insurance's equity in 2025 increased by 1.85% from IDR2.59 trillion in 2024 to IDR2.64 trillion in 2025. The increase was due to a 5.30% increase in current year profit compared to 2024 to IDR675 billion in 2025.

### PT BRI Asuransi Indonesia's Strategy for 2025

The increasingly competitive business conditions and dynamic and uncertain business environment require BRI Insurance to continue to create innovations and implement strategies that are appropriate and in line with changes in the business environment. BRI Insurance continues to strive to achieve a competitive advantage by creating better competitive values than competitors. To realize aspirations in 2025, BRI Insurance strengthened reciprocally interconnected businesses to encourage sustainability through business diversification

and partnerships. The business activities referred to the strategy to establish increasingly interconnected businesses through the value chain, Business to Business to Consumer (B2B2C) technology, and in accordance with market needs. Strengthening connections between corporations can create synergies and opportunities to encourage joint growth and sustainability initiatives. This business synergy was mainly carried out through collaboration with the BRI Group.

To realize the 2025 aspirations, BRI Insurance implemented the following strategic steps, as follows:

1. Strengthening governance and risk management to ensure compliance with regulations and internal provisions, as well as good risk management of BRI Insurance.
2. Supporting sustainable quality growth by strengthening the selection and management of BRI Insurance's main business risks.

3. Expansion into the retail and micro segments in business classes and products with better profitability.
4. Optimizing the potential of derivative businesses from the wholesale and internal BRI ecosystems.

#### Business Prospects and Strategies of PT BRI Asuransi Indonesia in 2026

BRI Insurance will implement its Vision to become "The Most Trusted Partner for Reliable Protection Solutions" with services oriented toward customer needs and satisfaction. In 2026, BRI Insurance carries the Annual Theme "Expansion of Core Business to Remain Competitive through Data and Technology Utilization,". To realize the aspirations in 2026, BRI Insurance will persistently carry out continuous penetration of core competencies, such as focusing on services and businesses in the retail and micro segments. This refers to ongoing efforts to integrate and utilize the fundamental strengths of BRI Insurance's business into products and distribution channels in the captive and non-captive markets. Thus, this is expected to be able to increase competitiveness and encourage the growth of BRI Insurance in a sustainable manner.

To realize the aspirations of 2026, BRI Insurance has established a series of strategic plans and steps as follows:

1. Optimization of premium growth in the retail and micro segments sourced from non-captive markets.
2. Optimization of the BRI and BUMN entity ecosystem and value chain.
3. Creating new growth engines to diversify revenue sources in the corporate, small, medium, and consumer business segments.
4. Strengthening BRI Group synergy in the context of business expansion and operational support, including integration of governance, compliance, risk management, information technology, and human resources.
5. Strengthening quality and profitable premium growth by strengthening risk selection.
6. Strengthening investment capacity to optimize investment results and manage investment risks.
7. Product innovation and after-sales services as differentiation according to customer needs and segmentation (customeroriented) to strengthen the image of BRI Insurance Indonesia.
8. Strengthening the subrogation and reinsurance receivables collection system.
9. Implementation of PSAK 117 in accordance with applicable provisions and governance.
10. Implementation of the separation of the Sharia Business Unit in accordance with applicable provisions and governance.
11. Strengthening employee capabilities, especially marketing staff, including strengthening the Company's culture to support the transformation and internalization of BRI Insurance Indonesia's culture, as well as sharpening KPIs to become important indicators in achieving a high-performance culture.

Assets	56,986,249	55,348,061	1,638,188	2.96%

#### PT Permodalan Nasional Madani's Strategy for 2025

PNM has set strategic strategies and policies to achieve the company's 2025 targets as follows:

1. Changes to PNM's organizational structure carried out in order to support long-term strategic initiatives and the company's sustainability.
2. Market penetration and expansion of service areas through the opening of new business units carried out selectively and effectively.
3. Development of advanced cycle financing products to meet customer needs and as preparation for UMi customers to move up a class.
4. Increasing financial literacy and financial inclusion of Mekaar customers through customer group meetings and synergies.
5. Increasing the level of corporate governance through operational and credit risk management and measuring the Corporate Governance Performance Index (CGPI).
6. Development of information technology and digitalization of business processes and adding features to the Mekaar Digi application to improve the efficiency and effectiveness of business processes.
7. Diversification of funding sources from the capital market, banking, and the government through the Government Investment Center to reduce loan interest rates amidst the trend of increasing interest rates.
8. Increasing the productivity and competence of human resources to support the empowerment of female customers who are ultra-micro and micro entrepreneurs. As well as providing training facilities to improve competence for all PNM workers.

#### Competitive Advantages and Innovation of PT Permodalan Nasional Madani

PNM was founded in 1999 with a vision to become a leading financing institution in increasing added value sustainably

for ultra-micro and micro segment businesses based on the principles of Good Corporate Governance (GCG). Currently, PNM's main focus is to empower women ultra-micro entrepreneurs. PNM has 4,675 service offices by the end of 2024 spread across 451 districts/municipalities and 36 provinces. PNM has empowered more than 14.4 million women ultra-micro business customers and more than 72 thousand MSE customers. In order to encourage increased business capacity of customers, PNM also emphasizes empowerment activities through providing mentoring and business training to customers in addition to providing capital. In addition, PNM also supports the Sustainable Development Goals program, including financing to improve the quality of sanitation and clean water and financing for the renovation of customer business facilities/infrastructure, and PNM also plays an active role in various social and environmental responsibility activities. The use of technology and information is also carried out to improve services to customers and support business and operational activities, especially through digitalization and through strategic initiatives carried out together in the Ultra Micro Holding synergy.

#### Business Prospect and Strategy of PT Permodalan Nasional Madani in 2026

In 2026, in line with PNM's long-term roadmap, "Driving Quality Loan Growth, Enhancing Productivity, and Efficiency

through IT Innovation," PNM implements several strategic initiatives under Strong & Healthy Growth, Impactful Empowerment, and Operational Excellence as follows:

1. Product innovation through Warung Mekaar and Waste Management.
2. Business process and working method transformation through Diary Mekaar and UlaMM, Mapping Zoning and Routing, and Daily Closing Automation.
3. PKM Re-engineering through utilization of the Mekaar Group PKM ecosystem and PKM Berdikari (hybrid).
4. Empowerment by restoring WO customers to resume business and providing insurance literacy to customers.
5. Strengthening Human Capital management through Recruitment Reinforcement, Career Development and Capacity Building, and development of the Human Capital Core System.
6. Digitalization and IT upgrading through Oracle integration, improvement of IT infrastructure reliability and resilience, development of IT Enterprise Strategic Planning and Architecture Management, enhancement of IT security reliability, and development of Data Analytics Governance
7. Subsidiary structuring through alignment of Danantara's Strategic Plan.

PT Pegadaian's asset performance growth in 2025 reached IDR151.26 trillion or grew yoy by 48.04%. Asset growth was influenced by the largest component, namely outstanding loans, which grew 47.63% from 2024, namely from IDR85.38 trillion to IDR126.09 trillion through the implementation of effective marketing and sales strategies amid geopolitical turmoil and dynamic macroeconomic conditions. In profitability, PT Pegadaian posted a net profit of IDR8.35 trillion in 2025 or an increase of 42.80% from IDR5.85 trillion in 2024. This increase in profit was supported by an increase in revenue, as well as cost efficiency as reflected in the improvement in BOPO realization of 63.68% in 2025 or a slightly decrease compared to 2024 of 63.75%.

### PT Pegadaian Strategy for 2025

PT Pegadaian's impressive performance in 2025 is attributed to successful business transformation efforts. The company has undertaken optimization, modernization, and capability building as initial steps toward becoming "The Leader in The Gold Ecosystem and Accelerator of Financial Inclusion" by 2029. Pegadaian's strategies for 2025 include:

1. Strengthening core business by developing services that meet customer needs.
2. Expanding service networks through pawnshop agents and digital partnerships.
3. Implementing innovation and diversifying income streams through non-pawn business segments.
4. Reinforcing commitment to environmental sustainability.
5. Enhancing joint services within the Ultra Micro Holding under BRI.

### Competitive Advantages and Innovation of PT Pegadaian

PT Pegadaian always prioritizes innovation in order to strengthen competitiveness and provide the best and most appropriate products/services for the community, especially in utilizing the use of technology and changes in community behavior to improve customer experience. In addition, PT Pegadaian continues to maintain the quality of service with reliable appraisers supported by various marketing and sales programs, strengthening pawnbased products, optimizing opportunities for gold-based and fiduciary products, strengthening sharia business, and optimizing digital services and synergies with strategic partners that can help the company to continue to grow sustainably as a solution for the community in overcoming problems without problems. Through ultra-micro synergy, PT Pegadaian together with the Ultra Micro Holding entity also expands the accessibility of financial services both with online and offline services.

### Business Prospects and Strategies of PT Pegadaian in 2026

With the spirit of growing together with Ultra Micro Holding, the spirit of transformation, and the spirit of making Indonesia beautiful, in 2026, the company will carry the theme: "Sustainable Acceleration: Turbocharge Digital Innovation" with a strategy that is in line with the grand strategy in the Company's LongTerm Plan for 2026-2030, namely G7-STAR:

1. **Grow Core**  
Strengthening Pegadaian's core business in the pawn and micro business lines through the use of data and technology in sales activities, modernizing business processes and facilitating multi-product customer experience.
2. **Go Further**  
Improving agency network capabilities and optimizing cooperation with potential strategic partners.
3. **Go Together**  
Strengthening the synergy between BRI Group and Pegadaian Group through joint utilization of sales networks and strengthening the capabilities of business supporting functions.
4. **Grab New**  
Expanding business segments by launching new business lines through the development of Bullion Services and accelerating growth through inorganic strategies and strengthening subsidiary entities.
5. **Groom Talent**  
Achieving the best talent management in order to support business growth and development.
6. **Gen-Z Tech**  
Strengthening IT architecture that supports new business implementation, strengthening the Company's internal and external applications and running data-based operational models to achieve optimal benefits.
7. **Great Culture and GCG**  
Relaunching cultural transformation, strengthening governance and risk management and implementing comprehensive ESG practices.

PT BRI Investment Management's assets in 2025 amounted to IDR375.57 billion, an increase of 19.95% compared to 2024, which amounted to IDR313.10 billion. The increase was driven by the growth of the securities portfolio as part of idle cash optimization and higher receivables from AUM (Asset Under Management) management fee services.

In terms of liability, there was an increase of 12.58%, the majority of the increase was in tax debts, employee benefit liabilities, and accrued expenses (on accrued operational costs that had not been paid at the end of December 2024).

PT BRI Investment Management's revenue in 2025 was IDR300.30 billion, an increase of 20.64% compared to 2024 which was IDR248.92 billion. The revenue growth was driven by securities portfolio income, interest, and dividends, which surged by 215.1% year-on-year or increased by IDR12.5 billion, supported by mark-to-market improvements and bond coupon income. As a result, PT BRI Manajemen Investasi recorded a profit increase of 12.78% in 2025 to IDR33.22 billion.

Table of PT BRI Investment Management Performance (Productivity)

(in IDR million)

Description	2025	2024	Growth	
			IDR	%
(1)	(2)	(3)	(4) = (2)-(3)	(5) = (4)/(3)

Assets	375,569	313,098	62,471	19.95%
Liability	101,063	69,270	31,793	45.90%
Equity	274,506	243,828	30,678	12.58%

### PT BRI Investment Management Strategy in 2025

Some of the strategies implemented by BRI Investment Management in 2025 are as follows:

1. Focus on building the foundation of group synergy through aligning flagship products and marketing targets from both the institutional side, Mutual Fund Selling Agents/Bank APERD (WMG), and Securities APERD (BRIGHTS).
2. Focus on marketing open-end mutual fund products, especially flagship products, and increasing managed funds through the main retail segment.
3. Focus on improving human resource capabilities and qualifications, including through talent mobility and strengthening core competencies.
4. Focus on optimizing back-office processes, including through upgrading core systems and developing ERP.
5. Focus on strengthening risk management and governance through aligning risk maturity assessments and governance and managing risk profiles.

### Competitive Advantage and Innovation of PT BRI Investment Management

PT BRI Investment Management was established in 1992 under the name Danareksa Investment Management. As the first Investment Manager in Indonesia, BRI Investment Management has also recorded history in the industry as the first mutual fund issuer in Indonesia in 1996. The broad spectrum of Investment products owned by BRI Investment Management based on financial planning and customer orientation provides various investment options for all segments, both Institutional and retail, which are adjusted to the risk tolerance and investment policies of customers. As a knowledge-intensive company, BRI Investment Management prioritizes business and operational management handled by professional and experienced HR in the capital market world, supported by infrastructure and technology readiness from front to end. BRI Investment Management periodically prepares HR development plans, monitors, and evaluates

workers specifically in each function in order to adjust and prepare HR who can follow the development of the investment manager industry. For more than 30 years in the investment manager industry, PT BRI Investment Management has consistently implemented governance and risk management as the main key to success to ensure smooth and sustainable business and operations in order to maintain customer trust and reputation in the long term.

In supporting industry growth and responding to industry developments, BRI Investment Management has a complete spectrum of investment products that suit various customer risk profiles. In 2024, BRI Investment Management will sharpen existing products into flagship products that are expected to be able to follow the development of the business cycle and in accordance with the character of the retail segment, including the money market mutual fund seruni money market, fixed income mutual fund melati main income, balanced regular income fund mixed mutual funds that distribute monthly dividends, and MSCI Indonesia ESG Screened index mutual funds. Marketing efforts are supported by various financial literacy and inclusion activities in the BRI group ecosystem and the general public which are carried out intensively or through affordable product features for the retail segment.

In 2023, Danareksa Investment Management officially changed its name to BRI Investment Management. This change is in line with the effective majority ownership of BRI on November 30, 2022. Alignment of strategies and policies in the Group's synergy began to be carried out intensively in 2023 in various aspects of the Company's business and operations which are expected to become the Company's competitive strength in increasing its contribution to the investment manager industry. Various collaborations carried out are expected to increase the integration of BRI Investment Management as part of the BRI Group.

### Business Prospects and Strategy of PT BRI Investment Management in 2026

Entering 2025, BI faces challenges in maintaining the stability of the rupiah exchange rate amid global uncertainty and tighter-than-expected US monetary policy. Nevertheless, BI remains optimistic about Indonesia's economic growth prospects, with a slightly lower growth projection than previously estimated. In the mutual fund industry, BRI Investment Management has succeeded in achieving a managed fund target of IDR65 trillion by the end of 2025, with a focus on the retail segment and optimizing group synergy through superior products. This strategy is supported by strengthening internal control, increasing human resource capacity, strengthening integrated IT systems, and strengthening company branding.

Facing 2026, BRI Investment Management will continue to strengthen a solid business foundation and maintain business continuity through increasing literacy and financial inclusion that is more collaborative and integrated. In addition, the company will comply with new regulations issued by the Financial Services Authority (OJK) and the Law regarding personal data protection, which will affect the investment manager's operations in the future.

With the aspiration "To be the Biggest and Most Reliable Investment Manager in Indonesia with Global Capabilities," in 2026 BRI Manajemen Investasi will implement several key metrics to achieve a larger, stronger, and more competitive BRI Manajemen Investasi through:

1. Solid and consistent AUM growth
2. Accelerated revenue and profitability growth
3. Improved operational efficiency
4. Strengthened retail portfolio
5. Enhanced reputation and increased market share

### Revenue and Profitability of Operating Segment

Amid challenging economic conditions both globally and domestically, prolonged conflicts in several regions, including the Middle East, Eastern Europe, and most recently the Americas, have influenced the global economic landscape and also affected the domestic economy. Nevertheless, BRI was able to identify growth opportunities that could be optimized in 2025.

BRI recorded solid balance sheet growth on an annual basis, as reflected in loan growth of 12.3% year-on-year, supported by positive contributions from all business segments. The growth in lending was also supported by strong Third-Party Funds (TPF) growth, which increased 7.4% year-on-year, primarily driven by low-cost funds (CASA) that rose 12.7%, or increased by IDR116.8 trillion annually. The strong growth in assets and liabilities supported BRI's key financial ratios in 2025, which remained stable and robust, including Net Interest Margin (NIM) of 7.8%, Cost of Fund (COF) of 2.9%, and Return on Assets (ROA) of 2.7%, while maintaining a strong capital position as reflected by a Capital Adequacy Ratio (CAR) of 23.5%.

Overall, BRI's consolidated net income was recorded at IDR57.13 trillion. Compared to the previous year, BRI's net profit in 2025 declined by 5.26% year-on-year, primarily due to the growth in consolidated provision for impairment losses (CKPN), which increased 21.02% year-on-year, with the highest increase occurring in the Other and Corporate segments. Nevertheless, from the perspective of total revenue, BRI Consolidated still recorded growth of 4.74% year-on-year, or IDR9.39 trillion. The Company's net profit continued to be supported by the Micro segment as the primary contributor, accounting for 32.39% of total consolidated profit.

From an operating segment performance perspective, in 2025 the Micro business segment continued to record the largest contribution to BRI's profit, amounting to IDR18.5 trillion, representing 32.39% of the Company's total profit. This contribution slightly declined compared to 38.85% in 2024, in line with a 21.0% yoy decrease in the Micro segment's profit. The decline was in line with the 4.2% yoy contraction in bank-only micro loan disbursements, as well as an increase in CKPN expenses of 6.4% yoy. This development reflects the Company's strategy to prioritize improvements in credit quality and initiatives to accelerate the resolution of non-performing loans. On the other hand, the non-micro segments, including subsidiaries, recorded a 4.7% yoy increase in net profit, supported by growth in the Corporate segment of 16.7% yoy and Other segments of 41.7% yoy, in line with loan growth in the corporate segment and improved performance in the Treasury business. This performance is aligned with the Company's strategy to drive sustainable growth in other segments, particularly non-micro MSMEs, through the Revamp Existing Core, Build New Core strategic pillar.

## Geographic Segment

### Geographic Segment Explanation

Geographical segments represent the provision of goods or services within a particular economic environment that is subject to risks and returns different from those of operating segments in other economic environments. BRI's geographical segments are based on the regions of Indonesia, the United States, Hong Kong, Singapore, Timor-Leste, and Taiwan.

### Productivity, Income, and Profit of Geographic Segmen

In terms of geographical performance, Indonesia remains the primary contributor, reflecting the Company's strategic focus on optimizing domestic growth potential. Nevertheless, all five overseas operating units also demonstrated strong performance, as reflected in the growth of assets, income, and profit before tax, each recording double-digit growth. Assets grew by 7.47% year-on-year, while income increased by 4.74% year-on-year. Meanwhile, income before tax and provision for impairment losses (CKPN) continued to grow positively by 2.62%, supporting the achievement of net income of IDR57.132 trillion. The presence of strong business potential and the ability to generate optimal profitability are among the key considerations for the Company in determining the establishment and operation of its overseas business units.

## National Strategic Projects (PSN) or Other Assignments

### Micro Business Loan (KUR)

KUR refers to working capital or credit financing that is provided to individual, corporate, or business groups debtors that are productive and feasible but do not have sufficient additional collateral. The distribution of BRI KUR is governed by the Regulation of the Coordinating Minister for Economic Affairs of the Republic of Indonesia Number 7 of 2024, which amends the previous Regulation Number 1 of 2023 regarding the Implementation of Micro Business Loan Guidelines. Dated October 21, 2024, a letter from the Coordinating Ministry for Economic Affairs of the Republic of Indonesia's Deputy for Macroeconomic and Financial Coordination (Number PK.KUR/162/D.I.M.EKON/10/2024) announced that the Financing Policy Committee for MSMEs has set BRI's KUR ceiling at IDR180 trillion, aiming to have at least 1,748,000 new KUR debtors in 2025 for BRI, along with a minimum of 1,012,712 graduated debtors in 2025, BRI Micro KUR already distributed, amounting to IDR178.08 trillion, which represented 98.93% of the quota allocated by the Government

### Micro and Small Enterprises Funding Program (PUMK)

The Social and Environmental Responsibility (CSR) initiative, implemented through financial support for MSE actors, is known as the MSE Funding Program (PUMK), previously referred to as the Partnership Loan Program. This MSE Funding (PUMK) represents a government policy executed by all State-Owned Enterprises (SOEs) with the purpose of not only conducting business operations but also fulfilling social responsibilities by supporting micro and small businesses

through access to capital and assistance, ultimately enabling them to become independent or transition to KUR or commercial loans. The MSE Funding Program is specifically allocated for productive business purposes to empower Micro and Small Enterprises (MSEs).

In terms of BRI internal, there was a change of business model in the 2021 PUMK funding program with partnership loan in the previous year, as explained below:

- Up to 2020, partnership loan was under Directorate of Small and Medium with the following business models, as follows:
  - Customer in the partnership loan segment was a feasible entrepreneur, yet having not been bankable.
  - Loan initiative was conducted by RM Program.
  - Maximum plafond of partnership loan was IDR75 million.
- In accordance with Minutes of Handover Number B.10-SSM/01/2021 dated January 15, 2021, the Partnership Loan, currently known as MSE Funding Program (PUMK) to be realized starting from 2021 became the responsibility of Directorate of Micro with the following business models, as follows:
  - PUMK Customer segment is feasible entrepreneurs, yet having not been bankable satisfying PUMK requirements.
  - PUMK program is distributed through BRI Units initiated by Advisors.

The SMEs funding program aims to guide the SMEs-fostered partners to become entry-level KUR debtors, enabling their businesses to thrive and potentially qualify for commercial loans in the future. This program is structured to support

PUMK fostered partners in transitioning into entry-level KUR debtors so that their businesses can expand and potentially serve as a potential pipeline for commercial loans. At the end of 2022, a new directive from the Ministry of State-Owned Enterprises mandated that PUMK funds for state-owned enterprises were distributed through BRI, as outlined in the Ministry of SOEs letter Number S-721/MBU/11/2022, which recommended BRI as the manager for the PUMK Program collaboration. Consequently, starting in 2023, state-owned enterprises began sending funds to BRI for the distribution of PUMK. Additionally, in 2023, the total distribution of PUMK reached IDR872.6 billion, with a total of 30,871 fostered partners. In 2024, the PUMK distribution amounted to IDR874.6 billion, reaching a total of 28,106 fostered partners. Meanwhile, in 2025, the PUMK distribution amounted to IDR807.7 billion, reaching a total of 20,780 fostered partners.

### Home Ownership Credit (KPR)

Home Ownership Credit (KPR) is a financing facility disbursed by BRI in order to support the Government's policy to accelerate the provision of national housing through the 3 Million Houses Program. KPR is intended for micro, small, and medium enterprises (MSMEs), both individuals and business entities, operating in the housing provision sector, including small-scale housing developers, contractors, and building material traders, as well as MSME actors requiring financing to support home ownership, construction, or renovation that supports their business activities.

The mandate for the disbursement of BRI's Home Ownership Credit (KPR) is based on Regulation of the Coordinating Minister for Economic Affairs of the Republic of Indonesia Number 13 of 2025 concerning Housing Program Loans, and is further stipulated in a Cooperation Agreement between BRI and the Ministry of Public Works and Public Housing (PUPR). In its implementation, BRI is appointed as the disbursing bank responsible for the financing disbursement process, subsidy management, and credit quality control in accordance with prevailing regulations.

In 2025, the Government mandated BRI to disburse Housing Program Loans with a quota of IDR1 trillion, allocated through a switching mechanism of a portion of the Micro Business Loan (KUR) ceiling to support national housing

sector development priorities. The ceiling adjustment was implemented based on Government approval as stated in the Letter of the Coordinating Ministry for Economic Affairs of the Republic of Indonesia Number PK.KUR/207/D.I.M.EKON/12/2025 concerning program loan ceiling adjustment. As of the end of 2025, the realization of Housing Program Loan disbursement by BRI amounted to IDR994.54 billion, reflecting BRI's commitment to supporting the implementation of the Government's program while maintaining prudent and sustainable financing quality management.

### Social Assistance (Bansos)

The Ministry of Social Affairs of the Republic of Indonesia collaborates with BRI in distributing Social Assistance, the collaboration is based on Presidential Regulation of the Republic of Indonesia Number 63 of 2017 concerning the Distribution of Non-Cash Social Assistance through banking system. In 2025, the Government through the Ministry of Social Affairs of the Republic of Indonesia distributed four types of social assistance programs, as follows:

1. **Family Hope Program Social Assistance (PKH Social Assistance)**  
Distributed to 3.55 million Beneficiary Families (KPM) with total assistance of IDR9.84 trillion.
2. **Social Assistance of Basic Food Program**  
Distributed to 6.01 million Beneficiary Families (KPM) with total assistance of IDR11.52 trillion.
3. **Economic Stimulus of Basic Food Program for Quarter 2 of 2025**  
Distributed to 6.01 million Beneficiary Families (KPM) with a total assistance amounting to IDR2.41 trillion.
4. **Temporary Direct Cash Assistance for People's Welfare (BLTS-Kesra)**  
Distributed to 5.60 million Beneficiary Families (KPM) with a total assistance amounting to IDR5.04 trillion.

Accordingly, the total assistance distributed from the four types of programs (Bansos PKH, Bansos Sembako, Economic Stimulus of Basic Food Program for Quarter 2 of 2025, and Temporary Direct Cash Assistance for People's Welfare (BLTS-Kesra)) throughout 2025 amounted to IDR28.80 trillion, representing an increase of 35.85% compared to social assistance distribution in 2024 amounting to IDR21.19 trillion.

# Financial Review

The financial review presented below refers to the Financial Statements for the year ended December 31, 2025, as disclosed in this Annual Report. The Financial Statements have been audited by Public Accounting Firm Purwanto, Sungkoro & Surja (Member of Ernst & Young Global Limited), which expressed the opinion that the consolidated financial statements present fairly, in all material respects, the consolidated financial position of PT Bank Rakyat Indonesia (Persero) Tbk and its subsidiaries as of December 31, 2025, as well as the consolidated statement of profit or loss and other comprehensive income and the consolidated statement of cash flows for the year then ended, in accordance with Indonesian Financial Accounting Standards.

## Financial Performance

BRI's financial performance consists of the performance of the Consolidated Financial Position Report, Consolidated Profit and Loss Report and Other Comprehensive Income along with the Consolidated Cash Flow Report presented as follows.

## Consolidated Financial Position Statement Graph

(in trillion IDR)

## Total Assets

In 2025, total assets reached IDR2,135.37 trillion, an increase of 7.19% compared to 2024, which stood at IDR1,992.19 trillion. This asset growth was primarily driven by productive assets, specifically loans and financing, which increased by 12.51% year-on-year (YoY) or by IDR162.41 trillion. The loan and financing growth was mainly contributed by BRI Bank Only, which grew by 10.43% or increased by IDR126.83 trillion, Pegadaian, which saw a 47.63% YoY growth, or an increase of IDR40.67 trillion, PNM, which grew by 8.27% YoY, equivalent to a nominal increase of IDR0.6 trillion.

### Current Accounts with Bank Indonesia

The current account with Bank Indonesia (BI) in 2025 reached IDR31.93 trillion, a decrease of 64.08% compared to IDR88.88 trillion in 2024. This decline aligns with the Statutory Reserve Requirement (GWM) incentive received by the company of 5% as of the end of December 2025, higher than 4% in December 2024. This incentive was granted to the company for its positive contribution to loan distribution in priority sectors as determined by Bank Indonesia.

### Placements with Bank Indonesia and Other Financial Institutions

Placements with Bank Indonesia and Other Financial Institutions in 2025 reached IDR21.06 trillion, a decrease of 63.62% YoY compared to IDR57.87 trillion in 2024. This decline was mainly due to a IDR11.49 trillion decrease in Deposit Facility placements at the central bank, as part of liquidity adjustments and yield optimization efforts

**Securities**

Securities in 2025 reached IDR372.73 trillion, increasing by 14.15% compared to IDR326.54 trillion in 2024. This movement was contributed by an increase in held-to-maturity securities, which rose by 34.37% YoY, or IDR46.48 trillion. This increase was primarily aimed at optimizing the portfolio toward assets with higher yields while still maintaining flexibility for the Company's liquidity.

### Export Bills and Others Receivable Net

Export Bills and Other Receivables in 2025 reached IDR48.25 trillion increasing by 18.68% or amounted to IDR7.60 trillion compared to IDR40.66 trillion in 2024. This increase was mainly contributed by Rupiah Bills Receivable, which rose by IDR2.80 trillion, and related-party USD Bills Receivable, which grew by IDR2.30 trillion. This increase aligns with data indicating that Indonesia's total export value in 2025 grew by 6.15% year-on-year (YoY), reaching USD282.91 billion, or USD16.38 billion higher than USD266.53 billion recorded in 2024.

### Security Purchased Under Agreement to Resell

Securities Purchased with an Agreement to Resell in 2025 amounted to IDR22.45 billion, reflecting a 99.85% YoY decline compared to IDR16.85 trillion in 2024. This decrease aligns with the company's strategy to diversify income sources and optimize interest revenue by reallocating funds to more productive assets, particularly credit disbursement.

### Derivative Receivables

Derivative Receivables in 2025 reached IDR1.17 trillion, reflecting an increase of IDR76.98 billion compared to IDR91.09 trillion in 2024. These derivative transactions were conducted for hedging purposes and liquidity management.

The recognition of derivative receivables was due to the increase in the fair value of derivatives at the reporting date compared to their contract value.

### Loans and Financing Given

BRI's consolidated loans and financing given in 2025 reached IDR1,521.49 trillion, representing an increase of 12.32% year-on-year compared to IDR1,354.64 trillion in 2024. This increase was primarily driven by BRI Only loans, which grew 10.43% year-on-year or IDR126.83 trillion. All of the Company's business segments recorded solid growth. The MSME segment (including consumer loans) grew 6.18% year-on-year or IDR68.61 trillion, maintaining a strong portfolio composition of 77.49%. Meanwhile, the corporate segment also recorded strong growth of 40.22% year-on-year or IDR98.24 trillion, largely driven by high-quality corporations with value chains linked to the Company's MSME segment. This growth profile reflects the Company's ability to balance loan expansion with ongoing improvements in asset quality, as evidenced by profitability ratios that remain well maintained at optimal levels.

In 2025, Pegadaian recorded a commendable performance, achieving growth of 47.64%, equivalent to a nominal increase of IDR40.67 trillion. Pegadaian's ability to optimize gold price movements was a crucial factor contributing to this growth.

Table of Loan and Financing Provided

(In Million IDR)

Description	2025	2024	Growth	
			IDR	%
(1)	(2)	(3)	(4) = (2)-(3)	(5) = (4)/(3)
Loan Given	1,460,729,418	1,298,318,089	162,411,329	12.51%
Syariah Loans	56,350,282	49,889,082	6,461,200	12.95%
Finance Lease Receivables	4,406,157	6,433,608	(2,027,451)	(31.51%)
<b>Total Loan and Financing Provided (Gross)</b>	<b>1,521,485,857</b>	<b>1,354,640,779</b>	<b>166,845,078</b>	<b>12.32%</b>
Minus reserves	(83,058,656)	(81,063,511)	(1,995,145)	2.46%
<b>Net</b>	<b>1,438,427,201</b>	<b>1,273,577,268</b>	<b>164,849,933</b>	<b>12.94%</b>

### Acceptance Receivable

Acceptance receivable in 2025 reached IDR13.08 trillion, increasing by 29.42% YoY (IDR2.97 trillion) compared to IDR10.11 trillion in 2024. This increase was supported by BRI's ability to optimize export-import business potential, particularly in documentary credit acceptance (L/C) transactions.

## Share Participation

In 2025, share participation reached IDR8.83 trillion, marking a 9.39% year-on-year (YoY) increase compared to IDR8.08 trillion in 2024. The dominant factor driving this growth was the recognition of the equity method for profits from associated entities, in proportion to BRI's ownership stake, particularly in PT Bank Syariah Indonesia and PT Bahana Artha Ventura.

## Fixed Assets

In 2025, fixed assets reached IDR63.29 trillion, reflecting a 1.31% year-on-year (YoY) increase compared to IDR62.48 trillion in 2024. This increase was allocated to support the reliability of the Company's information technology (IT) infrastructure and to ensure that the adequacy, feasibility, and completeness of the operational premises across work units remain in optimal and serviceable condition.

## Deffered Tax Assets – Net

Deferred Tax Assets (Net) in 2025 amounted to IDR8.13 trillion, reflecting a 36.49% YoY decrease from IDR12.80 trillion in 2024. This decline was primarily driven by a drop in Allowance for Impairment Losses (CKPN), in line with accelerated resolution of non-performing assets. Despite the

reduction, BRI continues to ensure sufficient provisioning as part of its risk mitigation strategy for potential deterioration in productive assets

## Other Assets – Net

Other assets – net (including investment property) in 2025 reached IDR54.55 trillion, representing an increase of 38.57% year-on-year compared to IDR39.37 trillion in 2024. The increase in other assets was mainly driven by receivables related to ATM and credit card transactions, which increased by IDR576,78 billion, in line with higher transaction volumes. In addition, the increase was also supported by a rise in gold deposit assets amounting to IDR3.27 trillion, in line with the commencement of bullion bank operations managed by Pegadaian, a company within the BRI Group

## Total Liabilities

In 2025, total liabilities reached IDR1,804.43 trillion, reflecting a increase of 8.12% year-on-year (YoY) compared to IDR1,668.87 trillion in 2024. This increase was primarily driven by a IDR101.39 trillion rise in customer deposits. Customer deposits remained the largest contributor to total liabilities, accounting for 81.29% of the total.

### Immediate Liabilities

Immediate liabilities include advance payment deposits, dividend deposits, BRI's obligations as the issuing bank for ATM and credit cards, remittances, check deposit funds, deposit receipts, clearing transactions, tax deposits received by BRI, and social assistance funds. In 2025, immediate liabilities reached IDR39.82 trillion, reflecting a 8.14% year-on-year (YoY) increase compared to IDR36.82 trillion in 2024. The largest component of this increase was the interim dividend payment deposits, which amounted to IDR20.63 trillion. This was in line with BRI's announcement of interim dividend payments at the end of December 2025, with the actual payment executed in January 2026.

### Customer Deposits

In 2025, customer deposits reached IDR1,466.84 trillion, reflecting a 7.43% year-on-year (YoY) increase compared to IDR1,365.45 trillion in 2024. The highest deposit growth was driven by Current Account and Savings Account (CASA), which grew by 12.71% YoY, or IDR116.81 trillion. Meanwhile, time deposits (Deposits) declined by 3.45% YoY, equivalent to IDR15.41 trillion.

The increase in deposits was in line with the Company's first focus on optimizing funding by distributing productive assets, especially recorded loan. The Company was able to maintain LDR, Bank Only at 91.43%, far below the trigger level. In addition, in line with the strategy of focusing on absorbing low-cost funds or CASA, the Company's CASA ratio in December 2025 was recorded as the highest in history or 70.61% and will continue to be increased in the future in line with the strategy to focus on obtaining CASA through transactions.

### Table of Customer Deposits

(In Million IDR)

Description	2025	2024	Growth	
			IDR	%
(1)	(2)	(3)	(4) = (2)-(3)	(5) = (4)/(3)

Saving	587,585,862	544,426,947	43,158,915	7.93%
Time Deposit	431,054,307	446,468,817	(15,414,510)	(3.45%)
<b>Total Customer Deposits</b>	<b>1,466,843,839</b>	<b>1,365,450,104</b>	<b>101,393,735</b>	<b>7.43%</b>

### Deposits from Other Banks and Financial Institutions

In 2025, deposits from other banks and financial institutions reached IDR17.60 trillion, reflecting a 19.91% increase compared to IDR14.68 trillion in 2024. This increase was part of the company's strategy to optimize liquidity acquisition and an effort to diversify funding sources beyond third-party funds.

### Securities Sold Under Agreement to Repurchase

In 2025, securities sold under repurchase agreements reached IDR27.93 trillion, marking a 11.54% year-on-year (YoY) increase compared to IDR25.04 trillion in 2024. This increase was part of the company's liquidity fulfillment strategy, particularly for short-term liquidity needs of less than one year, to accommodate the dynamic liquidity movements occurring in the industry.

### Derivative Payable

In 2025, derivative payable reached IDR1.10 trillion, reflecting a 30.49% YoY decrease compared to IDR1.59 trillion in 2024. This increase was part of the company's treasury strategy in response to fluctuating interest rate trends.

### Liabilitas Payable

In 2025, acceptance payable reached IDR13.08 trillion, reflecting a 29.42% YoY increase compared to IDR10.11 trillion in 2024. This movement was partly due to an

increase in the volume of several acceptances at year-end, which were financed in the form of bank guarantees and/or bills of exchange, recorded under the commitments and contingencies item.

### Tax Payable

In 2025, tax payables reached IDR3.30 trillion, reflecting a 53.42% YoY increase compared to IDR2.15 trillion in 2024. This movement was contributed by three (3) items, namely income tax (Article 25 and 29) from both BRI Parent and its subsidiaries, as well as value-added tax.

### Table of Tax Debt

<b>Total Tax Payables</b>	<b>3,299,310</b>	<b>2,150,487</b>	<b>1,148,823</b>	<b>53.42%</b>

### Marketable Securities Issued

In 2025, securities issued amounted to IDR40.90 trillion, reflecting a 25.84% year-on-year (YoY) growth compared to IDR32.50 trillion in 2024. In terms of denomination, this change was primarily driven by rupiah-denominated securities, which declined by 25.84% year-on-year or decreased by IDR8.40 trillion. The movement was influenced by several types of securities, as outlined below:

1. Sustainable Social Bonds I Phase I of BRI in 2025 amounting to IDR4.82 trillion.
2. BRI Finance Sustainable Bonds Phase I in 2025 amounting to IDR590 billion.
3. PNM Sustainable Orange Social Bonds I Phase I in 2025 amounting to IDR852 billion.

4. PNM Social Mudharabah Sukuk Phase I and II in 2025 amounting to IDR2.77 trillion.
5. Pegadaian Sustainable Bonds VI Phase II in 2025 amounting to IDR4.35 trillion.

### Fund Borrowings

In 2025, borrowings received amounted to IDR129.19 trillion, reflecting a 1.02% YoY increase compared to IDR127.88 trillion in 2024. This increase was primarily driven by the issuance of Social Loans and Club Loans (SLCL) and bilateral loans, as part of BRI's strategy to balance liquidity needs, ensuring adequate funding and optimal allocation

### Estimated Losses on Commitments and Contingencies

In 2025, estimated loss on commitments and contingencies reached IDR1.95 trillion, marking a 23.71% YoY decrease compared to IDR2.55 trillion in 2024. This decline was in line with the decrease in exposure to contingent commitment liabilities, such as bank guarantees and letters of credit, particularly from debtors in the construction, trading, and services sectors.

### Liabilities For Employee Benefits

In 2025, employee benefit liabilities reached IDR27.43 trillion, reflecting a 31.01% YoY growth compared to IDR20.94 trillion in 2024. This decrease was attributed to movements in reserves for employee benefit programs, which had been adjusted by actuarial calculations. These adjustments were based on changes in key actuarial assumptions, including the discount factor, wage growth assumptions, average employee age, movements in gold prices and other relevant factors.

Table of Liabilities for Employee Benefits

(In Million IDR)

Description	2025	2024	Growth	
			Nominal	%
(1)	(2)	(3)	(4) = (2)-(3)	(5) = (4)/(3)

Provision for contract worker	120,375	174,964	(54,589)	(31.20%)
Provision for exit management	86,474	85,000	1,474	1.73%
<b>Total</b>	<b>27,428,311</b>	<b>20,936,335</b>	<b>6,423,649</b>	<b>30.68%</b>

### Other Liabilities

Other liabilities in 2025 reached IDR34.80 trillion, increasing 21.38% year-on-year compared to IDR28.67 trillion in 2024. This increase was contributed by the growth in Gold Deposit Payable, in line with the rise in gold transactions managed by Pegadaian, one of the Companies within the BRI Group.

### Total Equity

In 2025, total equity reached IDR330.94 trillion, reflecting a 2.36% YoY increase or IDR7.63 trillion compared to IDR323.32 trillion in 2024. This increase was primarily driven by the company's ability to sustain net profit, which was recorded at IDR57.13 trillion, and after accommodating interim dividend payments of IDR20.6 trillion. In addition, the increase was also supported by improvements in other comprehensive income from employee benefits, which improved by IDR3.49 trillion, or 158.70% YoY, driven by the improvement in bond yields over the past year.

### Subordinated Loans and Marketable Securities

In 2025, subordinated loans and securities amounted to IDR486.87 billion, remaining relatively flat with only a 1.00% YoY decrease compared to IDR491.78 billion in 2024. This movement was solely impacted by the annual amortization process.

### Capital Stock

In 2025, share capital reached IDR7.58 trillion, remaining unchanged compared to 2024, as there were no corporate actions related to the issuance of new shares throughout 2025.

### Unrealized Gains (Losses) on Securities Classified as Fair Value Through Other Comprehensive Income-Net

In 2025, the unrealized gains (losses) on securities classified as fair value through other comprehensive income - net rebounded to a positive IDR1.29 trillion, representing a growth of 158.70% year-on-year (YoY) compared to a negative IDR2.20 trillion in 2024. This was in line with the improvement in securities yields throughout 2025.

### Repurchased Share Capital (Treasury Shares)

Treasury stock (treasury shares) in 2025 reached IDR4.46 trillion, a slight increase of 2.63% yoy compared to 2024, which reached IDR4.35 trillion. This movement aligns with the stock buyback program and the distribution of shares to employees in the form of ESA.

### Non-Controlling Interests

In 2025, non-controlling interests reached IDR6.91 trillion, marking a 9.88% increase compared to IDR6.29 trillion in 2024. This increase was driven by the 16.12% YoY increase in the profit contribution from Subsidiaries, which rose by IDR1.44 trillion. As a result, the profit contribution from subsidiaries to consolidated profit increased to 18.16%, reflecting a 3.43% YoY improvement compared to 14.73% in December 2024.

#### Graph of Consolidated Statement of Profit and Loss and Other Comprehensive Income

#### Interest and Sharia Income

In 2025, interest and sharia income reached IDR207.78 trillion, reflecting an 4.27% YoY increase, or an increase of IDR8.52 trillion compared to IDR199.27 trillion in 2024. The majority of the interest income came from loans and financing receivables (including sharia), which accounted for 88.23% of the total interest income.

The company's interest income from loans was recorded at IDR183.32 trillion, reflecting a 5.25% YoY increase. Among the various business segments, the ultra-micro and micro sectors, which include BRI, Pegadaian, and PNM, contributed 99.55% of total interest income from loans and financing.

## Interest and Sharia Expenses

In 2025, interest and sharia expenses reached IDR57.28 trillion, remaining relatively flat with only a 0.13% YoY growth compared to IDR56.61 trillion in 2024. Throughout 2025, the Company was able to optimize its cost of funds ratio to remain below 3%, precisely at 2.87%. This successful optimization of interest expenses aligns with the Company's achievement in growing CASA, particularly current accounts by 19.66% and savings by 7.93%, resulting in a record-high CASA ratio of 70.8%.

## Interest and Sharia Income-Net

In 2025, net interest and sharia income reached IDR150.50 trillion, representing a 5.50% YoY increase compared to IDR142.66 trillion in 2024. This increase was driven by the company's ability to enhance interest income, which rose 4.27% YoY through solid growth in productive assets, particularly loans, as well as its ability to optimize interest expenses, which increased only slightly by 1.20% yoy, allowing the company to still record optimal net growth.

## Other Operating Income

Other operating income in 2025 reached IDR53.68 trillion, or recorded flat compared to 2024 which reached IDR53.95 trillion. Several operational income items recorded very strong growth, including:

- Treasury income recorded a significant increase of 65.4% year-on-year (YoY), equivalent to IDR2.22 trillion. This growth was mainly driven by capital gains, which rose by 52.6%, supported by BRI's ability to optimize securities while maintaining liquidity capacity.
- Fee and commissions grew consistently by 5.2% YoY, driven by the Company's ability to sustain fee growth from agency businesses (BRILink Agents), trade finance, and e-channel transactions, in line with the increasing penetration of BRImo usage.
- Recovery income from written-off assets reached IDR20.95 trillion. With this achievement, the Company was able to maintain a recovery rate at the 46% level.
- In addition, there was a significant increase in gold sales revenue, which rose by 241.15% YoY, equivalent to an increase in income of IDR1.70 trillion.

### Provision for Allowance for Impairment Losses on Financial Assets – Net

The net allowance for impairment losses on financial assets (CKPN) in 2025 amounted to IDR46.72 trillion, representing an increase of 11.93% yoy or IDR4.98 trillion compared to IDR41.74 trillion in 2024. The largest portion of this expense was allocated to earning assets in the form of loans and financing, totaling IDR47.57 trillion, which increased by 10.71% yoy or equivalent to IDR4.60 trillion. This increase was in line with the Company's efforts to accelerate the resolution of non-performing loans. The Company's commitment is reflected in maintaining loan quality-related ratios at an adequate level, including the NPL Coverage ratio. Going forward, the provisioning expenses are projected to continue improving, in line with the ongoing asset quality improvement process.

### Reversal of (Provision for) Allowance for Estimated Losses on Commitments and Contingencies - Net

The reversal (burden) of estimated provision for losses on commitments and contingencies-net in 2025 recorded a reversal of IDR624.06 billion. This movement aligned with changes in the volume and outstanding balance related to non-loan products or contingent commitment assets held, such as bank guarantees and letters of credit.

### Provision for Allowance for Impairment Losses Non-Financial Assets - Net

The provision for impairment losses on non-financial assets in 2025 reached IDR82.41 billion, the contribution of this reserve expense was recorded as very minimal, representing only approximately 0.18% of the total allowance for impairment losses. This provisioning was primarily attributable to the creation of reserves for other receivables held by the Subsidiary and the Company from a third party in 2023.

### Other Operating Expenses

Other operating expenses (opex) in 2025 reached IDR88.44 trillion, an increase of 7.73% yoy compared to 2024 which reached IDR82.10 trillion. This growth has been recorded as very strong and well-maintained, as reflected in the movement of the Cost to Income Ratio, which in 2024 stood at 42.55%, remaining below the guidance of 43%. Another ratio demonstrating the Company's success in controlling other operational costs is the Opex to Asset ratio, which has been maintained at the level of 4.1%–4.2% over the past five (5) years. This shows the Company's success in allocating the growth of this operating expense to the right business activities so as to create efficient and consistent performance supported by the use of digitalization in business operational processes.

### Consolidated Cash Flow Statement Graph

in trillion IDR

### Cash Flow from Operating Activities

Cash flows from operating activities reflect the sources and uses of cash from the company's core operational activities. By the end of 2025, net cash used for operating activities reached IDR14.62 trillion, a decrease of IDR9.67 trillion compared to 2024, which recorded cash outflows of IDR24.28 trillion for operating activities. This decline was contributed by the Company's higher credit growth in 2025, recorded at 12.32% year-on-year (YoY), or equivalent to IDR166.85 trillion, compared to 6.97% YoY, or IDR88.21 trillion in 2024. This increase indicates that the Company is allocating cash to productive assets in order to maintain profitability. Furthermore, on the cash inflow side, there was a significant increase in third-party funds, particularly in current accounts and savings, which grew by IDR73.65 trillion and IDR43.16 trillion, respectively. This also contributed to the Company's CASA reaching an all-time high and enabled the COF to remain below 3%. The Company's ability to optimize operational cash as described above had a positive impact

on the growth of operational cash relative to operational income. In 2025, cash flows relative to income amounted to IDR109.33 trillion, an increase of IDR4.13 trillion compared to 2024, which recorded IDR105.21 trillion.

### Cash Flow from Investment Activities

Cash flows from investing activities reflect the sources and uses of cash related to the company's investment activities. As of the end of 2025, net cash used for investing activities was recorded at IDR46.09 trillion, representing an increase of IDR45.90 trillion compared to 2024, when net cash was generated from investing activities amounting to IDR188.19 trillion. This movement in investment cash flows was directed towards supporting the company's core business activities, particularly in credit and financing. The largest source of optimization came from securities, while liquidity ratios remained strong and well above regulatory requirements.

## Cash Flow from Financing Activities

Cash flows from financing activities reflect the sources and uses of cash related to funding activities, including liquidity of liabilities and capital. By the end of 2025, net cash used for financing activities reached IDR42.62 trillion, a decrease of 13.78% YoY compared to IDR37.46 trillion in 2024. This movement was influenced by several factors, including profit distribution for dividends, which amounted to IDR51.88 trillion, an increase of 7.85% or equivalent to IDR3.78 trillion compared to 2024. This aligns with BRI's commitment to creating added value and delivering tangible benefits to shareholders, including both minority shareholders and the Republic of Indonesia as the majority shareholder, including both minority shareholders and the Republic of Indonesia as the majority shareholder through PT Danantara Asset Management (Persero).

## Interest Rate

### Interest Rate

The following is information on counter rate interest rates for BRI deposit, savings, and current account products as of December 31, 2025.

Table of Deposit Counter Rate as of December 31, 2025

Savings Products	Interest rate (IDR)	Interest rate (USD)
Current account	0.00%-1.25%	0.05%-0.15%
Saving	0.00%-2.50%	0.08%-0.25%
Deposit	2.50%-3.00%	4.00%-4.00%

### Loan Interest Rate

In general, the Basic Interest Rate of Loan is calculated based on three components, namely the Cost of Funds for Loan arising from customer fund collection activities, operational costs incurred for fund collection and credit distribution activities, and the profit margin component from credit distribution.

The calculation of SBDK does not take into account the risk premium component of the debtor, the amount of which depends on the assessment of the risk of each debtor.

Therefore, the amount of credit interest charged to the debtor is not necessarily the same as the SBDK.

The calculation of SBDK applies to types of corporate credit, medium credit, small credit, micro credit, and consumer credit (KPR and Non-KPR). Non-KPR consumer credit does not include the distribution of funds through Credit Cards and Unsecured Loan. However, Bank Indonesia submits the classification of the credit according to the bank's internal criteria.

Quantitative Disclosure Table of Prime Loan Interest Rate

Data Period December 31, 2025	Prime Lending Rate

Category	Loan Category Definition	Indicators/Criteria of Loan Category
Corporation	Working capital credit and investment credit for nonMSMEs and non-retail	Total credit limit > IDR500 billion
Retail	N/A	N/A

Notes:

- SBDK refers to OJK Regulation Number 13 of 2024 dated August 12, 2024 concerning Transparency and Publication of Basic Loan Interest Rates for Conventional Commercial Banks.
- SBDK is determined by the Bank based on various factors, including the reference interest rate set by the competent authority, cost of funds for credit, overhead costs, profit margins, and developments in economic conditions.
- SBDK is used as a reference in determining the credit interest rate that will be charged to customers. SBDK does not take into account the estimated component.
- Risk premium, the amount of which depends on the Bank's assessment of the risk for each debtor or group of debtors. Thus, the amount of Loan Interest Rate charged to customers may differ from the calculation of SBDK.
- SBDK excludes credit distribution with special interest rates, promo interest rates, fixed rates for a certain period of time, interest rates for employees for welfare purposes, and the like.
- Information on SBDK that applies at any time can be seen in the publication on the Bank's website and/or each Bank Office.

## Ability to Pay Debt and Receivable Collectibility

### Ability to Pay Debt

The ability to pay debts is reflected in the Bank's liquidity and solvency. In relation to bonds issued, the ability to pay debts is reflected in the smooth payment of interest and bond ratings.

### Protection of Creditors' Rights

The Bank has a policy regarding the fulfillment of creditor rights, which serves as a guideline for borrowing from creditors. The objective of this policy is to ensure that creditors' rights are met and to maintain their trust in the Bank. This policy includes considerations in making agreements and follow-up actions in fulfilling the obligations of the Public Company to creditors. The fundamental rights of creditors include, among others, receiving principal repayment and interest payments as agreed, obtaining the right to late payment penalties for principal and interest, as well as requesting explanations, information, and documents, and examining the Bank's financial records.

### The Ability to Pay Short-Term Debt (Bank Liquidity)

The liquidity ratio is a comparison between loans and deposits (Loan to Deposit Ratio or LDR). BRI's LDR ratio in December 2025 was 91.94% (Bank Only), an increase compared to the LDR in 2024 which was 89.39% (Bank Only), indicating that banking liquidity conditions are tightening amidst slowing economic growth in Indonesia and stagnation in global economic growth. This is reflected in the decline in money

supply (M2) as a projection for economic activity. In addition, the trend of increasing liquidity in the banking industry is also influenced by BI's monetary operations.

In accordance with Bank Indonesia Regulation Number 24/16/PBI/2022 concerning the Fourth Amendment to Bank Indonesia Regulation Number 20/4/PBI/2018 concerning the Macroprudential Intermediation Ratio and Macroprudential Liquidity Buffer for Conventional Commercial Banks, Sharia Commercial Banks, and Sharia Business Units, Banking must maintain a RIM ratio of 84% to 94%. In calculating the RIM, securities issued and administered by the Indonesian Central Securities Depository (KSEI) and not owned by the bank for at least 2 (two) months prior to the reporting date and corporate bonds owned are taken into account. BRI's RIM ratio in 2025 was 92.01% (Bank Only), an increase compared to 2024 which was 91.35% (Bank Only). The increase in BRI's RIM ratio in 2025 was influenced by an increase in higher assets.

In order to enhance short-term liquidity resilience, BRI manages the Liquidity Coverage Ratio (LCR), which represents the ratio between High Quality Liquid Assets (HQLA) and total net cash outflows over the next 30 (thirty) days under stressed conditions. In 2025, BRI's LCR was maintained at 136.92% (Consolidated) and 135.21% (Bank Only). With this achievement, BRI successfully maintained its liquidity adequacy ratio above the minimum regulatory threshold of 100%. Meanwhile, to maintain long-term liquidity resilience, BRI measures the Net Stable Funding Ratio (NSFR), which represents the ratio of available stable funding (ASF) to required stable funding (RSF). In 2025, BRI's NSFR stood at 117.71%, enabling the Bank to maintain

long-term stable funding adequacy above the minimum requirement of 100%.

### The Ability to Pay Long-Term Debt (Bank Solvability)

The Capital Adequacy Ratio (CAR) reflects the Bank's ability to mitigate risks that may occur in carrying out its business processes. In 2025, BRI's CAR was recorded at 21.06% (Bank Only) and 23.52% (consolidation). The CAR ratio is still above BRI's minimum capital requirement according to the BRI Risk Profile which refers to the risk profile scorecard assessment, namely 9.70% (Bank Only) and 9.70% (consolidation). With a still high capital adequacy ratio, BRI is able to anticipate all

major risks that occur in bank management, both market risk, loan risk and operational risk

### Ability to Pay Debt from Issued Securities

The ability to pay debts can also be reflected based on the rating of the securities issued by the Bank, namely Bonds. Securities issued are routinely assessed by rating agencies to support the eligibility of the securities. The quality of securities is largely determined by the ability of the issuing company to pay its securities when they mature and its ability to pay interest or coupons during the term of the securities issuance.

Table of Rank Meaning

(In Million IDR)

Rating Agency	Rating	Meaning of Rating
Pefindo	idAAA	Bonds with an idAAA rating have the highest rating given by Pefindo. The obligor's ability to meet long-term financial commitments on the debt securities, relative to other Indonesian obligors, is superior.
	idAA	An idAA rated debt differs from the highest rated debt only to a small extent. The obligor's ability to meet its long-term financial commitments on the debt, relative to other Indonesian obligors, is very strong.
	idA1+	The idA1+ from PEFINDO is the highest rating for short-term debt instruments, indicating the obligor's superior ability to meet short-term financial commitments compared to other Indonesian issuers. This rating signifies a very low risk of default.
Fitch	BBB-	A BBB rating indicates that the current expectation of default risk is low. The capacity to repay financial commitments is considered adequate, but adverse business or economic conditions are more likely to impair this capacity.
Moody's	Baa2	Bonds rated Baa2 are considered medium and subject to moderate credit risk and as such may have certain speculative characteristics.

## Receivable Collectibility

Loan collectibility can be measured by the asset quality ratio or Non-Performing Loan (NPL). BRI is still able to maintain loan quality very well, this can be seen in the non-performing loan (NPL) ratio in 2025 of 3.29% (Bank Only) and 3.07 (consolidation). BRI's NPL ratio is still far below the maximum regulatory provision of 5% (net NPL) (PBI Number 3/25/2001). BRI will continue to improve the effectiveness of loan risk management to maintain and improve asset quality

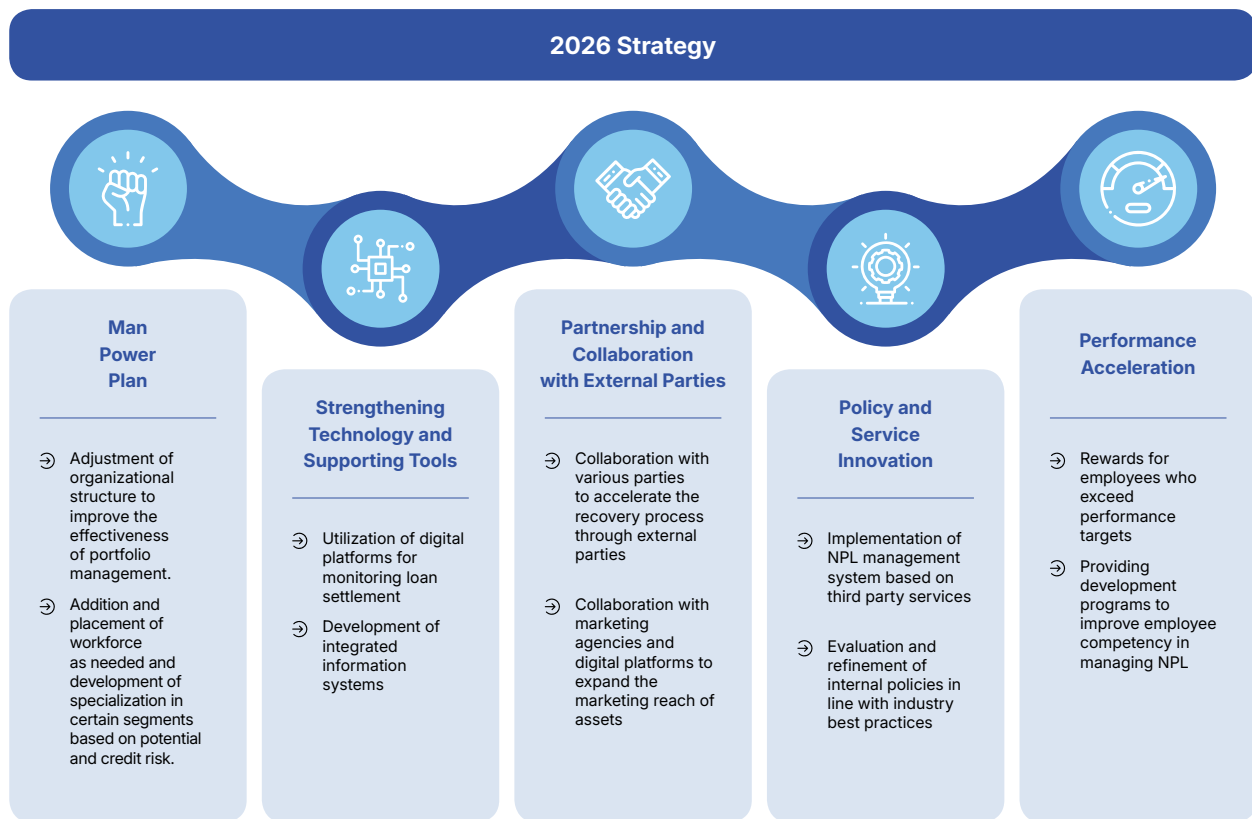

Table of Loan Collectibility

(Consolidated, in IDR millions)

Description	2025	2024
<b>Loan</b>	<b>1,521,485,857</b>	<b>1,354,640,780</b>

<b>NPL</b>	<b>46,646,641</b>	<b>37,701,504</b>
<b>NPL (%)</b>	<b>3.07%</b>	<b>2.78%</b>

The recovery strategy that BRI will implement in 2026 to improve NPLs is as follows:

## Other Financial Ratios

### Rentability and Profitability Ratio

In the banking industry, the profitability ratio is generally measured using the return on assets (ROA), return on equity (ROE) and net interest margin (NIM). BRI was able to record positive profitability performance during 2025.

Table of Rentability and Profitability Ratios

(in %)

Description	Bank Only		Consolidated	
	2025	2024	2025	2024
ROA (before tax)	3.26	3.76	3.49	3.90
ROE (Tier-1)	20.78	22.91	19.31	21.02
ROE Balance Sheet	16.84	18.40	17.44	18.90
NIM	6.54	6.75	7.81	7.85

## Return on Assets (ROA)

Return on Assets (ROA) before tax at the end of 2025 was recorded at 3.49%, relatively stable compared to 3.90% in the same period of the previous year. Amid challenging conditions from both the global and domestic macroeconomic environments, as well as the ongoing asset quality improvement process, the Company was able to generate net profit of IDR57.132 trillion in 2025. This achievement was supported by solid upper-line performance, as reflected in the positive growth in Net Interest Income (NII), an increase in non-interest income, and the Company's ability to maintain discipline in managing operating expenses.

## Return on Equity (ROE)

At the end of 2025, BRI was able to maintain a solid Return on Equity (ROE) of 17.44%. Amid challenging conditions from both the global and domestic macroeconomic environments, as well as the ongoing asset quality improvement process, the Company was able to generate net profit of IDR57.132 trillion in 2025. This achievement was supported by solid upper-line performance, as reflected in the positive growth in Net Interest Income (NII), an increase in non-interest income, and the Company's ability to maintain discipline in managing operating expenses.

## Net Interest Margin (NIM)

At the end of 2025, the Company recorded a stable Net Interest Margin (NIM) of 7.81%. This was supported by the Company's ability to optimize net interest and sharia income, which reached IDR150.5 trillion, or an increase of 5.50% year-on-year (yoy) compared to IDR142.7 trillion in 2024. The increase was driven by the Company's ability to grow interest income by 4.27% in line with healthy loan growth, as well as the efficiency in interest expenses, which grew moderately by 1.20%, reflecting the impact of the Retail Funding Transformation.

## Efficiency Ratio

### Cost to Income Ratio (CIR)

The Company's efficiency ratio is reflected in the Cost to Income Ratio (CIR) of 38.92% (bank only) and 42.55% (consolidated). This operational efficiency was achieved through the streamlining of business processes, including the optimization of digitalization initiatives.

Table of Efficiency Ratio

(Bank Only, in %)

Description	Bank Only		Consolidated	
	2025	2024	2025	2024
CIR	38.92	37.87	42.55	41.37

## Compliance Ratio

### Percentage of Violation and Exceeding of Legal Lending Limit (LLL)

In 2025, BRI has no debtors, either related or unrelated parties, who do not meet or exceed the Maximum Loan Limit.

### Net Foreign Exchange Position Ratio

The Net Open Position (NOP) represents the sum of the absolute values of the net difference between assets and liabilities, combined with the net difference between receivables and liabilities arising from commitments and

contingencies in administrative accounts for each foreign currency, all expressed in Rupiah against capital.

In 2025, the NOP ratio stood at 2.51%, relatively flat compared to 2.42% in 2024. This NOP level remains well below the maximum limit set by Bank Indonesia, which is 20% of capital, in accordance with Bank Indonesia Regulation No. 17/5/PBI/2015 dated May 29, 2015 concerning the Fourth Amendment to Bank Indonesia Regulation No. 5/13/PBI/2003 on the Net Open Position of Commercial Banks.

## Productive Assets Quality Analysis

The quality of the Company's productive assets is in very good condition. For productive assets outside of recorded loan, only securities are in bad collectibility. Meanwhile, productive assets classified as loan provided have very well-maintained quality, as seen in the non performing loan (NPL) ratio in 2025 of 3.29 % (Bank Only) and 3.07% (consolidation). BRI's NPL ratio is still far below the maximum regulatory provision of 5% (net NPL) (PBI No.3/25/2001). BRI will continue to improve the effectiveness of loan risk management to maintain and improve asset quality

## Strategy For Improving fee Based Income

During 2025, BRI recorded fee-based income and other income (bank only) amounting to IDR53.8 trillion, representing 0.50% yoy growth. This income was derived from fee-based income of IDR20.7 trillion, which increased by 1.25% yoy, other operating income of IDR12.3 trillion, which grew by 38.13% yoy, and recovery income from written-off earning assets amounting to IDR20.8 trillion, which recorded a 14.04% yoy decline. In 2025, the largest increase in BRI's fee-based income was derived from credit administration transaction services, particularly credit fees generated from the selective expansion of the corporate segment, international business transactions, as well as e-channel transactions sourced from e-channel products such as BRImo, QLola, EDC, QRIS, and BRILINK. BRI's fee-based income performance will continue to be driven by enhancing transaction-based fees, including strategies to expand the marketing of transaction banking products through digital initiatives that provide convenience for customers in conducting e-channel transactions. Cross-selling marketing collaborations of Subsidiary products represent one of the strategies that can boost BRI's fee-based income performance.

## Bank Capital Structure

### Management Policy for Capital Structure and Fundamental Selection of Management Policy in Capital Structure

The management of capital structure aims to ensure that BRI consistently maintains adequate capital to cover inherent risks in managing its business while optimizing value for shareholders.

BRI has established the Financial Conglomeration Governance Committee, which consists of six sub-committees, one of which is the Capital, Investment, and Strategy Sub-Committee. The Committee serves as a supporting body for the Board of Directors to review, determine, recommend, and evaluate corporate actions undertaken within the BRI Group. In addition, the Committee conducts performance reviews and analyses, as well as provides recommendations regarding BRI Group synergies, including initiatives related to capital structure optimization and the management of subsidiaries.

The capital structure policy is one of the policies that requires the approval of the Board of Commissioners. Accordingly, the Board of Commissioners consistently reviews and ensures

-	-	-	-	-	-	-	
50,837	-	-	-	-	-	53,246	

that the capital structure is aligned with the strategic plan and the established risk appetite.

In addition, BRI also has a Risk Management Committee, which is responsible for the implementation of risk management and integrated risk management strategies. The Committee is tasked with determining corrective measures based on the evaluation results of the implementation of Integrated Risk Management in the form of capital analysis.

BRI is also committed to complying with regulatory requirements regarding capital structure. In accordance with the Financial Services Authority Regulation (POJK) No. 11/POJK.03/2016 dated January 29, 2016, regarding the Minimum Capital Requirement for Commercial Banks (POJK 11/2016), as amended by POJK No. 34/POJK.03/2016 dated 22 September 2016 concerning Amendments to Financial Services Authority Regulation No. 11/POJK.03/2016 on the Minimum Capital Adequacy Requirement (KPMM) (POJK 34/2016), banks are required to maintain a minimum capital in line with their risk profile and establish additional capital buffers, as follows

1. Capital Conservation Buffer of 2.50% of Risk-Weighted Assets (RWA)

2. Countercyclical Buffer of 0.00% of RWA
3. Capital Surcharge for Systemic Banks of 2.50% of RWA

With a minimum CAR requirement of 9.70% (consolidated) based on its risk profile, BRI's 2025 CAR of 21.06% (bank only) and 23.52% (consolidated) remains well above the minimum regulatory requirement set by the banking and financial services authority

As of December 2025, BRI's capital structure consists of a Core Capital (Tier-1) of IDR246.05 trillion (bank only) and IDR301.84 trillion (consolidated), as well as a Supplementary Capital (Tier-2) of IDR13.97 trillion (bank only) and IDR14.99 trillion (consolidated). The Tier-1 Capital Adequacy Ratio (CAR) stands at 19.93% (bank only) and 22.41% (consolidated). BRI's Tier-1 Capital is equivalent to its Common Equity Tier-1 (CET-1), as BRI does not have Additional Tier-1 Capital

Therefore, BRI's Tier-1 Capital Ratio is well above the minimum requirement of 6% and the minimum Common Equity Tier-1 (CET-1) requirement of 4.5% set by the regulator.

## Capital Structure Details

A detailed description of the capital structure is presented as follows.

Table of Capital Structure

(consolidated, in IDR millions)

Description	2025	2024
Core (Tier 1)	301,847,212	291,317,196
Common Equity (CET 1)	301,847,212	291,317,196

Tier 2 Ratio	1.11%	1.11%
Minimum CAR based on Risk Profile	9.70%	9.64%

## Information on Capital and Risk Exposure

In accordance with the complexity of its business, the Bank manages 8 (eight) types of risk, namely credit risk, liquidity risk, market risk, operational risk, legal risk, reputation risk, strategic risk and compliance risk. However, this section only describes risk management practices for credit risk, market risk, liquidity risk and operational risk. Meanwhile, explanations related to other types of risk are presented in the Risk Profile and Management section on Corporate Governance in this Annual Report.

Based on the Otoritas Jasa Keuangan Regulation (POJK) Number 32/POJK.03/2016 concerning Amendments to the Otoritas Jasa Keuangan Regulation Number 6/POJK.03/2015 concerning Transparency and Publication of Bank Reports Article 13A Banks are required to add quantitative information on risk exposures faced by Banks on Publication Report, Otoritas Jasa Keuangan Circular Letter (SEOJK) Number 9/SEOJK.03/2020 of 2020 concerning Transparency and Publication of Conventional Commercial Bank Reports and POJK Number 18/POJK.03/2016 concerning Implementation of Risk Management.

## Explanation of Differences Between Exposure Values under Financial Accounting Standards and Financial Services Authority Regulations (LIA)

### A. DIFFERENCES BETWEEN CARRYING AMOUNTS IN PUBLISHED FINANCIAL STATEMENTS AND CARRYING AMOUNTS UNDER PRUDENTIAL PRINCIPLES

The differences between the carrying amounts disclosed in the Published Financial Statements and the contractual carrying amounts of each financial asset and liability arise from differences in the intended use of financial asset and liability data between reporting purposes in accordance with accounting standards and business negotiation purposes. This principle is also applied to BRI's subsidiaries.

## B. VALUATION METHODOLOGY, DESCRIPTION OF INDEPENDENT PRICE VERIFICATION PROCESS, AND PROCEDURES FOR VALUATION OR RESERVES ADJUSTMENTS

Valuation is a critical component required for managing nearly all banking risks, including market risk, credit risk, and liquidity risk. The valuation process is applied to all positions in the trading book, including securities held by the Group (fair-value-to-other-comprehensive income).

There are valuation method levels for financial instruments measured at fair value. The distinctions among these levels are as follows:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: Inputs other than quoted prices included in Level 1 that are observable for assets and liabilities, either directly (as a price) or indirectly (derived from prices).

Level 3: Inputs for assets or liabilities that are not based on observable market data (unobservable information).

Verification of market price sources is performed via sampling for each type of instrument in open positions and does not need to be conducted simultaneously. The sampling method is conducted randomly (random sampling). Verification is performed at a minimum to assess the fairness of market prices and the information used as inputs in the valuation models.

No valuation adjustments are required, as the carrying amounts under the market risk framework utilize sources consistent with the carrying amounts under financial accounting standards.

### Qualitative Disclosure on Capital Structure and Capital Adequacy

The management of capital structure aims to ensure that BRI consistently maintains adequate capital to cover inherent risks in its business operations without compromising value optimization for shareholders.

BRI has established a Financial Conglomeration Governance Committee, consisting of six sub-committees, including the Capital, Investment, and Strategy Sub-Committee. The Committee serves as a supporting body for the Board of Directors to review, determine, recommend, and evaluate corporate actions undertaken by the BRI Group. In addition, the Committee conducts performance reviews and analyses, as well as provides recommendations on BRI Group synergies, including activities related to capital structure optimization and subsidiary management.

BRI also has a Risk Management Committee, which is responsible for the implementation of risk management and integrated risk management strategies. This Committee is tasked with determining corrective actions based on evaluations of the Integrated Risk Management implementation, including capital analysis.

BRI is committed to complying with regulatory requirements regarding capital structure. Based on Financial Services Authority Regulation (POJK) No. 11/POJK.03/2016 dated January 29, 2016, concerning Minimum Capital Requirements for Commercial Banks (POJK 11/2016), as amended by POJK

No. 34/POJK.03/2016 dated September 22, 2016 (POJK 34/2016), banks are required to maintain minimum capital according to their risk profile and establish additional capital buffers, as follows:

1. Capital Conservation Buffer: 2.50% of Risk-Weighted Assets (RWA)
2. Countercyclical Buffer: 0.00% of RWA
3. Capital Surcharge for Systemically Important Banks: 2.50% of RWA

BRI's minimum CAR based on risk profile is 9.70% (consolidated). As of 2025, BRI's CAR stood at 21.06% (bank only) and 23.52% (consolidated), well above the regulatory minimum requirements for banking and financial services.

Regarding capital structure, as of December 2025, BRI held Tier-1 Capital of IDR246.05 trillion (bank only) and IDR301.84 trillion (consolidated), as well as Tier-2 Capital of IDR13.97 trillion (bank only) and IDR14.99 trillion (consolidated). The Tier-1 CAR reached 19.93% (bank only) and 22.41% (consolidated). BRI's Tier-1 Capital is equivalent to Common Equity Tier 1 (CET1) Capital, as BRI does not have Additional Tier 1 (AT1) Capital.

Therefore, BRI's Tier-1 Capital Ratio is well above the regulatory minimum of 6% as well as the minimum Common Equity Tier 1 (CET1) requirement of 4.5% set by the Regulator.

## Risk Management – Bank Risk Management Approach (OVA)

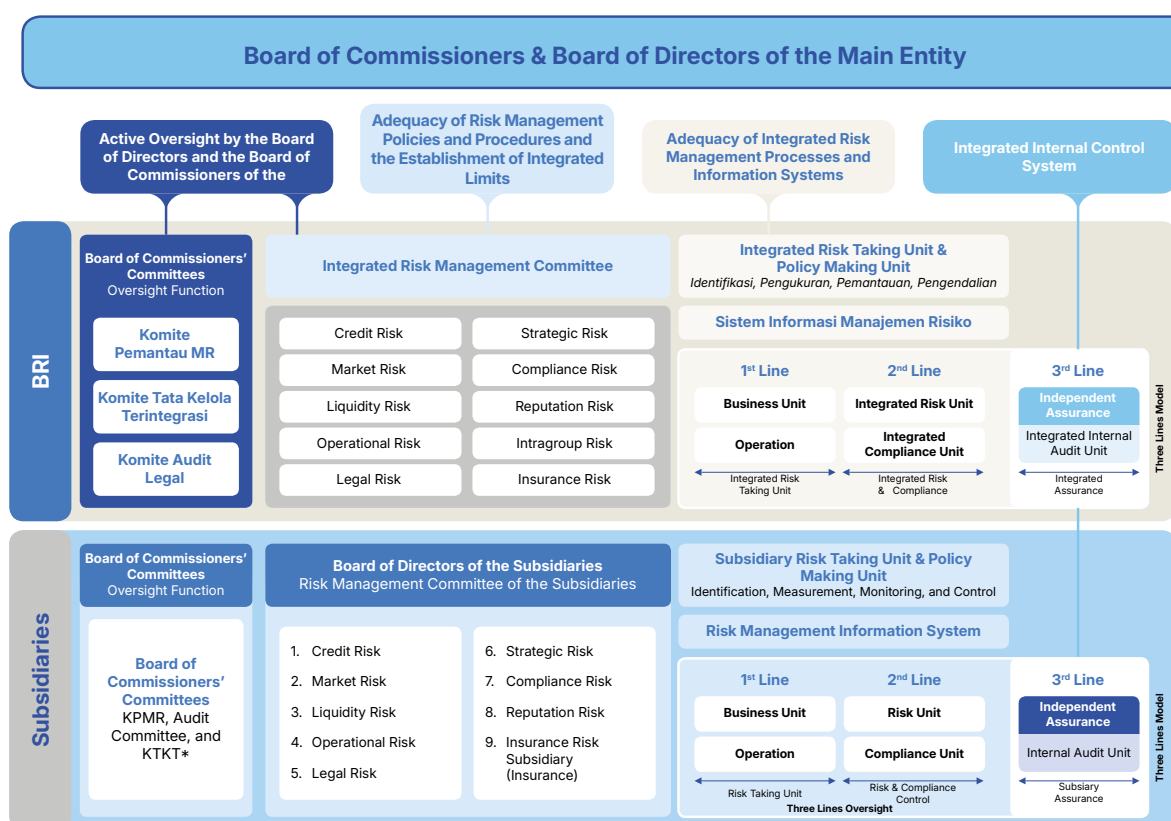

### A. BUSINESS MODEL AND INTERACTION WITH THE RISK PROFILE

Risk Profile of the Bank is established to provide an overview of the assessment of risks inherent in the business and operational activities of BRI, as well as the quality of the implementation of its risk management, both on an individual basis and on a consolidated basis with its Subsidiaries. The Bank's business model is reflected in its risk profile through the determination and measurement of risk profile parameters. The Bank regularly evaluates the determination of risk limits and risk management thresholds at least once a year, or more frequently in the event of changes in factors that significantly affect business activities, risk exposure, and/or the Risk Profile.

In order to calculate additional capital in accordance with the Risk Profile, the Bank implements the Internal Capital Adequacy Assessment Process (ICAAP), which applies to the Bank both on an individual basis and on a consolidated basis with its Subsidiaries. ICAAP is a process undertaken by the Bank to determine capital adequacy in line with the Bank's risk profile and to establish strategies for maintaining adequate capital levels.

### B. RISK MANAGEMENT STRUCTURE AND GOVERNANCE

The Company's Risk Management framework is set out in the BRI Risk Management Policy and is implemented through an approach that integrates capital management and risk management in operational and business activities, covering all levels of the BRI organization as well as members of the BRI Financial Conglomeration. In general, the BRI risk management framework, which is integrated with its Subsidiaries, can be illustrated as follows:

The integrated risk management governance framework above refers to POJK No. 17/POJK.03/2014 on the Implementation of Integrated Risk Management for Financial Conglomerates. The risk management framework and governance applied by the BRI Financial Conglomeration consist of four (4) main pillars, as follows:

1. Pillar 1: Active oversight by the Board of Directors and the Board of Commissioners of the Main Entity;
2. Pillar 2: Adequacy of policies, procedures, and the establishment of integrated limits;
3. Pillar 3: Adequacy of integrated risk management processes and risk management information systems; and
4. Pillar 4: A comprehensive integrated internal control system.

In the implementation of Pillar 1 and Pillar 2 of Integrated Risk Management, the Board of Directors and the Board of Commissioners of each entity within the BRI Financial Conglomeration are assisted by the Risk Management Committee under the Board of Directors and by committees under the Board of Commissioners. In the implementation of Pillar 3, each entity within the BRI Financial Conglomeration applies the three lines model of risk governance, consisting of the following:

1. The first line, as the risk owner unit, represents the units that directly identify and manage risks in business processes, consisting of both Core Risk Taking Units and Supporting Risk Taking Units;
2. The second line, as the independent risk management and compliance function, represents the units responsible for measuring, monitoring, and mitigating risks on an aggregate basis, as well as developing risk management methodologies and policies; and
3. The third line, as the Internal Audit function, represents the unit responsible for ensuring that risk governance and risk control are effectively implemented within the organization.

In the implementation of Pillar 4, namely the Integrated Internal Control System, the Integrated Internal Audit Unit and the Internal Audit Units of the Subsidiaries, acting as Independent Assurance, play an important role in ensuring the effectiveness of the implementation of the three pillars of Integrated Risk Management. Lastly, in the implementation of Integrated Risk Management, synergy is established between the risk management organs of the Main Entity and those of the Subsidiaries.

### C. CODE OF CONDUCT

BRI has established a Code of Conduct policy as stipulated under its Good Governance provisions. The principles of the Code of Conduct at BRI are as follows:

1. Principle of Leadership Commitment and Exemplary Conduct  
Leadership commitment is reflected in the obligation of the Board of Directors and the Board of Commissioners to declare their compliance with the Code of Conduct through a Code of Conduct Statement Letter. In addition, the Board of Directors and the Board of Commissioners serve as role models for all BRILiaN personnel in adhering to and implementing the Code of Conduct.
2. Principle of Transparency  
The principle of transparency is reflected in the Bank's openness and disclosure regarding the provisions, implementation, and any violations of the Code of Conduct occurring within BRI, in accordance with the applicable regulations.
3. Principle of Accountability  
BRI's responsibility as a bank in implementing the Code of Conduct is reflected, among others, in its relationships with customers, competitors, business partners, regulators, stakeholders, as well as the community and the environment. The responsibility of BRI personnel to comply with the Code of Conduct is documented through the Code of Conduct Statement Letter and through the application of conduct consistent with the Code of Conduct in carrying out their duties and responsibilities.
4. Principle of Control  
Violations of the Code of Conduct may be reported through the Whistleblowing System (WBS). If, based on the results of the investigation, the violation is proven to be valid, sanctions will be imposed in accordance with the provisions of BRI's Disciplinary Regulations.
5. Principle of Oversight  
The implementation of the Code of Conduct policy at BRI is subject to monitoring and evaluation to ensure that the Code of Conduct is well understood by BRI personnel and properly implemented, thereby continuously serving as a guideline for all BRI personnel. The Code of Conduct policy is also continuously improved in line with prevailing conditions.

The commitment to the Code of Conduct applies to all BRI personnel at all levels of the organization. The continuous and sustainable implementation of the Code of Conduct, reflected in attitudes, actions, commitments, and regulations, supports the creation of the Company's culture. All BRI personnel are required to sign a Code of Conduct Statement Letter annually.

The publication and transparency of the Company's Code of Conduct are carried out through BRI's website, which includes, but is not limited to, the policies and implementation of the Code of Conduct at BRI in accordance with applicable regulations. In addition, BRI's compliance system is certified/audited/verified by third parties, both internal and external, in accordance with the applicable provisions.

### D. SCOPE AND KEY FEATURES OF THE RISK MEASUREMENT SYSTEM

The risk measurement system is used to measure BRI's risk exposure as a basis for risk control. Risk measurement must be conducted periodically for products and portfolios as well as for all BRI business activities. The measurement approaches and methodologies may be quantitative, qualitative, or a combination of both, through the development of models such as Internal Risk Rating, Value at Risk (VaR), Portfolio Management, Stress Testing, Economic Value of Equity (EVE), impairment models, and other models that support decision-making.

The risk measurement system is evaluated and refined periodically or whenever necessary to ensure the appropriateness of assumptions, accuracy, reasonableness and integrity of data, as well as the procedures used in measuring risk. Enhancements to the risk measurement system are carried out whenever there are changes in BRI's business activities, products, transactions, and risk factors that may affect BRI's financial condition.

In order to align the implementation of Basel II, Basel III, and Enterprise Risk Management (ERM), BRI continues to implement the Basel framework in accordance with the regulatory guidelines of the Otoritas Jasa Keuangan and the Basel Committee on Banking Supervision, as well as other best practices. This implementation covers areas including Credit Risk, Market Risk, Liquidity Risk, Interest Rate Risk in the Banking Book (IRRBB), Operational Risk, Capital Management, the Internal Capital Adequacy Assessment Process (ICAAP), Stress Testing, and Recovery and Resolution Plan.

### E. RISK INFORMATION REPORTING TO THE BOARD OF COMMISSIONERS AND THE BOARD OF DIRECTORS

The Risk Management Work Unit (SKMR) of BRI and all Subsidiaries prepare risk management reports in formats that comply with the applicable regulations, both on a consolidated basis and on an integrated basis. Risk management reporting to the Board of Directors, the Board of Commissioners, and other relevant parties includes, among others, the following:

1. Monitoring reports on the Risk Appetite Statement, Risk Profile, and Bank Soundness Level, both on an individual and consolidated basis;
2. Allowance for Impairment Losses (CKPN) adequacy reports;
3. Risk-Weighted Assets (RWA) reports for Credit Risk, Market Risk, and Operational Risk;
4. Reports on loan growth developments;
5. Reports on credit quality developments;
6. Reports on the development of restructured loans;
7. Reports on the utilization of the write-off budget and realization of recovery income;
8. Monitoring reports on impairment costs (CKPN) and provisioning ratios, such as NPL Coverage and LAR Coverage;
9. Stress testing results for Credit Risk, both at the portfolio level and for large borrowers, as well as stress testing for Market Risk and Liquidity Risk;
10. Liquidity Coverage Ratio (LCR) and Net Stable Funding Ratio (NSFR) reports;
11. Interest Rate Risk in the Banking Book (IRRBB) reports; and
12. Recovery and Resolution Plan reports.

#### F. STRESS TEST

To assess the adequacy of the Bank's capital resilience and liquidity sufficiency in facing changes and shocks in macroeconomic conditions, BRI conducts stress testing. The objectives of stress testing at BRI are as follows:

1. To identify impacts, particularly those that may have a significant effect on BRI's portfolio;
2. To estimate BRI's potential losses under abnormal and extreme market conditions;
3. To measure the sensitivity of BRI's performance and financial condition to changes in risk factors; and
4. To ensure that BRI maintains resilience during periods of economic crisis.

The scope of stress testing implemented at BRI includes scenario stress testing and sensitivity stress testing. Scenario stress testing covers credit risk, market risk, and liquidity risk. Within scenario stress testing, credit risk and market risk are included in the solvency stress test, which assesses the Bank's capital resilience as reflected in its financial statements, including the balance sheet, profit or loss, and financial ratios. Meanwhile, liquidity risk is assessed through a separate methodology outside the solvency stress test framework. Sensitivity stress testing is conducted to complement the analysis of scenario stress testing and includes credit risk, exchange rate risk, and interest rate risk. Stress testing at BRI is conducted both on an individual basis and on a consolidated basis together with its Subsidiaries. The implementation of stress testing across the BRI Group constitutes part of integrated risk management, with the results reported to BRI management, the management of Subsidiaries, as well as the regulator to obtain feedback and consideration for the Company's risk management strategies under economic downturn scenarios.

As one of the Domestic Systemically Important Banks (D-SIBs) in Indonesia, BRI is required to prepare stress testing analysis as part of the Recovery Plan, which is submitted to the Board of Directors and to the Otoritas Jasa Keuangan. BRI also participates in the Joint Stress Test conducted periodically by Bank Indonesia and Otoritas Jasa Keuangan.

#### G. STRATEGIES AND PROCESSES TO MANAGE, HEDGE, AND MITIGATE RISKS ARISING FROM THE BANK'S BUSINESS MODEL

The market risk management process is carried out in accordance with the principles of risk management implementation as stipulated in the general risk management policy and is based on the Three Lines Model, in which the Board of Commissioners and the Board of Directors act as the governing body, supported by the Three Lines of Defense consisting of the Operational Work Units, the Risk Management Work Unit, and the Internal Audit Work Unit. Active oversight by the Board of Directors is conducted periodically through various management forums, including the Risk Management Committee Forum, the Assets and Liability Management Committee (ALCO) Forum, the Business Performance Review, and meetings of the Board of Directors. Meanwhile, oversight by the Board of Commissioners is carried out through the Risk Monitoring Committee. Risk measurement is performed periodically (daily and monthly) by both the Operational Work Units and the Risk Management Work Unit using established tools to mitigate risks that may arise from business activities.

BRI establishes hedging policies to reduce risks arising or expected to arise from price fluctuations in the financial markets. Matters stipulated in relation to hedging include general provisions, hedging transaction techniques, limits on hedging transactions, and hedging instruments.

## Leverage Ratio

### Report on Total Exposure in the Leverage Ratio – Individual

(in IDR million)

No	Item	Total
1	Total assets in the statement of financial position in the published financial statements (gross before allowance for impairment losses).	2,005,039,158
2	Adjustment for investments in banks, financial institutions, insurance companies, and/or other entities that are required to be consolidated under financial accounting standards but excluded from the scope of consolidation based on OJK regulations.	(43,694,582)
3	Adjustment for the value of underlying financial asset pools transferred in asset securitization transactions that meet the true sale requirements as stipulated in OJK regulations on prudential principles in asset securitization activities for commercial banks. If the underlying financial assets have been deducted from total assets in the statement of financial position, the amount in this row is 0 (zero).	-
4	Adjustment for the temporary exclusion of demand deposits with Bank Indonesia to meet the minimum reserve requirement (if any).	-
5	Adjustment for fiduciary assets recognized in the statement of financial position under financial accounting standards but excluded from the calculation of total exposure in the Leverage Ratio.	-
6	Adjustment for purchases or sales of financial assets under regular way transactions using trade date accounting.	-
7	Adjustment for cash pooling transactions that meet the requirements as stipulated in this OJK regulation.	-
8	Adjustment for derivative transaction exposure.	5,022,245
9	Adjustment for SFT exposure, such as reverse repo transactions.	1,407,391
10	Adjustment for TRA exposure after applying the credit conversion factor (CCF).	122,184,690
11	Adjustment for prudential valuation, including capital deduction factors and allowance for impairment losses.	(169,259,220)

No	Item	Total
12	Other adjustments.

## Credit Risk

### Disclosure of Qualitative Regarding Counterparty Credit Risk (CCRA)

#### Business Model Reflected in the Bank's Credit Risk Profile Component

The business model for BRI individually is reflected in the parameters/indicators used in assessing the inherent risk of credit risk and those used in determining the amount of credit risk reserves, which include:

**1. Asset Portfolio Composition and Level of Concentration**

The composition of loans to total assets is maintained at approximately 70%, with the maximum loan portfolio in a single segment maintained at around 40%. The composition of loans to the 25 largest non-bank debtor groups, excluding related parties, is maintained at approximately 20% of total loans. The Bank also establishes credit concentration limits by industry sector. In the credit risk profile, the number of credit concentration limit breaches in specific industry sectors is maintained at a maximum of three (3) industry sectors.

**2. Quality of funding provision and adequacy of reserves**

The quality of fund provision is reflected in the indicator of low-quality loans (LaR/Loan at Risk) to total loans, which is maintained at approximately 10%, and is also monitored by business segment. The ratio of non-performing loans (NPL) to total loans is maintained at approximately 3%, and is also monitored by business segment. The adequacy of allowance is reflected in the LaR coverage, NPL coverage, and the amount of Allowance for Impairment Losses (CKPN) on loans to total loans. LaR coverage is maintained at a minimum range of 50%–55%, while NPL coverage is maintained at a minimum range of 160%–200%.

**3. Fund provision strategy and sources of fund provision**

The fund provision strategy and the sources of fund provision are reflected in the annual loan growth target and the Loan to Deposit Ratio (LDR) target. The determination of loan growth targets takes into consideration macroeconomic conditions, such as economic growth and inflation, as well as liquidity conditions in the banking industry.

**4. External factors**

Several external factors may influence loan growth and credit quality, including economic growth, inflation, interest rates, exchange rates, and unemployment rates.

The business model for BRI on a consolidated basis with Subsidiaries is reflected in the parameters/indicators used in assessing the inherent risk of credit risk, including:

**1. Asset portfolio composition and level of concentration**

In measuring concentration risk, Subsidiaries use several parameters, including: the composition of

loans, financing, and investments to total assets; the composition of loans, financing, and investments provided to large non-bank debtors excluding related parties; and credit concentration by industry sector.

**2. Quality of funding provision and adequacy of reserves**

The quality of fund provision is reflected in indicators including: the ratio of low-quality loans, financing, and investments (LaR/Loan at Risk) to total loans, financing, and investments; the ratio of non-performing loans, financing, and investments (NPL) to total loans, financing, and investments; and the adequacy of allowance as reflected in LaR coverage, NPL coverage, and the amount of Allowance for Impairment Losses (CKPN) on loans to total loans.

**3. Fund provision strategy and sources of fund provision**

The strategy for providing funds and the source of the provision of funds is reflected in the annual credit growth target as well as the LDR or Loan to Deposit Ratio target. The credit growth target is determined by considering macroeconomic conditions, such as economic growth and inflation, as well as the liquidity conditions of the banking industry.

**4. External factors**

Several external factors can influence growth and credit quality, including: economic growth, inflation, consumption levels, export growth, interest rates, gold prices and unemployment rates.

#### Criteria and Approaches Used to Determine Credit Risk

##### Management Policies and Determine Credit Risk Limits

1. The criteria and approaches used by BRI individually to determine Credit Risk Management policies and determine Credit Risk limits are as follows:

The preparation of Policies and Procedures must fulfill the following points:

- Compliance with rules and regulations.
- Hierarchy and authority
- Clear regulatory scope
- Directive, applicable and contains elements of control.
- Oriented towards effectiveness and sustainable business.

In extending credit, BRI applies the prudential principle, which is stipulated in policies and procedures, namely the General Credit Policy (Kebijakan Umum Perkreditan/KUP) as set forth in Decree No. KU.01-DIR/KRD/11/2022, and the Credit Implementation Guidelines for each business segment, namely Circular Letter No. SE.02-DIR/KRD/01/2025 on Micro Business Credit Implementation Guidelines, Circular Letter No. SE.04-DIR/KRD/01/2024 on SME Business Credit Implementation Guidelines, and Circular Letter No. SE.06-DIR/KRD/07/2025 on

Corporate Business Credit Implementation Guidelines. The key provisions governing credit risk governance include the following main principles:

- a. Segregation of functions in credit granting, consisting of the Relationship Management (RM) function and the Credit Risk Management (CRM) function;
- b. Implementation of the Four Eyes Principle in exercising credit approval authority, requiring at least two (2) line credit officers in the decision-making process;
- c. Implementation of the Internal Risk Rating System, as a standard risk assessment framework through credit risk scoring and rating;
- d. Segregation in the management of non-performing loans; and
- e. Implementation of sound financing principles in accordance with the Loan Portfolio Guidelines (LPG), which consist of Sector Classification (SC), Sector Acceptance Criteria (SAC), and Sector Limits.

The implementation of the Bank Credit Policy (KPB), which consists of the General Credit Policy (KUP) and its implementing provisions, must be aligned with the Bank's organizational structure; therefore, its implementation shall:

- a. Must be used, implemented and implemented and adhered to by all workers related to credit, including members of the Board of Commissioners and Directors, consistently and consistently.
- b. This also applies to overseas business units, but the implementation can be adjusted to local banking regulations.
- c. To be able to support the implementation and implementation of the KPB, apart from understanding and complying with the KPB as well as possible, every credit officer is also required to:
  - 1). Understand and comply with the implementation guidelines for each business sector as well as other credit regulations in the field, including changes.
  - 2). Understand and comply with regulations and policies from regulators, follow developments and changes in provisions or regulations as well as all issues related to credit, whether local, regional, national or international in scope.

Determination of Credit Risk limits is carried out by taking into account the following matters:

- a. Credit risk limits are established for business segments, industry sectors, customers (debtors) or counterparties, related parties, economic sectors, or other forms of classification.
- b. Credit Risk limits are set at the portfolio level or overall level for all products and activities that have Credit Risk exposure including: credit portfolios, securities transactions, trade finance transactions, and other products and activities that contain Credit Risk.
- c. Credit Risk limit is determined every year according to the risk appetite and applicable regulations.

- d. Determination of limits is carried out using historical data and taking into account the average data and standard deviation during the data collection period.
- e. As for parameters for which historical data as support is not yet available, they can be determined using expert judgment by considering the Bank Business Plan (RBB), Company Budget Work Plan (RKAP), external data, expertise, knowledge, experience possessed by the decision maker and regulatory provisions. applies.
- f. In determining risk limits, in addition to the considerations above, forward-looking factors may also be taken into account, such as macroeconomic variables, risk issues, and other relevant factors.
- g. The group within the Risk Management Work Unit (SKMR) responsible for this area, together with the Operational Work Unit, formulates and proposes the objects and dimensions of Credit Risk Limits to the Board of Directors or the Risk Management Committee (RMC) for decision and approval.

2. Criteria and Approaches used by Financing Companies to determine Credit Risk Management policies and determine Credit Risk limits

Management of policies and procedures must meet the following principles:

- a. Principle of harmony
- b. Principle of suitability of authority
- c. Principles of effectiveness and efficiency
- d. Principles of sustainability
- e. Principles of good stewardship and accessibility

The approach used to determine Credit Risk Management policies is as follows:

- a. Business process approach by developing policies and procedures in each business financing process.
- b. Risk scoring approach by developing analytical tools based on statistical methods to assess the risk profile of prospective debtors individually in predicting the Probability of Default (PD).
- c. The process of measuring and calculating corporate financing risk is carried out in the form of measuring risk profiles and monitoring Risk Appetite Criteria (RAC).

Determination of Credit Risk limits is carried out by taking into account the following matters:

- a. Credit risk limits are established for business segments, industry sectors, customers or counterparties, related parties, economic sectors, or other forms of classification.
- b. Credit Risk limits are determined according to risk appetite, portfolio, RKAP and applicable regulatory and internal provisions.
- c. The determination of limits is conducted using historical data, taking into account the average data and standard deviation over the observation period. If historical data

- is not yet available as supporting information, limits may be determined based on expert judgment, taking into consideration the Corporate Long-Term Plan (RJPP), the Corporate Work Plan and Budget (RKAP), external data, as well as the expertise, knowledge, and experience available, and applicable regulatory provisions.
- d. In determining risk limits, in addition to the considerations above, forward-looking factors may also be taken into account, such as macroeconomic variables, risk issues, and other relevant factors. The Board of Directors approves and signs the determination of risk limits in the Risk Appetite Statement (RAS) document, which is subsequently reported to the Shareholders, the Board of Commissioners, and the Board of Directors.
  - e. In implementing sound financing principles, financing concentration limits are managed through the preparation of Financing Portfolio Guidelines (LPG), including limits on heavy equipment mining financing, the regulation of the Maximum Financing Limit (BMPP), and the establishment of Delegation of Financing Authority Decisions (PDWP).
  - f. Credit risk limits include, among others, limits for financing decision-making authority, which are aligned with the competency of the decision-makers and the level of risk involved, while ensuring that there is no conflict of interest in the financing process provided to customers. This includes the establishment of Financing Approval Authority Limits (BWMP), including authority limits for the handling of non-performing financing, as well as the delegation of financing approval authority in accordance with the Company's policies.
  - g. Credit Risk Limits are determined, among other things, including limits for the authority to make financing decisions which are adjusted to decision-making competence and the level of risk and taking into account that there is no conflict of interest in the financing process provided to customers, determining Limits of Authority to Decide on Financing (BWMP) including limits on handling authority, problematic financing and delegation of authority to decide on financing carried out in accordance with company regulations.
3. Criteria and Approaches used by Securities Companies to determine Credit Risk Management policies and determine Credit Risk limits. The Risk Management Policy regulates risk management principles, including:
    - a. Risk management policy.
    - b. Risk Management Governance.
    - c. Risk Management Framework.
    - d. Implementation/Risk Management Process.
    - e. Risk Criteria.
    - f. Risk Management Business Unit.
    - g. Approval Authority Policy.
    - h. Securities Trading Transaction Policy.
  4. Criteria and Approaches used by Insurance Companies to determine Credit Risk Management policies and determine Credit Risk limits. The Risk Management Policy regulates risk management principles, including:
    - i. Margin Policy.
    - j. Tradable shares policy.
    - k. Short Term Warehouse Policy.
    - l. Non-Performing Asset Policy.
    - m. Margin Transaction SOP (opening a margin account until closing a margin account and extending margin)
    - n. SOP for securities trading transactions.
- The implementation of Credit Risk management is reflected in the following matters:
- a. There is due diligence and risk analysis of transactions and products before they are carried out by the Business Division. Due Diligence and risk analysis are carried out by the Business Division and Risk Management Division as outlined in the form of a Risk Evaluation Memorandum (MER) which is the basis for significant decision making by the Directors and Commissioners.
  - b. Providing credit limits (margin or other financing) to brokerage customers in accordance with the customer's background, financial profile and transaction history. Approval for granting this limit is based on a matrix of authority to grant approval in accordance with predetermined risk appetite and risk tolerance.
  - c. Limitations on shares that can be pledged and transacted by brokerage customers. These restrictions include:
    - 1) The share value is recognized as the customer's portfolio value by determining the share haircut based on regulatory regulations and reassessment by Risk Management
    - 2) The types of margin shares that may be transacted are based on the circular issued by the Indonesian Exchange every month and the valuation carried out by Risk Management in accordance with the Company's Risk Appetite.
    - 3) Investment Universe (Bond Universe and Equity Universe) is a list of securities that have received approval from the Risk Management Committee (Mortgage) which can be used as underlying assets by the Investment Manager in portfolio management. Bank Universe is a list of Counterparty Banks that have obtained Risk Management Committee (Mortgage) approval which can be used for placing time deposits. Time deposit placement limits at Counterparty Banks are determined by the Risk Management Committee (Mortgage) and are reviewed 2 (two) times a year.

hierarchy and authority, clear regulatory scope, directives and oriented towards effectiveness and sustainable business. Determination of Credit Risk limits is carried out by taking into account the following matters:

- a. Credit Risk Limits are set for risks related to reinsurance and investment.
- b. The Credit Risk Limit is determined every year in accordance with the Risk Appetite and applicable regulations
- c. Determination of risk limits uses one or a combination of regulatory, historical, expert judgment methods by considering the Company's Business Plan, Company Budget Work Plan (RKAP), etc.

#### **Credit Risk Management Structure and Organization and Control Function**

To support healthy credit provision and the implementation of internal control elements from the initial stages of the activity process, in addition to the relationship between bank officials in credit such as the Board of Commissioners, Directors, other Credit Officials and/or business units, BRI and Bank Subsidiaries and Pegadaian It also has a Credit Policy Committee (KKP) and Credit Committee (KK) which are BRI's credit instruments.

The duties and responsibilities of each credit instrument in general are as follows:

##### **1. Board of Commissioners**

The duties and responsibilities of the Board of Commissioners as a credit instrument are as follows:

- a. Approve the RBB which includes: annual credit plan, plan for providing credit to related parties, and credit to certain large debtors submitted to the OJK.
- b. Supervise the implementation of credit granting plans
- c. Approve Bank Credit Policy (KPB)
- d. Request an explanation and/or accountability from the Board of Directors for:
  - 1) Development and quality of the overall credit portfolio
  - 2) Corrective steps if the implementation of credit disbursement deviates from the established credit plan.
  - 3) Deviations in the implementation of the KPB.

##### **2. Board of Directors**

The duties and responsibilities of the Board of Directors as a credit instrument are as follows:

- a. Prepare and be responsible for:
  - 1) Preparation of KPB.
  - 2) Preparation of precredit plans contained in the RBB.
  - 3) Implementation of corrective steps based on evaluation results and suggestions submitted by the Credit Policy Committee (KKP).

4) Implementation of corrective steps for various irregularities in credit discovered by internal audit.

- b. Ensure that the KPB has been implemented and implemented consistently and consistently.
- c. Determine members of the KKP and Credit Committee (KK).
- d. Report regularly to the Board of Commissioners regarding developments in the overall quality of the portfolio and deviations in the implementation of the KPB.

##### **3. Credit Policy Committee (KKP)**

The duties and responsibilities of the KKP as a credit instrument are as follows:

- a. Providing input to the Board of Directors in the preparation of the KPB, especially the formulation of prudential principles in credit as regulated in the OJK PPKPB.
- b. Supervise the implementation of the KPB in a responsible and sustainable manner.
- c. Conduct regular KPB reviews
- d. Evaluate the correctness of the implementation of the authority to decide on credit or provide funds, the process of granting credit or providing funds, implementation of LLL provisions, allowance for reserves, resolution of problem loans and compliance with other laws.
- e. Conduct a review of the effectiveness of the credit internal control system.
- f. Report to the Board of Directors and Board of Commissioners regarding the results of supervision of the implementation of the KPB and evaluation results reports.
- g. Monitor the development of the quality of the credit or financing portfolio as a whole.

##### **4. Credit Committee**

(KK) The duties and responsibilities of KK as a credit instrument are as follows:

- a. Provide credit approval based on competence honestly, objectively, carefully and thoroughly.
- b. Refuse requests and/or influence from interested parties in credit applications to provide credit approval which is only a formality.
- c. Coordinating with ALCO in aspects of credit funding

##### **5. Credit Business Unit and Loan**

Officers Credit Business Units (SKP) are Relationship Management (RM) and Credit Risk Management (CRM) ranks located at the Head Office, Regional Offices, Special Branch Offices, Branch Offices, Sub-Branch Offices, BRI Units and BRI Business Units abroad. Loan officers consist of credit line workers and credit support workers.

For Financing Companies, based on company accountability, the Risk Management Business Unit consists of the Enterprise Risk Management Section, Operational Risk Management Section, Modeling and Portfolio Management as well as the Policy and Procedures Section. SKMR is responsible for achieving a healthy financing portfolio, periodically reviewing financing policies and guidelines, delegating authority to decide financing to Credit Risk Management officials in accordance with limits, ratifying Financing Portfolio Guidelines and members of the Financing Committee.

Based on the financing implementation guidelines, the organizational structure and financing management are regulated to support the provision of healthy financing and the implementation of risk management in the financing business process through:

- a. Financing-related work units, consisting of the Relationship Management (RM) function and the Credit Risk Management (CRM) function.
- b. The Financing Work Unit and Financing Officers, consisting of Line Financing Officers and Supporting Financing Officers.
- c. The Financing Committee, serving as a collegial operational body responsible for conducting the evaluation and approval of financing proposals.
- d. The implementation of a Risk Scoring System by applying granular credit risk scoring based on debtor and product criteria.
- e. Strengthening of the collection function through the enhancement of collection tools and asset management.

Taking into account the development of Credit Risk and business complexity in Financing Companies with a focus on Credit Risk management, the suitability of prospective customers is determined through credit scoring, determining the level of approval and limits of authority to decide on financing by the Financing Committee as stated in the ULaMM/ULaMM Financing and Operational Policy Sharia and Mekaar/Mekaar Sharia as well as determining approval level schemes and authority limits to decide on tiered financing.

For Venture Companies, the formation of an Organizational Structure takes into account the complexity of business processes and daily operations. In connection with this, the Venture Company established a Risk Management Business Unit which is under the supervision of the Portfolio & Finance Director. The business units in contact with investment risk are all divisions under the Investment Directorate and the Kupang Financing Branch Office which is under the

supervision of the Portfolio & Finance Directorate. To realize healthy business activities and implement internal control elements, the Company formed a committee for investment activities (both deploy/divest).

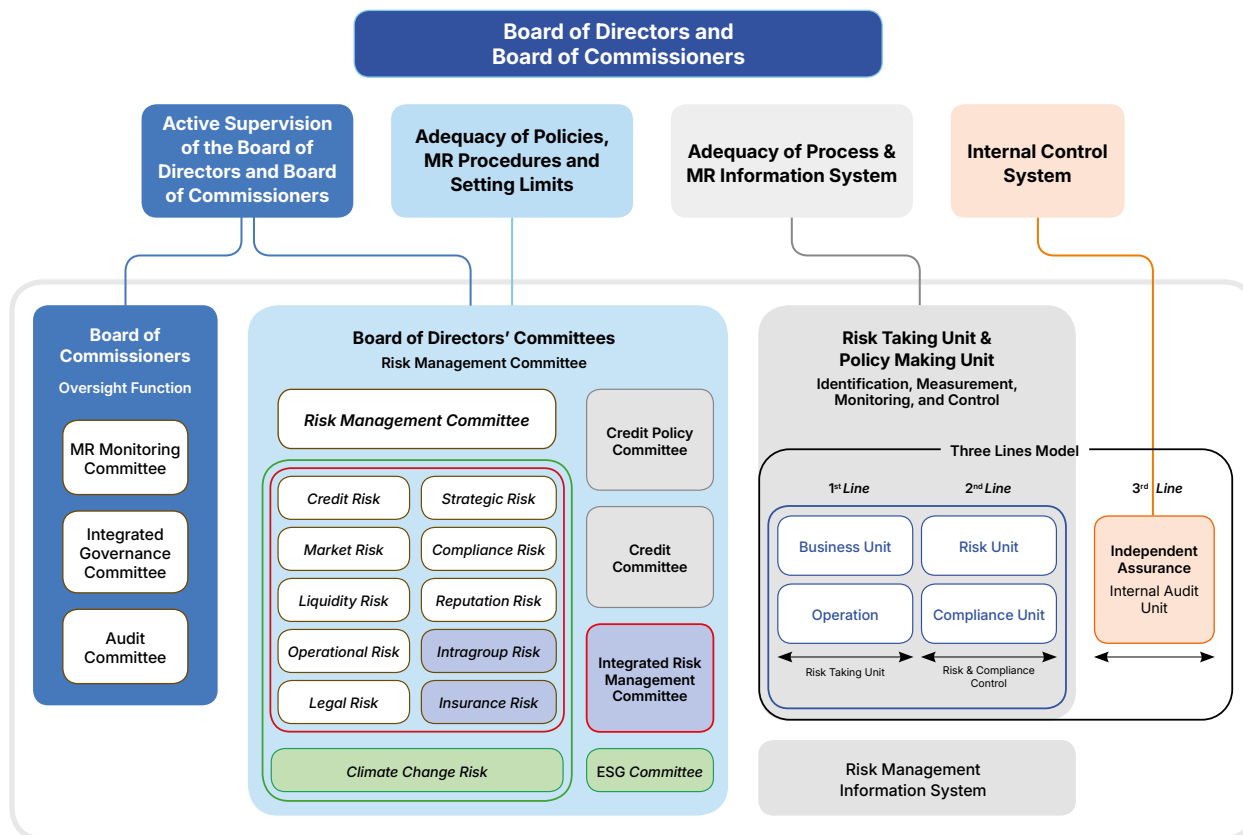

For Securities Companies, the Risk Management Division is a Risk Management Unit (SKMR) which is independent of operational units and is directly responsible to the Director in charge of the Risk Management Function. In managing risks arising from business activities and coordinating all risk management activities, relevant Executive Committees were formed, which include, among other things:

- a. The Risk Management Committee is tasked with providing recommendations to the Board of Directors related to the preparation/refinement of the Risk Management Policy, determination (justification) of matters related to business decisions that deviate from normal procedures (irregularities), determination of policies and procedures, determination / Investment Universe approval, and approval of transaction limits.
- b. The Investment Committee is tasked with discussing, evaluating, recommending and determining the range of investments, investment limits, types of investments and investment strategies that must be implemented by the Investment Management Team.
- c. The Product Committee is tasked with approving product formation, evaluating existing products, proposing product development/ mergers, and proposing product marketing concepts to the Board of Directors.

For Insurance Companies, to control the growth of Credit Risk and implement elements of internal control starting from the early stages of the activity process, in addition to the relationship between officials in Credit Risk such as the Board of Commissioners, Directors, other officials and/or business units, the Insurance Company has an Investment Committee.

For the Remittance Company, the management of credit activities is carried out through the credit governance structure, which consists of the Non-Executive Director, Executive Director, and the Internal Control and Compliance Division (ICC). These credit governance bodies are responsible for ensuring that credit policies, credit approval processes, and the monitoring of credit portfolio quality are implemented prudently and in accordance with the applicable regulations.

The Relationship Between the Functions of Credit Risk Management, Risk Control, Compliance and Internal Audit

In implementing Credit Risk Management at BRI, the Risk Management Director oversees the Credit Risk Management function as well as the Credit Risk Control Unit. The Credit Risk Management function is part of the Risk Management Unit which consists of:

1. Credit & Product Risk Policy Division plays a role in preparing credit policies and preparing the Internal Risk Rating model
2. Market, Portfolio & Enterprise Risk Group, which is responsible for formulating risk management policies, determining credit risk limits, developing the Allowance for Impairment Losses (CKPN) model, preparing policies and calculating Risk-Weighted Assets (RWA) for credit risk, conducting portfolio monitoring, and performing credit risk stress testing.

The Credit Risk Control Unit is organized based on business segments, as follows:

1. Small Risk Group, which is responsible for controlling credit risk in the small segment by establishing risk appetite and managing risk on both a portfolio and transactional basis.
2. Consumer Risk Group, which is responsible for controlling credit risk in the consumer segment by establishing risk appetite and managing risk on both a portfolio and transactional basis.

3. Micro Risk Group, which is responsible for controlling credit risk in the micro segment by establishing risk appetite and managing risk on a portfolio basis.
4. Corporate Credit Risk Group, which is responsible for controlling credit risk in the corporate segment on a transactional basis.
5. Commercial Credit Risk, which is responsible for controlling credit risk in the commercial segment on a transactional basis.
6. Small Medium Enterprise (SME) Credit Risk Analysis – Regional Office, which is responsible for controlling credit risk in the SME segment on a transactional basis.

The Compliance Function is carried out by the Compliance Group and the Policy & Procedure Group has a role in formulating policies, preparing Standard Operating Procedures, and carrying out Compliance Tests to ensure that BRI has complied with applicable laws and regulations and ensures that business activities do not deviate from laws and regulations.

The Internal Audit Unit as Independent Assurance has an important role in assessing the effectiveness of the implementation of credit risk management, both on a transactional basis and on a portfolio basis. Apart from that, Internal Audit Unit is also a member of the Credit Policy

Committee so that recommendations from audit results are part of improving credit policy.

Within the Subsidiaries, the implementation of the second line and third line in accordance with the Three Lines Model framework is aligned with business needs and the operational complexity reflected in the organizational structure of each Subsidiary. For the Banking, Pawnshop, and Financing Company Subsidiaries, the risk management function plays a role in monitoring and controlling risks on an aggregate basis, as well as formulating credit risk policies and methodologies. The management of non-performing loans (classified as Substandard, Doubtful, and Loss) is carried out by the Credit Risk Management (CRM) function or by designated personnel within the Relationship Management (RM) function responsible for handling problematic loans. In addition, the compliance function ensures the implementation of due diligence in credit approval through the decisions of the credit committee, while the Internal Audit Unit ensures that credit granting activities comply with sound lending principles and are conducted in accordance with the credit policies and credit implementation guidelines.

For Insurance Companies, the Risk Management function has the responsibility and authority to manage the preparation/evaluation/refinement of risk management plans and strategies as well as policies, methodologies, guidelines for risk management tools and measurements. The Compliance Function has the responsibility and authority to manage and evaluate activities, operational activities, Company policies and guidelines that are adequate in accordance with legal and regulatory provisions, as well as managing all Regulatory policies implemented in each Business Unit. The Internal Audit function has the responsibility and authority to carry out internal audit activities in the form of Assurance services and consulting services as a Strategic Business Partner for the company's business processes. In controlling the growth of credit risk and implementing internal control elements starting at the initial stage of the activity process, in addition to the relationship between officials in credit risk such as the Board of Commissioners, Directors, other officials and/or divisions, an Investment Committee is also formed to determine investment policy and investment decisions to related parties and third parties with a certain nominal value and time period.

For Venture Companies, the investment risk management function is divided into two parts, namely before the investment is made (investment risk management) and after the investment is made (portfolio risk management). At the pre-investment stage, the investment team coordinates with the risk management, compliance and legal departments to ensure that all investment stages are compliant. Apart from the Risk Management Unit of BRI Ventures, there is a Internal

Audit Unit of BRI Ventures which functions as internal control and third line of defense in implementing company risk management. Internal Audit Unit of BRI Ventures contributes to providing support for internal control and fraud indication. Internal Audit Unit of BRI Ventures also periodically carries out risk based audits. In its implementation, the audit process is also monitored by the BRI Internal Audit Unit team offsite. If necessary, the BRI Internal Audit Unit team can carry out ad-hoc joint audits. This is aimed at maintaining operational efficiency at BRI Ventura without reducing the quality of audit results.

For the Remittance Company, the Division Head of Internal Control and Compliance (ICC) oversees the Policy and Risk function, which also serves as the credit risk control unit. The Division Head of ICC also supervises the compliance function, carried out by the Compliance Officer, as well as the Anti-Money Laundering (AML) function, performed by the Money Laundering Reporting Officer. These functions are responsible for formulating policies and conducting compliance testing to ensure that BGF's business activities are in accordance with the applicable laws and regulations. In addition, the Internal Auditor, as part of the independent assurance function, plays a role in assessing the effectiveness of the implementation of credit risk management, both on a transactional and portfolio basis. The Internal Auditor reports administratively to the Division Head of ICC, while maintaining direct access to the Executive Director for the submission of audit results.

#### **Scope and Main Information from Reporting on Credit Risk Exposure and Credit Risk Management Functions to the Board of Directors and Board of Commissioners**

BRI's Risk Management Unit and all Subsidiary Companies in charge of credit risk prepare risk management reports in a format that complies with applicable regulations, both on a consolidated and integrated basis. Credit risk management reporting to the Board of Directors, Board of Commissioners and certain parties, including:

- a. Individual and Consolidated Bank Risk Profile and Health Level Reports
- b. Allowance for Impairment Losses and ATMR reports for Credit Risk
- c. Loan growth progress report
- d. Loan quality development report
- e. Report on the development of restructured credit
- f. Report on the use of the write-off budget (PH) and the realization of recovery income
- g. Monitoring reports on Allowance for Impairment Losses costs and reserve ratios, for example NPL Coverage and LAR Coverage
- h. Credit Risk Stress Test Results both in portfolio and for large customers

### Additional Disclosures Regarding the Quality of Credit on Assets (CRB)

#### QUALITATIVE

##### Scope and Definition of Matured Claims and Impaired Claims

Past due receivables represent all receivables that have been overdue for more than 90 (ninety) days, whether related to principal and/or interest payments, or receivables from debtors in default. Impaired receivables represent receivables that have experienced a condition in which a loss event (objective evidence) has occurred as a result of one or more events that took place after the credit was granted, which adversely affects the debtor's ability to meet future payment obligations. All receivables that have been overdue for more than 90 (ninety) days are classified as impaired receivables.

##### Input, Assumptions, and Techniques Used In Estimation of Value Impairment

###### a. Use of forward-looking information

The Bank uses forward-looking information in assessing whether there has been a significant increase in Credit Risk and measuring expected Loan losses. Based on advice from the Risk Management Committee, economic experts and consideration of various actual information and external estimates, the Bank formulates a basic view (base case) regarding the movement of relevant economic variables in the future as well as estimates of other scenarios that may occur. This process involves developing two or more additional economic scenarios and considering the relative probabilities of possible outcomes. External information includes economic data and forecasts published by, such as government bodies and selected private sector analysts and academics. The

basic view (base case) is used in strategic planning and budgeting. The other scenarios reflect more optimistic outcomes and more pessimistic outcomes.

###### b. Measurement of Expected Loan Losses

The main inputs in measuring expected loan losses are the following variables:

- Probability of Default (PD)
- Loss of Given Default (LGD)
- Exposure at Default (EAD)

These parameters generally come from internally developed statistical models and other historical data. These parameters are adjusted to reflect forward-looking information.

The PD estimate is an estimate as of a specific date, calculated based on a statistical rating model, and assessed using ratings adjusted for various categories of debtor and exposure. This statistical model is based on internally compiled data consisting of quantitative, qualitative factors and forward-looking estimates. LGD is the amount of loss if a payment default occurs.

LGD parameters are estimated historically based on the recovery rate of claims against defaulting debtors. LGD is also observed by considering cash collateral which is an integral part of the outstanding financial assets as well as costs incurred in the recovery process.

EAD represents the estimated exposure in the event of default. The EAD of a financial asset is the gross carrying amount. For loan commitments and financial guarantees, the EAD includes the amount that has been drawn, as well as the potential future amount to be drawn, estimated based on historical observations.

## Additional Disclosures Regarding the Treatment of Troubled Assets (CRB-A)

### QUALITATIVE

#### Asset Quality:

- Non-performing assets are assets that are of substandard, doubtful or non-performing quality as referred to in the provisions of laws and regulations and FSA provisions regarding assessing the quality of commercial bank assets. For loans with exposure above a certain value, collectibility assessments are carried out individually based on 3 (three) pillars, namely accuracy in payments, debtor's business prospects, and debtor's financial condition.
- Overdue Loans and Securities are claims that are more than 90 (ninety) days past due, both for principal payments and/or interest payments or debtors who are in default. These claims include assets that have experienced impairment and a value impairment reserve (Allowance for Impairment Losses) has been established.
- Performing Assets are assets that have current quality and are subject to special attention as intended in the provisions of laws and regulations and FSA provisions regarding assessing the quality of commercial bank assets.
- Restructuring Assets are assets in an effort to improve debtors who are experiencing difficulties in fulfilling their obligations. Assets can be restructured if the debtor has good business prospects and is deemed capable of meeting obligations after restructuring. A restructuring asset can fall out of this category if, within the restructuring period, the debtor's business conditions have returned to normal so that the debtor can fulfill its obligations according to normal conditions.

## 1) Loan segmentation:

### Qualitative Disclosures Regarding MRK Techniques (CRC)

In calculating credit risk RWA using a standard approach, the Bank considers the use of Credit Risk Mitigation Techniques (Enterprise Risk Management-ERM) in accordance with FSA regulations. The ERM techniques used by the Bank are the ERM-Collateral technique and the ERM-Guarantee or Credit Insurance technique. The ERM-Collateral technique used is collateral in the form of cash (cash collateral) stored at the Bank and gold stored at the Subsidiary. Meanwhile, the ERM-Guarantee or Credit Insurance technique is used for loan guaranteed by credit insurance from an Insurance Company with SOEs status. Loans guaranteed by an insurance company which is a Bank Subsidiary is not counted as a guarantor in the ERM technique because it is a party affiliated with the Bank.

Acceptable collateral criteria include:

1. Collateral is tied to mortgage rights, power of attorney to sell, current accounts, savings, time deposits or other collateral generally accepted by banks as well as collateral in the form of gold (subsidiaries).
2. Determining the value of collateral must be based on considerations of appraisal, binding, control, security and utilization.

## Management Discussion and Analysis on Bank Performance

3. Collateral appraisal must be carried out objectively, honestly, responsibly and present a fair value.
4. Collateral reviews are carried out to see the adequacy of collateral compared to the debtor's total obligations, including:
  - a. Collateral condition at the time of review
  - b. Collateral value
  - c. Securing collateral (storage, binding and validity of collateral)
  - d. Other information relevant to assessing collateral adequacy
5. The collateral review period is carried out as stated in the loan terms and conditions, but must be carried out at least once a year along with the loan review as regulated in each business sector. The collateral review period can be set differently if specifically regulated by the regulator (BI, FSA or other related agencies). For the purposes of calculating RWA, specifically for consumer loans backed by residential homes, collateral valuation must be carried out periodically for a minimum of 30 (thirty) months.

#### Additional Disclosure

--	--	--	--	--	--	--

## Disclosure on the Use of External Credit Ratings (CRD)

The rating agencies used are rating agencies recognized by the Financial Services Authority, namely Moody's Investor Service, Standard and Poor's, Fitch Ratings and PT. Indonesian Securities Rating (Pefindo). If there are Marketable Securities that have more than 1 (one) rating, then the worst rating will be used. Portfolio Categories that use ratings are Receivables to the Government, Receivables to Public Sector Entities, Receivables to Banks, Receivables to Securities & Financial Services Companies, and Receivables to Corporations. Meanwhile, other bills use unrated (without rating) because rating data is not available.

#### Additional Disclosure

TRA exposure is converted into equivalent Loan exposure using FKK. The smallest FKK used by the Bank is 20% for TRA exposure in the form of commitment obligations in the form of L/C, 40% FKK is given for TRA exposure in the form of commitment obligations (draw allowance) while 100% FKK is given for TRA exposure in the form of issued guarantees in order to take over the risk of default. CKPN taken into account for calculating net receivables is CKPN on assets identified as experiencing impairment, namely CKPN at stage 2 and stage 3. Credit Risk Mitigation Techniques used by the Bank are collateral and loan guarantees/insurance, collateral in the form of cash collateral, while guarantees/ Loan Insurance is an insurance company with SOE status. Loans guaranteed by insurance companies which are Bank Subsidiaries are not counted as guarantors in the MRK technique because they are parties affiliated with the Bank.

### Additional Disclosure

### Qualitative Disclosure on Counterparty Credit Risk (CCRA)

Counterparty credit risk is the credit risk arising from certain types of transactions that generally have the following characteristics:

- The transaction is affected by movements in fair value or market value;
- The fair value of the transaction is influenced by movements in certain market variables;
- The transaction results in the exchange of cash flows or financial instruments; and
- The risk characteristics are bilateral, namely:
  - If the fair value of the contract is positive, the Bank is exposed to credit risk from the counterparty; or If
  - the fair value of the contract is negative, the counterparty is exposed to credit risk from the Bank.

	70%	75%	85%	90%	100%	105%	110%	150%	Other	Net Bills After FKK and MRK Technique
					997,600			8,574,724		7,895,639

	100%	Other	Net Bills After FKK and MRK Technique
	26,480,673		76,193,042

	150%	1250% 5)	Other	Net Bills After FKK and MRK Technique
	55,674			104,924,987

Credit risk arising from counterparty default may occur in repo transactions, reverse repo transactions, and derivative transactions. In the calculation of the Minimum Capital Adequacy Requirement (KPMM), BRI applies the Standardized Approach to calculate credit risk arising from counterparty default (counterparty credit risk).

### CVA Risk

#### 1. CVA Risk Management Process

CVA risk is the risk of loss arising from changes in the CVA value as a result of changes in the counterparty's loan spread and market risk factors that affect the price of derivative transactions.

BRI has implemented a market risk management process including for CVA risk in accordance with the principles of implementing risk management regulated in the general risk management policy and based on the Three Lines Model where the Board of Commissioners and Board of Directors act as the governing body and the Three Lines of Defense consisting of the Operational Business Unit, Risk Management Business Unit and Internal Audit Business Unit.

Derivative transaction activities were carried out by the Business Treasury Unit and monitored by the Risk Management Unit (Market, Portfolio and Enterprise Risk). BRI regularly sets and reviews limits for derivative transactions through pre-settlement risk limits, treasury activity transaction limits and market risk limits.

#### 2. CVA Method

BRI uses the simplified basic approach method (BA-CVA) in calculating the capital burden for CVA risk. The BA-CVA approach calculates and sums up all counterparties included in the scope of the CVA Calculation in accordance with regulatory provisions.

### Simplified BA-CVA (CVA 1)

## Implementation of Risk Management for IRRBB Report – Individual

## Qualitative Analysis

1	Interest Rate Risk in the Banking Book (IRRBB) is a risk resulting from movements in interest rates in the market that are contrary to the position of the Banking Book, which has the potential to have an impact on BRI's capital and profitability both now and in the future. The risk of movement in BRI interest rates occurs because asset interest rates adjust more slowly than liability interest rates. This risk is due to BRI's asset composition which is dominated by fixed interest rates and has longer repricing maturities.
2	In mitigating IRRBB risk, BRI formulates a strategy for managing the impact of interest rate movements through the Asset and Liability Management (ALCO) and Risk Management Committee (RMC) committees. ALCO is held every month to discuss asset and liability management strategies, including balanced pricing, assets allocation, funding mix, gap management and capital management. RMC is carried out regularly every month with discussion of updated market conditions, market risk profiles and the latest risk issues.
3	BRI calculates IRRBB quarterly using the Economic Value of Equity (EVE) and Net Interest Income (NII) methods. The EVE method used a longterm perspective in calculating the sensitivity of interest rates to BRI Tier 1 capital. This EVE method has been in accordance with the guidelines from the Otoritas Jasa Keuangan. Meanwhile, the NII method applies a short-term perspective in calculating the sensitivity of interest rates to BRI's estimated income in the next year.
4	The scenario used in calculating IRRBB was as follows: a) Parallel Up (400 bps) b) Parallel Down (400 bps) c) Steeper (350 bps) d) Flattener (350 bps) e) Short Rate Up (500 bps) f) Short Rate Down (500 bps)

### Qualitative Analysis

- 5 In calculating IRRBB, BRI applies the following main modeling and parametric assumptions:
- Cash flow calculations, instruments with floating interest rates use risk free sourced from Government Bonds IDR and Government Bonds USD. The margin used was sourced from the average margin of each instrument. Meanwhile, instruments with fixed interest rates used the effective interest rate as the basis for determining cash flow.
  - Non Maturity Deposit (NMD) accounts consisting of current accounts and savings were placed in the overnight time bucket, 3 - 4 year time bucket and 4 - 5 year time bucket in accordance with the maximum caps determined by the regulator. NMD placed in the longest time bucket becomes a BRI core fund which has a lower interest rate sensitivity than non-core funds placed in the overnight time bucket.
  - Determining prepayment risk based on historical data according to loan segments and products within a period considered adequate. The baseline calculation of the prepayment percentage is the average of the total loan balances paid off before maturity to the total loan balances in each segment. Meanwhile, in determining early redemption, the method uses a historical approach to the report position to determine the deposit balance paid off before maturity within a certain period of time against the total deposit balance for the current month.
  - Apart from modeling prepayment risk and early redemption, BRI also determines internal modeling for NPL accounts. Commercial Retail NPL with a maximum ceiling of IDR5 billion was placed in a time bucket of 3.5 years. Meanwhile, Medium Corporate NPLs with a ceiling above IDR5 billion were placed in the 3 year time bucket. NPL accounts were non-rate where the estimated cash flow did not take interest into account.
  - IRRBB calculations used rupiah and USD. Foreign currencies other than these currencies were aggregated into the USD calculation.

### Quantitative Analysis

- 1 Current accounts and savings are savings that do not have a term and contractually have an overnight maturity. Meanwhile, behaviorally, BRI places current and savings accounts in the overnight time bucket, 3 - 4 year time bucket and 4 - 5 year time bucket. Distribution of BRI Non Maturity Deposits according to the time period of December 31, 2025:
- Current Account;** Overnight time bucket (60.78%), 3 - 4 year time bucket (31.04%) and 4 - 5 year time bucket (8.18%).
  - Savings;** Overnight time bucket (22.28%) and 4 - 5 year time bucket (77.72%).

## IRRBB Calculation Report – Consolidated

(in IDR million)

Period	Δ EVE		Δ NII	
	T	T - 1	T	T - 1

## Implementation of Risk Management for IRRBB Report – Consolidated

### Qualitative Analysis

- Interest Rate Risk in The Banking Book (IRRBB) is a risk due to interest rate movements in the market due to being contrary to the Banking Book position which has the potential to impact BRI's capital and profitability both now and in the future. BRI's interest rate movement risk occurs because the adjustment of asset interest rates is slower than the adjustment of liability interest rates due to BRI's asset composition, which is dominated by fixed interest rates and has longer re-pricing maturities.
- In mitigating IRRBB risk, BRI formulates a strategy for managing the impact of interest rate movements through the Assets and Liability Management (ALCO) committee and the Integrated Risk Management Committee (RMC). ALCO is held every month to discuss asset and liability management strategies, including balanced pricing, assets allocation, funding mix, gap management and capital management. Meanwhile, Integrated RMC is carried out bank wide with subsidiary companies to discuss market risk profile assessments and the latest risk issues.

### Qualitative Analysis

3	BRI calculates the Consolidated IRRBB semi-annually using the Economic Value of Equity (EVE) and Net Interest Income (NII) methods. The EVE method uses a long-term perspective in calculating interest rate sensitivity to BRI Tier 1 capital and has been adjusted to the guidelines from the Otoritas Jasa Keuangan. Meanwhile, the NII method uses a short-term perspective in calculating the sensitivity of interest rates to BRI's estimated income in one year.
4	<p>The scenario used in calculating BRI's IRRBB is as follow:</p> <ul style="list-style-type: none"> <li>a) Parallel Up (400 bps)</li> <li>b) Parallel Down (400 bps)</li> <li>c) Steepener (350 bps)</li> <li>d) Flattener (350 bps)</li> <li>e) Short Rate Up (500 bps)</li> <li>f) Short Rate Down (500 bps)</li> </ul>
5	<ul style="list-style-type: none"> <li>a) In calculating cash flows, instruments for assets and liabilities with floating interest rates use risk free sources from Government Bonds IDR and Government Bonds USD. The margin used comes from the average margin of each instrument segment. Asset and liability instruments with fixed interest rates use the yield reference charged on the instrument as the basis for determining cash flow.</li> <li>b) Non Maturity Deposit (NMD) accounts, namely current and savings accounts placed on an overnight period, a time scale of 3 - 4 years and 4 - 5 years in accordance with the maximum caps determined by the regulator. NMD placed on the longest time scale is a BRI core fund which has a lower interest rate sensitivity than non-core funds placed on an overnight time scale.</li> <li>c) Determining prepayment risk based on historical data according to loan segments and products within a period that is considered adequate. The baseline calculation of the prepayment percentage is the average of the total loan balances paid off before maturity to the total loan balances per each segment. Meanwhile, in determining early redemption, use a historical approach with adequate data sources and other relevant approaches. The baseline percentage used in early redemption is the deposit balance that is paid off before maturity within a certain period of time against the total deposit balance for the current month.</li> <li>d) IRRBB calculations use rupiah and USD. All currencies other than these currencies are aggregated into the USD calculation.</li> </ul>

### Quantitative Analysis

1	<p>Current accounts and savings are savings that do not have a term and contractually have an overnight maturity. Behaviorally, BRI consolidatedly places current and savings accounts as of December 31, 2025 in 3 separate time buckets, namely:</p> <ul style="list-style-type: none"> <li>a. Overnight (non corefund), Current Account (60.80%) and Savings (22.43%)</li> <li>b. 3 - 4 years (corefund), Current Account (31.04%) and Savings (0.01%)</li> <li>c. 4 - 5 years (corefund), Current Account (8.16%) and Savings (77.57%)</li> </ul>

#### Information:

- 1 Adjusted values are calculated after applying haircuts, run-off rates and inflow rates as well as maximum limits for HQLA components, for example the maximum limit for HQLA Level 2B and HQLA Level 2 as well as the maximum limit for cash inflow that can be considered in the LCR.

#### Individual Analysis

- The Liquidity Coverage Ratio (LCR) of BRI on an individual basis for Q4 2025 stood at 135.21%, representing a decrease of 13.09% compared to the Q3 2025 position of 148.30%. The decline in this ratio was primarily attributable to:
  - A decrease in High Quality Liquid Assets (HQLA) of IDR28.60 trillion or 7.90%, primarily driven by a decline in placements with Bank Indonesia, securities issued by the Central Government and Bank Indonesia amounting to IDR29.38 trillion, partially offset by an increase in Level 2 HQLA components of IDR0.55 trillion.
  - An increase in Net Cash Outflow (NCO) of IDR2.49 trillion or 1.02%, representing the difference between Cash Outflows and Cash Inflows. Total Cash Outflows increased, mainly due to higher withdrawals related to other cash outflows (additional requirements) amounting to IDR29.97 trillion, increased withdrawals for micro and small business financing of IDR0.23 trillion, and increased withdrawals of retail customer deposits of IDR0.16 trillion. Meanwhile, Total Cash Inflows also increased, primarily due to higher other cash inflows arising from derivative transactions amounting to IDR23.65 trillion.
- The composition of BRI's HQLA is predominantly comprised of Level 1 assets amounting to Rp331.05 trillion or 99.25%, consisting of cash, liquidity reserves with Bank Indonesia (statutory reserves and placements with Bank Indonesia), and securities classified as Level 1 assets. Meanwhile, Level 2 assets accounted for Rp2.50 trillion or 0.75% of the total HQLA composition.
- The majority of BRI's funding sources (Bank Only) during Quarter IV 2025 came from CASA amounting to 70.89% with the following composition:

Funding Source Components	Composition
Demand Deposits	30.83%
Savings	40.06%
<b>CASA</b>	<b>70.89%</b>
Deposits	29.11%
<b>Total</b>	<b>100.00%</b>

- BRI has established liquidity management strategies, early warning indicators, and a contingency funding plan in relation to liquidity risk. Liquidity risk management, the establishment and monitoring of limits as liquidity early warning indicators, as well as the periodic implementation of liquidity stress testing are carried out by the Risk Management working unit. BRI has also established a documented action plan (recovery plan) as part of the implementation of sound risk management in accordance with regulatory requirements.

### Consolidated Analysis

- The Liquidity Coverage Ratio (LCR) of BRI on a consolidated basis for Q4 2025 stood at 136.92%, representing a decrease of 12.66% compared to the Q3 2025 position of 149.58%. The decline in this ratio was primarily attributable to:
  - A decrease in High Quality Liquid Assets (HQLA) of IDR28.40 trillion or 7.72%, primarily driven by a decline in placements with Bank Indonesia and securities issued by the Central Government and Bank Indonesia amounting to IDR29.20 trillion, partially offset by an increase in Level 2 HQLA components of IDR0.57 trillion.
  - An increase in Net Cash Outflow (NCO) of IDR2.00 trillion or 0.81%, representing the difference between Cash Outflows and Cash Inflows. Total Cash Outflows increased, mainly due to higher withdrawals related to other cash outflows (additional requirements) amounting to IDR29.76 trillion, increased withdrawals for micro and small business financing of IDR0.24 trillion, and increased withdrawals of retail customer deposits of IDR0.20 trillion. Meanwhile, Total Cash Inflows decreased, primarily due to lower other cash inflows arising from derivative transactions amounting to IDR23.65 trillion.
- The composition of BRI's consolidated HQLA is predominantly comprised of Level 1 assets amounting to Rp336.67 trillion or 99.17%, consisting of cash, liquidity reserves with Bank Indonesia (statutory reserves and placements with Bank Indonesia), and securities classified as Level 1 assets. Meanwhile, Level 2 assets accounted for Rp2.80 trillion or 0.83% of the total HQLA composition.
- The majority of BRI (Consolidated) funding sources during Quarter IV 2025 came from CASA amounting to 70.65% with the following composition:

Funding Source Components	Composition
Demand Deposits	30.69%
Savings	39.96%
<b>CASA</b>	<b>70.65%</b>
Deposits	29.35%
<b>Total</b>	<b>100.00%</b>

- BRI has consolidatedly set limits related to liquidity risk. Liquidity risk management was carried out by monitoring the liquidity risk limits of BRI and Subsidiaries as well as carrying out periodic liquidity stress testing.
- BRI regularly coordinated with Subsidiaries regarding monitoring of predetermined liquidity risk limits. In addition, BRI regularly holds meetings with Subsidiaries in the Integrated Risk Management Committee forum in which one of the agendas was to discuss BRI's liquidity conditions on a consolidated basis and discussing follow-up plans for liquidity issues that impact BRI on a consolidated basis.

### Consolidated Analysis

(in IDR million)

Ratio	Component	September 2025	December 2025
Net Stable Funding Ratio (NSFR)	Available Stable Funding (ASF)	1,363,031,478	<b>1,355,934,194</b>
	Required Stable Funding (RSF)	1,107,115,182	<b>1,149,494,783</b>
<b>NSFR</b>		<b>123.12%</b>	<b>117.96%</b>

The Net Stable Funding Ratio (NSFR) on a consolidated basis as of December 2025 was recorded at 117.96%, representing a decrease of 5.16% compared to the position in September 2025 of 123.12%. The decline was attributable to a decrease in the Available Stable Funding (ASF) component of Rp7.10 trillion or 0.52%, while the Required Stable Funding (RSF) component increased by Rp42.38 trillion or 3.83%.

### Encumbered Assets (ENC)

	a	b	c	d
	Encumbered Assets	Assets that are stored or contracted with the Central Bank but not used to generate liquidity	Unencumbered assets	Total
Assets in the statement of financial position can be presented in detail as needed	25,145,761,177,300	40,404,372,286,215	217,835,373,667,259	283,385,507,130,774

### Qualitative Analysis

In accordance with SEOJK Number 9/SEOJK.03/2020 concerning Transparency and Publication of Conventional Commercial Bank Reports. In the table above, data related to liquidity risk is presented which is divided into several criteria, namely restricted assets, assets stored or agreed with the Central Bank but not yet used for liquidity and non-restricted assets. These assets are liquid assets that are used for liquidity needs in accordance with POJK No. 42/POJK.03/2015 regarding the Minimum Liquidity Coverage Ratio (LCR) Requirement.

Total assets that meet the qualifications in the table above as of December 31, 2025 are IDR283.39 trillion. Based on the distribution, the total value of the assets consisted of:

- Restricted assets amounted to IDR25.15 trillion or 8.87% of total liquid assets.
- Assets stored or agreed with the Central Bank but not yet used to generate liquidity amounted to IDR40.40 trillion or 14.26% of total liquid assets.
- Unrestricted assets amounted to IDR217.84 trillion or 76.87% of total liquid assets.

### Liquidity Risk Management (LIQA)

Information regarding liquidity risk management is presented as follows:

#### 1. Risk Governance

- BRI manages liquidity risk as part of its risk mitigation efforts arising from banking products and activities that may affect sources and uses of funds, both for current risk exposures and those that may arise in the future.
- The formulation of the level of risk to be assumed (risk appetite) and risk tolerance related to liquidity risk has been established in line with the Bank's overall strategic and business objectives.
- BRI periodically reviews the Risk Appetite Statement and the limit parameters related to liquidity risk as stipulated in the Board of Directors Decree on the Establishment of Risk Taxonomy and Parameters & Limits for Risk Appetite, Risk Profile, Profitability and Capital in the Risk-Based Bank Soundness Rating and Integrated Risk Profile Assessment of PT Bank Rakyat Indonesia (Persero) Tbk.

- In managing liquidity risk, the Liquidity & Funding Management Group and the Treasury Business Group are responsible for managing national liquidity, while the Market, Portfolio & Enterprise Risk Group is responsible for formulating and reviewing liquidity risk management policies as well as monitoring liquidity risk limits.

## 2. Funding Strategy

- **Funding Diversification**  
This is carried out by taking into account the characteristics of funding sources and funding maturities as well as the Bank's Business Plan (RBB), while considering counterparties, the availability of collateral, types of instruments, currencies, and the geographical location of funding markets.
- **Stabilization of Funding Growth**  
This refers to maintaining the stability of Third-Party Funds (DPK) to ensure a positive growth trend, among others through pricing strategies, the issuance and/or development of deposit products, enhancement of quality marketing initiatives that support the stability of funding growth, as well as periodic reviews of policies related to product development and marketing.
- **Evaluation and Analysis of Funding Strategy**  
This activity is carried out periodically through ALCO meetings and/or other relevant forums, taking into account changes in both internal and external factors. The Liquidity & Funding Management Group and the Treasury Business Group, together with related groups, conduct identification, monitoring, and evaluation of key factors that affect BRI's ability to obtain funding, including alternative funding sources that may strengthen the Bank's resilience during crisis conditions.
- **Maintaining Market Access**  
Maintaining access to the Rupiah and foreign exchange markets includes expanding markets for asset sales or increasing the availability of standby facilities with or without collateral, actively conducting transactions in markets aligned with the funding strategy, and maintaining good relationships with funding providers in order to ensure effective diversification of funding sources.

## 3. Risk Management Process

- Liquidity risk identification activities are carried out by each operational working unit by identifying liquidity risks arising from banking products and activities that may affect sources and uses of funds, both in the positions of assets and liabilities as well as off-balance sheet accounts, including other risks that may increase liquidity risk (such as credit risk, market risk, and operational risk).

- Liquidity risk measurement is conducted periodically through the use of daily liquidity dashboards and early warning indicators, cash flow projections, liquidity ratios, and liquidity stress testing.
- Monitoring and control of the results of risk measurements are performed by the Liquidity & Funding Management Group (for example, monitoring the statutory reserve requirement/GWM and evaluating the achievement of the national cash ratio on a quarterly basis) and the Market, Portfolio & Enterprise Risk Group (for example, monitoring the Liquidity Coverage Ratio and Net Stable Funding Ratio) to ensure compliance with the established limits. The results of monitoring and liquidity risk assessments are presented in the form of periodic reports (Liquidity Risk Dashboard) submitted to the Board of Directors and the Board of Commissioners of BRI. When monitoring results indicate a potential increase in liquidity risk, recommendations for mitigating liquidity risk exposure and decisions regarding follow-up control actions implemented.
- A liquidity risk profile dashboard is prepared periodically or adjusted in accordance with business strategy needs. The information technology systems used to provide timely and up-to-date information on BRI's liquidity include BI-RTGS, BRINets, BRISIM, the Treasury and Market Risk System, SKNBI, Swift, as well as other applications developed to monitor BRI's assets and liabilities.

## 4. Contingency Funding Plan

- The Contingency Funding Plan (CFP) is a plan and strategy designed to address crisis conditions that may impact liquidity, in order to ensure BRI's ability to obtain the required funding sources in a timely manner and at a reasonable cost.
- The Contingency Funding Plan has been established and aligned with Book 5 – Early Warning Indicators and Contingency Funding Plan in accordance with the Liquidity Risk Management Circular Letter No. SE.68-DIR/MPE/12/2022, which governs the General Provisions, CFP Implementation, CFP Management Actions, as well as Authorities and Responsibilities. CFP testing is conducted regularly at least once a year and is coordinated by the Liquidity & Funding Management (LFM) Group as the Secretary of ALCO.
- Testing of the Contingency Funding Plan is conducted using the walk-on-paper-based method, whereby all working units related to emergency funding (the Liquidity Crisis Management Team) convene to execute testing scenarios on paper without conducting transactions in the financial markets.
- The Market, Portfolio & Enterprise Risk Group monitors the parameters of the Contingency Funding Plan as reflected in the Early Warning Indicators dashboard.

## 5. Liquidity Risk Stress Testing

- Stress testing is conducted to measure BRI's capability and resilience in meeting liquidity needs under crisis conditions (stress conditions).
- Liquidity risk stress testing is carried out in accordance with BRI's internal policies and requirements and/or regulatory requests. The results of the stress testing are also reported periodically to the Board of Directors through the Risk Management Committee (RMC).
- The stress testing process utilizes stress test scenarios developed by taking into account business aspects and the level of risk managed by BRI.
- The results of the stress tests demonstrate the implications of each scenario used in assessing BRI's liquidity resilience.

## 6. Funding Concentration

- BRI has established a limit parameter for the Rupiah Loan to Deposit Ratio (LDR) with an appetite limit of 94.50%–96.50% under the moderate risk profile and >98.50% under the high risk profile.
- BRI has also set a limit parameter for the Macroprudential Intermediation Ratio (RIM) with a limit of 89.50%–92.50% under the moderate risk profile and >94.00% under the high risk profile.

- To mitigate concentration risk, BRI monitors the composition of core depositors, the non-core funding ratio, and the non-third-party funding ratio.

## 7. Maturity Profile

- Potential liquidity risks that may be faced by BRI in the future are measured through liquidity gap analysis, which represents projections of liquidity surpluses and shortages based on the maturity profiles of assets and liabilities, after taking into account funding needs for business expansion. This information serves as a key consideration in liquidity planning and management, including the funding requirements for business expansion. Through effective liquidity management, BRI aims to minimize liquidity risk while enhancing the overall stability of the banking system.
- BRI has established a maturity profile limit for maturities of less than one year (assets maturing in < 1 year / liabilities maturing in < 1 year) with limits of >86.50%–73.00% under the moderate risk profile and <59.50% under the high risk profile.

## Operational Risk

### Operational Risk Calculation

In accordance with SEOJK No. 6/SEOJK.03/2020, the calculation of Risk-Weighted Assets (RWA) for Operational Risk using the Standardized Approach has been implemented since January 2023. The following table presents the calculation of Operational Risk RWA using the Standardized Approach in accordance with the provisions set by the Financial Services Authority.

Table of Operational Risk Quantitative Disclosure – Bank Only (Individual)

No	Approach Applied	December 31, 2025						
		Business Indicator (BI)	Business Indicator Component (BIC)	Operational Risk Loss Rate (ORLR)	Operational Risk Loss Component (ORLC)	Internal Loss Multiplier (ILM)	Minimum Capital for Operational Risk (MCOR)	Operational Risk RWA

## General Qualitative Disclosure

## Qualitative Analysis

1	<p>The preparation of BRI's operational risk management framework refers to Financial Service Authority (OJK) Regulation on the Implementation of Commercial Bank Risk Management Number 18/POJK.03/2016 dated March 16, 2016 concerning the Implementation of Commercial Bank Risk Management and best practices. In BRI's internal regulations, this framework is outlined in the Risk Management Policy regulated in the Board of Directors' Decree Number KU.02-DIR/MPE/04/2024 dated April 30, 2024, regulating the principles of the Bank's risk management policy. Specifically for operational risk management, the Bank has prepared the Guidelines for the Implementation of Operational Risk Management referring to BRI Risk Management Policy regulated in Circular Letter Number SE.58-DIR/ORD/11/2022 dated November 22, 2022 with coverage:</p> <ol style="list-style-type: none"> <li>a. Operational risk management framework.</li> <li>b. Anti-fraud strategy</li> <li>c. Risk Management Function in Units.</li> </ol> <p>In addition, the implementation of operational risk management is also regulated in the form of Circulars, Decree Letters, and other Standard Operating Procedures, including:</p> <ol style="list-style-type: none"> <li>a. Circular No. SE.17-DIR/MOP/03/2020 concerning operational risk management tools.</li> <li>b. Circular No. SE.04-DIR/CTR/01/2023 concerning Corporate Culture which includes Risk Culture.</li> <li>c. Circular No. SE.30-DIR/PPM/11/2024 concerning Product Management which includes Product Implementation Risk Management.</li> <li>d. Circular No. SE.66-DIR/MPE/12/2022 concerning Guidelines for Calculating Risk Weighted Assets (RWA) which includes Operational RWA Calculations.</li> <li>e. Circular No. SE.50-DIR/MPE/12/2023 concerning Business Continuity Management which includes Business Continuity Management (BCM).</li> <li>f. SOP Number SO.36-ORD/12/2024 concerning Regional Risk Management SOP.</li> <li>g. SOP No. SO.09-ORD/03/2025 concerning Business Continuity Management.</li> </ol>
2	<p>The structure and organization of management and control functions related to operational risk at BRI are established by taking into account the development of operational risks in the banking and financial services industry as well as the complexity of BRI's business. In this regard, the Operational Risk Management Unit (Satuan Kerja Manajemen Risiko Operasional/SKMRO) has been established to focus on managing operational risk at BRI. SKMRO reports directly to the Director of Risk Management and comprises the Operational Risk Group, Digital Risk Group, and IT &amp; Fraud Risk Group.</p> <p>Along with the development of digital transactions and services and to anticipate increasing cyber threats, the Digital Risk Group has the task of managing digital risks, including formulating policies, implementing risk management processes, and monitoring and evaluating digital risks and their control throughout the Bank's activities.</p> <p>In addition, to strengthen the implementation of Good Corporate Governance (GCG) and the application of POJK No. 12 of 2024 concerning the Implementation of Anti-Fraud Strategies for Financial Services Institutions, the Bank established the IT &amp; Fraud Risk Group in accordance with the Board of Directors Decree No. 2989-DIR/PPM/06/2025 dated June 24, 2025. The IT &amp; Fraud Risk Group is responsible for formulating anti-fraud strategy policies, ensuring the implementation of anti-fraud strategies covering prevention, detection, investigation, reporting, and sanctions, as well as monitoring, evaluation, and follow-up actions aimed at preventing fraud risk incidents and undertaking recovery efforts for losses arising from fraud.</p> <p>In line with organizational developments and the strengthening of operational risk management, in 2025 the Bank established four (4) Senior Operational Risk Head (SORH) positions at the Head Office level, namely SORH Procurement, SORH Distribution, SORH Information Technology, and SORH Corporate Center. Each SORH is responsible for the implementation of operational risk management within the respective Directorates under their supervision.</p> <p>The Operational Risk Group focuses on operational risk management, including the development and implementation of an operational risk management framework, policy formulation, and Business Continuity Management (BCM) and SMK3 implementation. Operational risk management implementation is strengthened by the establishment of SORH Distribution with the Regional Operational Risk &amp; Compliance (RORC) organization. The RORC at the Regional Office acts as a Control Tower that ensures the implementation of operational risk management at the Regional level and is led by an Assistant Vice President (AVP) level official called the RORC Team Leader. The RORC organizational structure consists of the RORC Team Leader who supervises Risk Management and Compliance (RMC) and Micro &amp; Retail Risk &amp; Compliance (MRR). The RMC is based at the Regional Office, supervises the MRR which is based at the Branch Office and supervises the Retail and Micro work units.</p> <p>BRI recognizes the importance of implementing Internal Control over Financial Reporting (ICoFR) to support the integrity, reliability, and transparency of financial reporting as well as compliance with applicable regulations. The implementation of ICoFR at BRI refers to the Ministry of State-Owned Enterprises Decree No. SK-5/DKU.MBU/11/2024 concerning the Technical Guidelines for Internal Control over Financial Reporting of State-Owned Enterprises and POJK No. 15 of 2024 concerning the Integrity of Bank Financial Reporting, which require banks to develop, establish, and ensure the implementation of internal control policies and procedures in the financial reporting process. The ICoFR program is designed to provide reasonable assurance to Management, shareholders, and stakeholders that the financial statements have been prepared in a complete and accurate manner, in accordance with applicable accounting standards, and are consistently applied across all accounting entities up to the consolidated level.</p> <p>The implementation of ICoFR has been carried out in phases, beginning in 2021 with the initial scope covering Micro Loans, Retail &amp; Middle Market Loans, Customer Deposits, and Financial Reporting, and subsequently expanded in later phases to include Consumer Loans, Corporate Loans, Treasury, Trade Finance, and Fixed Assets. In accordance with NOKEP No. 3927-DIR/PPM/11/2024, the ICoFR function has been integrated into the Operational Risk Group (ORD) to strengthen governance and cross-functional coordination. In 2025, BRI implemented the Phase 3.5 transition stage, which involved a deeper review of nine key scope areas in response to changes in business processes and to comply with the provisions of SK-5/DKU.MBU/11/2024, which require ICoFR coverage of at least two-thirds of the materiality of the financial statements. This was carried out through the updating of Business Process Maps (BPM) and Risk Control Matrices (RCM), the implementation of Control Self-Assessment (CSA), and the testing of control design to ensure the continuous effectiveness of internal controls.</p> <p>The current organizational structure of the Operational Risk Group is as follows:</p>

To implement the Three Lines Model, the form of collaboration with the Internal Audit Unit (IAU) as the third line model has an important meaning in implementing operational risk management. IAU functions as an enabler which is tasked with providing assurance in the implementation of risk management. In addition, IAU also contributed in providing support in the form of tools to facilitate the RRM Team in conducting control testing and fraud detection. Furthermore, SKMRO as the second line was also asked to provide data and information sources in the form of risk maps to assist the IAU in implementing risk-based audits.

- 3 Explanation of the measurement system for operational risk (covering the system and data used to calculate operational risk in order to estimate the capital burden for operational risk). Regarding the Bank's obligation to estimate the capital charges for operational risk by calculating of Operational Risk RWA using the Standard Approach in accordance with OJK Circular Number 6/SEOJK.03/2020, BRI carried out measurement and calculation of operational risk as a part of the operational risk management process, namely identification, measurement, control, and monitoring.

The operational risk management process was carried out in accordance with the governance set out in the operational risk management framework and used tools in accordance with regulatory provisions and best practices. The process of measuring and calculating operational risk was carried out through the following activities:

- a. **Risk and Control Self Assessment (RCSA)**  
Risk and Control Self Assessment is a qualitative and predictive risk management tool used to identify and measure risk based on the dimensions of impact and likelihood. RCSA in BRI was implemented at the BRI Head Office Division/Desk, regional offices, special branch offices, Overseas Business Units, regional internal audit, regional campus, branch offices that also represented BRI Units, sub-branch offices and BRI Prioritas service centers. Risk and Control Self Assessment was intended to assist business units in independently identifying and measuring operational risk in every operational and business activity, including monitoring and determining corrective steps/follow-up future plans. Risk issue and control updates on RCSA were carried out by considering BRI's business developments which included the implementation of new products and or activities, new market segments and business competition, changes in internal/external regulations, and other changes that affected BRI's risk exposure. The assessment was carried out by considering Incident Management/Loss Event Database data, Key Risk Indicators (KRI) and Audit Reports (LHA). RCSA was carried out periodically every semester, and the frequency increased if there was a significant change in risk exposure.
- b. **Self Assessment of New Bank Products' Risk**  
The application of the risk management process for each New Bank Products issuance plan at BRI was carried out through the implementation of New Bank Products Risk Self Assessment by the Product Owner and requesting an adequacy assessment of New Bank Products risk management from the Risk Management Unit to then be recommended to the BRI Risk Management Director in order to obtain approval.
- c. **Recording Operational Risk Losses in the Loss Event Database (LED)**  
Loss Event Database (LED) BRI included the process of recording loss event data for each type of financial and non-financial loss which included actual loss, potential loss including corrective measures and incident handling. Based on the loss event data on LEDs, an analysis of loss events could be performed based on the cause, functional activity, event category (event type) and BRI's business lines. This information system could be used to determine preventive risk control measures based on documenting incident handling/settlement processes both from a non-financial perspective, financial losses and loss recovery as well as litigation processes. To calculate the capital charge and Operational RWA, BRI used the Basic Indicator Approach (BIA) method implemented since 2010 in accordance with regulatory provisions. However, BRI made preparations for implementing the Standard Approach Minimum Operational Risk Capital Measurement (MMRO) guided by the Basel III Framework. Provisions for Operational Risk RWA with a standard approach are regulated through Directors' Circular Letter No. SE.10-DIR/MPE/08/2025 Book 2 concerning Operational RWA Calculations.

### Qualitative Analysis

	<p>d. <b>Key Risk Indicator Monitoring (KRI)</b> Key Risk Indicator (KRI) is a Risk Management tool in the form of a quantitative indicator to provide early information on increasing or decreasing risk and or decreasing the effectiveness of controls against predetermined thresholds. KRI could be leading or lagging. Risk monitoring through KRI aimed to determine follow-up plans related to risk control so as to prevent or minimize the impact of losses. BRI identified key risk indicators for all types of risk and established risk limits that reflected BRI's risk appetite and conditions. Identification of key risk indicators and determination of KRI thresholds was carried out using best judgment by considering BRI's risk exposure and risk appetite. The threshold determination involved internal audit, risk owners and other related units. BRI's main risk indicators were reflected in the bankwide risk profile report and regional office risk profile monitored regularly and reported to management every month.</p> <p>e. <b>Risk Assessment Plan (RAP)</b> Risk Assessment Plan (RAP) is a form of risk strategy preparation activity carried out by RRM with output in the form of a list of main risks, business unit priorities based on risk and risk control activity plans.</p> <p>f. <b>Disaster Threat Risk Assessment</b> BRI carried out Disaster Threat Risk Assessment as an implementation of Business Continuity Management (BCM) to protect the security and safety of employees' lives, protect the lives of customers and other stakeholders within BRI's operational units (disaster management plan), and maintain the continuity of business/operational activities. most importantly, safeguarding BRI's assets and having an adequate response in disruption/disaster situations (business continuity plan). Disaster Threat Risk Assessment aimed to identify the resources needed in order to prepare for threats/disasters in each unit. As one of the implementations of BCM, BRI already had guidelines for an Emergency Response Plan (ER Plan) and a Business Continuity Plan (BC Plan) policy for Critical Business Units.</p> <p>g. <b>Internal Control Over Financial Reporting (ICoFR)</b> The measurement of operational risk arising from weaknesses in internal control over financial reporting is conducted through the Internal Control over Financial Reporting (ICoFR) framework. The identification of control weaknesses is carried out through multiple layers of assessment to ensure the adequacy of control design and the operational effectiveness of internal controls.</p> <p>i. <b>Walkthrough and Design Validation – Second Line</b> The ICoFR team conducts business process walkthroughs to map transaction flows into the Business Process Mapping (BPM) and Risk Control Matrix (RCM), identify risks at the assertion level, and assess the adequacy of control design, including key controls, control types (manual/ITAC/ITDM), and the reliability of supporting information (IPE/EUC).</p> <p>ii. <b>Control Self-Assessment (CSA) – First Line</b> Process owners perform self-assessments of control implementation in accordance with the attributes set out in the RCM, test evidence of control execution, assess data reliability, and determine the root cause and remediation plans. CSA serves as an early detection mechanism for operational control weaknesses.</p> <p>iii. <b>Evaluation and Test of One – Second Line</b> The Second Line performs quality assurance on CSA results through Test of One to verify the alignment between control design and actual practice, the accuracy of the classification of findings (design or operating deficiency), and the adequacy of remediation plans.</p> <p>iv. <b>TOD and TOE – Third Line (SKAI)</b> SKAI performs independent testing consisting of Test of Design (TOD) to assess the adequacy of control design and Test of Operating Effectiveness (TOE) to ensure consistent implementation during the reporting period. The results form the basis for determining the level of deficiencies, quantifying the Degree of Deficiencies (DoD), and concluding on the effectiveness of ICoFR.</p>
4	<p>Operational risk management was reported regularly to management, business unit heads, and other interested parties as a monitoring tool. The ORD Group submitted operational risk reports, both mandatory and for internal reporting purposes. The scope and form of operational risk management reports included:</p> <p>a. <b>Bank Operational Risk Profile</b> The Bank's operational risk profile was submitted to Regulators, Directors and Commissioners on a quarterly basis coordinated by the MPE Group. The operational risk profile included risk parameters which became the focus of monitoring the Bank's operational risk exposure. The Bank's operational risk profile report was also submitted to the Risk Management Committee (RMC) and the Risk Management Oversight Committee.</p> <p>b. <b>Regional Risk Profile</b> The regional risk profile contained parameters for 7 (seven) types of risk, one of which was operational risk. The preparation of the operational risk profile was coordinated by RRM and submitted to the Regional Chief Executive Officer (RCEO) through the Governance, Risk and Compliance (GRC) forum every month.</p> <p>c. <b>Operational Risk News (OPEN)</b> Operational Risk News (OPEN) was submitted to the Director of Risk Management and other Directors on a monthly basis. The scope of OPEN included operational risk profile reports, achievement of risk appetite statements (RAS), incidents of human error and fraud incidents, as well as improvements to implemented controls, risk management forum activities, BCM and OHS activities, regional risk management activities, risk assessment of Bank products New (UN), RRM SMART, and external event information.</p> <p>d. <b>MRR Risk Analysis Report</b> The MRR Risk Analysis Report contains a list of control weaknesses that still occur within the respective Work Units based on the verification results conducted by MRR. The report is submitted by MRR to the Heads of Work Units and presented in the Work Unit MR Forum on a monthly basis. In addition, for verification results by MRR that indicate potential fraud, the report is submitted to the RCEO and the Operational Risk Group for further follow-up by the IT &amp; Fraud Risk Group.</p>

### Qualitative Analysis

- 5 The risk mitigation process was part of the risk management process, namely risk control. Risk control was carried out in order to prevent risk events and minimize the impact of risks. Risk mitigation measures were adjusted according to the results of an analysis of the causes of events or potential risks. In accordance with this, risk mitigation was generally grouped into 3 (three) subs, namely:
- a. **People**

Mitigation of the people aspect was carried out in terms of quantity and quality, including:

    - i. Determining and reviewing the need for employee formation to carry out business processes in the Business Unit.
    - ii. Determining the requirements, mechanisms, and background checks in the employee recruitment process.
    - iii. Fulfilling employee formation in the Business Unit.
    - iv. Improving worker capabilities, including by:
      - Conducting education and training of workers according to position level.
      - Reviewing the curriculum and educational methods.
      - Providing certification for workers with certain specializations.
    - v. Encouraging the implementation of risk culture through risk culture internalization programs, including:
      - Culture Activation Program (CAP).  
Each business unit has established a CAP to form the behavior needed to achieve KPIs prudently through activities specified in the CAP.
      - Building Risk Awareness of Workers in Business Units  
Risk Management Unit routinely delivers risk awareness media in the form of letters, infographic media, webinars, podcasts, e-learning, official Bank social media accounts and email/WA/SMS blasts.
      - Empowering Risk Officer.  
The involvement of the Risk Officer as the Transformation Driving Team is required in internalizing and ensuring that the implementation of risk culture is implemented. Thus, the RM function is strengthened through adjusting operational procedures and upgrading knowledge and technical skills through education/socialization.
      - Early Detection.  
The implementation of a risk culture needs to be supported by Early Warning System tools which can help mitigate or correct risk events earlier.
      - Business Process Review.  
Risk culture activities are reflected through the implementation of daily banking operational procedures. Hence, it is necessary to review the adequacy of control over operational procedures.
  - b. **Process**

Risk mitigation in the process aspect, namely:

    - i. Develop policies and standard operating procedures (SOP) for each product and activity of the Bank which includes business processes, internal control, and the duties and responsibilities of workers as makers, checkers, signers. Each draft policy and SOP before being ratified must obtain an assessment of the adequacy of risk management from the Risk Management Unit.
    - ii. Risk mitigation was also carried out by transferring risk to a third party, namely an insurance company that bore the Bank's losses or to a labor service provider which of course had taken into account the principles of bona fide and integrity of the service provider as regulated in the Cooperation Agreement (PKS) in every cooperation with third parties.
  - c. **Technology**

In principle, digital risk control was closely related to the Bank's efforts to secure its assets, including providing protection for customer data/information. Digital risk management in IT management activities/IT services includes, but was not limited to:

    - i. Development, updating and deletion of electronic/digital banking services.
    - ii. Development, updating, and deletion of IT infrastructure (computing, network, satellite) and security.
    - iii. Development, renewal and deletion of the Bank's internal services.
    - iv. Procurement of IT service providers.
    - v. IT service provider by the Bank.
    - vi. IT operational activities.
    - vii. Development and/or review of Fraud Detection System (FDS) rules.

Furthermore, to strengthen digital risk control, each application development was accompanied by the Digital Risk Group.

## Material Bonds Related to Capital Goods Investment

### Objective of the Bonds

In capital goods procurement engagements using investment budget with a Work Order Letter (SPK) and Agreement in accordance with the tiering of procurement value and term of procurement period. The purpose of holding an engagement is so that it can be detailed in description of the implementation of procurement work to the provider of goods that are binding, the rights and obligations of the parties and contains terms and conditions that must be met by the parties.

To speed up the process of procuring goods primarily by using direct purchase and self-management methods following best practices without requiring an SPK, the procurement committee only needs to issue a Purchase Order (PO) or a letter of request for quotation, or simply prove it with a purchase receipt.

The general principles of procurement of goods within the company must refer to the guides of efficiency, effectiveness, competitiveness, transparency, fairness and

reasonableness, accountability, standardization of goods, centralization, decentralization and have been determined in the Company's Work Budget Plan (RKAP).

### Source of Funds

The source of funds uses the budget within the BRI Company that has been allocated (breakdown) following the budget items specified in the Company's Work Budget Plan (RKAP).

### Denominated Currency and Planned Steps to Hedge Risk from Foreign Currency Positions

All procurement uses rupiah currency, and it is required that all procurements that have been agreed in foreign currency will be adjusted in the SPK or PKS to use rupiah currency. Thus, BRI will not hedge due to changes in foreign exchange rates.

## Capital Goods Investment

### Types and Value of Capital Goods Investment

Types and investments of BRI Bank Only capital goods are presented in the following table.

Table of Types and Values of Capital Goods Investment

(In Million IDR)

Types	Investment in 2025	Investment in 2024
Land and Building	1,819,017	1,948,290
Furniture and Inventory	321,790	207,163
Vehicle	147,067	651,221
Machinery and Equipment	184,990	132,537

### Objective of Capital Goods Investment

Apart from supporting Company's operations, procurement of goods also aims to encourage the growth of domestic industry. Users of goods can give preference to the use of domestic production while observing the provisions of applicable laws and regulations.

Users of goods and/or services prioritize synergy between SOEs, SOE Subsidiaries, BRI Subsidiaries, and/or Subsidiaries of entities established by BRI as long as the goods and/or services are the result of production of the SOEs, SOE Subsidiaries, BRI Subsidiaries and/or Subsidiaries of entities established by BRI in question, and as long as the quality, price, and purpose are accountable and take into account arm's length principle.

## Commitments and Contingencies

Assessment of commitments and contingencies transactions that have individual credit risk using objective evidence, except for commitments and contingencies belonging BRIS (a subsidiary based on sharia principles) is carried out using the Bank Indonesia collectability guidelines.

Table of Commitment and Contingency

(In Million IDR)

Description	2025	2024
<b>COMMITMENT</b>		
Commitment Bill		
Spot purchases and foreign currency	57,618,468	49,309,688
Commitment Liability		
Loan facilities provided to unused debtors	134,386,017	123,492,574
Spot sales and foreign currency	157,153,569	94,874,355
Irrevocable L/C ongoing to import	13,549,757	11,775,920
Commitment-net	(247,470,875)	(180,833,161)
<b>CONTINGENCIES</b>		
Contingent liability		
Warranty issued in the form		
Bank guaranty	52,556,615	46,148,254
Standby L/C	14,359,061	20,706,982
Contingencies – net	(66,915,676)	(66,855,236)

## Material Information and Facts After the Accountant's Report Date

Up to the date of this Annual Report, no significant events have occurred after the auditor's report date that would affect future business performance or risk.

## Business Prospects and Future Strategies

Entering 2026, the global economy is projected to remain in an adjustment phase with persistently high levels of uncertainty. Although easing global inflationary pressures have created room for monetary policy relaxation in several countries, U.S. trade policies, rising geopolitical risks, and the fragmentation of global supply chains continue to be sources of financial market volatility. The elevated indicators of uncertainty and geopolitical risk, which remain well above historical norms, suggest that the potential for accelerating global economic growth in the near future is likely limited.

Within this context, Indonesia's economy in 2026 is expected to demonstrate relatively solid resilience, albeit with more moderate growth momentum. BRI projects Indonesia's

economic growth to be in the range of 5.00–5.24%, primarily supported by domestic demand. Nevertheless, this growth rate reflects a phase of economic cycle normalization, during which growth drivers are not as strong as during the post-pandemic recovery period. The weakening of economic momentum observed since the end of 2025, as reflected in BRI's Macroeconomic Index moving toward a neutral zone and the declining realization of tax revenues, indicates that real economic activity and household income have not yet fully recovered across the board.

From the domestic demand perspective, household consumption is expected to grow more gradually in 2026. The recovery in consumption remains unevenly distributed, with

household spending and credit demand primarily supported by the upper-middle and high-income segments, while the purchasing power of the lower-middle income groups remains constrained. This situation aligns with the labor market structure, which is still dominated by the informal sector, thereby limiting income stability and restraining the acceleration of mass-market consumption. On the other hand, investment and government expenditure continue to play an important role in sustaining growth momentum, although the scope for fiscal stimulus is expected to become increasingly selective amid fiscal policy normalization and dynamics in state revenue.

In line with these dynamics, Indonesia's inflation in 2026 is projected to range between 2.48% and 3.22%, remaining within Bank Indonesia's target range of 2.5% ± 1%. Although relatively contained, inflationary pressures may increase moderately due to external factors, such as rising energy prices and exchange rate volatility amid heightened global uncertainty. Under these conditions, monetary policy is expected to remain focused on maintaining a balance between macroeconomic stability and support for economic growth.

BRI projects the BI Rate in 2026 to range between 4.00% and 4.50%, reflecting the continuation of a gradual and prudent monetary easing policy. The scope for further reductions in the BI Rate is expected to be limited, considering the need to maintain exchange rate stability amid external pressures and the constrained room for global interest rate easing. In line with this outlook, the average Rupiah exchange rate against the U.S. Dollar in 2026 is projected to range between IDR16,609 and IDR16,853 per U.S. Dollar. The Rupiah may continue to face pressure in the first half of 2026 amid a strengthening U.S. Dollar and heightened global geopolitical tensions, while the potential for appreciation in the second half of the year is expected to remain relatively limited.

Against this macroeconomic backdrop, banking intermediation performance in 2026 is projected to continue growing on a sustainable yet more selective basis. National banking credit growth is estimated to reach 8.15%–11.09%, reflecting credit demand that is likely to remain supported by the corporate segment and sectors with relatively strong fundamentals, while retail and MSME lending growth is expected to proceed more cautiously amid the incomplete recovery of overall household purchasing power. On the funding side, Third-Party Funds (TPF) are projected to grow within the range of 7.19%–9.06%, with banking liquidity conditions expected to remain within a relatively normal regime, albeit still facing potential tightening risks

in the second half of 2026 due to fiscal dynamics and the possibility of government fund withdrawals.

Overall, while remaining attentive to global dynamics characterized by heightened uncertainty and the ongoing normalization process of the domestic economy, BRI views Indonesia's economic outlook for 2026 as remaining conducive, albeit requiring adaptive and prudent strategies. Strengthening risk management, maintaining disciplined liquidity management, and focusing on segments and sectors with sustainable growth quality will be key to preserving business performance and banking resilience amid a still dynamic economic landscape.

Challenging macroeconomic conditions and increasingly intense competition in the banking industry have prompted BRI to implement a focused strategy to sustain growth and strengthen market share. BRI is confident that the strategies developed will deliver strong performance in the future. Challenging macroeconomic conditions and intensifying competition within the banking industry have prompted BRI to implement targeted strategies aimed at sustaining growth and strengthening market leadership. Taking into account external dynamics and the Company's long-term development direction, BRI's strategy in 2026 is centered on reinforcing business fundamentals and generating sustainable growth. In line with this framework, BRI's strategy for 2026 focuses on three main strategic areas as follows:

- **Transform the Funding Franchise**  
Strengthening low-cost funding by accelerating sustainable CASA growth, optimizing digital channels, and enhancing transaction banking services across retail, SME, and wholesale segments.
- **Revamp Existing Core, Build New Core**  
Reinforcing core businesses, particularly the micro segment, through the refinement of business processes and improvement of financing quality, while simultaneously accelerating new growth engines in consumer banking, gold pawn services, and value chain-based commercial and corporate segments.
- **Build World-Class Foundations**  
Strengthening organizational foundations through human capital development, robust risk management, enhanced utilization of technology and data, improved operational efficiency, and the reinforcement of network presence and brand identity.

## Achievement of Targets and Future Targets

### Target Achievement 2025

#### Comparison of Target and Financial Realization

Comparison of targets and financial realizations can be described as follows:

Table Comparison of Financial Targets and Realizations

(Consolidated, in IDR Billion)

Description	Target	Realization	Achievement
Loans and Financing Granted (IDR Billion)	1,462,009	1,521,486	104.1%
CASA Ratio	67.28%	70.61%	105.0%
Net Interest Income (IDR Billion)	150,053	150,498	100.3%
Operating Profit Before Provisions for Loan Losses (PPOP) (IDR Billion)	118,607	119,430	100.7%
Loan at Risk (LAR) <sup>*)</sup>	10.36%	9.61%	107.8%

<sup>\*)</sup> The calculation of LAR achievement is based on the formula: Target / Actual.

In 2025, BRI recorded total loans and financing of IDR1,521.5 trillion, representing 12.3% year-on-year growth compared to IDR1,354.6 trillion in 2024 and achieving 104.1% of the target. All business segments recorded positive growth, with BRI Bank Only growing 10.43% year-on-year or IDR126.8 trillion. On the liabilities side, BRI recorded total third-party funds (DPK) of IDR1,466.8 trillion, an increase of 7.43% year-on-year compared to IDR1,365.45 trillion in 2024. The highest deposit growth was driven by CASA, which grew 12.71% year-on-year or IDR116.8 trillion, in line with the Funding Franchise Transformation implemented throughout 2025. Strong CASA growth pushed the Company's CASA ratio to an all-time high of 70.61%, exceeding the target at 105.0%.

Healthy growth in loans and financing, along with improvements in the liabilities structure impacting Cost of Fund efficiency, was also reflected in profitability improvements. This is particularly evident in Net Interest Income, which reached IDR150.5 trillion, up 5.5% year-on-year from IDR142.7 trillion in 2024, achieving 100.3% of the target. The healthy growth of Net Interest Income, combined with disciplined cost management, enabled BRI to generate Pre-Provision Operating Profit (PPOP) of IDR119.4 trillion, up 2.6% year-on-year from IDR116.8 trillion in 2024, achieving 100.7% of the target.

The acceleration of non-performing loan resolution throughout 2026 was also reflected in the improvement of the consolidated LAR ratio, which was recorded at 9.61%, lower than the target of 10.36%, representing an achievement of 107.8%.

## Comparison of Target and Capital Structure Realization

As of 31 December 2025, BRI maintained its capital structure in line with both target levels and regulatory minimum requirements. The Total Minimum Capital Requirement (KPPM) or Capital Adequacy Ratio (CAR) for BRI Bank Only stood at 21.06%, and 23.52% on a consolidated basis, with the Main Core Capital Ratios 1 (CET1) and Tier-1 Capital Ratio recorded at 19.93%. Both Tier-1 and CET1 remain well above the regulatory minimum requirements of 6.0% and 4.5%, respectively, with the details as follows:

Table Comparison of Target and Realized Capital Structure

(bank only, in %)

Description	2025		
	Target	Realization	Achievement
CAR Ratio	22.08%	21.06%	95.24%
CET Ratio 1	20.95%	19.93%	94.95%
Tier 1 Ratio	20.95%	19.93%	94.95%
Tier 2 Ratio	1.12%	1.13%	100.89%
Tier 1 Minimum Ratio	-	8.57%	-
CET 1 Minimum Ratio	-	8.57%	-
Minimum CAR Based on Risk Profile	-	9.70%	-

## Comparison of Target and Marketing Realization

Table of Marketing Targets and Realization Comparison

(Consolidated, in IDR Billion)

Description	Target	Realization	Achievement
CASA	987,227	1,035,790	104.9%

Throughout 2025, BRI will consistently implement various marketing activities to encourage the use of banking products and services, particularly in the third-party funds, transactions, and digital services segments. These activities will focus on increasing the use of savings products, non-cash transactions, and optimizing digital banking services as part of the Funding Franchise Transformation to support sustainable business growth.

In order to strengthen the use of digital banking services, BRI continued various programs aimed at increasing the adoption of BRIimo as the primary customer transaction channel. These initiatives are designed to boost savings balances,

transaction frequency, and the utilization of payment products through BRIimo, BRI Debit, BRI Credit Cards, and others. Customer loyalty and appreciation programs remain an integral part of the marketing strategy, delivered through campaigns and rewards for customers.

These efforts have had a positive impact on BRI's Third Party Funds performance throughout 2025, particularly on the CASA side, which was recorded at IDR1,035.8 trillion, growing 12.71% yoy or IDR116.8 trillion, or posting an achievement of 104.9%.

## Comparison of Targets and Realization of HR Development

Employee competency development remains a top priority for the Company, implemented through various programs, including education and certification initiatives delivered through both offline and online channels. These programs are facilitated through the Company's digital learning platform (BRISMART) and external learning platforms (LinkedIn Learning, GoFluent, and so on). In 2025, the realization of human capital development initiatives exceeded the established target, achieving 109% of the annual target. (382.11% for education development and 104,16% for education enhancement).

Table of Comparison HR Development Targets and Realizations

(In People)

Description	2025		
	Target	Realization	Achievement
Development *	1,800	6,878	382.11%
Enhancement**	101,500	105,724	104.16%
<b>Total</b>	<b>103,300</b>	<b>112,602</b>	<b>109.00%</b>

Notes:

\* BRILiaN Future Leader Program (BFLP), BRILiaN Next Leader Program (BNLP), BRILiaN Leadership Development Program (BLDP), BRILiaN Banking Associate Program (BBAP),

\*\* Enhancement Education including BRILiaN Specialist Development Program (BSDP) 0, BSDP (1,2,3), Public Course, Certification, BRILiaN Leader Retirement Program (BLRP), BRILiaN Bright Scholarship Program (BBSP), BRILiaN Improvement Forum (BIF), Green Program, and Socialization.

## Targets in the Future (Projection)

BRI Management has prepared the Bank's Business Plan by considering current economic conditions and economic projections in 2026, both from macro and micro perspective

Table of Assumption in Compiling Projections

No	Assumption	2026
<b>MACRO ASSUMPTIONS</b>		
1.	GDP Growth (%)	4.98 – 5.22
2.	Inflation (%)	2.41 – 3.13
3.	IDR/USD Rates	16,609 – 16,853
4.	BI Rate	4.00 – 4.50

No	Assumption	2026
<b>MICRO ASSUMPTIONS</b>		
1.	National Loan Growth (%)	8.15 – 11.09
2.	TPF Growth (%)	7.19 – 9.06

Source: BRI Economist Team

## Financial Projections

The financial projections for BRI in 2026 are as follows:

**Table of Financial Projections**

	Proyeksi 2026
Loans & Financing Growth (YoY)	7% - 9%
Net Interest Margin (NIM)	7.4% - 7.8%
Credit Cost (CoC)	2.9% - 3.2%
Cost to Income Ratio (CIR)	41% - 43%

In 2026, PT Bank Rakyat Indonesia (Persero) Tbk projects consolidated loans and financing growth to be in the range of 7%–9%. This growth is expected to continue to be dominated by the Micro, Consumer, and CSME segments, in line with the Company's commitment to remain a key contributor to the development of Indonesia's MSME sector, a primary pillar of economic growth. The Corporate segment is projected to continue growing healthily, with a focus on acquiring optimal business value chains. This growth in loans and financing will be supported by increasingly robust business process initiatives and agile risk management, aimed at maintaining credit and financing quality at a high level.

On the profitability side, the Company targets a consolidated Net Interest Margin (NIM) of 7.4%–7.8%, relatively stable compared to the 2025 NIM of 7.8%. In 2026, third-party

funds collection, with a focus on CASA, is projected to sustain NIM at optimal levels, while taking into account potential liquidity challenges arising from global economic uncertainties. Furthermore, healthier credit disbursement is expected to maintain loan profitability levels, supporting the stability of NIM.

The Credit Cost in 2026 is projected to be in the range of 2.9%–3.2%, improving from 3.3% in 2025, reflecting the Company's commitment to continue the positive trend in asset quality improvement observed in mid-2025. To ensure profitability remains well-maintained, the Company also aims to continue prudent cost management, as reflected in the Cost-to-Income Ratio (CIR), which is projected to be in the range of 41%–43% in 2026.

## Capital Structure Projection

KPMM capital as of December 2026 is projected to always be maintained above the minimum provisions of the banking and financial services regulator's Minimum Capital Adequacy Ratio (CAR). The description of BRI's capital projection and CAR fulfillment in summary is as follows:

**Table of BRI Capital Projection**

Description	Regulatory Minimum Requirements	2026 BRI Projection
Capital Adequacy Ratio (CAR)	15%	24.74%

(In %)

Sustainable business growth and optimal capital management are key to maintaining capital ratios in line with regulatory requirements.

### Dividend Policy Projection

Considering the current capital position, BRI has established a dividend distribution policy by maintaining a Dividend Payout Ratio (DPR) of at least 60% of the net profit attributable to owners of the parent entity, unless otherwise determined at the General Meeting of Shareholders (GMS). BRI may determine a higher or lower DPR by taking into account sustainable business growth projections, capital adequacy requirements, and efforts to maintain an optimal return on equity over the medium to long term. In accordance with prevailing regulations, dividend distribution may be made in the form of cash or non-cash dividends.

Going forward, dividend payments will be made while taking into account factors such as business growth strategy, financial stability, and regulatory compliance. Dividend payments are also made with due regard to applicable regulations, including POJK 17/2023 on the Implementation of Governance for Commercial Banks.

### Marketing Projections

In line with its marketing communication strategy, in 2025, BRI implemented a rebranding initiative as part of strengthening its corporate identity and aligning brand communication comprehensively. This rebranding effort was

aimed at ensuring consistency in visual identity, messaging, and BRI's brand values across all products and services communicated to customers and stakeholders.

To support the effectiveness of integrated marketing communications, BRI's rebranding also encompassed the restructuring and reinforcement of the brand architecture across its key products and services. This alignment was intended to clarify the positioning of each brand, enhance the clarity of the value proposition delivered to customers, and ensure a consistent brand experience across all communication channels, both digital and non-digital.

In this regard, the rebranded product, service, and solution brands of BRI will become the primary focus of marketing communications in 2026, aimed at supporting the comprehensive fulfillment of customers' financial needs. In accordance with BRI's Bank Business Plan, the marketing communication initiatives projected for 2026 include the following:

1. Amplification of BRI's Rebranding Initiative, through strengthened positioning and enhanced brand value delivered via product, service, and solution marketing communications. These efforts are aimed at increasing brand awareness, consideration, and product evaluation across various media platforms.
2. Campaign activation through a digital campaign funnel as one of BRI's clear and measurable media strategy transformations in reaching target customers that are in line with BRI's product development journey.

### HR Development Projection

HR development projections in 2026 are as follows:

Table of HR Development Projection

(In Person)

Description	2026 Projection
Development *	1,700 – 2,100
Enhancement**	90,000 – 105,000

Notes:

\* BRILiaN Future Leader Program (BFLP), BRILiaN Next Leader Program (BNLP). BRILiaN Leadership Development Program (BLDP), BRILiaN Banking Associate Program (BBAP).

\*\* Education Enhancement includes, BRILiaN Specialist Development Program (BSDP) 0, BSDP (1,2,3), Public Course, Certification, BRILiaN Leader Retirement Program (BLRP), BRILiaN Bright Scholarship Program (BBSP), BRILiaN Improvement Forum (BIF), Green Program, and Socialization.

### Long Term Plans (RJP) Evaluation

In order to ensure the effective implementation of the Long-Term Plan (Rencana Jangka Panjang/RJP), BRI consistently conducts annual evaluations of all strategic initiatives within the relevant planning period. This evaluation is carried out not only to assess the alignment between strategic realization and the established targets and milestones, but also to serve as a basis for adjustments and the formulation

of BRI's forward-looking strategic direction. In 2025, the evaluation focused on the realization of the Corporate Plan, encompassing all Business Units (Segments) and Enablers throughout the 2025 period. The results of this evaluation subsequently formed the foundation for the preparation of the 2026–2030 Long-Term Plan, aligned with the aspirations of Danantara Asset Management.

## Dividend

### Dividend Policy

The dividend distribution policy is internally regulated under Circular Letter No. SE.70.b-DIR/CMG/12/2022 Book 6 concerning Dividend Management. This policy sets out the principles governing dividend management, including ensuring the fulfillment of shareholders' rights in the distribution of dividends in accordance with corporate governance principles applicable to commercial banks and prevailing laws and regulations, as well as enhancing shareholder value.

Dividend distribution is determined by taking into account both BRI's internal considerations and external factors, including the Company's historical performance, business prospects, and the forward-looking economic outlook. The determination of the dividend payout ratio is based on the reasonableness of profitability performance, rate of return/yield levels, and the overall contribution to shareholders. The approval mechanism for dividend distribution is carried out through the GMS, in compliance with applicable regulatory requirements, while the technical provisions governing dividend distribution are further stipulated under BRI's internal policies.

BRI's dividend policy may be reviewed by the Board of Directors, without prejudice to the authority of the GMS to determine otherwise in accordance with BRI's Articles of Association and the prevailing laws and regulations in the banking sector.

Based on the Annual General Meeting of Shareholders (AGMS) held on 25 March 2025, BRI distributed dividends of IDR51.73 trillion, equivalent to 86% of the 2024 net income attributable to the owners of BRI's parent entity of IDR60.15 trillion. The total cash dividend per share amounted to IDR343.4, comprising an interim dividend of IDR135 and a remaining cash dividend of IDR208.4. The interim dividend was paid on 15 January 2025 to shareholders recorded in the Company's recording date on 30 December 2024, while the remaining cash dividend was paid on 23 April 2025 to shareholders recorded on 14 April 2025. In accordance with regulations, dividends were paid within 30 days from the announcement date.

In the previous year, the AGMS held on 1 March 2024 approved a dividend distribution of IDR48.10 trillion, representing 80.04% of the 2023 net income attributable to the owners of BRI's parent entity of IDR60.09 trillion. The cash dividend per share amounted to IDR319.00, consisting of an interim dividend of IDR84 and a remaining cash dividend of IDR235. The interim dividend was paid on 18 January 2024 to shareholders recorded on 3 January 2024, while the remaining cash dividend was paid on 28 March 2024 to shareholders recorded on 15 March 2024. Dividends were paid within 30 days from the announcement date.

The financial performance for the 2025 financial year will be decided at the 2026 AGMS.

### Announcements, Payment, and Amounts of Dividend

Information on announcements, payments and dividend amounts in the last 3 (three) financial years is as follows.

**Table of Dividend Announcement and Payment**

Description	2024 Fiscal Year	2023 Fiscal Year	2022 Fiscal Year
Profit After Tax and Minority Interest (PATMI) (IDR billion)	<b>60,154.89</b>	60,099.86	51,170.31
Cash Dividend (IDR billion)	<b>51,726.77</b>	48,102.28	43,494.76
Non-Cash Dividend	-	-	-

BRI did not carry out acquisition activities throughout 2025.

## Debt/Capital Restructuring

BRI did not carry out debt/capital restructuring activities throughout 2025.

## Material Transaction Information Containing Conflict of Interest and/or Transactions with Affiliated Parties

Material Transaction is any transaction carried out by a Public Company or Controlled Company that meets the value limits as stipulated in the Financial Services Authority Regulation (POJK) Number 17/POJK.04/2020 Concerning Material Transactions and Changes in Business Activities.

### Scope of Transaction:

Public Listed Company conducting Material Transaction in:

- a. 1 (one) transaction; or
- b. A series of transactions for a specific purpose or activity must comply with the provisions as stipulated in POJK Number 17/ POJK.04/2020.

### Value Limitation:

- (1) A transaction is categorized as a Material Transaction if the transaction value is equal to 20% (twenty percent) or more of the equity of the Public Company.
- (2) Transactions in the form of acquisitions and disposals of companies or operating segments are categorized as Material Transactions in terms of:
  - a. The transaction value is equal to 20% (twenty percent) or more of the equity of the Public Company;
  - b. The total assets that are the object of the transaction divided by the total assets of the Public Company are equal to or more than 20% (twenty percent);
  - c. The net profit of the object of the transaction is divided by the net profit of the Public Company whose value is equal to or more than 20% (twenty percent); or
  - d. The operating income of the object of the transaction is divided by the operating income of the Public Company whose value is equal to or more than 20% (twenty percent).

- (3) In the event that the transactions as referred to in (1) and (2) are conducted by a Public Company that has negative equity, the transaction is categorized as a Material Transaction if the transaction value is equal to 10% (ten percent) or more of the total assets of the Public Company.

## Conflict of Interest Transactions

In accordance with the Financial Services Authority Regulation (POJK) Number 42/POJK.04/2020 concerning Affiliated Transactions and Transactions with Conflict of Interest (POJK 42/2020), what is meant by Conflict of Interest is the difference between the economic interests of a public company and the personal economic interests of members of the Board of Directors, members of the Board of Commissioners, major shareholders, or controllers that can be detrimental to the public companies. Therefore, Conflict of Interest is a condition/situation in which a person due to his/her position, title or authority at BRI has a personal interest that can affect the quality and performance of the objectively mandated tasks.

BRI has a conflict of interest policy contained in Bank BRI has a conflict of interest policy contained in the Circular Letter of the Board of Directors Number SE.09-DIR/ KEP/03/2023 dated March 15, 2023 concerning Corporate Governance (Book 1 related to Handling Conflict of Interest). Handling conflict of interest is basically done through the improvement of values, systems, personal and culture. The basic principles of handling conflict of interest include:

1. Maintaining integrity, prioritizing interests of the public and the Company and is committed to handling conflicts of interest.
2. Creating transparency in the handling and supervision of conflict of interest.
3. Encouraging personal responsibility and exemplary behavior.
4. Creating and fostering an organizational culture capable of handling conflict of interest.

Until the end of 2025, BRI has no material transactions that contain Conflict of Interest.

## Affiliate Transaction

Based on POJK 42/POJK.94/2020 dated July 2, 2020 concerning Affiliated Transactions and Conflict of Interest (POJK42/2020), Affiliates are:

1. Family relationships due to marriage and descent to the second degree, both horizontally and vertically;
2. Relationships between parties with Employees, Directors, or Commissioners of the party;
3. Relationships between 2 (two) Companies where there are 1 (one) or more members of the same Board of Directors or Board of Commissioners;

4. Relationships between the Company and parties, either directly or indirectly, controlling or being controlled by the Company;
5. Relationships between 2 (two) Companies that are controlled, either directly or indirectly, by the same party; or
6. Relationships between the Company and the major Shareholders.

Affiliated Transactions are any activities and/or transactions carried out by a Public Company or Controlled Company with an Affiliate of a Public Company or an Affiliate of a member of the Board of Directors, member of the Board of Commissioners, Major Shareholder, or Controller, including any activity and/ or transaction carried out by a Public Company or Controlled Company for the benefit of an Affiliate of the Public Company or an Affiliate of a member of the Board of Directors, member of the Board of Commissioners, Major Shareholders, or Controllers.

Compliance with the provisions on Affiliated Transactions is guided by Circular Letter No. SE.38-DIR/FMA/12/2025 dated December 31, 2025, concerning the Management of BRI's Reporting as a Public Company (Book 5 – Reporting of Affiliated Transactions). This Circular Letter regulates, among others:

1. Identification of Affiliated Parties;
2. Identification of Affiliated Transactions;
3. Pelaporan Transaksi Afiliasi yang mencakup:
  - a. Procedures for the implementation of Affiliated Transactions;
  - b. Categorization of Affiliated Transaction Reporting;
  - c. Exemptions from Affiliated Transaction Reporting;
  - d. Disclosure of Information;
  - e. Disclosure and Re-implementation of Affiliated Transaction Procedures.
4. Duties and Responsibilities of the relevant parties;
5. Process flow for the submission of Affiliated Transaction Reports.

The reporting of Affiliated Transactions to the Financial Services Authority (OJK) may be categorized as follows:

**Table of Information on the Reporting Categories of Affiliated Transactions to the Financial Services Authority (OJK)**

Category	Transaction Description	Obligations
Category 1	<p>Category 1 refers to Affiliated Transactions that must be reported to OJK and disclosed to the public. An Affiliated Transaction is classified as Category 1 if it meets one of the following criteria:</p> <ol style="list-style-type: none"> <li>1. Transactions between:               <ol style="list-style-type: none"> <li>a. BRI and a Controlled Company in which BRI holds less than 99% of the paid-up capital;</li> <li>b. Controlled Companies in which BRI holds less than 99% of the paid-up capital; or</li> <li>c. A Controlled Company and another company in which the Controlled Company holds less than 99% of the paid-up capital.</li> </ol> </li> <li>2. Transactions with a value exceeding 0.5% of BRI's paid-up capital or exceeding IDR5,000,000,000, whichever is lower.</li> </ol>	<ol style="list-style-type: none"> <li>1. Comply with the procedures for the implementation of Affiliated Transactions as stipulated under Article 3 and Article 4 of POJK No. 42/POJK.04/2020 concerning Affiliated Transactions and Conflict of Interest Transactions.</li> <li>2. Announce information disclosure for each Affiliated Transaction to the public in accordance with prevailing regulations; and</li> <li>3. Submit the information disclosure, appraisal report, and other supporting documents to OJK no later than 2 (two) working days after the date of the Affiliated Transaction.</li> </ol>
Category 2	<p>Category 2 refers to Affiliated Transactions that are required to obtain prior approval from Independent Shareholders at a General Meeting of Shareholders (GMS) before being reported to OJK and disclosed to the public. An Affiliated Transaction requires approval from Independent Shareholders at a GMS if:</p> <ol style="list-style-type: none"> <li>1. The value of the Affiliated Transaction meets the threshold of a Material Transaction that requires GMS approval;</li> <li>2. The Affiliated Transaction may disrupt the business continuity of BRI; and/or</li> <li>3. The Affiliated Transaction, based on OJK's consideration, requires approval from Independent Shareholders.</li> <li>4. The transaction is conducted between:               <ol style="list-style-type: none"> <li>a. BRI and a Controlled Company in which BRI holds less than 99% of the paid-up capital;</li> <li>b. Controlled Companies in which BRI holds less than 99% of the paid-up capital; or</li> <li>c. A Controlled Company and another company in which the Controlled Company holds less than 99% of the paid-up capital.</li> </ol> </li> <li>5. The transaction value exceeds 0.5% of BRI's paid-up capital or exceeds IDR5,000,000,000, whichever is lower.</li> </ol>	<ol style="list-style-type: none"> <li>1. Comply with the procedures for the implementation of Affiliated Transactions as stipulated under Article 3 and Article 4 of POJK No. 42/POJK.04/2020 concerning Affiliated Transactions and Conflict of Interest Transactions.</li> <li>2. Obtain prior approval from Independent Shareholders at a GMS;</li> <li>3. Announce information disclosure for each Affiliated Transaction to the public; and</li> <li>4. Submit the information disclosure referred to in point (d) above, along with the appraisal report and other supporting documents, to OJK no later than simultaneously with the announcement of the GMS.</li> </ol>

Category	Transaction Description	Obligations
Category 3	<ol style="list-style-type: none"> <li>1. Transactions carried out in compliance with prevailing laws and regulations or pursuant to a court decision;</li> <li>2. Transactions between: <ol style="list-style-type: none"> <li>a. BRI and a Controlled Company in which BRI holds at least 99% of the paid-up capital;</li> <li>b. Controlled Companies in which BRI holds at least 99% of the paid-up capital; or</li> <li>c. A Controlled Company and another company in which the Controlled Company holds at least 99% of the paid-up capital;</li> </ol> </li> <li>3. Transactions with a value not exceeding 0.5% of BRI's paid-up capital or not exceeding IDR5,000,000,000, whichever is lower;</li> <li>4. Loan transactions received directly from banks, venture capital companies, financing companies, or infrastructure financing companies, whether domestic or foreign;</li> <li>5. Transactions involving the provision of guarantees to banks, venture capital companies, financing companies, or infrastructure financing companies, whether domestic or foreign, for loans received directly by BRI or its Controlled Companies;</li> <li>6. Transactions involving the increase or decrease of equity participation to maintain the percentage of ownership, provided that such participation has been held for at least 1 (one) year;</li> <li>7. Transactions conducted by BRI as a financial services institution with a Controlled Company that is an Islamic financial services institution, in the context of developing such a Sharia financial services institution;</li> <li>8. Transactions conducted in the context of restructuring by BRI; and/or</li> <li>9. Transactions conducted by BRI upon being categorized as a financial services institution under certain conditions, as determined by OJK.</li> </ol>	Report to OJK no later than 2 (two) working days after the date of the Affiliated Transaction.
Category 4	Business activities conducted in the ordinary course of business to generate operating revenue and carried out on a routine, recurring, and/or continuous basis, including transactions categorized as operational expenditures (Operation Expenditure/OPEX).	<ol style="list-style-type: none"> <li>1. Comply with the procedures for the implementation of Affiliated Transactions as stipulated under Article 3 of POJK No. 42/POJK.04/2020 concerning Affiliated Transactions and Conflict of Interest Transactions.</li> <li>2. Disclose Affiliated Transactions that constitute business activities in BRI's Annual Report or Annual Financial Statements, which must include the following information: <ol style="list-style-type: none"> <li>a. The type of Affiliated Transaction;</li> <li>b. The transacting parties;</li> <li>c. The nature of the affiliated relationship;</li> <li>d. The transaction value; and</li> <li>e. A statement from the Board of Directors confirming that the Affiliated Transaction has complied with the procedures referred to under Article 3 of POJK No. 42/POJK.04/2020 concerning Affiliated Transactions and Conflict of Interest Transactions.</li> </ol> </li> </ol>

The Affiliated Transactions carried out in 2025 are described as follows:

## Affiliate Transaction Report

### Category 1

The Company has submitted reports on Category 1 Affiliated Transactions to the public and to the Financial Services Authority (OJK), among others as follows:

Table of Affiliated Transaction Category 1

No	Transaction Date	Type /Object of Transaction	Name of Affiliated Party	Nature of Affiliation
1	March 21, 2025	Purchase of land owned by PT Sang Hyang Seri	<ol style="list-style-type: none"> <li>1. BRI</li> <li>2. PT Sang Hyang Seri</li> </ol>	BRI and PT Sang Hyang Seri are controlled, directly or indirectly, by the same controlling party, namely the Government of the Republic of Indonesia.

9	December 31, 2025	Custodian	PT BRI Danareksa Sekuritas	BRI acts as the majority shareholder	18,069,185,246

In addition to the Affiliated Transactions described above, there are other transactions that are not presented in detail in this Annual Report. Such other Affiliated Transactions can be found in the Annual Financial Statements. Note 44 (Related Party Transactions)

### Fairness of Transactions

Transactions with affiliated parties were conducted in accordance with generally accepted business practices, including by complying with the arm's length principle.

### Affiliated Transaction Review Mechanism

Each Head Office Group acting as the Transaction Owner Work Unit, intending to enter into a transaction with an Affiliated Party, is required to submit the proposed transaction to the Corporate Secretary Group. In this regard, the Transaction Owner Work Unit must also coordinate with the Work Unit overseeing the compliance function and the Work Unit overseeing the legal function to ensure regulatory compliance. Furthermore, coordination with the Work Unit overseeing subsidiary synergy is required if the affiliated transaction is conducted with a Subsidiary. Compliance with the obligations relating to affiliated transactions is guided by Circular Letter No. 38-DIR/FMA/12/2025 dated 31 December 2025 concerning the Management of BRI Reporting as a Public Company (Book 5 – Reporting of Affiliated Transactions).

### Fulfillment of Related Rules and Conditions

In alignment with Financial Services Authority Regulation No. 17 of 2023 dated 14 September 2023 concerning the Implementation of Governance for Commercial Banks, and Minister of State-Owned Enterprises Regulation No. PER-2/MBU/03/2023 concerning Guidelines on Governance and Significant Corporate Actions of State-Owned Enterprises (SOEs), affiliated transactions between the Company and its Subsidiaries are synergies between banking business groups in the context of optimizing resources, supporting the implementation of business activities and providing added value to the BRI Group. Meanwhile, affiliated transactions with other affiliated parties are carried out in the context of mutually beneficial business synergies, efficiency/optimization in operational activities and providing added value for each party.

To ensure that affiliated and/or related party transactions are conducted fairly and in accordance with the Company's interests (arm's length transactions), each transaction with affiliated and/or related parties must undergo a review mechanism in accordance with the procedures established by the Company. All significant transactions and balances with affiliated and/or related parties are carried out under normal and arm's length terms and conditions.

## Statement of the Board of Directors Regarding Affiliate Transactions and the Role of the Board of Commissioners and Committee Regarding Affiliate Transactions

In this regard, the Board of Directors states that the affiliate transactions have undergone adequate procedures, are conducted in accordance with prevailing business practices, and comply with the arm's length principle as well as applicable laws and regulations. As part of the effort to ensure that such transactions are carried out in the best interests of the Company and to prevent potential conflicts of interest that may arise from the proposed affiliate transactions, the Audit Committee and the Risk Management Monitoring Committee (KPMR), in accordance with their duties and responsibilities, review and provide recommendations to the Board of Commissioners regarding any potential conflicts of interest. Accordingly, the affiliate transactions have complied with the arm's length principle. These affiliate transactions do not require approval from Independent Shareholders.

All affiliate transactions have been reported to OJK in accordance with POJK 42/2020. Furthermore, in addition to the transactions above, there are other Affiliate Transactions which are disclosed in the Related Party Transactions section.

## Related Parties Transaction

BRI and its subsidiaries had transactions with related parties as defined in PSAK Number 224 concerning "Related Party Disclosures". A party is considered related to BRI and its subsidiaries if:

1. Directly or indirectly through one or more intermediaries, a party (i) controls, or is controlled by, or is under common control with, BRI and its subsidiaries; (ii) has an interest in BRI and its subsidiaries that exerts significant influence over BRI and its subsidiaries; or (iii) has joint control over BRI and its subsidiaries;
2. A party related to BRI and its subsidiaries;
3. A party having a joint venture in which BRI and its subsidiaries are venturers;
4. A party is a member of the key management personnel of BRI and its subsidiaries or parent;
5. A party is a close family member of an individual described in point (1) or (4);
6. A party is a controlled entity that is jointly controlled or significantly influenced by or for which significant voting rights in several entities, directly or indirectly, an individual as described in point (4) or (5); and
7. A party is a post-employment benefit plan for employee benefits from BRI and its subsidiaries or entities related to BRI and its subsidiaries.

## Fairness and Reasons for the Transaction

In the normal course of business, BRI conducted transactions with related parties due to ownership and/or management relationships. Related party transactions occurred due to BRI's business needs. All transactions with related parties became subject to mutually agreed policies and terms. Transactions with related parties were conducted fairly in accordance with the interests of the Company (arm's length transaction). The transactions were carried out following the laws and regulations and were free from conflicts of interest.

## Disclosure References In Financial Statements

Details of related party transaction realizations (values) are presented in Note 44 of the attached Financial Statements in this Annual Report. These related party transactions are business activities conducted to generate operating income and are carried out on a routine, repetitive, and/or continuous basis.

## Fulfillment of Related Rules and Conditions

Transactions with affiliates and/or related parties are conducted under the same terms and conditions as transactions with third parties. The transactions undertaken by the Bank comply with the Financial Services Authority Regulation Number 42/ POJK.04/2020 concerning Affiliate Transactions and Conflicts of Interest Transactions (POJK 42/2020), at the time these transactions were executed. All material transactions and balances with related parties are disclosed in the relevant notes to the consolidated financial statements, and the details are presented in Note 44 of the consolidated financial statements.

## Related Party Transaction Review Mechanism

Each related party transaction is subject to adequate review, considering the type and substance of the transaction, particularly when occurring among entities within the same parent holding entity. The process of presenting related party information involves identifying transactions with related parties based on the latest related party list provided by the parent holding entity, which is updated periodically, thereby ensuring that all related party transactions are properly identified, recorded, and disclosed in accordance with the applicable standards.

To ensure that affiliate and/or related party transactions are conducted fairly and in accordance with the Company's interests (arm's length transactions), each transaction with affiliated and/or related parties must undergo a review mechanism in accordance with the procedures established by the Company. All significant transactions and balances with affiliated and/or related parties are conducted under normal and arm's length terms and conditions.

## Statement of the Board of Directors Regarding Related Transactions and the Role of the Board of Commissioners and Committee

The Board of Directors states that the affiliate and/or related party transactions have undergone adequate procedures, are conducted in accordance with generally accepted business practices, and comply with the arm's length principle as well as applicable laws and regulations.

As part of the effort to ensure that such transactions are carried out in the best interests of the Company and to prevent potential conflicts of interest that may arise from the proposed affiliate and/or related party transactions, the Audit Committee and the Risk Management Monitoring Committee (KPMR), in accordance with their duties and responsibilities, review and provide recommendations to the Board of Commissioners regarding any potential conflicts of interest. Accordingly, the affiliate and/or related party transactions have complied with the arm's length principle. Such affiliate and/or related party transactions do not require the approval of the Independent Shareholders.

## Changes In Law and Their Impact on Bank

Table of Changes in Legislation in 2024

No	Regulation	Key Provisions	Information on Adjustments Made	Impacts on Financial Statements
1	POJK No. 24 of 2025 concerning Account Management at Commercial Banks	<p>POJK No. 24 of 2025 was issued to strengthen governance in customer account management and enhance consumer protection in the banking sector. Previously, account management policies were determined internally by each bank, potentially resulting in inconsistent practices that could disadvantage customers. This regulation aims to provide legal certainty and protection for customers by standardizing account management practices across the banking industry and preventing the misuse of customer accounts.</p> <p>Financial Services Authority Regulation No. 24 of 2025 came into effect on its promulgation date, November 10, 2025. BRI is required to comply with the provisions under Article 4 and Article 10 paragraph (1) no later than six (6) months from the promulgation date, or at the latest by May 10, 2026, as follows:</p> <ol style="list-style-type: none"> <li>The obligation for banks to establish policies and procedures for the administration of current and savings accounts.</li> <li>The prohibition on charging administrative fees that result in negative account balances.</li> <li>The obligation to provide systems for the management of current and savings accounts and to classify such accounts as active, inactive, or dormant.</li> <li>The obligation to inform customers regarding the status of their current and savings accounts when classified as inactive, through the channels available at the Bank.</li> </ol>	<ol style="list-style-type: none"> <li>Establishing policies and procedures for the administration of current and savings accounts</li> <li>Ensuring that no administrative fees are charged that would result in negative balances.</li> <li>Providing systems to manage and classify current and savings accounts as active, inactive, or dormant.</li> <li>Delivering notifications to customers regarding account status when classified as inactive through the Bank's available channels.</li> </ol>	Has no impact on the Financial Statements.

## Accounting Policy Changes

Information regarding changes in accounting policies, reasons and their impact on financial statements is presented as follows.

Table of Changes in Accounting Policies

No	Accounting Policy Changes	Reason for the Accounting Policy Changes	Explanation of Consequences and Adjustments Made	Impact of Changes in Accounting Policies on the Financial Statements
1.	<p><b>Revision of PSAK 117</b></p> <ul style="list-style-type: none"> <li>Effective Date: 1 January 2025</li> <li>This revision covers the recognition, measurement, presentation, and disclosure of insurance contracts.</li> <li>PSAK No. 117 applies to all types of insurance contracts, including life and non-life insurance, direct insurance, and reinsurance, regardless of the issuing entity. It also applies to guarantees and certain financial instruments with non-binding participation features, with certain scope exemptions.</li> </ul>	<p>The overall objective of PSAK No. 117 is to provide a more useful and consistent accounting model for insurance contracts for insurers. PSAK No. 117 is adopted from IFRS 17 and replaces PSAK No. 104.</p>	<p>PSAK 117 introduces three new measurement models, namely the General Measurement Model (GMM), the Variable Fee Approach (VFA), and the Premium Allocation Approach (PAA).</p> <p>Changes also include the presentation of insurance contracts. Under PSAK 117, the statement of financial position separately presents the carrying amounts of:</p> <ol style="list-style-type: none"> <li>Issued insurance contracts that are assets</li> <li>Issued insurance contracts that are liabilities</li> <li>Held reinsurance contracts that are assets</li> <li>Held reinsurance contracts that are liabilities</li> </ol> <p>Amounts recognized in the statement of profit or loss and other comprehensive income are presented separately as:</p> <ol style="list-style-type: none"> <li>Insurance service results, consisting of insurance revenue and insurance service expenses</li> <li>Insurance finance income or expenses</li> </ol>	<p>accordance with PSAK No. 117, the statement of profit or loss and the statement of other comprehensive income are presented separately. The separation is reflected in the following line items:</p> <ol style="list-style-type: none"> <li>Insurance service revenue in 2025 amounted to IDR7,666,262,733 million.</li> <li>Insurance service expenses in 2025 amounted to IDR6,364,550 million.</li> <li>Finance expenses from issued insurance contracts amounted to IDR361,281 million.</li> </ol> <p>The above figures represent the consolidated financial results of BRI and its insurance subsidiaries, namely BRI Insurance and BRI Life.</p>
2.	<p><b>Amendment to PSAK 221</b></p> <ul style="list-style-type: none"> <li>Effective Date: 1 January 2025</li> <li>PSAK No. 221 provides guidance on how to incorporate foreign currency transactions and foreign operations into an entity's financial statements, and how to translate financial statements into the presentation currency.</li> </ul>	<p>The amendment to PSAK 221 refers to the IAS 21 amendment on Lack of Exchangeability.</p>	<p>This amendment requires entities to apply a consistent approach in assessing whether a currency is exchangeable into another currency and, if not, to determine the exchange rate to be used and the disclosures to be provided.</p>	<p>Updated BRI's internal accounting policies in accordance with the requirements set forth in PSAK 221.</p> <p>The implementation of PSAK 221 does not have a quantitative impact on BRI's financial statements.</p>

## Bank Soundness Level

Bank Soundness Level is assessed based on Financial Services Authority Regulation No. 4/POJK.03/2016 concerning Assessment of the Soundness of Commercial Banks using a risk approach (Risk-Based Bank Rating). Bank Soundness Level assessment is carried out on the Bank's risk and performance, which can be seen from the final rating of the assessment results.

Assessment of the Soundness of Commercial Banks using a risk approach (Risk-Based Bank Rating) is carried out with a scope of evaluation of the following 4 (four) factors:

1. Risk Profile
2. Good Corporate Governance (GCG)
3. Profitability (Earnings)
4. Capital

**Table of Individual BRI Soundness Level (Self Assessment)**

Rating Factor	2 <sup>nd</sup> Semester Assessment 2025	2 <sup>nd</sup> Semester Assessment 2024
	Rating	Rating
Risk Profile	2	2
Good Corporate Governance (GCG)	2	2
Profitability	3	3
Capital	2	1
<b>Risk-Based Bank Soundness Rating</b>	<b>2</b>	<b>2</b>

The soundness level of BRI Bank, using the risk-based assessment method (RBBR), is at Composite Rating 2 (PK 2) – SOUND, with the details for each assessment factor as follows: BRI's Risk Profile is rated 2 (Low to Moderate), GCG is rated 2 (Good), Profitability is rated 3 (Adequate), and Capital Adequacy is rated 2 (Adequate).

In addition to the soundness level mentioned above, BRI also conducts a soundness assessment performed by a rating agency. The rating provided as part of the soundness

assessment is the rating conducted by PT Peningkat Efek Indonesia (PEFINDO), which was signed on April 21, 2025, with the following results:

- a. Stand-Alone Rating : <sub>id</sub>AA+(sa)
- b. Final Rating: <sub>id</sub>AAA/Stable

Thus, the Soundness Level for BRI in Financial Year 2025 is Sound (AAA) as stipulated in the Regulation of the Minister of SOEs Number PER-2/MBU/03/2023.

The following is information on the definition of rating results by PEFINDO.

**Table of Definition of Ranking Results**

Ranking Results	Definitions
<sub>id</sub> AA	An obligor with an AA rating differs slightly from the highest rating and has a very strong ability to meet its long-term financial commitments compared to other obligors in Indonesia.  The plus sign (+) indicates that the given rating is relatively strong and above average within the relevant category.  The (sa) symbol indicates that the rating is a stand-alone rating.
<sub>id</sub> AAA/Stable	An obligor with an AAA rating is the highest rating given by PEFINDO. The obligor's ability to meet its long-term financial commitments, relative to other obligors in Indonesia, is superior.

## Business Continuity Information

### Details of Issues Arising During the Financial Year that Affected Business Activities

In 2025, there were no significant issues arising during the financial year that materially affected BRI's business activities.

### Potentially Influential and Significant to Business Continuity Ord

Threats to BRI's business continuity can come from potential disruptions/disasters caused by, among other things, nature (natural disasters), man-made disasters, and social disasters. To anticipate the impact of this potential disruption, the BRI Board of Directors developed and implemented a Business Continuity Management (BCM) Policy as outlined in Circular Letter No. SE.12 -DIR/MPE/09/2025 dated September 29, 2025 concerning Business Continuity Management (BCM). The objectives of the BCM policy include, among others, protecting the security and safety of BRI employees, their families, customers, and stakeholders in accordance with the existing Disaster Management Plan (RPB). Apart from that, BCM aims to maintain the continuity of the most important business/operational activities, safeguard BRI assets, and ensure an adequate response in all conditions, from normal to crisis and disaster recovery phases, until conditions return to normal (new normal). Currently, the challenges of BCM, apart from the 4 (four) factors above, are related to the digitalization of banking and financial systems, which can cause many disruptions, including cyberattacks.

In addition to threats from potential disruptions or disasters, BRI also faces business continuity risks arising from financial market disruptions. To anticipate the impact of such disruptions, BRI has developed and established a Contingency Funding Plan (CFP) and a Recovery Plan, in accordance with Law No. 4 of 2023 of the Republic of Indonesia, dated January 12, 2023, on the Development and Strengthening of the Financial Sector. The CFP policy outlines approaches and strategies to address liquidity crises, ensuring BRI's ability to obtain necessary funding in a timely manner and at a reasonable cost. In more severe conditions, BRI will implement the Recovery Plan to ensure the bank can resume its business operations in a viable and sustainable manner.

## Management Assessment of Matters with Potentially Significant Influence on Business Continuity, Including Assumptions Used

In order to implement proactive BCM, the BCM Policy has been updated, which consists of:

1. Risk and Threat Assessment (PRAB), Business Impact Analysis (BIA), Business Continuity Plan (BCP), Emergency Response Plan (ERP), Crisis Management Plan (CMP), Disaster Recovery Plan (DRP), and Socialization and Testing. To ensure the implementation of BCM and Occupational Safety and Health (K3), BCP trials have been carried out in the BRI Bank Critical Division, as well as socialization and trials of emergency response (Emergency Response) at the head office as well as all regional offices and their supervisory business units. BRI Bank business units have also carried out a Threat and Disaster Risk Assessment (PRAB)/Risk and Threat Assessment, which aims to identify the highest threats/disasters within the business unit and the resources needed to prepare for them.
2. Updates to BRI Bank's Emergency Funding Plan (CFP) and Action Plan (Recovery Plan) policies, which include aspects of updating early warning indicators and trigger levels, emergency funding strategies, and recovery options, as well as communication strategies for handling crises. Regular monitoring of early warning indicators and trigger levels is carried out. In addition, to ensure the readiness of the BRI organization in implementing CFP procedures, a contingency funding plan trial simulation was carried out to ensure the feasibility of CFP.

## Disclosure of the Governance Framework, Management and Control of Tax Aspect

BRI, as a State-Owned Enterprise (SOE) Bank that has gone public and is majority-owned by the Government of Indonesia, is committed to fulfilling its tax obligations under applicable regulations. To achieve better tax management, BRI applies taxation principles to ensure effective and efficient tax management while always complying with the prevailing tax laws and regulations.

On June 30, 2020, the Government issued Government Regulation in Lieu of Law (Perpu) of the Republic of Indonesia Number 1 of 2020, which was later enacted as Law Number 2 of 2020. It enacted Government Regulation (PP) Number 30 of 2020 concerning the Reduction of Corporate Income Tax

Rates for Domestic Taxpayers in the Form of Publicly Listed Companies, effective as of its promulgation on June 19, 2020. Subsequently, on October 29, 2021, the Government issued Law Number 7 of 2021 of the Republic of Indonesia concerning the Harmonization of Tax Regulations (UU HPP). These regulations stipulate, among other things, a reduction in the corporate income tax rate for domestic taxpayers and permanent establishments, from the previous 25% to 22% for the fiscal years 2020, 2021, 2022, and onward, along with an additional 3% tax rate reduction for domestic taxpayers meeting specific criteria.

Based on Certificate Number DE/1/2025-0193 dated January 6, 2026, and the monthly share ownership report from the Securities Administration Bureau, Datindo Entrycom, regarding BRI's share ownership throughout 2025, all the specific requirements to obtain the tax rate reduction facility for BRI's financial statements for the year ending December 31, 2025, have been fulfilled. As a result, BRI qualified for a 3% tax rate reduction incentive under the provisions of Article 5, paragraph (2) of Law Number 2 of 2020. Consequently, for 2025, Bank BRI applied a 19% tax rate in its Corporate Income Tax calculations.

Bank BRI adopts a tax approach that complies with all applicable tax regulations. The bank has established tax policies and strategies that are approved and reviewed annually by the Director of Finance at the time of submitting the Annual Corporate Income Tax Return (SPT Tahunan PPh Badan). In managing tax implementation, Bank BRI has set up a comprehensive and structured process, which includes:

1. The governance body (executive) responsible for formulating, reviewing, and implementing tax strategy is the Finance Director.
2. Bank BRI has internal tax guidelines for fulfilling tax obligations, outlined in BRI's Circular on Tax Provisions and the BRI Taxation Standard Operating Procedures, which serve as standards for all BRI Business Units.
3. Bank BRI identifies, manages, and monitors tax obligations under applicable regulations through continuous monitoring and reconciliation carried out by

the Financial and Management Accounting Division and related business units.

4. Bank BRI discloses tax information transparently, adhering to reporting guidelines for shareholders and the public.

Tax management was integrated with corporate governance and risk management, and supported by the digitalization of the tax reporting system, thereby enhancing transparency, administrative efficiency, and minimizing potential tax dispute risks. The tax strategy aligned with the sustainable development business strategy through compliance and transparency in tax payments to support state revenue and contribute to achieving the Sustainable Development Goals (SDGs), particularly SDG 8 – Decent Work and Economic Growth and SDG 16 – Peace, Justice and Strong Institutions.

Tax compliance was stipulated in the BRI Code of Conduct and has been disseminated to all relevant units. The Code of Conduct has also been published on the BRI website. Meanwhile, tax-related disclosures are presented in the Financial Statements and audited by an Independent Public Accounting Firm.

The primary stakeholder in taxation matters is the Government, represented by the tax authority, namely the Directorate of General Taxes (DJP). Therefore, Bank BRI consistently maintains good relations with tax authorities but refrains from engaging in public policy advocacy on taxation or from any efforts to influence tax authorities. BRI fully complies with all applicable tax laws and regulations, as well as tax policies issued by the Government. Operating only in Indonesia, with a few branches overseas, Bank BRI's tax reporting is exclusively conducted for Indonesia.

The BRI profile is presented in the Company Profile chapter, while the financial information is presented in the Management's Discussion and Analysis (MD&A) chapter of this Annual Report. The taxes paid have been in line with the Company's performance and profit generation.

**Table of Contributions to the State**

(in million IDR)

	Tax Types	Year 2025	Year 2024
<b>A</b>	<b>TAX</b>

Total Contribution to the State (Total A and B)		<b>56,020,569</b>	57,672,525

## Response to Change in Monetary Policy Direction

In 2025, Bank Indonesia's (BI) policy mix was focused on a measured monetary easing stance to support economic growth, while maintaining exchange rate stability and keeping inflation under control amid global uncertainty. In line with manageable inflation, BI gradually reduced the BI-Rate by 125 bps, from 6.00% to 4.75%. This policy reflects a shift toward a more accommodative monetary stance to support economic recovery and strengthen banking intermediation, while safeguarding macroeconomic stability and the resilience of the national financial system.

The monetary easing was accompanied by more expansionary liquidity management and the strengthening of a pro-growth macroprudential policy mix. Bank Indonesia enhanced liquidity availability in the financial system by optimizing various monetary instruments, including the management of securities and market operations, to maintain adequate Rupiah liquidity. On the macroprudential front, BI reinforced the Macroprudential Liquidity Incentive Policy (KLM), which is accommodative and performance-based, with the objective of lowering banking interest rates, increasing credit disbursement, and directing financing toward priority sectors with high multiplier effects on economic growth.

With the more accommodative policy mix, the transmission of monetary policy to the financial sector began to show improvement, particularly in the second half of 2025, although the pace of transmission was not yet evenly distributed. The decline in money market and deposit rates occurred more rapidly, reflecting the banking sector's initial response to the easing policy. However, adjustments to lending rates were implemented more gradually, in line with prudent risk management considerations and caution in responding to credit demand dynamics.

In the context of banking intermediation, credit demand continued to face challenges. In the first half of 2025, banking credit growth slowed to 7.03% year-on-year (yoy) in July 2025, down from 10.46% yoy in December 2024. The deceleration was driven by credit demand that had not fully strengthened, amid a wait-and-see stance among businesses and lending rates that remained relatively high. Nevertheless, credit growth gradually improved to 7.74% yoy in November 2025. Meanwhile, banking third-party funds (DPK) growth increased significantly to 12.03% yoy in November 2025, from 4.48% yoy at the end of 2024, indicating that banking liquidity conditions improved amid BI's accommodative policy stance.

Looking ahead, the strengthening of monetary policy transmission, supported by macroeconomic stability and adequate liquidity, is expected to further stimulate credit growth and reinforce the banking sector's role in supporting sustainable economic growth. BI projects that banking credit growth may increase to a range of 8%–12% in 2026, in line with the stronger transmission of monetary easing policies and continued coordination with the Government and the Financial System Stability Committee (KSSK).

In response to the benchmark interest rate adjustments and the monetary policies of BI and The Fed, BRI has selectively adjusted its deposit and lending interest rates (particularly for short-term loans). As of December 2025, BRI's SBDK has been adjusted in accordance with the implementation of OJK Regulation No. 13 of 2024, dated August 12, 2024, on the Transparency and Publication of Prime Lending Rates for Conventional Commercial Banks

## Prohibitions, Limitations and/or Significant Obstacles to the Legal Lending Limit Between Banks and other Entities in a Business Groups

In carrying out its business activities, BRI established a policy that includes limits on providing funds to related parties in accordance with the Regulation of the Financial Service Authority (OJK) of the Republic of Indonesia Number 32/POJK.03/2018 concerning Legal Lending Limits (BMPK) and Provision of Large Funds for Commercial Banks and OJK Regulation No. 38 /POJK.03/2019 concerning Amendments to POJK No. 32/POJK.03/2018 Concerning BMPK and Provision of Large Funds for Commercial Banks.

### Provision of Funds to Related Parties and Large Amount of Funds

In carrying out its intermediation function, the Bank manages fund allocation, including funds distributed as loans. This fund allocation must be subject to risk mitigation and portfolio diversification through limitations imposed on both Related Parties and nonRelated Parties, up to a certain percentage of the Bank's Capital or Core Capital (Tier 1), known as the Legal Lending Limit (BMPK) and Large Exposure. In this regard, to support Indonesia's economic growth and national competitiveness, the Regulator has provided flexibility or exemptions in implementing the BMPK and Large Exposure rules while maintaining prudential principles in loan disbursement. BRI has established policies related to fund allocation for Related Parties, Large Exposure, and other parties with an interest in the Bank, as regulated in the BRI Board of Directors Circular Letter No. SE.27-DIR/KRD/10/2024 dated October 29, 2024.

### Policy of Giving Loan to the Board of Directors and Board of Commissioners

Granting loans to the Board of Directors and the Board of Commissioners was included in the provision on Related Parties, and such loans had to be approved by the Board of Commissioners. Funding for Related Parties had been regulated by the Financial Service Authority (OJK) and the Company's provisions, namely the BRI Loans Provision Minimum Limit Policy. The provisions and procedures for extending loans to the Board of Directors and the Board of Commissioners were applied the same as for extending loans to prospective BRI Bank debtors in

general, and were given at market interest (market rate) and on a reasonable (arm's length) basis, while taking into account the principle of prudence.

### Mechanism for Provision of Funds to Related Parties

1. Provision of Funds to Bank Related Parties was submitted independently or collectively through the Credit Operation Division and had to obtain approval from the Board of Commissioners.
2. The Secretary of the Credit Committee submits the results of the approval request for follow-up according to the approval decision.
3. Provision of Special Funds (especially loans) to the Board of Directors and Board of Commissioners had to be carried out in a fair and reasonable manner (equal treatment).

### Provision of Funds to Related Parties

Provisions regarding the setting of BMPK limit were that the Portfolio of provision of funds to Related Parties with a Bank as a whole was set at a maximum of 10% (ten percent) of the Bank's Capital. Other regulated party provisions were:

1. Banks were prohibited from providing funds to Related Parties that were contrary to the general procedures for the provision of funds.
2. Banks were prohibited from providing funds to Related Parties without the approval of the Bank's Board of Commissioners.
3. Banks were prohibited from purchasing low-quality assets (assets that were of substandard, doubtful, or loss quality and/or have been restructured) from Related Parties.
4. In the event that the quality of providing funds to Related Parties declined to substandard, doubtful, or loss, the Bank was required to take steps to correct it by:
  - a. Repayment of loans no later than 60 (sixty) days after the decline in the quality of provision of funds; and/or
  - b. Conducted loans restructuring since the decline in the quality of the provision of Funds.
5. In the event that a Bank provided funds in the form of Equity Participation, which caused the party where the Bank made the Equity Participation to become a Related Party, the Bank was required to ensure:
  - a. Fund Provision Plan was set at a maximum of 10% (ten percent) of Bank Capital;

- b. Provision of funds that would be and had been given to parties in which the Bank made Equity Participation after being added to the entire portfolio of provision of funds to Related Parties was set at a maximum of 10% (ten percent) of Bank Capital;
- c. Meet the conditions referred to in points 1, 2 and 3

Related parties included:

1. Individuals or companies that controlled the Bank.
2. Legal entity in the event that the Bank acted as a controller.
3. Companies in the case of individuals or companies as referred to in point 1 act as controllers.
4. Members of the Board of Directors, members of the Board of Commissioners, and Bank Executive Officers.
5. Parties who had family relations horizontally or vertically:
  - i. From individuals who were controllers of the Bank as referred to in point 1; and
  - ii. From members of the Board of Directors and/or members of the Board of Commissioners at the Bank as referred to in point 4;
6. Members of the Board of Directors and/or members of the Board of Commissioners in the company as referred to in points 1, 2 and/or 3.
7. Companies of which members of the Board of Directors and/ or members of the Board of Commissioners were members of the Board of Commissioners at the Bank.
8. Companies in which 50% (fifty percent) or more members of the Board of Directors and/or members of the Board of Commissioners were Directors and/or Commissioners of the company as referred to in points 1, 2 and 3. The amount of 50% (fifty percent) or more was calculated from the total cumulative Board of Directors and/or Board of Commissioners.
9. Companies that:
  - a. Members of the Board of Directors, members of the Board of Commissioners, and/or Bank Executive Officers acted as controllers; and
  - b. Members of the Board of Directors and/or members of the Board of Commissioners from the parties referred to in points 1, 2 and/or 3 acted as controllers.
10. Collective Investment Contract in which the Bank and/or the parties referred to in points 1-9 own 10% (ten percent) or more shares in the collective investment contract investment manager.
11. Companies that had financial relationships with Banks and/ or parties referred to in points 1-9 above.
12. The borrower was an individual or a non-bank company that had a financial relationship through providing guarantees to the parties referred to in points 1-11.
13. Borrowers who had financial relationships through guarantees provided by the parties referred to in points 1-11.
14. Other banks that had financial relationships through the provision of guarantees to the parties referred to in points 1-11 in the event that there was a counter guarantee from the Bank and/or the parties referred to in points 1-11 to the other bank.
15. Other companies in which there was an interest in the form of share ownership of 10% (ten percent) or more individually or jointly, from the parties referred to in point 5.

### Provision of Funds to Parties other than Related Parties

1. Provision of funds to:
  - a. 1 (one) Borrower other than a Related Party; or
  - b. 1 (one) group of Borrowers other than Related
2. Provision of funds to 1 (one) borrower other than Related Parties or 1 (one) group of Borrowers other than Related Parties is set at a maximum of 25% (twenty five percent) of the Bank's Core Capital (Tier 1).
3. Banks were required to determine the classification of Borrowers in a group of borrowers in the event that the Borrower had a controlling relationship with other Borrowers through ownership, management and/or financial relationships.
4. Classification of Borrowers with the following criteria:
  - a. The Borrower was the controller of other Borrowers;
  - b. 1 (one) party that was the controller of several Borrowers;
  - c. 50% (fifty percent) members of the Board of Directors and/ or members of the Borrower's Board of Commissioners become members of the Board of Directors and/or members of the Board of Commissioners at other Borrowers;
  - d. The Borrower had financial relationships with other Borrowers; and/or
  - e. The Borrower had a financial relationship in the form of issuing guarantees to take over and/or pay off part or all of the obligations of other Borrowers in the event that another Borrower failed to fulfill obligations to the Bank.
5. Borrower Group classification does not apply to:
  - a. Provision of funds Facilities provided by Banks to debtors in general Bank business activities; and
  - b. Providing guarantees by insurance companies, guarantee companies, the Government of the Republic of Indonesia, and/or governments of other countries.
  - c. Provision of loans to debtors through companies using the forwarding method.
  - d. Providing loans with a nucleus-plasma partnership pattern with a core company scheme guaranteeing loan to plasma.

- e. Provincial government and district/municipal government as well as between each district/city government.

## Provision of Funds

Provision of funds that were considered in the calculation of BPMK and Provision of Large Funds were all provisions of funds in the position of the banking book and trading book.

1. Types of Provision of funds, namely:
  - a. Placement;
  - b. Derivative transactions;
  - c. Securities;
  - d. Securities under agreement to repurchase (repo);
  - e. Securities under agreement to (reverse repo);
  - f. Acceptance bills;
  - g. Loans;
  - h. Equity capital;
  - i. Temporary equity participation;
  - j. Administrative account transactions; and
  - k. Other forms of fund provision that may be equated with those referred to in letters a through j.
2. Provision of Bank Funds to SOEs for development purposes was set at a maximum of 30% (thirty percent) of Bank Capital.
3. Provision of funds to SOEs for development purposes such as Provision of funds for:
  - a. Food procurement;
  - b. very simple Home procurement;
  - c. Procurement, supply and/or management of oil and natural gas as well as alternative natural sources of energy that are equivalent;
  - d. Procurement, supply and/or management of water;
  - e. Procurement, provision and/or management of electricity;
  - f. Procurement and/or management of export-oriented commodities;
  - g. Procurement of instructors supporting land, sea, and air transportation in the form of construction of roads, bridges, railroads, seaports, and airports; and/or
  - h. The development of the National Tourism Strategic Area (KPSN) which was determined and prioritized by the central government.

## Credit Risk Mitigation Techniques

BRI was required to apply an Credit Risk Mitigation (MRK) technique that met certain requirements in calculating BPMK in the event that BRI recognized the existence of collateral, guarantees, guarantees or loan insurance as an Credit Risk Mitigation technique in calculating weighted assets according to credit risk using the standard approach by referring to the provisions of the Financial Service Authority (OJK) which regulated regarding guidelines for calculating risk-weighted assets for credit risk using a standardized approach.

## Exceptions from the Calculation of Legal Lending Limit (LLL)

Placements at each Prime Bank were excluded from the BPMK calculation with the following provision:

1. Legal Lending Limit Section for Borrowers who obtain guarantees from Prime Bank.
2. Legal Lending Limit to the Central Government.
3. Placement with Bank Indonesia.
4. Purchase of Securities issued by the Government of the Republic of Indonesia and/or Bank Indonesia.
5. The Legal Lending Limit Division, which obtained guarantees from the Government of the Republic of Indonesia under certain conditions.
6. Export-oriented Legal Lending Limit to financial institutions and the Legal Lending Limit Division, which obtains guarantees from financial institutions that meet certain requirements
7. The portion of the Legal Lending Limit guaranteed by certain collateral meets certain requirements.
8. Provision of funds that have become a deduction factor, Capital as referred to in the Financial Services Authority Regulation.

## Exceeding Legal Lending Limit (LLL)

### Excess Conditions

Legal Lending Limit by BRI was categorized as exceeding the BMPK, caused by:

1. Decrease in Capital or Core Capital (Tier 1);
2. Changes in exchange rate;
3. Changes in fair value;
4. Business mergers, changes in ownership structure, and/or changes in management structure that caused changes in Related Parties and/or Borrower groups;
5. Changes in provisions (regarding changes to parties categorized as Related Parties or Borrower groups).

The determination of Borrowers in the calculation of BMPK exceedance is carried out in accordance with the provisions for the calculation of Fund Provision. The BMPK exceedance is calculated based on the recorded value as of the reporting date.

## Settlement of Violations and Excessing of LLL Bookings

During 2025, BRI has never violated or exceeded the BPMK. In the event that the Bank violates and/or exceeds the BPMK, BRI is required to prepare a follow-up plan for the settlement of BPMK violations and/or exceedances, along with a target completion time.

Table of BPMK Violations and Exceedings

BMPK	Related Parties	Not Related Parties	Unrelated Parties (Borrower Group)	SOEs
Violations of BMPK	-	-	-	-
Exceeding of BMPK	-	-	-	-

## Reporting

### External Report

BRI submitted reports on Provision of Funds, Provision of Large Funds, Exceptions to Provision of Large Funds, Violations of BMPK or Exceedings of the BMPK, individually and on a consolidated basis, to the Financial Service Authority (OJK) periodically.

### Internal Report

Internally, BRI prepared BMPK reports involving business units related to the following mechanism:

- As a basis for determining BMPK and the provisions of Large Exposure, the FMA Group provides data on BRI's last position of Capital to the Group in charge of the loan portfolio.
- The Head Office Business Group, Branch Offices, UKLN, Division/ Desk in charge of Subsidiary Entities, and related units report the data required for reporting according to their respective functions to the Group in charge of the loan portfolio.
- The Group in charge of the loan portfolio consolidates and prepares BMPK and the provisions of Large Exposure, and submits them to the Board of Directors and Board of Commissioners.

### BRI Internal LLL

- As a form of prudence and risk appetite, BRI sets a maximum internal BMPK amount of 85% of the BMPK determined by the Financial Service Authority (OJK) per obligor.
- BRI's distribution of loan funds was focused on the MSME segment.

## Transactions to Related Parties

In 2025, transactions with related parties (related party transactions) were carried out in a fair, normal commercial terms, on an arm's length basis, with the following details:

Table of Legal Provision Funds to Related Parties and Provision of Large Funds

Provision of Funds	2025		2024	
	Debtors	Outstanding (in IDR million)	Debtors	Outstanding (in IDR million)
1. To Related parties	667	18,656,883	671	17,495,695
1. To Core Debtors				
a. Individual	50	242,229,198	50	158,229,350
b. Group	50	314,840,547	50	211,909,460

## Spot and Derivative Transactions

Spot transactions and derivative instruments undertaken by BRI are conducted within a prudent risk management framework, in compliance with applicable regulatory requirements and prevailing best practices in the banking industry. All derivative activities are intended to support hedging strategies, enable the management of measured risk exposure, and fulfill the transaction needs of customers and the Company.

The derivative instruments and spot transactions carried out by BRI are generally used to manage foreign exchange and interest rate risk, including implementing hedging strategies for foreign currency-denominated assets and liabilities, as well as supporting liquidity management in foreign currency. All such activities align with the Company's role as a financial intermediary, upholding market integrity, regulatory compliance, and sustainable risk management practices.

Throughout 2025, BRI conducted spot and derivative transactions, including forward contracts, foreign exchange swaps, interest rate swaps, and options, all aimed at supporting the management of foreign exchange and interest rate risk. The management of these instruments was carried out in an integrated manner and consistently aligned with the prevailing governance framework and risk management policies.

#### Table of Spot and Derivative Transaction

(In Million IDR)

Transactions	Derivative Bills		Derivative Liabilities	
	2025	2024	2025	2024
Foreign currency swaps	651,230	409,454	383,297	656,917

Currency Option	12,328	-	9,798	-
<b>Total</b>	<b>1,167,029</b>	<b>1,087,048</b>	<b>1,101,753</b>	<b>1,585,120</b>

## Report on Additional Use of State Capital Participation (PMN)

Based on the Regulation of the Minister of State-Owned Enterprises of the Republic of Indonesia Number PER-2/ MBU/03/2023 concerning Guidelines for Governance and Significant Corporate Activities of State-Owned Enterprises Additional State Capital Participation (PMN) is the separation of state assets from the state revenue and expenditure budget which is used as capital of SOEs and/or Limited Liability Company and managed corporately. In accordance with the provisions in Article 110 PER-2/ MBU/03/2023:

- (1) Additional PMN is carried out with the aim of:
  - a. Improving the capital structure of SOEs or Limited Liability Company; and/or
  - b. Increasing the business capacity of SOEs or Limited Liability Companies.
- (2) Additional PMN to SOEs as intended in paragraph (1) is used in the context of:
  - a. Carrying out Government assignments to SOEs;
  - b. Carry out restructuring and/or rescue of SOEs; and/or
  - c. Carry out SOEs business development.

In 2025, BRI did not receive additional State Capital Participation (PMN), so there is no information on the Report on the Use of Additional State Capital Participation.

# Business Support Functions Overview

**"BRI consistently strengthens its Human Capital as a strategic enabler of business transformation by ensuring alignment between talent and corporate strategies."**

# Human Capital

BRI's Human Capital Vision is "Home for the Best Talent (*Rumah bagi Talenta Terbaik*)," which consistently focuses on the career development and capability enhancement of its employees. Throughout 2025, BRI focuses on an end-to-end human capital transformation, prioritizing the human capital management cycle.

## 1. Recruitment, Talent Management, & Succession Plan

Talent is viewed as the most valuable asset that determines BRI's quality, competitiveness, and sustainability in the future; therefore, its management becomes a priority in the Company's strategic initiatives. As a manifestation of its commitment to ensuring the best talent quality, in 2025, BRI implemented a revamp of the Brilian Future Leader Program (BFLP) through the development of specialization tracks, the enhancement of the selection system, and the optimization of the recruitment process, resulting in improved effectiveness, higher selection quality, and faster fulfillment of organizational needs. In addition, BRILIANEXT serves as a platform to prepare and nurture future leaders in Indonesia's banking industry by providing top graduates with opportunities to earn Golden and Silver Tickets for the BRI management trainee pathway. Furthermore, as part of its commitment to leadership sustainability, BRI compiled the Book of Leaders to map and prepare top talent for future leadership roles, while ensuring strong, sustainable leadership continuity.

## 2. Performance Management, Compensation, & Productivity

In 2025, BRI also enhanced its Performance Management System framework through careful integration, complemented by a compensation design that emphasizes the principles of differentiation, fairness, simplicity, and consistency as a strategic foundation for driving superior performance. Each process within this system is harmoniously structured to align work-unit achievements with individual contributions, fostering a sustainable, high-performance culture. To further encourage employee productivity and peak performance, BRI refined the Productivity & Performance Enhancement Program (PPEP), a strategic initiative that optimizes employees to meet minimum performance standards.

## 3. Human Capital Operating Model

The refinement of the HC operating model was carried out to strengthen the strategic role of the HC Business Partner (HCBP) as a trusted business

partner. This was supported by a more comprehensive HC capability-building program design, including competency remapping, strengthened onboarding, expanded certification, intensive peer coaching, and enhancements to the Regional HCBP Playbook as a best-practice reference and as part of efforts to prepare BRI's HCBPs to serve as strategic problem solvers and value creators. In addition, to strengthen the role of HC, a quality assurance function has been implemented to ensure the quality of BRI's human capital policy implementation across the end-to-end human capital management cycle.

## 4. Culture and Well-being

As part of strengthening the corporate culture, BRI carried out the socialization and internalization of the latest Brilian Way through a measured and sustainable communication strategy. This implementation was accompanied by the measurement of effectiveness and alignment across the entire human capital lifecycle to ensure that the Brilian Way values are consistently embedded in every aspect of employee management. As a manifestation of BRI's commitment to ensuring employee well-being, creating *Insan Brilian* who are healthy, safe, comfortable, and happy, while also enhancing the Employee Value Proposition (EVP), BRI introduced the "Teman Cerita Brilian" psychological or counseling service in collaboration with selected professional psychologists and counselors.

## 5. BRI Group Synergy

In supporting the implementation of financial conglomeration governance as stipulated under Financial Services Authority Regulation (POJK) No. 30 of 2024 concerning Financial Conglomerates and Financial Conglomerate Holding Companies, and in order to optimize the contribution and performance of all Subsidiaries, BRI continuously strengthens synergy in managing an integrated human capital lifecycle across the BRI Group. Such synergy includes aligning General Policies, performance management, rewards, learning and development, HCIS, people analytics, and talent mobility. As the parent company, BRI also conducts assessments of human capital maturity across the BRI Group.

## Human Capital Management Framework and Strategy

BRI formulates its human capital (HC) management strategy in alignment with the Company's aspirations and corporate strategy. This is carried out by considering the role and involvement of BRI's human capital as a business enabler and as part of efforts to achieve BRI's HC vision. To support this function, BRI's human capital is organized into several Groups that encompass various end-to-end human capital functions under the Human Capital Sub Directorate.

The management of human capital at BRI (BRI HC Lifecycle) begins by gathering business strategy inputs from the company, including both short- and long-term strategies that will guide BRI HC in developing and implementing people processes. The BRI HC Lifecycle consists of six (6) stages of human resource management at BRI, namely:

1. Align: Through the development of strategies and planning.
2. Attract: Through the recruitment process and onboarding of new employees.
3. Evolve: Through learning and development programs.
4. Accomplish: Through performance management.
5. Engage: Through the provision of rewards and career management.
6. Offboard: Through exit policies and retirement programs.

BRI's human capital management also takes into account various aspects, including customers, employees, the government, national and global alliances, the media, as well as partners collaborating with BRI. BRI's human capital management involves the roles of various parties, such as BRI as a company and related stakeholders including customers, employees, the government, national and global alliances, the media, and partners collaborating with BRI. In this regard, HC management needs to be supported by harmonious industrial relations (IR), a human capital information system (HCIS), technology, people analytics, and creative HC communication.

In 2025, the strategic theme of BRI's human capital is strengthening the HC strategic foundation for managing BRI's human capital lifecycle, with a focus on recruitment, talent management, succession plan, human capital operating model, productivity, performance management, compensation, culture, and well-being.

## Human Resources Management Policy and Implementation

### Recruitment

#### Policies

In navigating the increasingly complex, digital, and competitive financial industry landscape, BRI views talent management as a strategic asset of the Company in safeguarding sustainable performance and long-term growth. The business transformation undertaken by BRI requires an adaptive, highly competitive organizational capability that can respond to changes in a timely and precise manner.

Global competition to attract top talent, particularly in critical competencies and specialized areas, continues to intensify amid the limited availability of high-quality human capital (talent scarcity). This condition has elevated talent management from being merely operational to an integral part of corporate strategy, ensuring leadership continuity, operational stability, and the Company's innovation capability.

In response to these challenges, BRI consistently strengthens its Human Capital as a strategic enabler of business transformation by ensuring alignment between talent and corporate strategies. BRI is committed to becoming an employer of choice as well as the Home to the Best Talent. In this regard, BRI has initiated several strategic measures, including:

#### 1. Strategic Workforce & Capability Planning

BRI aligns workforce planning and capability development with the Company's strategic business priorities to ensure the availability of critical talent that supports transformation initiatives, future growth, and risk mitigation.

#### 2. Talent Attraction

BRI consistently expands access to potential talent, particularly among younger generations, through employer branding, engagement, and strategic recruitment programs that attract the best candidates from diverse backgrounds.

#### 3. Strengthening Specialized & Critical Talent

BRI proactively develops and acquires talent with specialized expertise and critical competencies, particularly in strategic areas such as technology, risk, and priority business segments, to ensure organizational readiness to address industry complexity and future demands.

#### 4. Embedding Culture into Recruitment & Talent Selection

BRI consistently integrates Brilian Way values into all talent management processes, including recruitment and selection, to ensure that from the outset, BRI builds a strong organizational foundation through individuals

who not only demonstrate excellence in competencies but also uphold alignment with values, integrity, and corporate culture.

**5. Digital Enablement & Optimization of HR Technology**

BRI optimizes the use of Human Capital technology and digital systems in the recruitment process to enhance decision quality, process efficiency, and transparency, as well as the overall candidate experience, while supporting a more agile, data-driven, and integrated organization.

By implementing these strategies, BRI remains committed to continuously building organizational capabilities, strengthening talent competitiveness, and ensuring the sustainability of the Company's transformation over the long term.

In addition, as a flagship program under the BRILiaN Future Leader Program (BFLP), BRI prepares the best young talents to grow into future leaders who are professional, uphold integrity, and are adaptive to change. A specialization-based approach has been designed to ensure that BFLP participants gain structured learning experiences, in-depth business exposure, and opportunities to contribute directly to the Company's strategic areas. Through a combination of learning, mentoring, and real on-the-job assignments aligned with their respective fields, BFLP cultivates leaders who are not only technically proficient but also possess a holistic business perspective and embody the Brillian Way values. The BFLP specialization tracks include:

1. **BFLP Micro Banking**  
Develops young leaders who are close to the community, understand the micro business ecosystem, and play an active role in promoting financial inclusion and community-based economic empowerment.
2. **BFLP CSME (Commercial, Small & Medium Enterprise)**  
Cultivates talents capable of supporting MSME growth, analyzing business opportunities in productive sectors, and contributing to the strengthening of the national economy.
3. **BFLP Wealth Management**  
Prepares competent professionals in wealth management, financial planning, and sustainable relationship management with priority customers.
4. **BFLP Wholesale Banking**  
Equips talents with strategic experience in corporate financing, project financing, and institutional banking services.
5. **BFLP Consumer**  
Develops talents focused on retail banking products and services management, enhancement of customer experience, as well as expansion of market penetration and financial inclusion within the consumer segment.

6. **BFLP Audit**  
Develops future leaders who help maintain the effectiveness of internal controls, accountability, and good corporate governance.
7. **BFLP Risk Management**  
Builds talents capable of identifying, managing, and mitigating various risks to support BRI's business resilience and sustainability.
8. **BFLP IT (*Information Technology*)**  
Prepares future leaders in technology by developing digital systems, data, infrastructure, and cybersecurity.
9. **BFLP Business Enabler**  
Provides cross-functional exposure to ensure talents gain a comprehensive understanding of BRI's strategy, operations, and business ecosystem.

Seeing the phenomenon of the talent war in attracting outstanding BRILiaN talent, BRI continuously innovates to enhance its appeal more creatively through various sources (Multi Source) and channels (Multi Channel).

**A. Multi Source**

1. **Regular**
  - a. **National Recruitment**  
Recruitment was carried out by the head office to meet the needs of prospective leaders in all business unit both at home and abroad (ex. BRILiaN Future Leader Program).
  - b. **Regional Recruitment**  
Recruitment is carried out at the BRI Regional Office and Head Office to fulfill the need for workers in certain positions or functions.
2. **Multi Source**
  - a. **BRILiaN Scholarship Program (BSP)**  
An early recruitment program designed to attract potential young generation and as a means of character development before becoming employees of BRI through the Bank's Employee Recruitment Program.
  - b. **BRILiaN Internship Program (BIP)**  
An internship program offering opportunities for high school/vocational school graduates, students, or fresh graduates to gain work experience at BRI's Business Units while providing support for the BRI Unit operations.
  - c. **BRILIANEXT**  
A strategic talent engagement and early recruitment program organized by BRI as part of its efforts to strengthen relationships with the academic ecosystem and attract top talent.

## B. Multi Channel

In addition to various sources of talent search (multi source), BRI prepared various entry channels (multi channel), there were 5 (five) entry channels, namely:

1. BRILiaN Future Leader Program (BFLP): A recruitment and education program to attract potential candidates and provide education as provisions to become future leaders from external sources.
2. BRILiaN Next Leader Program (BNLP): Recruitment and education program for BRI Internal Workers who have great potential to become future company leaders.
3. BRILiaN Banking Associate Program (BBAP): A recruitment and development program designed to prepare new employees at the Associate corporate title level, sourced from both external and internal candidates, to support the Company's performance in accordance with BRI's operational standards and prevailing corporate values.
4. BRILiaN Specialist Hiring Program (BSHP): a recruitment program aimed at hiring employees with specialized skills in specific areas that align with the company's needs. The recruitment of employees through BSHP is intended to fulfill the bank's need to fill certain positions or roles, which include:
  - a. Positions related to new products/activities or new fields due to the company's organizational development, where the company does not yet have employees with adequate specialized skills in those areas.
  - b. A shortage of employees with specialized skills in certain fields, where the number of internal employees proficient in those areas is very limited.
  - c. There was an urgent need to fill such positions where it is not feasible to develop the specialized skills of internal employees in a short period.

## Recruitment Implementation

In 2025, BRI carried out recruitment as follows:

1. BFLP: Throughout 2025, the BFLP Specialist Program was conducted in three recruitment waves, covering nine (9) specialization areas that candidates could choose from, with an average time to hire of one (1) month.
2. BBAP: The BBAP program was implemented at the Head Office and each BRI Regional Office to fulfill staffing needs for both marketing roles (such as Junior Associate Mantri, Relationship Manager, and others) and non-marketing roles (such as Priority Banking Assistant, IT Officer, and others), in accordance with the requirements of each work unit, with an average time to hire of one month.

3. Experienced and Professional Hire: BRI conducted Experienced Hire and Professional Hire recruitment to meet specific needs for experienced talent in critical positions across business lines, IT, and other supporting functions, prioritizing competency-, experience-, and performance-based selection, supported by an agile recruitment process.

## Competency Development

Information on employee competency development can be found in the Company Profile Chapter.

## Talent Management

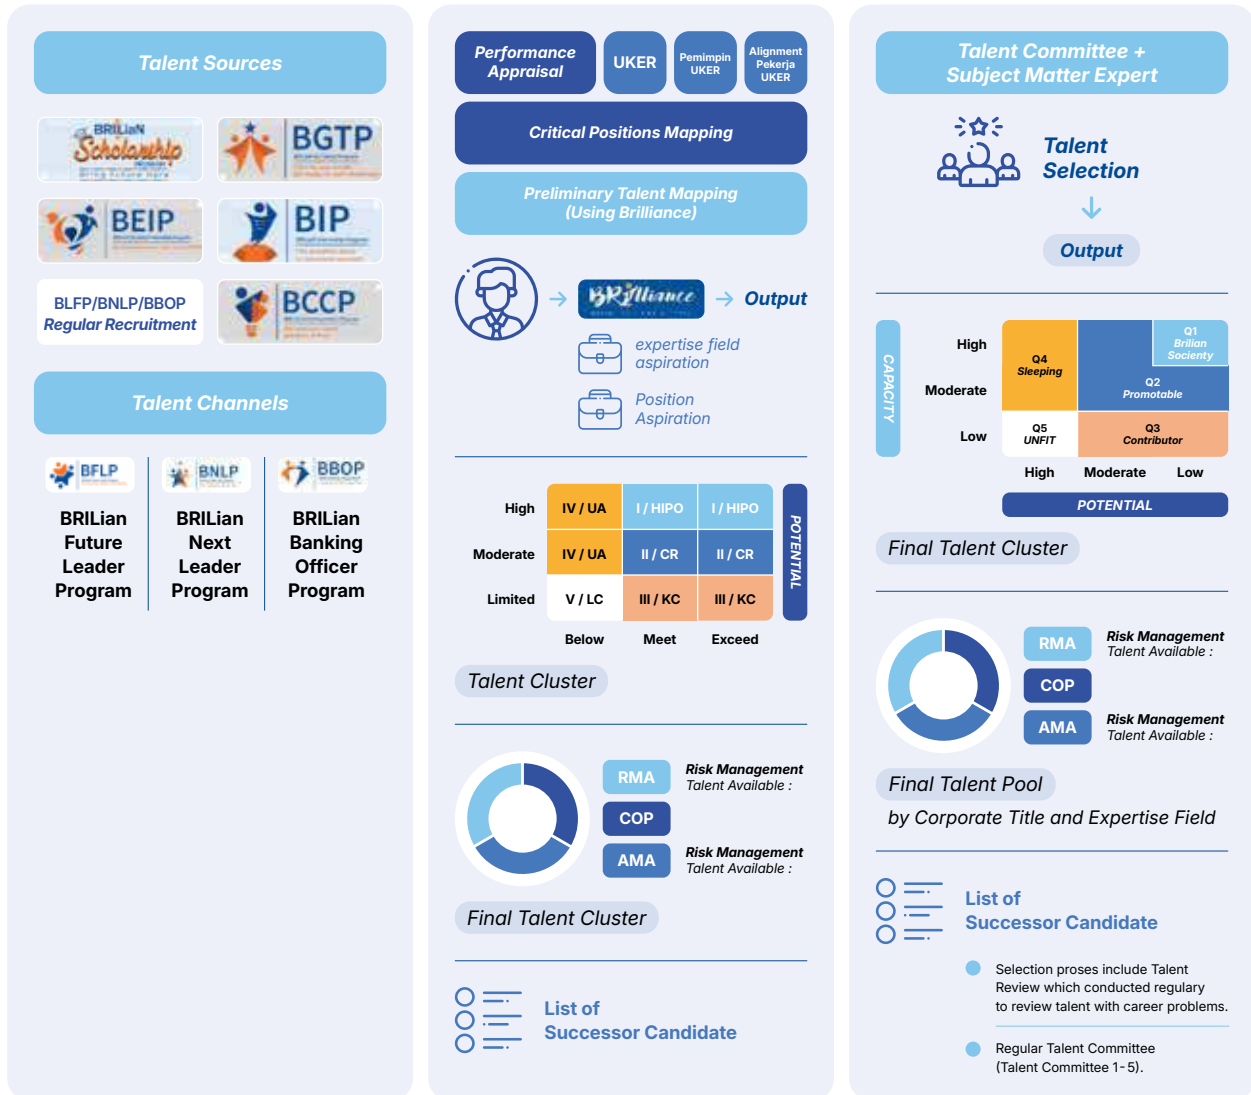

### Policies

BRI implements a Talent Management System as an integrated framework for talent management, encompassing five stages: Attraction, Identification, Selection, Development, and Succession.

1. The Attraction Stages, BRI prepared Talent Sources and Talent Channels to attract the best candidates for BRI. Some programs include Regular Recruitment and Talent Scouting. The talent channels designed by BRI include BFLP (Brilian Future Leader Program), BNLP (Brilian Next Leader Program), and BBAP (Brilian Banking Associate Program).
2. The Identification Stages is a grouping of BRI employees based on aspirations, individual assessment (annual performance), and competency, and clustering into the Human Asset Value Matrix and areas of expertise (talent pool).
3. The Selection Stages: Employees were categorized into talent clusters based on performance and competence. The results are then calibrated as the basis for selecting and determining Top Talent for the year. Employees selected as Top Talent receive specialized development programs to prepare them as a pool of successors and future leaders.
4. The Development Stages, Workers will be given development programs according to their needs, whether based on talent clusters, Corporate Titles, or Worker roles. This helps in the succession search process, especially for Key Strategic Positions. Some development programs include character, professional, leadership, and technical competencies.
5. The Succession Stage refers to the process of selecting candidates to be placed in critical positions as successors through talent promotion or rotation (succession planning). This stage is designed to ensure the availability of successor candidates and their readiness for specific positions, thereby ensuring the strategic continuity of key roles within the organization.

## Development Program

In line with this development concept, Insan BRILian will go through a series of education to develop their potential to become a Great Talent & Great Leader in accordance with the BRILiaN Development Journey, namely:

1. Brilian Leader Development Program (BLDP): An educational program designed to prepare employees to become global leaders through sustainable and comprehensive leadership development, with an emphasis on strengthening character, national insight, global perspective, business and banking acumen, and technological understanding.
2. Brilian Specialist Development Program (BSDP): A continuous and comprehensive technical competency development program designed to enhance specific knowledge and skills in line with the competencies required to become specialists in particular fields.
3. BRILiaN Young Leader Indonesia (BYLI): A development program for selected young Insan BRILian that provides career acceleration opportunities and exclusive development so that employees can master the competencies, knowledge, and skills needed to become Indonesia's Young Leaders.
4. Brilian Women Leaders Indonesia (BWLI): An additional development program for selected female BRI employees, providing opportunities to enhance the competencies, knowledge, and skills required to become Indonesian women leaders.
5. BRILiaN Society Elite Program (BSEP): Special development program to prepare Top Talents who are members of BRILiaN Society Member (BSM) Band 1 and Band 2, to prepare themselves to act in a more complex Leader role, collaborate with companies or high-quality international global education providers.
6. Brilian Bright Scholarship Program (BBSP): Educational scholarship program for permanent BRI employees to pursue a master's degree abroad at the top 30 best universities in the world.
7. Domestic Postgraduate Education Program: A development program for BRI employees, implemented as a master's degree (S2) scholarship at domestic universities with "A/Excellent" accreditation

### Development Program

The Career Development Program for BRILiaN Employees has been prepared by BRI in alignment with the **Talent Management Development Program**, including the BLDP Soft Competency program and BSDP Hard Competency program, as well as other development initiatives.

1. BBOP: Brilian Banking Officer Program
2. BNLB: Brilian Next Leader Program (BNLP)/ Brilian Future leader Program (BFLP)
3. BLDP: Brilian Leader Development Program

4. BSDP: Brilian Specialist Development Program
4. BLDP: Brilian Leader Development Program
5. BSDP: Brilian Specialist Development Program
6. BGLP: Brilian Global Leaders Program

7. BSEP: Brilian Society Elite Program
8. BBSP: Brilian Bright Scholarship Program
9. BCEP: Brilian Career Enhancement Program
10. BWLI: BRILiaN Women Leaders Indonesia

BRI also uses assessment tools to identify and measure the competencies of all employees, as well as to assess their suitability for the competency requirements of their current positions and future roles. A series of systematic development programs is prepared by BRI so that Insan Brilian can design their own careers through the Brilian Development Plan, which is a career and competency development planning program for each employee to achieve their career goals by preparing personal development plans while simultaneously enhancing individual and company performance.

## Performance Assessment

### Policy

The individual performance management process at BRI is packaged in a series called BRI Continuous Performance Management (BRICORE). BRICORE is a continuous process carried out during the performance period through 3 (three) stages: planning, managing, and evaluating. The performance management process (managing) is a continuous process throughout the period (continuous), which is manifested in Courageous Performance Dialogue (CPD). The cycle in question is depicted in the following illustration:

#### A. Performance Planning Stage (Planning)

1. It is a process for determining employee performance targets. In this stage, an agreement is reached between the employee and the appraiser, ensuring alignment between the employee's and the business unit's performance targets.
2. This stage is not only carried out at the beginning of the performance period (beginning of the year) or at the beginning of the worker's assignment to a new position/ field of duty and Business Unit, but can be carried out periodically if necessary as long as it is in line with the Business Unit's performance targets.
3. Determination of these performance targets (performance objectives & behavior objectives) is contained in the performance plan for each employee.

#### B. Performance Management Stage (Managing)

1. The management stage is packaged in the form of Performance Dialogue, which is a two-way communication activity between the Worker and the Evaluator in the form of effective and constructive feedback to achieve continuous individual performance improvement and processes that are integrated into all stages of BRICORE.
2. The implementation of the Performance Dialogue is well planned (dedicated time) with the following objectives:

- a. Employees understand their roles and contributions toward the achievement of the Work Unit.
  - b. Provide the best solutions or effective feedback on obstacles/problems related to employee performance.
  - c. Offer appreciation for employees' performance achievements so they can reach the next, more challenging targets.
  - d. Facilities for the preparation of employees' individual development plans.
3. Performance Dialogue is conducted continuously throughout the performance period with the following explanations:
    - a. Mandatory (required) to be carried out at the beginning of the performance period (performance planning) and at the end of the performance period (performance evaluation).
    - b. Optional is conducted outside the mandatory implementation, as needed by each Worker, or if the Worker shows signs of declining performance, such as unsatisfactory work quality, low initiative, refusal to work, increased complaints, defensiveness, or avoidance of more challenging tasks.

#### C. Performance Evaluation Stage (Evaluating)

1. The process for preparing and carrying out performance evaluations, including reviewing performance developments and comparing performance achievements with established performance targets.
2. Evaluations can be carried out by each employee during the performance period; they can be quarterly, semiannually, or annually.
3. Performance evaluation is carried out in the context of performance monitoring (performance check-in) and performance appraisal.
4. The performance appraisal of each worker (Performance Appraisal) is in the form of an Individual Performance Score (IPS) and an individual performance rating.
5. To avoid performance evaluations that are less than objective, employees should avoid the following conditions:
  - a. Halo Effect, a performance evaluation that is based only on the outstanding positive traits of the employee being evaluated.
  - b. Horn Effect, performance evaluations that are based only on the prominent negative traits of the employee being evaluated.
  - c. Leniency, appraisers tend to easily give good evaluations to employees.
  - d. Strictness, appraisers tend to find it difficult to give good evaluations to employees.

- e. Central Tendency, appraisers tend to give evaluations that are in the middle position (between good and bad).
- f. Recency Error, Appraisers tend to provide evaluations of employees' work performance in the last/recent period (not overall performance during the assessment period).

BRI uses the MyCore application as a supporting tool for implementing BRICORE at the Individual level. The application is used by Workers from the performance plan input stage to the performance evaluation process. The Company's good performance achievement is also indicated by the alignment of the Worker's Individual Performance Score (IPS).

One way BRI manages performance at the Company, Work Unit, and Individual levels is through a performance management process. This process aims to ensure that individual performance aligns with company performance, motivates employees to focus on achieving targets, and supports optimal performance.

The company evaluates the overall individual performance management process of Employees, including managing Employees with performance below the minimum required standards (underperform). In managing underperforming Employees, BRI has a Productivity & Performance Enhancement Program (PPEP) that aims to optimize Employees' performance in accordance with the Company's minimum standards.

## Implementation of Performance Assessment

In 2025, BRI implemented the Productivity & Performance Enhancement Program again. During the process of the Productivity & Performance Enhancement Program, the Company provides various supports as follows:

1. Buddy Mentoring: Buddy is determined by the Work Unit Leader.
2. Training: online and offline.
3. Mentoring is conducted directly by the supervisor or the head of the related work unit.
4. Coaching is conducted by a supervisor or an internal certified coach at BRI.
5. Counseling: the counselor appointed by the Company.

The Productivity & Performance Enhancement Program evaluation was conducted in October 2025, and the results showed that out of a total of 2,152 participants, 1,817 participants passed (performance achievement >90% and/or 100% completion of the development plan from the set target), representing 84% of all PPEP participants.

This indicates an increasing trend in the number of PPEP participants who pass compared to the previous year. Based on these evaluation results, it can be assessed that the PPEP program has a positive impact on worker performance.

## Remuneration

### Policies

BRI's remuneration system is structured based on several main principles, including internal fairness, namely providing remuneration according to competency and ability as well as position responsibilities, externally competitive (peers), and paying attention to strategy, business development, and the Company's capabilities. This principle serves as a basis for achieving the main objectives of the remuneration system: attracting potential employees (attract talent), retaining competent employees (retain talent), and maintaining employee motivation to consistently deliver their best performance (motivate talent).

The application of these principles is an important factor in building the Company's brand image as The Dream Company to Work in the Financial Industry, thereby increasing the Company's competitiveness in attracting the best talent. Remuneration at BRI does not differentiate between gender (male and female employees), but it does differentiate between race, religion, and ethnicity as regulated in the Regulations on Wages for PT Bank Rakyat Indonesia (Persero) Tbk employees.

The remuneration given to BRI employees includes:

1. Fixed compensation (fixed pay) is given to employee based on their position and/or work agreement. Fixed pay includes basic wages and allowances, Pay attention to the principles of Pay for Position and Pay for Person. Fixed pay includes Monthly Salary, Religious Holiday Allowance, Annual Leave Allowance, and Major Leave Allowance for each six-year work period.
2. Variable compensation (variable pay) is given to employees based on performance achievements, including Performance Incentives and/or Bonuses, as well as stock ownership programs (Employee Stock Allocation (ESA) and Employee Stock Option Plan (ESOP)).
3. Benefit, facilities provided to ensure security and comfort while working, during employment, and retirement, consisting of benefits before the end of the employment period and post-employment benefits.

## Implementation of Remuneration

To maintain the competitiveness of workers' monthly wages in accordance with remuneration principles, the Company conducts an annual review. In 2025, the Company provided an annual wage increase based on each individual's performance and the rising cost of living. Additionally, the Company implemented a wage recomposition to adjust the distribution of workers' wages by converting part of the fixed allowances into basic wages. This step has a positive impact on workers' pension benefits. This further reinforces the Company's commitment not only to ensuring the welfare of workers during their active years but also after they reach retirement age.

The Company also provides an annual bonus as a form of appreciation for each Employee's contribution to the company's performance and to motivate employees to perform better in the future. Bonuses are awarded through a bonus pool, which promotes a performance-driven culture, aligns bonuses with individual and unit performance, and fosters collaboration within a work unit. In 2025, employees received bonuses for 2024 fiscal-year performance, as well as interim bonuses in the third quarter of 2025. The interim bonus distribution is expected to maintain Employee optimism, enabling them to continue delivering their best performance and drive the company's growth at the end of 2025.

In addition to bonuses, variable pay is provided through an equity ownership program: a long-term incentive, the Employee Stock Allocation (ESA) V for 2023, distributed to each Employee's securities account in 2025. This stock-based compensation program is selectively granted to Employees who consistently demonstrate positive performance (Achieved) and maintain a positive track record throughout the assessment period from 2021 to 2024. This program is expected to foster a sense of ownership of the Company and motivate all Employees to continue contributing their best to the sustainability and growth of the Company.

To ensure the smooth execution of Workers' duties and responsibilities, the Company also provides benefits and facilities to support official duties, including transportation and travel accommodation, lump-sum relocation assistance, vehicle and official residence facilities, and a vehicle ownership program (for selected roles). Additionally, Workers are provided with health maintenance benefits, including outpatient/inpatient care guarantees, dental and eye treatment and medication, assistance with eyeglasses replacement, general medical check-ups, life and accident insurance, and mandatory government programs. These maintenance benefits are provided to Workers and their immediate families (spouse and three children).

## Pension Program

### Policies

BRI always strives to improve employee welfare both during the active period and at the end of the employment relationship through benefit programs which include:

1. BPJS Health Care Insurance Program (BPJS Kesehatan)
2. Old Age Guarantee Program (BPJS Ketenagakerjaan)
3. Pension Security Program (BPJS Ketenagakerjaan)
4. Pension Health Care Program (Prospens)
5. Defined Benefit Pension Program (PPMP)
6. Defined Contribution Pension Program (PPIP)
7. Old Age Allowance Program (THT)

Additionally, during the retirement preparation period, employees are entitled to entrepreneur education provided by the company to help them transition into retirement. This education is delivered through the BLRP (BRILiaN Leader Retirement Program), which prepares employees for retirement by equipping them with knowledge, insights, and skills to navigate their post-retirement lives.

### Implementation of Pension Program

In 2025, the Company has implemented the BLRP (BRILiaN Leader Retirement Program) for employees approaching retirement. As of December 2025, a total of 741 BRI employees have been enrolled in BRI's retirement preparation development program.

## Human Capital Information System

BRI is building a strong digital foundation through a modern, integrated Human Capital Information System (HCIS) ecosystem focused on efficiency and accuracy in employee data management, making it a strategic pillar of organizational development. Through the Personal Data Validation feature in Brilian Apps, employees are encouraged to actively maintain the accuracy and currency of their data independently and continuously, ensuring that all personal and professional information is reliable. Digitalization also extends to various critical processes, from integrated overtime management and compensation submission to the Productivity Performance Enhancement Program (PPEP), which enables systematic monitoring, management, and improvement of underperforming employees with valid documentation.

Processes such as transfers, rotations, and promotions are supported by digital templates that enhance efficiency, accuracy, and document consistency, while the integration of the Talentics system with e-Recruitment ensures talent data is always up-to-date and ready for strategic decision-making.

BRI strengthens HCIS governance through 2025 by documenting systems and procedures to maintain high-quality, organized, and standard compliant data. Innovative developments such as the Courageous Performance Dialogue on MyCore during coaching and mentoring processes, the Applicant Tracking System for selection, and adjustments to compensation mechanisms for Position Holders in structured roles demonstrate the system's ability to support the entire talent management cycle, including performance management, recruitment, and rewards. The bonus pool and payroll processes are now managed more effectively and efficiently, reflecting the synergy between technology and human capital strategy.

## Culture Internalization

BRI's transformation focuses on two main areas: Digital and Culture (Corporate Culture). Corporate Culture is considered a fundamental pillar for achieving its Vision and Mission and integrating it into its overall strategy. Recognizing the importance of shaping employees' character and behavior, fostering a productive and dynamic work environment, and ensuring a consistent and measurable transformation, BRI Group undertakes various efforts to internalize and implement Work Culture Initiatives.

## BRI Cultural Transformation Journey

The BRI Cultural Transformation Journey is a continuous, targeted effort that emphasizes developing and strengthening work culture as the primary driver of the Company's transformation agenda. This effort is carried out through various initiatives and programs to shape the behavior, mindset, and working methods of Insan Brilian to align with the company's strategic direction.

1 2018 - 2020

The Most Profitable Bank in Southeast Asia

→ 2025 - 2030

Continuation of BRI's comprehensive transformation through the internalization of the Brilian Way.

*Brilian Way*

- Accountability
- Integrity
- Growth Mindset
- Collaborative
- Customer Focus

BRI is developing a Culture Transformation Roadmap until 2030 as a long-term strategic framework to ensure that the Company culture consistently promotes behaviors aligned with the business strategy and the Company's sustainability, including but not limited to:

1. Comprehensive internalization of the Brilian Way.
2. Empowerment of Change Leaders and Change Agents as role models of the culture.
3. Integration of culture into the entire Human Capital cycle, from recruitment and development to performance management.

4. Strengthening a data-driven culture measurement system.

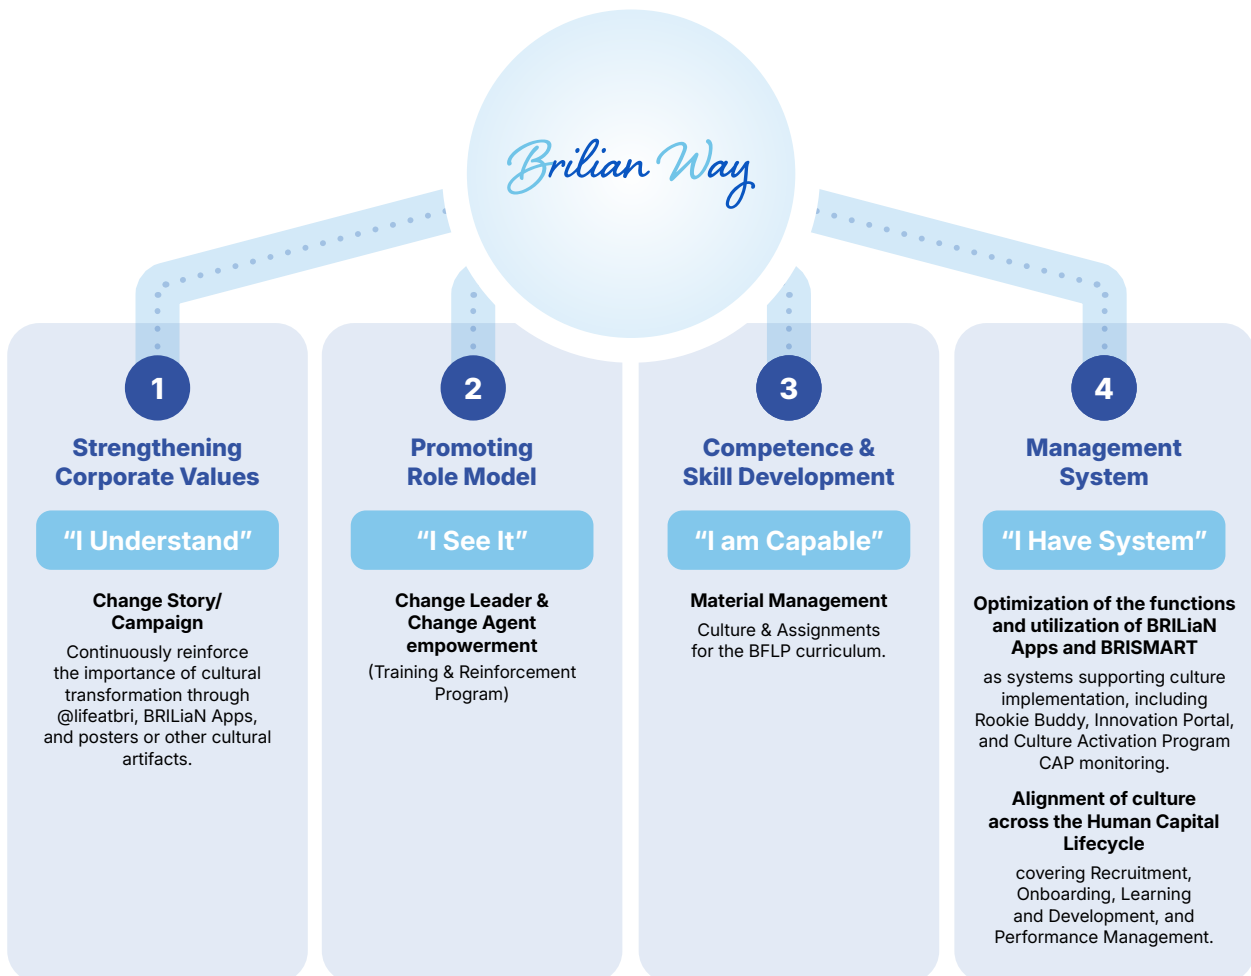

This effort is supported by a human capital management foundation, the creation of a collaborative, positive work environment, and an integrated communication strategy across internal and external channels.

## Work Culture Internalization Aspects

Throughout 2025, BRI has implemented various strategic initiatives to internalize its work culture in line with the BRI One Culture framework. The internalization of BRI One Culture focuses on four main aspects:

### 4 Aspect of Brilian Way Internalization

To ensure the effective implementation of Corporate Values, several initiatives are carried out on a continuous basis.

**1. Strengthening Corporate Values (I Understand)**

Strengthening Corporate Values is the main foundation in ensuring that every BRILiaN Employee has a comprehensive understanding of BRI's Core Values along with their definitions and key behaviors. BRI continuously internalizes these core values through consistent communication approaches (change stories/campaigns), utilizing various internal channels such as Social Media @lifeatbri and BRILiaN Apps, as well as the use of artifacts and symbols of work culture.

**2. Promoting Role Model (I See It)**

Promoting Role Model emphasizes the leadership role as the main driver of BRI's work culture. All Work Unit leaders at BRI serve as Culture Leaders who actively set an example in implementing the Brilian Way. Their role as Leaders is supported by Change Agents present in each Unit Work. This initiative is reinforced through empowerment programs for Change Leaders and Change Agents to ensure consistency in behavior and cultural messages across all levels of the organization.

**3. Competence & Skill Development (I Am Capable)**

Competence & Skill Development focuses on strengthening BRILiaN Human Capital capabilities to align with the Brilian Way. The internalization of culture is systematically integrated into all Employee Development Programs, including onboarding materials for new hires and refreshment programs for existing Employees.

**4. Management System (I Have System)**

The Management System is a strategic support mechanism that ensures the management of BRI's Work Culture is structured, measurable, and sustainable. BRI consistently develops BRILiaN Apps as the main platform for implementing the culture, including support for the BRISMART and Work Culture and Innovation Portal applications, the BRILiaN Rookie Buddy program, and an integrated, data-driven Culture Action Program (CAP) monitoring system. In line with this, BRI also conducts comprehensive alignment of the Work Culture across the Human Capital cycle, from recruitment and Learning & Development to Performance Management.

**Internalization of Brilian Way in BRI Group**

As part of strengthening the corporate culture, the BRI Board of Directors conducted a direct dissemination of the Brilian Way through a series of Kick Off Brilian Way activities at each regional office. This activity serves as a strategic means for the Board of Directors to communicate the direction,

meaning, and expectations of implementing the Brilian Way directly to BRILiaN personnel across all operational units. This approach reinforces the sense of ownership among BRILiaN personnel and emphasizes that cultural transformation is a shared agenda.

BRI also ensures that the Brilian Way implementation alignment has been carried out across all entities within the BRI Group, including 10 (ten) subsidiary companies. The adjustments are made based on each entity's business characteristics, organizational maturity levels, and strategic needs.

In addition, BRI has also undertaken several initiatives to ensure that the internalization of Brilian Way can be understood and implemented by all Brilian personnel, including the following:

**1. CULTURE TEAM MANAGEMENT**

In order to optimize the management of BRI Work Culture and the implementation of BRI One Culture at Work Units, an active role from the Culture Team is required to serve as role models in internalizing BRI's work culture values. The Culture Team consists of Change Leaders (CL), Change Agents (CA), and Change Agent Coordinators (CAK), who actively ensure the success of the culture program that promotes behaviors to improve performance.

**2. BRILLIAN WAY ALIGNMENT IN THE HUMAN CAPITAL CYCLE**

BRI makes work culture the foundation in Human Capital management to ensure the sustainability of organizational performance. Work culture is systematically integrated into all stages of the Human Capital Lifecycle, from recruitment, onboarding, learning & development, performance management, to career development and succession.

**3. CULTURE MEASUREMENT**

To ensure that Brilian Way is understood and implemented consistently, BRI conducts regular and targeted culture measurements. The measurement assesses employees' understanding of the core values, definitions, and behaviors of Brilian Way, the application of the culture at the Work Unit level, and management's role modeling of these core values and behaviors.

**4. BRI EXCELLENCE AWARD**

The BRI Excellence Award (BEA) is one of the highest forms of appreciation BRI gives to its employees and work units that consistently deliver the best performance in meeting the Company's targets.

## Information Transparency for Employees

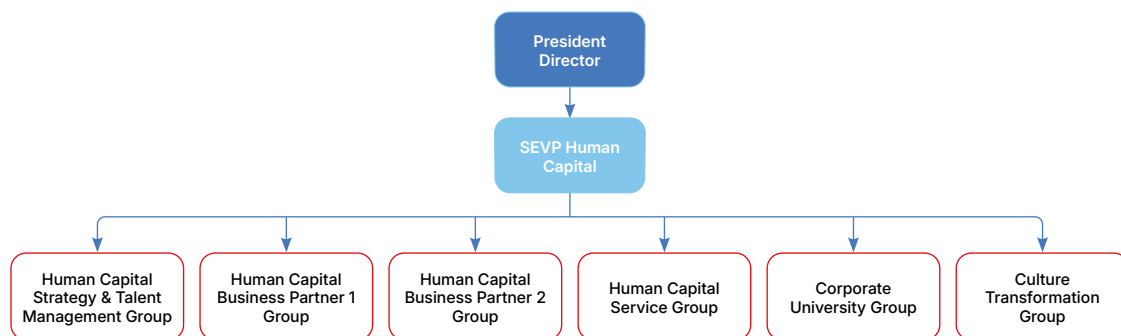

The transparency of information provided by BRI's human capital to BRI Group Employees is through the Human Capital General Policy (HCGP). The Human Capital General Policy serves as a guideline for the parent company BRI and its subsidiaries within the BRI Group in managing human resources.

The Human Capital General Policy (HCGP) standardizes human capital management policies by establishing uniform knowledge, skills, and employee behavior aligned with global conditions and the company's business dynamics. In this regard, HCGP serves as a foundation for human capital management plans and strategies, a guideline for developing policies and procedures related to human capital, and a standard reference for supervising human capital functions across all entities within the BRI Group. The HCGP covers provisions related to parenting style, HC maturity level, and HC management (HC lifecycle), which consists of human capital strategy, human capital planning, reward, career management, resourcing, onboarding, learning, development, performance management, industrial relations, people analytics, HC information system, HC communication, and offboarding.

In addition to being an effort to open up HC BRI's information to BRI Employees, HCGP is expected to address the Company's challenges in managing human capital and adapting to changing expectations regarding capabilities and competencies in the future.

## Human Resources Management Structure

In 2025, the organizational structure of the human capital management function changed from being under the supervision of the Human Capital & Compliance Directorate to the Human Capital Sub-Directorate (effective as of December 18, 2025).

The following outlines the scope of authority of each Group under the Human Capital Sub-Directorate:

- a. Human Capital Strategy & Talent Management Group  
(Previously: Human Capital Strategy & Policy Group)
  - HC Strategy & Synergy
  - HC Policy, Governance & Quality Assurance
  - HC Planning & Budgeting
  - People Analytics
  - Talent Management, Development, & Succession Plan
  - Individual Performance Management & Productivity Management
  - Reward Policy
  - HC Technology
- b. Human Capital Business Partner 1 Group
  - Strategic Business Partner
  - Career & Succession Implementation (based on Directorates)
  - HC Advisory, Solutions, Alignment, & Integration (based on Directorates)
  - Talent Mobility & Talent Marketplace (based on Directorates)
- c. Human Capital Business Partner 2 Group
  - Strategic Business Partner
  - Career & Succession Implementation (based on Directorates)
  - HC Advisory, Solutions, Alignment, & Integration (based on Directorates)
  - Talent Mobility & Talent Marketplace (based on Directorates)
  - Industrial Relation

- d. Human Capital Service Group
  - Massive Recruitment & Employer Branding
  - Executive Hiring & Onboarding
  - HC Operation
  - Partnership Management
- e. Corporate University Group
  - Learning & Development
  - Lembaga Sertifikasi Profesi
- f. Culture Transformation Group
  - Culture Transformation Strategy & Policy
  - HC Communication & Employee Experience
  - Culture Activation & Implementation

## Human Capital Work Plan 2026

To strengthen human capital capabilities and culture aligned with BRI's medium-term strategy and long-term aspirations, BRI's human capital team has prepared various programs that are holistically measured against the human capital management cycle, from human resource planning to termination of employment. The focus of the programs in 2026 includes the following:

1. Data & Systems Excellence: Refinement of data governance and data integration to ensure information accuracy, supported by advanced Employee Self Service (ESS), strategic data analytics capabilities, and a long-term commitment to a single HC Platform (HCM Suite) across the entire HC lifecycle.
2. Talent Management Transformation: End-to-end talent management revitalization in accordance with business strategy, including skill-based recruitment to support BRI's new core strategy, onboarding to enhance new talent productivity, and structured career path development.
3. Future Leadership Development: Identification of the Top Talents based on performance, capacity, and potential as part of succession planning. This initiative is also strengthened by the Executive Development Program (EDP) in collaboration with an international business school, as well as the development of leadership typology for role modeling leadership as a people manager.
4. Performance Management & Rewards: a comprehensive, objective, and impact-oriented performance management system enhancement to promote a high-performance culture, supported by a redesign of the reward system to create value and foster collaboration.
5. Productivity Transformation: Alignment of performance metrics, implementation of Strategic Workforce Planning (SWP) to address the impacts of digitalization and AI, as well as an efficient, adaptive, data-driven HC operating model to support the People Productivity Transformation aspirations.
6. Culture Transformation: Strengthening Brilian Way as a behavioral guideline, expanding the implementation of Brilian Lighthouse to subsidiaries, and integrating it into the entire HC lifecycle to reinforce a productive, adaptive, and impact-oriented work culture.
7. HC Partner Strengthening: Strengthening the role of HC BRI as a strategic advisory to improve productivity, efficiency, and measurable organizational transformation through the evaluation of the HC operating model at the Head Office and Regional Office.
8. Strategic Employee Well-being Implementation: Implementation of long-term employee well-being strategies to continuously improve employee experience and engagement.

# Information Technology

## DIGITAL AND INFORMATION TECHNOLOGY SUMMARY

As a tangible manifestation of BRI's commitment, the Information Technology (IT) strategy focused on strengthening Reliability, Availability, Scalability, and Security (RASS) across its systems. This focus was implemented through three core pillars of technology transformation aligned with the Company's corporate-strengthening and acceleration agenda: Run the Bank, Change the Bank, and Transform the Bank.

Throughout 2025, Information Technology recorded significant growth in digital transactions, with 98.22% of BRI's total transactions conducted through digital channels, while 1.78% were conducted through operational units. During the same period, BRI also achieved notable milestones across its flagship applications, infrastructure development, and AI adoption initiatives.

**BRImo** recorded total transaction growth of 29%, with transaction volume increasing by 26% and new user growth of 18.94%. This performance was supported by system availability maintained at 99.99% and a transaction success rate of 99.99%, underscoring BRI's continued commitment to delivering reliable digital corporate banking services.

Similarly, **Qlola** demonstrated strong performance, with total transactions growing by 38% and transaction volume increasing by 61%, alongside 36% growth in new users. System availability was maintained at 99.93%, with a transaction success rate of 92.98%.

**BRIAPI**, as BRI's Open API portal, has been utilized across more than 139 digital ecosystem types, supported by over 1,400 partners.

In leveraging artificial intelligence (AI) to enhance business process productivity, Sabrina, BRI's virtual assistant, handled 61 million incoming messages to the BRI Contact Center and managed 9.1 million interactions during 2025, with a customer satisfaction rate of 87%. The Working Instruction Search Engine (WISE) has been utilized by 58,715 operational employees, resulting in an efficiency improvement

of 67%. Meanwhile, the percentage of customers acquired using BRIBRAIN (BRI's Artificial Intelligence platform) for the micro, small, and consumer segments pipeline reached 32.78%.

From an infrastructure perspective, through a hybrid multi-cloud approach, BRI further strengthened the capacity of its existing Data Centers, which are designed in accordance with the Tier III Uptime Institute standards, while progressively leveraging cloud infrastructure to support critical services through an active-active strategy. This approach enhances downtime risk mitigation and ensures greater service stability and resilience.

In IT governance, BRI recorded a maturity score of 4.67 out of 5.00 based on COBIT 2019 by the guidelines of the Ministry of SOEs. In addition, BRI's digital capabilities also recorded Level 2 maturity based on SE OJK No. 24/SEOJK.03/2023 concerning Assessment of the Digital Maturity Level of Commercial Banks.

In the aspect of cybersecurity, BRI adopts Zero-Trust Architecture and Enterprise Security Architecture based on the NIST 2.0 Cyber Security Framework. Since 2018, the information security unit under the Digital & IT Directorate has been led by an internationally certified CISO to ensure system security proactively and continuously. BRI also recorded a Cybersecurity Maturity score of 3.60 in 2025.

## Information Technology Strategy

In navigating increasingly intense industry competition and evolving customer preferences, delivering excellent and sustainable services remains key to maintaining competitiveness and meeting rising customer expectations. A fundamental requirement for ensuring service sustainability is the fulfillment of the IT Hygiene Factors, encompassing Reliability, Availability, Scalability, and Security (RASS). Critical aspects such as 24/7 service availability, system reliability, robust security, and seamless system integration are prioritized to support BRI's strategic objectives.

BRI continuously undertakes enhancements and innovations, including adopting emerging technologies, to strengthen competitiveness, elevate service quality, enhance the customer experience, and ensure its digital services remain relevant to customers' evolving needs.

In supporting the Company's optimistic business growth aspirations through the BRIVolution corporate strategy, the Information Technology Directorate is committed to ensuring the reliability and readiness of the technology infrastructure by consistently fulfilling the IT Hygiene Factor. In line with this commitment, BRI's Information Technology function focuses on ensuring that the technology systems deployed are not only secure but also future-proof, fit-for-purpose, and scalable, thereby safeguarding long-term operational resilience and sustainability.

This strategy is further supported by the adoption of composable capabilities in delivering digital solutions, enabling BRI to innovate more rapidly and introduce products with greater efficiency. BRI also places strong emphasis on fostering an innovation-driven environment that develops digital talent capable of addressing future challenges, thereby facilitating the creation of more advanced, customer-relevant digital solutions.

This focus is implemented through three pillars of technology transformation, aligned with the Company's broader corporate-strengthening and acceleration agenda: Run the Bank, Change the Bank, and Transform the Bank.

- Run the bank, which focuses on modernizing and enhancing infrastructure reliability to ensure stable, secure, and efficient digital services.
- Change the bank, which emphasizes application modernization and the adoption of emerging technologies to enhance customer experience.
- Transform the bank, which centers on strengthening the Information Technology Strategic Plan (RSTI), supported by the development of a resilient, adaptive, and competitive IT organization.

## Information Technology Innovation

As part of its continuous improvement efforts to consistently deliver reliable services to customers, BRI implemented several key initiatives throughout the year, including:

1. Engage Customer Experience through BRIMO Channel for Buying Gold  
This initiative aims to elevate the Customer Experience (CX) in gold investment transactions through the BRIMO application, making the process more seamless, secure, and efficient, and better aligned with customers' evolving digital preferences.
2. Adoption of OpenShift Container Platform (OCP) Baremetal Technology  
This initiative is intended to provide high-performance, efficient, and flexible computing infrastructure with more optimized cost management.
3. Leveraging Cloud Infrastructure  
This use of cloud infrastructure is designed to enhance the reliability of BRI's application systems, ensuring they can support exponential business growth.
4. Implementation of Multiple Know Your Customer (KYC) Methods  
This initiative aims to enhance the accuracy of customer identity verification, strengthen regulatory compliance, and optimize the security and user experience of digital services by leveraging multiple identity verification methods and authorities

### Conversational Banking

To improve service, BRI developed Sabrina as a virtual assistant solution powered by Artificial Intelligence (AI). Sabrina is an innovative solution for text and voice-based interaction. Sabrina is designed to meet the needs of customers, especially in the micro and ultra-micro segments, who are still largely dependent on cash transactions, have limited knowledge of financial products, and need trusted, locally relevant financial institutions.

Sabrina has been integrated with BRIMO so customers can find account balance and mutation information through Sabrina. Sabrina is also one of the frontliners in facilitating customer questions and complaints regarding banking services provided by BRI.

A total of 61 million messages entering the BRI Contact Center were successfully handled by Sabrina. Every month, approximately 800,000 interactions are conducted by Sabrina to help customers. This good performance is supported by a satisfaction survey, in which 87% of users expressed satisfaction with the services provided. This figure increased by 6% from the 2025 milestone.

In addition to implementing AI for customer-facing services such as Sabrina, AI is also used through the Work Instruction Search Engine (WISE), a work guide search tool that makes it easier for front-line workers to access information and service solutions quickly and accurately. WISE has been accessed by more than 58,715 frontliners per day for search activities. Moreover, WISE also helps reduce the solution search time from an average of 15 minutes to less than 5 minutes, increasing time efficiency by 300%.

A total of 61 million incoming messages to the BRI Contact Center and 9.1 million interactions were successfully handled by Sabrina. This strong performance was supported by a customer satisfaction survey, in which 87% of users expressed satisfaction with the services provided. This figure represents an increase from the previous level of 81% recorded in 2025.

In addition to implementing AI for customer-facing services such as Sabrina, AI has also been used through the Working Instruction Search Engine (WISE), a work guidance search tool that enables frontliners to access service information and solutions more quickly and accurately. WISE has been utilized by 58,715 operational employees, resulting in a threefold increase in productivity, with task completion time improving from 5 minutes to 15 minutes and an effectiveness rate of 67% following its implementation.

## Information Technology Infrastructure

BRI has demonstrated a strong commitment to strengthening its technology infrastructure by increasing the capacity of all major data centers. This initiative aims to support the growing needs of business expansion while ensuring the sustainability of technology-based operations.

Along with the increasing IT workload requirements and the strategic role of BRI's Data Center (DC) in supporting the Company's critical operations, as well as the increasing IT workload requirements and design capacity that has approached its optimal limit. The project included the addition of new mechanical and electrical equipment and the implementation of a clean agent-based fire protection system that complies with international Tier-III standards. With this new infrastructure, BRI's DCs are designed to ensure the availability of operational services in accordance with Uptime Institute's standards.

Furthermore, the capacity increase is also carried out to support the active-active data center strategy. This architecture enables all data centers to operate simultaneously while providing real-time mutual backup and risk mitigation. In parallel, BRI has accelerated cloud

technology adoption to further strengthen overall system reliability and resilience. BRI has successfully implemented an Active-Active Data Center on the Cloud for its two flagship applications, BRImo & QLola.

Through this comprehensive transformation journey, BRI continues to reinforce its position as a banking institution with one of the most advanced IT infrastructures in Indonesia. This project not only supports sustainable business growth but also ensures reliable, competitive services that meet customer needs in the digital era.

## Information Technology Governance

In accordance with the Financial Services Authority (OJK) regulations on the Implementation of Information Technology and to strengthen the Board of Directors' oversight of IT implementation, BRI has established a dedicated committee as a governance forum to oversee IT execution within the Information Technology Directorate. The IT Steering Committee serves as a strategic governance mechanism to ensure that the management and utilization of Information Technology are aligned with the Bank's policies and business strategies; managed effectively, efficiently, and sustainably; supportive of operational, managerial, and decision-making needs of the Board of Directors; and compliant with prudential principles, regulatory requirements, and the Bank's risk management framework.

The establishment of the Committee also provides the Board of Directors with adequate visibility into the condition, performance, and future direction of Information Technology development, thereby enabling coordinated, well-informed strategic decision-making related to IT.

Following several adjustments to its membership in line with changes to the Company's organizational structure and management composition, the latest composition of the IT Steering Committee was formalized through Board of Directors Decree No. 5896-DIR/PPM/11/2025 concerning the Information Technology Steering Committee, effective as of November 25, 2025.

In carrying out its duties and authorities, one of the key strategic agendas deliberated and approved by the Committee during the year was the establishment of BRI's IT Strategic Plan for the 2026-2030 period. In line with this decision, the progress and achievements of the IT Strategic Plan implementation will be reported and reviewed periodically within the IT Steering Committee forum, as part of the Board of Directors' oversight and control function over IT implementation.

Digital risk management reporting is conducted through the Digital Risk Oversight Forum (DROF), which is attended by two members of the Board of Directors and the relevant Group Heads. The forum discusses updates, insights, and key issues related to the implementation of digital risk management, including application risk ratings, with particular attention to disaster recovery and Cyber Risk.

### Cybersecurity and Disruption

As digital transformation accelerates, BRI prioritizes cybersecurity as a fundamental pillar to safeguard customer trust and ensure sustainable business performance. The Company is committed to protecting the confidentiality, integrity, and availability of information through the implementation of robust information security governance aligned with national regulations, including OJK regulations and the Personal Data Protection Law, as well as internationally recognized best practices such as NIST Cybersecurity Framework, ISO/IEC 27001, OWASP, and

PCI DSS. As part of its strategic security framework, BRI continuously develops and enhances its Enterprise Security Architecture, encompassing risk management, third-party security governance, data protection and privacy, infrastructure and application security, as well as cyber resilience and business continuity. The Company is further supported by comprehensive internal policies, including structured cyber incident management procedures and a dedicated Security Incident Response Team, as well as regular incident simulation exercises to ensure preparedness to address potential disruptions. Through the implementation of integrated security solutions across the full lifecycle of identification, protection, detection, response, and recovery. BRI strives to minimize operational and reputational risks, maintain service stability, and create sustainable long-term value for shareholders and all stakeholders.

### Service Continuity and IT Recovery Test (Disaster Recovery)

There is potential for damage, disruption, or malfunction of information technology infrastructure due to events that cannot be avoided or predicted, such as natural disasters, man-made disasters, and system failures. BRI's current strategy to improve the resilience of IT systems against disasters is through data centers that are actively configured to maintain availability during disasters and through testing of the Disaster Recovery Plan (DRP).

The configuration undertaken during the execution of the DRP requires an integrated architecture comprising network, storage, computing, virtualization, and application components that operate in a coordinated manner. The availability and operability of applications during infrastructure failure in one of the data centers is a major

factor. The recovery plan is well-crafted and supported by a document that describes the mapping between the current state of the application and the infrastructure required to fulfill the planned architecture, as well as a test execution plan carried out consistently.

Each application uses a DRP strategy based on the application's criticality and technological capabilities. DRP planning is reviewed annually to ensure that the strategy and gap identification remain aligned with the IT roadmap. Filling the capability gap ensures that the active-active configuration process runs smoothly. In 2025, IT recovery testing was conducted on 15+ applications across all BRI Data Centers.

**Follow-up on Audit Results and/or Assessment of IT Implementation**

Throughout 2025, BRI continued to accelerate its global-standard information technology transformation. Based on the COBIT 2019 framework assessment, in line with the Ministry of State-Owned Enterprises regulations, BRI achieved a maturity score of 4.67, reflecting positive growth compared to the previous year. This achievement represents the tangible outcome of the Bank’s proactive measures, as it has completed 100% of the improvement action plans related to IT governance and operational aspects.

This transformation has also been validated through a digital maturity assessment conducted in accordance with OJK standards. BRI successfully maintained Level 2 with a “Satisfactory” rating across eight key domains. This accomplishment demonstrates that BRI’s digital investments are not only strategically aligned but also managed under sound, sustainable governance principles.

**Evaluation Results of IT Strategic Plan Implementation**

The IT Strategic Plan 2024 consists of Strategic Initiatives to improve capabilities to support business acceleration and reliability. These initiatives include increasing capacity and

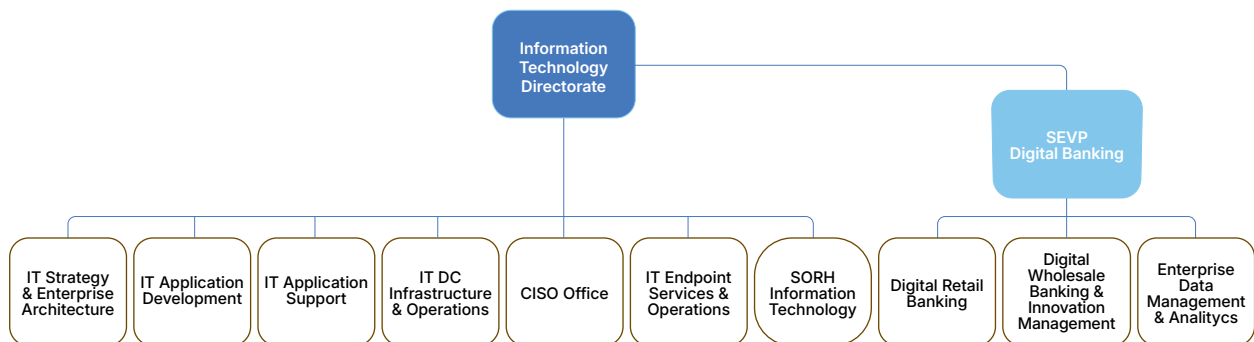

capability, optimizing data management and AI, expanding digital services, and strengthening cybersecurity. Overall, the Strategic Initiatives have run well according to the target milestones set with 7 (seven) initiatives will continue as Business As Usual (BAU). On the other hand, 5 (five) long-term initiatives will be completed by 2025 with 2 (two) other initiatives entering the advanced development phase.

**Evaluation Results on the Effectiveness of IT Implementation**

Through the Information Technology Directorate, BRI remains committed to ensuring that every technology initiative not only operates optimally but also serves as an accelerator of overall corporate performance. The development of IT capabilities is focused on key priorities: expanding business value, simplifying internal processes, strengthening system capacity, and ensuring strict compliance with prevailing regulations. In alignment with this commitment, BRI implements comprehensive IT risk management practices to mitigate potential disruptions, cybersecurity threats, and disaster recovery readiness. These measures are fully integrated within the Bank’s enterprise-wide risk management framework.

**Information Technology Management Structure**

In delivering best-in-class Information Technology services that support digital transformation and operational excellence, the Information Technology Directorate is organized under the following structure:

The following outlines the roles and responsibilities of each Group under the Information and Technology Directorate:

**IT Strategy & Enterprise Architecture**

This group is fully responsible for IT strategic planning, including the development of the IT Strategic Plan, transformation initiatives, capacity planning strategies, Enterprise Architecture, and Disaster Recovery Plan. Additionally, oversees the development of IT governance through policies, procedures, frameworks, and including Data and AI management. Operationally, IT Strategy & Enterprise Architecture manages IT Service Management

(ITSM) using a Continual Service Improvement approach, addressing and resolving system disruptions. The Group also conducts business needs analysis, manages stakeholder relationships, supervises project management and IT budget execution, and ensures the synergy of financial conglomerate operations, risk management, and IT Workforce Management to guarantee IT’s effective contribution to achieving business objectives.

### **IT Application Development**

This group is responsible for managing the end-to-end lifecycle of digital application development, commencing with technical requirements analysis covering applications, supporting infrastructure, and communication networks; followed by solution design, development, and continuous application enhancement. The Group also manages code repositories across all platforms and conducts ongoing analysis and evaluation to improve application performance, scalability, and overall capability.

### **IT Application Support**

This group conducts quality assurance in the development of digital platforms, including test planning, documentation, and platform monitoring. Operationally, the Group manages IT services encompassing event management, knowledge management, change management, as well as platform optimization and issue resolution to ensure stable and reliable service delivery.

### **IT DC Infrastructure & Operations**

This group manages all aspects of IT infrastructure, from strategic planning to the formulation and enhancement of operational procedures for computing, network, and data center facilities, including capacity management. At the implementation level, responsibilities include developing new technologies, designing and configuring infrastructure, conducting quality assurance, and executing operational maintenance, optimization, and problem resolution across all Data Centers and Disaster Recovery Centers. Specifically, the Group oversees core network management, satellite technology operations, and coordinated infrastructure assets and vendor management to ensure the reliability and optimal performance of IT infrastructure.

### **CISO Office**

This group manages all aspects of BRI's information security, starting from strategic planning through the development and refinement of security strategy and architecture, as well as information security governance policies, standards, and procedures. At the operational level, responsibilities include implementing security awareness programs, monitoring cyber threats, handling incidents, and operating and maintaining information security devices. Technically, the Office develops and optimizes security solutions such as secure branch, endpoint security, network security, cloud security, and identity and access management. It also ensures coordinated synergy across the Financial Conglomerate to provide comprehensive protection of information assets in accordance with industry standards.

### **IT Endpoint Services & Operations**

This group is responsible for managing IT infrastructure and endpoints across all business units, encompassing strategic planning through the formulation and enhancement of infrastructure policies, procedures, and budgeting. At the operational level, responsibilities include implementing and supporting IT infrastructure, endpoint security, preventive and corrective maintenance, and problem resolution. In addition, this function conducts continuous monitoring and evaluation through an early warning system, business process reengineering related to IT endpoint infrastructure management, management of supporting tools, vendor management, and endpoint performance management. It also provides comprehensive reporting to internal stakeholders, external parties, and regulators.

### **SORH Information Technology**

This group manages Information Technology by developing and implementing IT risk governance strategies, including identifying and assessing key risks, overseeing mitigation activities, and providing advisory support for product development and business process enhancement to ensure robust risk control integration. Operationally, this function conducts Risk and Control Self-Assessment (RSCA), monitors Key Risk Indicators (KRIs), implements fraud-detection systems and early-warning mechanisms, and manages IT incidents through root-cause investigation and comprehensive remediation plans. Furthermore, this function is responsible for reporting to internal and external stakeholders and for monitoring the achievement of business and budget targets, ensuring alignment between risk management practices and organizational objectives. The structure under the SEVP Digital Banking is established to accelerate digital transformation in digital product delivery and to optimize the utilization of data as a strategic asset.

### **Digital Retail Banking**

This group is responsible for managing the retail transaction business through the preparation of business studies and market research, as well as the development and innovation of products and services, including BRIZZI, QRIS, BRIImo, and BRIMerchant. This function also formulates relevant policies and manages regulatory licensing requirements. Operationally, responsibilities include partnership management for service development, digital campaign and branding strategies, and the establishment of product design and UI/UX standards across all digital platforms, supported by continuous evaluation of the customer journey. This function also ensures synergistic support in the development of digital retail initiatives across Subsidiaries.

### Digital Wholesale Banking & Innovation Management

This group is responsible for developing digital wholesale banking through business studies and market research, product and service innovation, and the formulation of policies and innovation management frameworks. Operational responsibilities include partnership management, API integration with customers and partners, campaign and branding initiatives, and regulatory licensing management. From an innovation management perspective, this function oversees the end-to-end innovation process, covering research, ideation, discovery, prototype design, business simulation, piloting, and value tracking of incubated business initiatives. These activities are supported by the development of innovation management tools and an enabling environment aligned with the IT architecture, as well as synergistic management of digital wholesale banking and innovation initiatives across the Financial Conglomerate.

### Enterprise Data Management & Analytics

This group manages enterprise-wide data governance and analytics by formulating enterprise data management and analytics strategies, implementing data governance procedures, including AI/ML governance, and developing data models, data lineage, and metadata management frameworks. From a technical perspective, responsibilities include monitoring and improving data quality; designing and developing integrated data platforms such as master data management, data hubs, and data lakes; delivering data products through data services; and developing golden records. In the area of AI/ML, this function covers best-practice assessment, model design and development, quality assurance, deployment, and ongoing maintenance of machine learning models and advanced analytics.

## Information Technology Work Plan 2026

The Digital & IT Directorate has a significant role, not only as a supporter of smooth business operations but also as a driver of business progress through improving Information Technology (IT) capabilities. In the era of fierce competition, this role is key to the success of digital transformation across BRI's business lines.

Through BRIVolution Reignite, BRI has established a clear acceleration pathway for future growth, centered on "Transform the Funding Franchise" and "Revamp existing Core, Build New Core". In this context, the Information Technology Directorate plays a pivotal role in building a world-class foundation by strengthening digital infrastructure, delivering personalized solutions, and leveraging data and AI to enhance the accuracy and speed of decision-making.

The Information Technology Directorate holds a strategic role in achieving the Corporate Ambition 2026-2030, namely "Deliver Sustainable Values and Integrated Solutions to Achieve Indonesia's Aspiration", by acting as a strategic partner to both business units and enablers. This commitment is embodied in the Directorate's aspiration, "Enabling sustainable business growth through trusted, secure & personalized Digital Solution".

Through the IT Strategic Plan (ITSP), the Information Technology Directorate has established five (5) strategic domains as key priorities for enhancement and development, namely:

- Biz-Tech Value Creation & Delivery: Clear and responsible demand management followed by high-quality & efficient delivery in a balanced business-IT lens
- Talent & Organization: Comprehensive organization setup, enabled with sustained technical leadership and future ready digital talent
- Applications & Integration: Agile, unified and flexible IT systems that deliver seamless experience and personalized services through modular, reusable and scalable capabilities.
- Data & Analytics (include AI): Streamlined, governed and scalable data foundation that accelerates Data Analytics & AI use-case delivery
- Infra, Ops & Security: Reliable, scalable and secure IT foundation with automation, observability and embedded protection across end-to-end tech stack.

As an enabler of business growth, the Information Technology Directorate recognizes that maintaining both quality and speed across all IT aspects is critical. Achieving the right balance requires disciplined execution supported by agile development practices, automated testing, clear standards, reusable components, and a strong delivery governance framework.

# Corporate Governance

**“Through comprehensive capability strengthening aligned with best-in-class standards, BRI has successfully elevated its corporate governance practices to a higher level that is adaptive to future challenges. This achievement serves as a key pillar in maintaining the implementation of corporate governance while ensuring BRI’s sustainability as a reliable financial institution that consistently earns public trust”**

The implementation of governance is a fundamental pillar of sustainable business performance, particularly in addressing the dynamics of the financial services industry. The commitment to continuously improving governance quality enables the Company to ensure alignment between business strategy, risk control, and compliance with prevailing regulations. Good corporate governance is achieved through a clear supervisory structure, effective coordination mechanisms with members of the Financial Conglomeration, and policy alignment across risk management, compliance, internal audit, and governance.

Governance strengthening is positioned not merely as a compliance-driven obligation, but as a strategic enabler that supports prudent, accountable, and long-term-oriented business decision-making. The Company's integrated capabilities are developed through enhancements in governance structure and processes, taking into account industry best practices that emphasize corporate

transparency, the implementation of check and balance functions, and the effectiveness of corporate strategy. These measures are undertaken to support the sustainability of the Company's contributions to all stakeholders, including the national economy. In 2025, BRI refined its corporate governance policies, promoted the implementation of anti-corruption and anti-bribery practices across internal and external environments, adopted disclosures aligned with the ASEAN Corporate Governance Scorecard standard, and enhanced the management mechanism for the Whistleblowing System by a trusted independent party.

The quality of governance implementation is measured by the company's achievements, as reflected in assessments by independent parties. Standardization and assessment methods are priorities for measuring the quality of governance implementation. In 2025, BRI could achieve a mature, high-quality implementation of industrial governance.

## Implementation of Corporate Governance with Company Performance

ACGS

Top 5 PLC Indonesia and  
ASEAN Asset Class

CGPI

The Most Trusted Company"  
predicate with a score of 95.38

IICD Corporate Governance  
Conference and Awards

Top 50 Emiten BigCap PLCs

# Objectives of Implementing GCG

The company realizes that business sustainability and success are not only measured by achieving financial performance and increasing profits but also through the implementing results of good governance principles. BRI implements corporate governance in accordance with prevailing regulations and industry best practices. The reliability of this system is validated through periodic assessments conducted by independent external parties to ensure objectivity and transparency, and aims to:

1. Help the Company achieve its vision and mission.
2. Provide guidelines to all employees on carrying out duties and responsibilities following their job description.
3. Enhance the shareholders' and stakeholders' confidence that the Bank management and oversight are professionally implemented.
4. Support the establishment of policies and decisions made by management based on the principles of good corporate governance.

# Corporate Governance Implementation in 2025

In 2025, the company's commitment to produce the implementation of Sustainable Governance prioritized on improving the quality of the implementation of Governance, including as follows:

1. Transparency of the company's condition in terms of both financial performance, independence of the Board of Directors and Board of Commissioners, and updated information regarding company actions that can be easily accessed through the company's website.
2. Maturity measurement in the implementation of governance was reflected through recognition from external parties, including:
  - a. Improvement in maturity scores covering governance and compliance aspects.
  - b. The predicate "Most Trusted Companies" in the Corporate Governance Perception Index assessment.
  - c. Top 5 PLC In Indonesia award in the ASEAN Corporate Governance Scorecard, and other awards.
3. Enhancement of the Anti-Bribery and Corruption program implementation, emphasizing industry best practices through the following initiatives:
  - a. Transformation of Whistleblowing System management.
  - b. Participation in the Integrity Assessment Survey (SPI) organized by the Corruption Eradication Commission of the Republic of Indonesia (KPK-RI).
  - c. Alignment of ISO-based processes, including ISO 37001:2016 Anti-Bribery Management System certification in procurement of goods and services, ISO 37301:2021 Compliance Management System certification, and ISO 9001:2015 Quality Management certification.
  - d. Certification of BRI employees as Anti-Corruption Counselors (PAKSI).
4. Providing guidelines for employees on the implementation of governance in the Business Unit through the improvement of the governance structure. It consisted of revisions to governance policies in accordance with current provisions.

# Quality Improvement Plan of Corporate Governance Implementation in 2026

In 2026, to improve the quality of Governance implementation, BRI has prepared the following plans:

1. Strengthening the Integrated Corporate Governance framework as the foundation for sustainable management of BRI and the Financial Conglomeration.
2. Promoting the implementation of high governance and compliance standards through independent and standardized evaluation mechanisms.
3. Ensuring transparency, accountability, and integrity through strengthening credible disclosure and reporting systems.
4. Reinforcing fraud, corruption, and bribery prevention systems as part of the Company's compliance culture.
5. Ensuring the effectiveness of internal controls and supervisory follow-ups as part of strengthening sustainable governance.

## Basic Implementation of Corporate Governance

BRI's governance is based on compliance with applicable regulations, stakeholder aspirations, and the Company's needs. Apart from that, BRI also implements corporate governance practices, drawing on best practices applicable to the financial industry. Several regulations that form the basis of guidelines for implementing good corporate governance at BRI include:

1. Law of the Republic of Indonesia No. 8 of 1995 concerning Capital Markets, as amended by Law of the Republic of Indonesia No. 4 of 2023.
2. # Sustainably Good Corporate Governance Implementation

Implementation of good corporate governance is carried out of duties and responsibilities of the Bank's Governance Organs, consisting of the General Meeting of Shareholders (GMS), the Board of Commissioners, the Board of Directors, and other supporting organs. Each organ played an important role in ensuring and striving for the effective implementation of Good Governance, BRI has established a Good Corporate Governance Policy (GCG Policy/Charter), namely the General Corporate Governance Policy of PT Bank Rakyat Indonesia (Persero) Tbk No. KU.02-DIR/KEP/10/2023 dated October 10, 2023, Book 1 concerning Governance and Compliance of PT Bank Rakyat Indonesia (Persero) Tbk. The GCG Policy/Charter was formulated based on the development of BRI's business, evaluation of previous guidelines, and GCG best practices in the industry.

## Framework of BRI Corporate Governance

## GCG Principles and Implementation Formulation

BRI positioned the implementation of Good Corporate Governance (GCG) as the primary foundation in managing its business activities and operations, by upholding the principles of independence, accountability, and integrity in every decision-making process. This commitment was implemented consistently and comprehensively at all organizational levels ranging from the Board of Commissioners and the Board of Directors to all BRI Employees and was internalized into the Company's vision, mission, and corporate values, supported by a code of ethics and a work culture oriented toward compliance and professionalism.

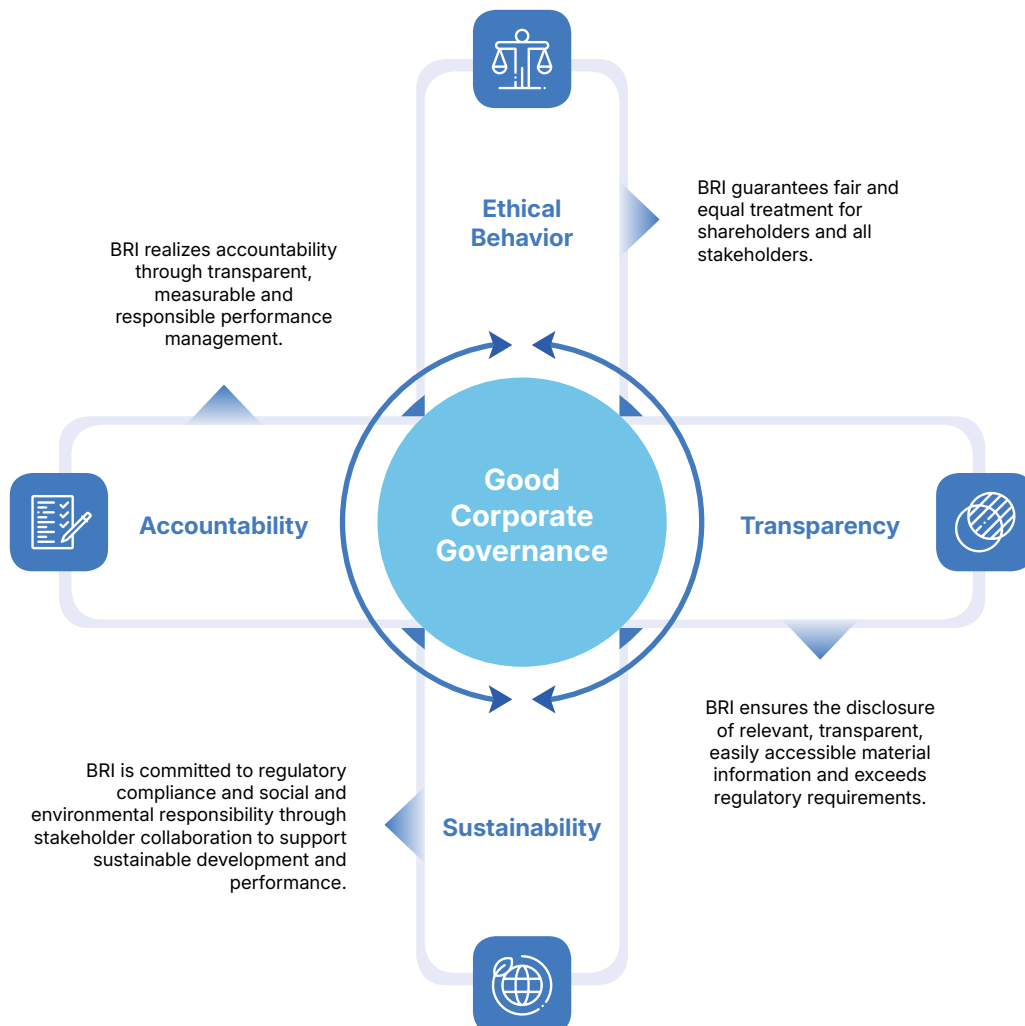

The implementation of GCG was carried out through internal policies and guidelines prepared independently and objectively, based on prevailing sectoral laws and regulations, while taking into account shareholders' aspirations without disregarding the interests of other stakeholders. To ensure consistency and effectiveness in governance implementation, the Company established a GCG evaluation

mechanism referring to standardized indicators and involving independent and reputable assessment institutions to ensure objectivity and continuous enhancement of governance quality.

As a form of accountability and transparency, all processes, implementation, and achievements related to GCG were disclosed openly through the Company's publications, including the Annual Report and official corporate media. This disclosure aimed to provide a comprehensive understanding to all stakeholders of the structure, processes, and outcomes of corporate governance, while strengthening public trust in the implementation of firm- and independent-governance standards at BRI.

In line with this commitment, the GCG principles that support BRI's sustainable performance were formulated based on the Indonesian Corporate Governance Guidelines (PUG-KI) 2021 as follows:

### BRI GCG Implementation Guidelines

## Implementation of Good Corporate Governance Based on Indonesian Corporate Governance

As a manifestation of the Board of Directors' and the Board of Commissioners' commitment to strengthening the quality of Good Corporate Governance implementation, BRI adopted the Indonesian Corporate Governance Guidelines (PUG-KI) issued by the National Committee on Governance Policy (KNKG). The implementation of these guidelines supported BRI's ability to continuously adapt to developments in governance practices, including strengthening social and environmental responsibilities based on sustainable development, enhancing transparency and accountability in the execution of duties by the Board of Directors and the Board of Commissioners, improving the effectiveness of anti-fraud strategies, as well as enforcing the code of ethics and managing conflicts of interest.

Furthermore, BRI reinforced the implementation of Good Corporate Governance by adopting the four pillars of Corporate Governance Principles as stipulated in the 2021 PUG-KI, as updated by KNKG.

### Implementation of Good Corporate Governance Principles

Pillar	Explanation	Implementation at BRI
Ethical Behavior	In performing its activities, the corporation always prioritizes honesty, treats all parties respectfully, fulfills its commitments, and consistently builds and maintains moral values and trust. The corporation pays attention to the interests of shareholders and other stakeholders based on the principles of fairness and equality, and is managed independently. Hence, each company's organ does not dominate the others and cannot be interfered with by other parties.	<ol style="list-style-type: none"> <li>BRI, in conducting company activities, always upholds Ethical Behavior, as evidenced by policies that govern the Bank Code of Ethics and the Employee Code of Ethics, and guidelines on culture that regulate risk culture, compliance, and corporate culture. In addition, to maintain employee morale and stakeholders' trust, BRI implements prevention through the following measures: <ol style="list-style-type: none"> <li>Effectiveness of Anti-Fraud Strategy.</li> <li>Gratification Control Program.</li> <li>Anti-Money Laundering Program, Prevention of Terrorism Funding and the Proliferation of Weapons of Mass Destruction.</li> <li>Availability of Whistleblowing System complaint channels.</li> </ol> </li> <li>The Company considers the principle of equality and fairness (Equal Treatment) to stakeholders and shareholders. The Company realizes the intended commitment by providing equal information to stakeholders, including through the company website, national mass media, and the company's social media.</li> <li>In addition, the company provides channels for stakeholders to participate in providing recommendations or opinions for the good of the company. Some of the channels provided by the company include General Meeting of Shareholders, Press Release, Public Disclosure, Quarterly Analyst Meeting, and so forth.</li> </ol>
Accountability	The corporation can be accountable for its performance in a transparent and fair manner. Therefore, the corporation must be managed properly, measurably, and in accordance with corporate interests, while considering shareholders' and stakeholders' interest. Accountability is a pre-requisite for achieving sustainable performance.	<ol style="list-style-type: none"> <li>The Company has guidelines for the Board of Directors and the Board of Commissioners regarding the exercise of their duties and obligations. The guidelines include meeting rules, voting mechanisms, guidelines for managing conflicts of interest, and so forth.</li> <li>The availability of a check and balance from the implementation of the Directors' duties. The Directors are responsible and independent from the supervision of the Board of Commissioners.</li> <li>The Company has an accountable and adequate governance structure through the completeness of the Main Organs, Supporting Organs and special Business Units that assist in performing the Directors' and the Board of Commissioners' duties.</li> <li>There are measurable standards in assessing the performance of the Directors, Board of Commissioners and supporting organs that are published transparently through the corporate governance report.</li> </ol>

Pillar	Explanation	Implementation at BRI
Transparency	To maintain its objectivity in conducting business, the corporation provides material and relevant information to stakeholders in an easily accessible and understandable manner. Then, the corporation takes the initiative to disclose not only issues required by laws and regulations but also any significant issues for decision-making by shareholders, creditors, and stakeholders.	<ol style="list-style-type: none"> <li>1. BRI establishes corporate transparency based on provisions and best practices in the industry. BRI also has Business Units, specifically managing corporate communication to each stakeholder, comprising:               <ol style="list-style-type: none"> <li>a. Corporate Secretary, being responsible for broadly establishing the company's reputation publicly.</li> <li>b. Investor relations, assigned to maintain better relationships with shareholders.</li> <li>c. Customer Experience as well as Marketing Communication, realizing the company's products and services transparency to customers.</li> </ol> </li> <li>2. BRI discloses information punctually, accurately, and sufficiently, including compliance with the provisions related to disclosure and reporting to the regulator and the interested party.</li> <li>3. BRI has a directed policy and communication system through a reliable channel, and it contains recent developments of the company's condition. Some communication channels managed by the company are as follows:               <ol style="list-style-type: none"> <li>a. Corporate website at <a href="http://www.bri.co.id">www.bri.co.id</a></li> <li>b. Social Media                   <ul style="list-style-type: none"> <li>• Facebook : BANK BRI</li> <li>• Instagram : @bankbri_id</li> <li>• X : @kontakBRI, @promo_BRI, @bankbri_id</li> <li>• Youtube : BANK BRI</li> </ul> </li> <li>c. Artificial Intelligence-based Chatbot: Sabrina via WhatsApp 0812 1214 017</li> </ol> </li> </ol>
Sustainability	The Corporation complies with laws and regulations and commits to fulfilling its responsibilities to society and the environment to contribute to sustainable development with relevant stakeholders. It is to improve their lives in a way that aligns with business interests and the Sustainable Development Agenda.	<ol style="list-style-type: none"> <li>1. The Company implements governance in accordance with applicable laws and regulations, including sector-specific banking regulations, as well as regulations related to capital markets, sound business competition, and State-Owned Enterprises.</li> <li>2. BRI has a committee at the Directors level and Business Units that specifically manages Environmental, Social &amp; Governance aspects to ensure that the company's commitment to sustainability has been implemented properly.</li> <li>3. BRI also builds a global standard sustainability report in order to meet stakeholders' expectations regarding BRI's role in building sustainability in the social and environmental sectors. In addition, BRI has published the Task Force on Climate-Related Financial Disclosures (TCFD Report) to further strengthen the company's commitment to environmental sustainability.</li> </ol>

# Structure of Governance

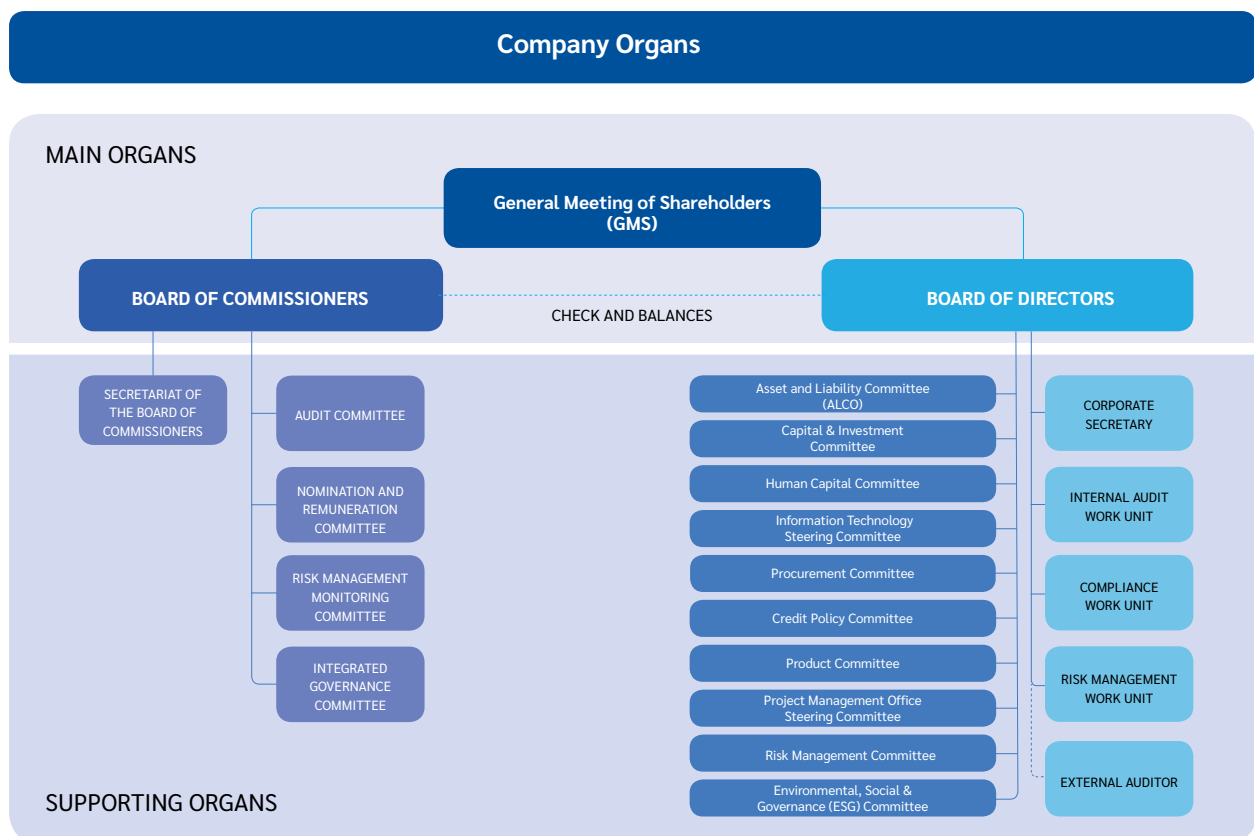

The Company's governance structure consists of Company Organs and Infrastructure.

## Company Organs

Based on the Law of the Republic of Indonesia Number 40 of 2007 concerning Limited Liability Companies, the Company's organs consist of:

1. General Meeting of Shareholders (GMS)
2. Board of Commissioners
3. Board of Directors

The Company's organs were established to ensure the effective implementation of the Company's governance principles, with clear roles and responsibilities, thereby creating a monitoring and check-and-balance mechanism. Structure includes Main Organs, Supporting Organs, and Policies and Procedures as follows:

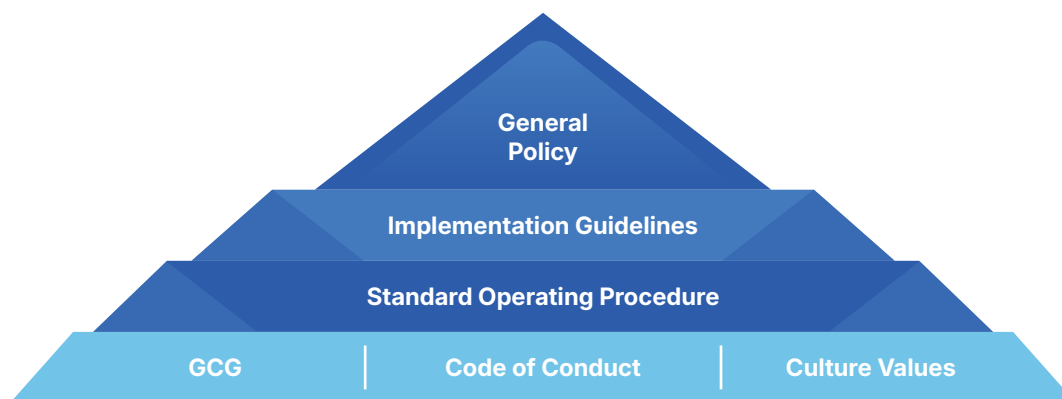

\*explanation of each organ can be found in each sub-chapter in the Annual Report

## Governance Infrastructure

### Corporate Governance Infrastructure

Based on BRI Board of Directors Circular Letter No. SE.13-DIR/KPD/09/2025 dated September 30, 2025, regarding the Establishment and Management of Policies & Procedures, the hierarchy of Policies & Procedures is illustrated as follows:

1. General Policy is a regulation that contains the basic principles, outline and/or philosophy and is high level, strategic, and long-term in nature.
2. Implementation Guidelines (PP) are regulations that contain general standards of business processes/explanations of activities or provisions of product specifications, target markets, and generally applicable requirements.
3. Standard Operating Procedures (SOP) are regulations that contain standards of business processes/explanations of activities or provisions of product specifications, target markets, and requirements that are more technical, detailed, and/or dynamic in nature.

In detail, the Corporate Governance Infrastructure owned by Bank BRI includes:

Issue	Internal Policy
Articles of Association	The Articles of Association of PT Bank Rakyat Indonesia (Persero) Tbk contained in Deed Number 15 dated April 22, 2025, which has received Ratification of Amendments and Acknowledgment of Notification of Amendments to the Articles of Association from the Minister of Law and Human Rights of the Republic of Indonesia dated May 8, 2025.
Implementation of the Directors' and Board of Commissioners' duties	<ol style="list-style-type: none"> <li>1. The Board of Commissioners has Work Guidelines and Regulations, which are ratified in the Decree of the BRI Board of Commissioners Number 06-KOM/05/2024 dated May 28, 2024.</li> <li>2. BRI's Board of Directors has established the Guidelines and Rules of Procedure for the Board of Directors, ratified through Decree No. B.299-DIR/SKP/04/2020 dated April 24, 2020.</li> </ol>
General Provisions on Corporate Governance	<ol style="list-style-type: none"> <li>1. # Corporate Governance Mechanism

The corporate governance process is the mechanism by which the company's organs and subordinates carry out their functions and duties to realize the commitment and governance structure, achieving governance results in accordance with GCG principles. The BRI governance process includes:

1. Implementation of the General Meeting of Shareholders.
2. Implementation of Duties and Responsibilities of the Board of Commissioners and Board of Directors
3. Implementation of Duties and Responsibilities of the Supporting Committees of the Board of Commissioners and Directors
4. Implementation of Duties and Responsibilities of Supporting Organs
5. Strategic Planning and Performance Management
6. Business Processes and Company Activities
7. Risk Management and Internal Control
8. Compliance Management System
9. Internal Audit

## Measurement/Testing of GCG Implementation Quality

To ensure that corporate governance results are adequate, BRI conducts an assessment of Corporate Governance implementation to measure the quality of governance structures and processes and to obtain feedback for continuous improvement. The assessment is carried out through self-assessment mechanisms and evaluations by independent parties with the following details:

### Internal Assessment

#### Self Assessment GCG

BRI conducts a self-assessment of the implementation of good corporate governance principles every semester, in accordance with POJK 17 of 2023 on the Implementation of Governance for Commercial Banks and SEOJK No. 14/POJK.03/2025 concerning Implementation of Governance for Commercial Banks. The Governance principles consist of Transparency, Accountability, Responsibility, Independence, as well as Fairness and Equality at all levels of the Bank's organization and operational activities. The assessment was carried out comprehensively on the implementation of the principles of good corporate governance, covering 3 (three) aspects of corporate governance, namely:

1. Governance Structure

The assessment aims to assess the adequacy of the Bank's governance structure and infrastructure so that the implementation of good governance principles produces results aligned with stakeholder expectations.

2. Governance Process

The assessment aims to assess the effectiveness of the process for implementing good governance principles, supported by the adequacy of the Bank's structured governance infrastructure, to produce results that are in line with stakeholder expectations.

3. Governance Outcome

The assessment aims to assess outcomes that meet the expectations of the Bank's stakeholders, resulting from the implementation of GCG principles and supported by the adequacy of the Bank's governance structure and infrastructure.

### Assessment Criteria

Based on SEOJK No. 14/POJK.03/2025 the indicators that serve as standards for implementing a corporate governance Self Assessment include 16 (sixteen) parameters, consisting of:

1. Implementation of Duties, Responsibilities, and Authorities of the Board of Directors
2. Implementation of Duties, Responsibilities, and Authorities of the Board of Commissioners
3. Completeness and implementation of the Committee's duties
4. Handling Conflicts of Interest
5. Implementation of compliance functions
6. Implementation of the internal audit function
7. Implementation of the external audit function
8. Implementation of risk management including an internal control system

9. Provision of Remuneration
10. Providing funds to related parties and providing large funds (large exposure)
11. Integrity of Reporting and Information Technology Systems
12. Bank strategic plan
13. Shareholder Aspects
14. Implementation of Anti-Fraud Strategy, including Anti-Bribery
15. Implementation of Sustainable Finance, including Social and Environmental Responsibility
16. Implementation of Governance within the Bank's Business Group

### The Party Carrying Out The Assessment

The GCG Self Assessment is coordinated by the Compliance Group and evaluated by the Committee under the Board of Commissioners on a periodic basis. The results of the GCG Self Assessment are then reported to the OJK.

## Self Assessment Results

In the corporate governance assessment conducted in 2025, the results of the self-assessment were as follows:

Self Assessment Results (Self Assessment) Implementation of Governance		
Entity	Rating	Rating Definition
PT Bank Rakyat Indonesia (Persero) Tbk.	2	Reflects that BRI Management has implemented GCG across the Governance Structure, Governance Process, and Governance Outcome aspects, which are generally good. This is reflected in adequate fulfillment of the principles of Good Corporate Governance. If there are weaknesses in the application of GCG principles, they are generally less significant and can be resolved through normal actions by BRI management.

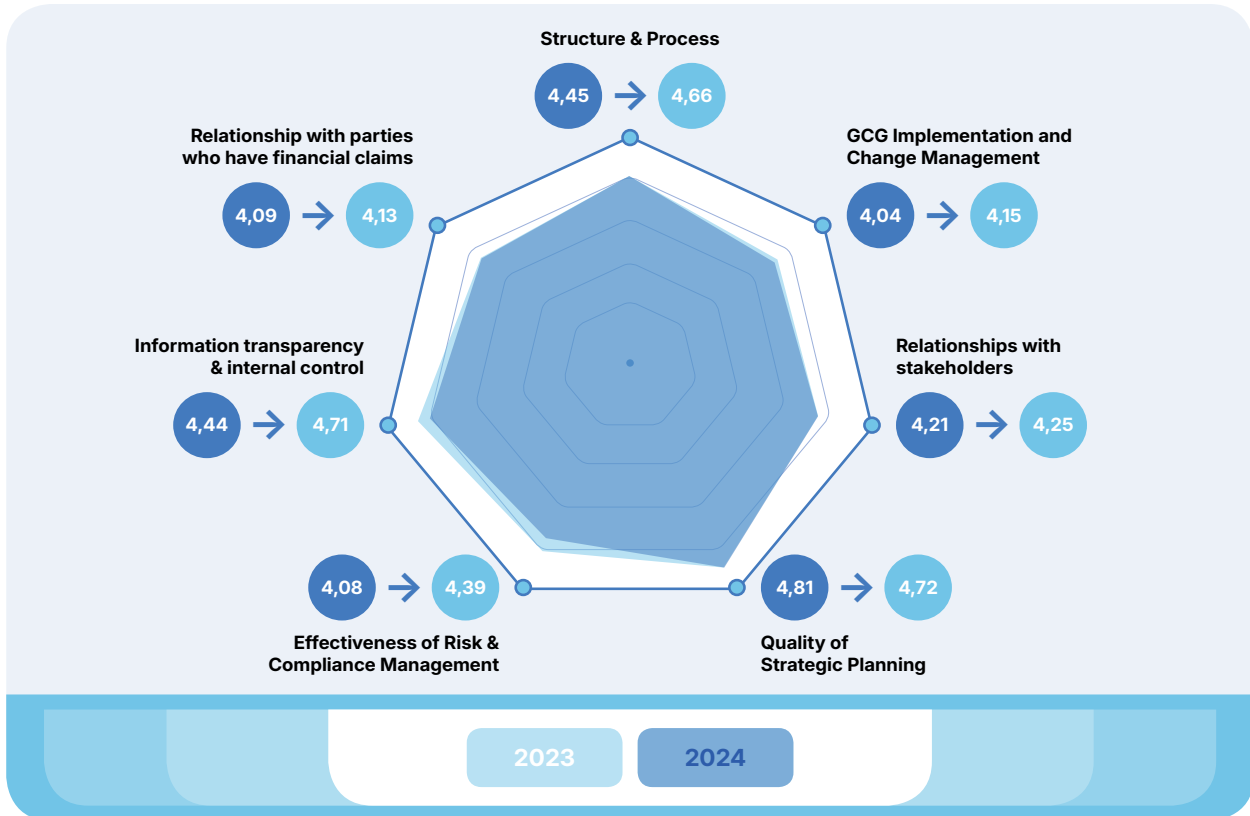

Analysis	
Governance Structure	The implementation of Good Corporate Governance in the governance structure was considered adequate, supported by governance structures, policies, strategies, and integrated systems. The composition of the Company's management had also been structured in accordance with prevailing regulations and supported by adequate internal policies. Any identified weaknesses were appropriately followed up on and did not impact the Company's performance.
Governance Process	The implementation of Good Corporate Governance in the governance process has generally gone well. The business processes carried out align with the established business plan, and each company organ has carried out its business processes in accordance with its duties and responsibilities. Apart from that, BRI regularly conducts reviews and evaluations to improve the effectiveness of each company organ's duties and responsibilities. Weaknesses in the implementation of the governance process can be addressed immediately to take corrective action.
Governance Results	The implementation of Good Corporate Governance in the governance outcome aspect has generally been carried out well; the disclosure and transparency of information, data, and reports are in accordance with applicable regulations. Due to weaknesses in the reporting process, BRI has developed and refined its management information and reporting system to improve reporting quality and make it easier for stakeholders to obtain accurate information.

## Follow-up on Self-Assessment Results

	Negative Aspects	Follow-up
Structure	There are still members of the Board of Directors who have been appointed at the GMS and have not received approval for the fit and proper assessment from the Financial Services Authority.	As of March 13, 2026, all members of the Board of Directors and Board of Commissioners have received approval for the fit and proper assessment from the Financial Services Authority.
Process	There are potential risks reflected in the increasing weaknesses in internal control over several risk issues, but the Company ensures that all these weaknesses are still within the control limits and the internal control process is still functioning effectively to prevent material financial and operational impacts.	The Company increases periodic evaluation of the effectiveness of internal controls and updates standard operating procedures to mitigate the potential for higher risk increases.
Outcome	There has been an increase in operational risk, but it remains within the established risk tolerance limits. The company's risk mitigation mechanisms are still very capable of minimizing the potential for material losses to the Company's financial stability.	The Company continues to optimize its real-time risk monitoring system to ensure that any potential risks can be detected and mitigated early before they exceed the specified tolerance threshold.

## Governance Maturity Level

BRI's Governance Maturity Assessment was conducted as part of efforts to strengthen the implementation of Good Corporate Governance through periodic measurement of governance structure, process, and outcome aspects. In 2025, BRI conducted a governance maturity evaluation for the 2024 period, which was carried out by an independent party, achieving a score of 4.48, an increase compared to the previous period's score of 4.30, as illustrated in the following diagram:

	Structure & Process	Relationship with Parties Having Financial Claims	Financial Transparency, Information Disclosure & Effectiveness of Internal Control	Effectiveness of Risk Management and Compliance	Quality of Strategic Planning	Relationship with Stakeholders	Implementation of GCG and Change Management
2022	4.24	3.90	3.75	3.73	4.50	3.86	3.68
2023	4.45	4.09	4.45	4.09	4.81	4.22	4.04
2024	4.66	4.13	4.71	4.39	4.72	4.25	4.15

## External Assessment

### Corporate Governance Perception Index

CGPI is one of the corporate governance assessments through a research method implemented by The Indonesian Institute for Corporate Governance (IICG) in Indonesian companies. For the past 5 (five) years, BRI has consistently improvements to the GCG implementation comprehensively. Hence, and in line with that in 2025, BRI achieved highest in the CGPI assessment event. This achievement shows BRI management's commitment to continuously and sustainably support the achievement of the company's vision and mission.

The CGPI assessment was carried out on 3 aspects of governance, namely:

- Governance Structure includes corporate governance structure and policy.
- Governance Process includes the corporate governance system and mechanism.
- Governance Outcome includes output, outcome, and impact of the GCG implementation process.

### The 2024 CGPI Assessment in Subsidiaries

To enhance the implementation of Good Corporate Governance within the BRI Financial Conglomerate, BRI, as the parent entity, encouraged Subsidiaries that are members of the BRI Financial Conglomerate to participate in the Corporate Governance Perception Index (CGPI) assessment as a form of external evaluation of corporate governance implementation in each respective company. The CGPI scores obtained by the Subsidiaries within the BRI Financial Conglomerate were as follows.

Implementing Year	Pegadaian	PNM	Bank Raya	BRI Finance	BRI Life	BRI Insurance	BRI Danareksa Sekuritas
2022	87.81	82.45	-	81.55	83.29	82.33	-
2023	88.42	83.50	-	-	84.40	82.85	-
2024	88.74	84.62	83.80	-	85.40	83.95	81.77
2025	89.05 <b>Most Trusted</b>	85.55 <b>Most Trusted</b>	85.07 <b>Most Trusted</b>	-	86.35 <b>Most Trusted</b>	85.25 <b>Most Trusted</b>	83.46 <b>Trusted</b>

### ASEAN Corporate Governance Scorecard

ACGS is one of the parameters for measuring governance practices agreed by the ASEAN Capital Market Forum (ACMF) and supported by the Asian Development Bank (ADB). It aims to improve governance practices among Listed Companies in ASEAN and support them in becoming companies with class assets. The ASEAN Corporate Governance Scorecard (ACGS) criteria adopt the principles of Corporate Governance issued by the Organization for Economic Cooperation and Development (OECD).

1. Shareholder Rights.
2. Sustainability and Resilience.
3. Disclosure and Transparency.
4. Responsibilities of the Board of Directors and Board of Commissioners.

In 2025, BRI was ranked among the Top 5 Public Listed Companies (PLCs) in Indonesia & the ASEAN Asset Class PLCs. The implementation of BRI's Corporate Governance, referring to the ASEAN Corporate Governance Scorecard, is delivered thoroughly on BRI's website at <https://www.ir-bri.com/acgs.html> or through the following QR Code.

# Implementation of Corporate Governance in Accordance with Financial Services Authority Provisions

The implementation of aspects and principles of public company governance is regulated in OJK Regulation No. 21/POJK.04/2015 concerning Implementation of Public Company Governance Guidelines and OJK Circular Letter No. 32/SEOJK.04/2015 concerning Public Company Governance Guidelines, which regulates 5 (five) aspects, 8 (eight) principles and 25 (twenty five) recommendations for implementing governance principles.

The implementation of these recommendations in BRI's GCG is as follows:

No	Aspect; Principle; Recommendation	Comply or Explain
<b>A. ASPECT 1: PUBLIC COMPANY RELATIONSHIP WITH SHAREHOLDERS IN GUARANTEEING SHAREHOLDER RIGHTS.</b>		
<b>A.1. Principle 1: Increase the value of holding a General Meeting of Shareholders (GMS).</b>		
	<b>A.1.1. Recommendation 1:</b> Public Companies have technical methods or procedures for collecting votes, both openly and privately, that prioritize shareholder independence and interests.	<p>The BRI General Meeting of Shareholders is conducted through one vote per share. The voting mechanism is implemented by way of raising hands, and the Officer collects voting rights by approaching all present shareholders.</p> <p>The Company has used a decision-making procedure based on voting, which prioritizes independence and the interests of shareholders in accordance with OJK provisions. The Company has implemented as follows:</p> <ul style="list-style-type: none"> <li>- Have a voting procedure in decision-making on the GMS agenda as stipulated in the BRI GMS Rules of Conduct, which is announced to the shareholders through the company's website.</li> <li>- The voting procedure involves Independent Parties, namely a Notary and the Securities Administration Bureau.</li> <li>- The voting process is regulated in BRI's Articles of Association, and the GMS Rules are available on the company's website.</li> </ul> <p>Remarks: Comply</p>
	<b>A.1.2. Recommendation 2:</b> All members of the Board of Directors and members of the Board of Commissioners of Public Companies are present at the Annual GMS.	<p>In 2025, BRI held the Annual General Meeting of Shareholders for Fiscal 2024 on March 24, 2025 and the Extraordinary General Meeting of Shareholders on December 17, 2025, which were attended by all members of the Board of Commissioners and the Board of Directors.</p> <p>Remarks: Comply</p>
	<b>A.1.3. Recommendation 3:</b> A summary of the GMS minutes is available on the Public Company Website for at least 1 (one) year.	<p>For the GMS convened in 2025, the Company prepared summaries of the minutes in both Indonesian and English with the following details:</p> <ol style="list-style-type: none"> <li>1. The minutes of the AGM meeting were published on the company's website within 1 (one) working day, Tuesday, March 25, 2025. The AGMS was held on Monday, March 24, 2025.</li> <li>2. The Summary of Minutes of the EGMS was published on the Company's website within 1 (one) working day, namely on Thursday, December 18, 2025. The EGMS was held on Wednesday, December 17, 2025.</li> </ol> <p>The minutes of the Bank's AGMS were available for more than 1 (one) year on the BRI website. (<a href="http://www.bri.co.id">www.bri.co.id</a>)</p> <p>Information related to the Annual GMS in 2025 was presented in the General Meeting of Shareholders Sub-Chapter in the Corporate Governance Chapter of this Annual Report.</p> <p>Remarks: Comply</p>

D.	<b>ASPECT 4: STAKEHOLDER PARTICIPATION</b>	
D.1.	<b>Principle 7: Improving Corporate Governance Aspects through Stakeholder Participation</b>	
	D.1.1. <b>Recommendation 18:</b> Public Companies have policies to prevent insider trading.	BRI Insider Trading policy is regulated under: 1. Circular Letter (SE) Number SE.09.a-DIR/ KEP/03/2023 dated October 31, 2023 concerning the First Amendment to Corporate Governance Book 6 concerning the Code of Ethics. 2. Circular Letter (SE) Number SE.09-DIR/ KEP/03/2023 dated March 15, 2023 concerning Corporate Governance Book 1 concerning Conflicts of Interest.  Remarks: Comply
	D.1.2. <b>Recommendation 19:</b> Public Companies have anti-corruption and anti-fraud policies.	The implementation of the Anti-Fraud Strategy at BRI is regulated in the Board of Directors' Circular Letter Number: SE.58b-DIR/ORD/11/2022 dated December 31, 2024 concerning the Second Amendment to the Guidelines for the Implementation of Operational Risk Management (Book 5 Anti-Fraud Strategy).  To improve banks' ability to prevent fraud and respond rapidly when a fraud event occurs, fraud risk management was divided into 2 main activities: risk management (when fraud is still a potential risk) and incident handling (after the incident occurs). This fraud risk management activity was adapted and developed from the 4 (four) pillars, namely: 1. Prevention 2. Detection 3. Investigation, Reporting, and Sanctions 4. Monitoring, Evaluation, and Follow-Up  To create a company environment free from Corruption, Collusion, and Nepotism, BRI has an anti-corruption policy, as stated in Circular Letter Number SE.09- DIR/KEP/03/2023 dated March 15, 2023, concerning Corporate Governance Book 3 regarding Anti-Bribery and Gratification Control.  To create and implement an Anti-Bribery Management System at PT. Bank Rakyat Indonesia (Persero), BRI, has implemented ISO 37001:2016 and adopted the ISO 37001:2016 Anti-Bribery Management System policy, as stated in Circular Letter (SE) Number SE.09-DIR/KEP/03/2023 dated March 15, 2023, concerning Corporate Governance Book 4 on the ISO 37001:2016 Anti-Bribery Management System.  Remarks: Comply
	D.1.3. <b>Recommendation 20:</b> Public Companies have policies for selecting and improving supplier or vendor capabilities.	The Company has established a policy on BRI Vendor Management, as regulated under the BRI Board of Directors Decree No. KU.03-DIR/PLM/06/2024 dated June 25, 2024, concerning the General Policy on Fixed Assets Management & Procurement concerning Procurement of Goods and/or Services, as last amended by Circular Letter No. SE.18.b-DIR/PLM/05/2023 dated July 31, 2024, concerning the Second Amendment to Procurement of Goods and/or Services (Book 11).  Remarks: Comply
	D.1.4. <b>Recommendation 21:</b> Public Companies have policies for fulfilling their obligations to creditors	The Company has a policy regarding the fulfillment of creditor rights, as set forth in each Loan Agreement between BRI and the debtors. The agreement sets out the rights and obligations of both parties, including transparency in financial reporting to creditors.  Remarks: Comply
	D.1.5. <b>Recommendation 22:</b> Public Companies have a whistleblowing system policy.	Implementation Guidelines No. JL.04-KEP/05/2025, dated May 8, 2025, concerning the Whistleblowing System, regulates the types of violations reported, reporting channels, the protection and confidentiality of reporters, as well as the Business Unit responsible for managing the Whistleblowing System. Furthermore, BRI has collaborated with an independent party in receiving complaint reports through the Whistleblowing System.  Remarks: Comply
	D.1.6. <b>Recommendation 23:</b> Public Companies have a policy of providing long-term incentives to Directors and employees.	BRI has a policy on long-term employee incentives, as set out in the Board of Directors Circular Letter Number SE.36-DIR/HCS/12/2024 dated December 30, 2024.  Explanation of Long-Term Incentives is also regulated in the Employee Welfare Section in BRI's 2025 Annual Report.  Remarks: Comply

	<p>E.1.2. <b>Recommendation 25:</b> The Annual Report of a Public Company discloses the ultimate beneficial owner in Public Company share ownership of at least 5% (five percent), in addition to disclosure of the ultimate beneficial owner in Public Company share ownership through the main and controlling shareholders.</p>	<p>In the 2025 BRI Annual Report, it conveys the obligation to disclose information regarding shareholders who own 5% (five percent) or more shares of a Public Company, as well as the obligation to disclose information regarding the main and controlling shareholders of a Public Company, both directly and indirectly, up to the last beneficial owner in ownership of the shares.</p> <p>Remarks: Comply</p>

# Implementation of Corporate Governance Aspects and Principles in Accordance with The Guidelines of Corporate Governance Principles for Banks Published by The Basel Committee in Banking Supervision

The Governance Guidelines include 12 (twelve) corporate governance principles. The description of its implementation can be conveyed as follows.

Principle	Explanation	Implementation at BRI
<b>Principle 1</b> Responsibility of the Board of Commissioners.	The Board of Commissioners has responsibilities that include approval and oversight of the implementation of business strategies, governance structures and mechanisms, and corporate culture	The scope of the Board of Commissioners' obligations as stated in the Board of Commissioners' Rules of Procedure ratified in the Decree of the BRI Board of Commissioners Number Decree 06-KOM/05/2024 dated May 28, 2024 includes the Board of Commissioners providing opinions and approvals on the Bank's work plan.
<b>Principle 2</b> Qualifications and Composition of the Board of Commissioners.	Members of the Board of Commissioners must possess qualities that align with their duties and responsibilities, both individually and collectively. The Board of Commissioners must understand its role in supervising and implementing corporate governance, and be able to carry out decision-making in a sound and objective manner.	The scope of the Board of Commissioners' obligations as stated in the Board of Commissioners' Code of Conduct in the Board of Commissioners Decree Number 06-KOM/05/2024 dated May 28, 2024 includes the Board of Commissioners' role in ensuring the implementation of Good Corporate Governance in every business activity of the Company at all levels or organizational levels and supervise the implementation of Integrated Governance. In order to implement good corporate governance, the Board of Commissioners is responsible for, among other things: <ul style="list-style-type: none"> <li>1. Propose the appointment of a Public Accountant to the GMS</li> <li>2. Report the results of supervision carried out to the GMS.</li> </ul> All members of the Board of Commissioners have passed the OJK fit-and-proper test and are certified in risk management, as detailed in each member's profile.
<b>Principle 3</b> Structure and Mechanism of the Board of Commissioners.	The Board of Commissioners must establish appropriate governance structures and practices to carry out its duties and periodically review their effectiveness.	The Board of Commissioners has committees to assist in carrying out its duties, namely the Audit Committee, Risk Management Monitoring Committee, Nomination and Remuneration Committee, and Integrated Governance Committee.
<b>Principle 4</b> Directors.	Under the direction and supervision of the Board of Commissioners, the Board of Directors manages the Bank's activities in accordance with the Bank's business strategy, risk appetite, remuneration policies, and other policies approved by the Board of Commissioners.	The duties and responsibilities of the Board of Commissioners include providing direction and supervision to the Board of Directors in the management of the Company. The Board of Commissioners approves the company's plans, work, and the implementation of the Bank's strategic policies.
<b>Principle 5</b> Business Group Governance Structure.	In a business group, the Board of Commissioners of the parent company has overall responsibility for the business group and to ensure the establishment and implementation of clean governance practices related to the structure, business and risks of the business group and entity. The Board of Commissioners and Directors must understand the business group's organizational structure and the risks it faces.	The Integrated Governance Committee is a supporting organ of the Board of Commissioners in ensuring the establishment and implementation of clean governance practices related to the financial conglomerate's structure, business, and risks. One of the duties and responsibilities of the Integrated Governance Committee is to evaluate the implementation of integrated governance by assessing the adequacy of internal controls, the execution of the compliance function, the implementation of integrated risk management, and other relevant integrated aspects.
<b>Principle 6</b> Risk Management Function.	Banks must have a quality risk management function, be independent, have quality resources and have access to the Board of Commissioners.	BRI has a Risk Management function that includes identifying, measuring, monitoring, and controlling all Company risk exposures carried out by the Risk Management Directorate. In carrying out its supervisory function, the Board of Directors communicates the implementation of the risk management function to the Board of Commissioners through the Risk Management Monitoring Committee.

Principle	Explanation	Implementation at BRI
<b>Principle 7</b> Risk Identification, Monitoring, and Control.	Risks must be identified, monitored, and controlled for all Bank activities. The quality of the risk management infrastructure and internal control must keep pace with changes in the Bank's risk profile, external risk conditions, and industry practices.	The process of implementing risk management, which includes identifying, measuring, monitoring, and controlling risks, is carried out on an ongoing basis. Risk management is carried out across all bank activities in accordance with the management standard provisions set by the regulator.
<b>Principle 8</b> Risk Communication.	Implementing effective risk governance requires accurate risk communication within the Bank, both between organizations and through reporting to the Board of Commissioners and Directors.	To support the implementation of Operational Risk Management (MRO), BRI has prepared an MRO Framework aligned with the principles of Risk Management in ISO 31000:2018, serving as a guideline for implementing MRO across every line. The MRO Framework is generally divided into 3 (three) main components, namely Business Strategy, Business Management, and Business Enablers.  BRI conducts regular discussions on risk management through the Risk Management Forum, the Risk Management Committee, and the Integrated Risk Management Committee.
<b>Principle 9</b> Compliance.	The Board of Commissioners is responsible for supervising management related to the Bank's compliance risks. The Board of Commissioners must establish a compliance function and approve policies and processes for identifying, assessing, monitoring, and reporting, and for providing advice on compliance risks.	The implementation of the Board of Commissioners' supervisory function regarding Bank Compliance risks is carried out by the Risk Management Monitoring Committee, which oversees the application of the precautionary principle to ensure that all business activities and policies comply with all applicable laws and regulations. The compliance function is reviewed and evaluated every semester.
<b>Principle 10</b> Internal Audit.	The internal audit function must report independent assurance activities to the Board of Commissioners and must support the Board of Commissioners and Directors in encouraging the implementation of effective governance processes and the long-term health of the Bank.	The Internal Audit Business Unit within the BRI organization is directly under the President Director and can communicate and coordinate supervision with the Board of Commissioners through the Audit Committee. Duties and responsibilities: The Internal Audit Business Unit is responsible for carrying out independent, objective assurance and consulting activities to add value and improve operational activities.
<b>Principle 11</b> Compensation.	The Bank's remuneration structure must support the implementation of corporate governance and risk management.	BRI's remuneration structure refers to OJK Regulation Number 45/POJK.03/2015 concerning the Implementation of Governance in Providing Remuneration for Commercial Banks. The implementation of BRI's Remuneration Governance is presented in the 2025 BRI Annual Report in the Remuneration Governance Policy Chapter.
<b>Principle 12</b> Disclosure and Transparency.	The Bank's governance must be implemented transparently to Shareholders, Depositors, other relevant Stakeholders, and Market Participants.	BRI's disclosure and transparency to shareholders are conveyed on the company website <a href="http://www.bri.co.id">www.bri.co.id</a> , which provides the latest information. BRI Bank's information disclosure is also conveyed in its Annual Report, Sustainability Report, and Public Expose.

## Relationship Between Structure, Mechanism and Governance Results

Corporate governance is implemented in an integrated series encompassing three (3) governance aspects: structure, process, and outcome. These three aspects, carried out by BRI, ensure the availability of adequate governance structures and infrastructure, maximize the effectiveness of governance implementation processes, and improve governance outcomes to meet stakeholders' expectations.

# Implementation of Corporate Governance

## Shareholders

Shareholders are individuals or legal entities who are the legitimate owners of the company's shares. Shareholders do not interfere with the functions, duties, and authorities of the Board of Commissioners and the Board of Directors.

BRI shares are categorized into 2 (two) types, namely:

1. Series A Dwiwarna shares
2. Series B shares

Shareholders have an important role in the implementation of corporate governance, which is manifested in the implementation of shareholder rights in the GMS in accordance with the principles of good corporate governance.

## Shareholders Rights

Holders of Series A Dwiwarna shares and Series B Shares have the same rights and every 1 (one) share gives 1 (one) voting right. Ownership of Dwiwarna Series A Shares provides special rights to the government as the main shareholder as follows:

1. The right to approve in the GMS regarding the following matters:
    - a. Approval of amendment to the Articles of Association.
    - b. Approval of changes in capital.
    - c. Approval of dismissal and appointment of members of the Board of Directors and Board of Commissioners.
    - d. Approval on merger, consolidation, expropriation, separation and dissolution.
    - e. Approval of remuneration of members of the Board of Directors and Board of Commissioners.
    - f. Approval of the transfer of assets based on These Articles of Association requires the approval of the GMS.
    - g. Approval regarding participation and reduction in the percentage of equity participation in other companies.
    - h. Approval of the use of profits.
    - i. Approval regarding investment and long-term financing that is not operational in nature, based on the Articles of Association, requires the approval of the GMS.
  2. The right to nominate members of the Board of Directors and members of the Board of Commissioners.
  3. The right to propose the agenda of the GMS.
  4. The right to request access to company data and documents, with the mechanism of the use of said rights in accordance with the provisions in the Articles of Association and laws.
- Apart from the special rights held by the Series A Dwiwarna Shareholder, the Series A Shareholder and the Series B Shareholder have the same rights as long as it is not regulated otherwise by the Articles of Association, namely:
1. Attend the GMS either directly or through proxy, provide an opinion and/or take a decision. Each shareholder is entitled to be treated equally and to make a claim in accordance with the type, classification, and number of shares owned.
  2. Receive accurate and prompt information related to BRI with the principle of equality of information to all shareholders.
  3. Receive distribution of dividend and other forms of profit of BRI in proportion to total owned shares.
  4. Receive remaining returns from the bank liquidation in the event of bankruptcy.
  5. Request a General Meeting of Shareholders by one or more shareholders of either share or jointly representing 1/10 (one-tenth) or more of the total shares issued by the Company with valid voting rights, in good faith, on the basis of the interests of the Company, and does not conflict with the laws and regulations of the Company.
  6. Obtain comprehensive and accurate information on the GMS procedures requirements.
  7. File a lawsuit against the Bank for any loss resulting from the Bank's acts that are considered unfair and irrational due to the resolutions of GMS, the Board of Directors and/or Board of Commissioners.
  8. Request for the Bank to purchase its shares at a fair price with the procedure as stipulated in the Articles of Association/ applicable laws and regulations in the event that the shareholder disagrees with the Company's action/ corporate actions that cause such loss to the Shareholders or the Company.
  9. Attain corporate information from the Board of Directors and/ or Board of Commissioners at the GMS as far as the requested information is in line with the meeting agenda and does not contradict the Company's interests.
  10. Obtain information relating to the Company from the Board of Directors and/or Board of Commissioners in the GMS as long as it is related to the agenda of the Meeting and does not conflict with the interests of the Company.

11. Through the GMS, make changes to the Board of Directors and the Board of Commissioners together with the Series A Dwiwarna Shareholders, provided that they represent more than ½ of the total number of shares with valid voting rights.

## Responsibilities of Shareholders

1. All Shareholders must be able to:
  - a. Separate the ownership of the company's assets and of personal assets.
  - b. Separate its function as shareholders and as members of the Board of Commissioners or Board of Directors in the event the shareholder holds a position in either organ.
2. The Controlling Shareholder must be able to:
  - a. Take into account the interests of minority shareholders and stakeholders pursuant to the prevailing laws and regulations.
  - b. Disclose the ultimate shareholders of the Bank to the law enforcement agency, where suspicion of legal breach arises or is requested by the competent authority.
  - c. Exert accountability and transparency in relationships between companies, where shareholders are also controlling shareholders of several other companies.
3. The minority shareholders are responsible for exercising their rights pursuant to the Company's Articles of Association and prevailing laws and regulations.

## Equal Treatment for Shareholders

BRI upholds equal treatment for all Shareholders which is reflected in:

1. Each shareholder has 1 (one) voting right.
2. Providing the same access to information through Investor Relations channel by means of direct interaction at Public Expose, Non-deal Roadshow, Press Conference or 1-on-1 Meeting, Conference Call and Email, as well as Documents availability on the Company's website, Investor Relations, and Indonesia Stock Exchange including the Annual Report, Audited Financial Statement, and Highlights of Company's Financial Performance, etc.
3. Equal treatment for all Shareholders to obtain information disclosure from the Bank, including information related with company performance, financial statements, and the implementation of the GMS.

## Policy on Shareholders Relations

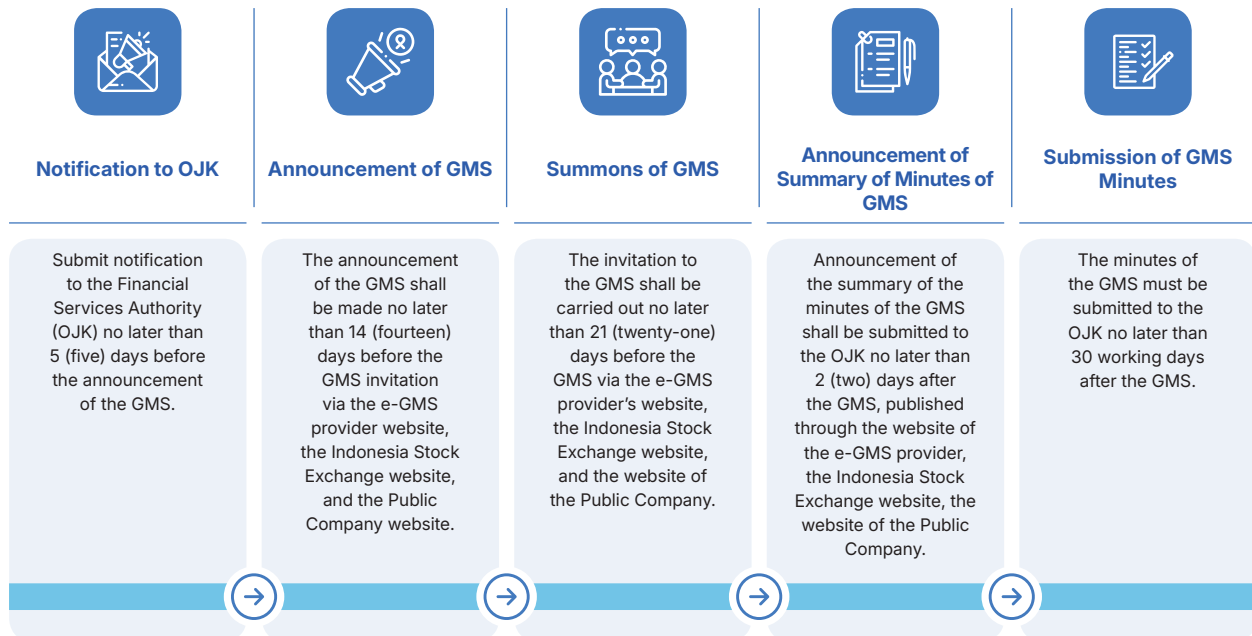

The relationship between the Company and Shareholders is regulated in the Company's Articles of Association. All communication with Shareholders shall be the responsibility of spokesperson of the company. The Company has a spokesperson who is authorized to communicate with Shareholders. All Shareholders must receive equal treatment and information (equitable treatment) in a timely manner as stated in the Board of Directors Circular Letter Number 17-DIR/CSC/07/2024 dated July 31, 2024 concerning Communication of PT Bank Rakyat Indonesia (Persero) Tbk.

## General Meeting of Shareholders

### GMS Implementation Stages

The stages of holding the 2025 GMS have met the provisions of POJK No. 15/POJK.04/2020 concerning the Plan and Implementation of the General Meeting of Shareholders of a Public Company and/or POJK No. 16/POJK.04/2020 concerning the Implementation of the General Meeting of Shareholders of a Publicly Listed Company Electronically as amended by OJK Regulation No. 14 of 2025 concerning the Electronic Implementation of General Meetings of Shareholders, General Meetings of Bondholders, and General Meetings of Sukuk Holders, as follows:

### Quorum Procedure

No.	Agendas	Attendance Quorum	Quorum of Decision
1.	Amendments to the Articles of Association that require the approval of the Minister who administers government affairs in the field of law and human rights, except for changes to the Articles of Association in order to extend the period of establishment of the Company. No.	Agendas	Attendance Quorum	Quorum of Decision
5	The agenda item requiring GMS approval was attended only by Independent Shareholders.	Attended by more than 1/2 (one half) of the total shares with valid voting rights owned by Independent Shareholders.	Approved by more than 1/2 (one half) of the total shares with valid voting rights owned by Independent Shareholders.

## GMS Procedures

The GMS procedures are as follows:

1. Shareholders or their proxies can access or download the GMS Rules of Procedure on the Company's website.
2. The GMS Rules are read out before the GMS begins.
3. Opportunities are given to Shareholders or their proxies present to submit questions/responses and/or proposals to each agenda of the GMS.
4. The Chairperson of the GMS or the party appointed by the Chair of the GMS will answer or respond to questions and/or opinions from the shareholders.
5. Voting is conducted after all questions and/or opinions have been answered. Shareholders or their authorized proxies can only cast votes.
6. The calculation and/or validation of votes in the GMS is carried out by an Independent party namely a Notary assisted by the Share Registrar appointed by the Company.

## Efforts to Encourage Shareholders to Attend The GMS

BRI encourages all Shareholders to attend and exercise their rights and authorities in the GMS. The efforts are carried out through:

1. Notifications and summons for the GMS are distributed promptly through the Company's website, the Stock Exchange, and e-RUPS provider.
2. Presenting material from each meeting agenda as a reference for Shareholders.
3. Open access for Shareholders to communicate with the Company regarding the implementation of GMS through the contacts available on the Company Website.
4. Provide a proxy form for Shareholders or Shareholders' proxies to vote at the GMS which can be accessed through the Company's website and/or the Stock Exchange.

## Attendance of Shareholders and Other Parties at The GMS

Shareholders, either individually or represented by a power of attorney, are entitled to attend the GMS. Shareholders who are entitled to attend the GMS are shareholders whose names are recorded in the list of shareholders of the Public Company 1 (one) working day before the invitation to the GMS.

BRI accommodates the practice of securing electronic voting in absentia at the General Meeting of Shareholders. For shareholders who cannot attend in person, the company allows them to attend the meeting and cast their votes electronically through the KSEI System's eASY facility. KSEI provides the link, and the company informs shareholders through the Summons for the AGMS and the AGMS Rules of Procedure. Shareholders can also grant the Attorney electronic power of attorney through eASY.KSEI application or in writing addressed to the Company. The procedures for Granting Power of Attorney for Attendance and Power of Attorney for Voting Rights are disclosed in the AGMS Summons document.

## GMS Voting Mechanisms

Every 1 (one) share entitles the holder to cast 1 (one) vote. Before voting, the Chairperson of the GMS will explain the voting procedures for each agenda item for which Shareholder approval is requested. The voting procedures in the GMS are:

1. Shareholders or their proxies who are physically present vote abstain or disagree by raising their hands and submitting their voting cards at voting time.
2. Shareholders or their proxies who are physically present and do not raise their hands are deemed to have approved the proposed resolution of the agenda.

3. Shareholders or their proxies who are present electronically vote via e-voting (vote by poll) on eASY.KSEI
4. Shareholders or their proxies who cast abstentions are deemed to have cast the same vote as the votes of the majority of shareholders who cast votes.
5. The chairman of the GMS will announce the voting results.
6. Each shareholder can be represented at the GMS by other holders or a third party with a power of attorney. Members of the Board of Directors, members of the Board of Commissioners, Secretary to the Board of Commissioners and Employees of the Company may act as proxies at the GMS, but are prohibited from acting as proxies in voting.

### GMS Voting Involving Independent Parties

In holding the GMS, BRI not only invites shareholders but also always involves independent parties, especially in voting and counting votes, namely Notary Fathiah Helmi S.H and PT Datindo Entrycom.

### Process of Organizing GMS and Voting

The quorum provisions, voting procedures, and rules of the Meeting are disclosed before the GMS begins. Voting can be conducted electronically. The decision-making mechanism is first by providing an explanation

regarding each agenda to be decided by shareholders, and the minimum number of quorum resolutions for each proposed agenda. Furthermore, the GMS Summary provides an explanation of the stages of GMS implementation, the basis for consideration of each GMS agenda that will receive shareholder approval, and the results of any questions and answers and/or expressions of opinion.

### Implementation of The 2025 Annual GMS and Its Realization

The Annual GMS was held on March 24, 2025 in accordance with OJK Regulation No. 15/POJK.04/2020 concerning the Plan and Implementation of the General Meeting of Shareholders of a Public Company and/or POJK Regulation No. 14 Year 2025 concerning the Implementation of General Meetings of Shareholders, General Meetings of Bondholders, and General Meetings of Sukuk Holders Electronically, with the following stages:

1. Notified the Chairman of the Financial Services Authority about the planned meeting through Letter Number R.219-DIR/CSC/01/2025 dated January 21, 2025.
2. Published the Meeting Announcement for Shareholders on the websites of PT Kustodian Sentral Efek Indonesia, PT Bursa Efek Indonesia, and the Company on January 31, 2025.
3. Published the Meeting Invitation for Shareholders on the Company's website, PT Bursa Efek Indonesia, and PT Kustodian Sentral Efek Indonesia on February 28, 2025.

**Note:**

\*) Effective since March 13, 2026.

### Independent Vote Counting Party

Vote counting, as a basis for decision-making at the 2025 Extraordinary GMS, was conducted by PT Datindo Entrycom, acting as the Securities Administration Bureau. Next, the validation was carried out by Fathiah Helmi, SH., Notary in Jakarta.

### Opportunity to Submit Statements/Opinions and Voting

The Shareholders or their proxies were given the opportunity to ask questions and/or express opinions in each Agenda Item of the Meeting. The number of Shareholders or their proxies, whether attending physically and/or electronically, who submitted questions and/ or opinions during the Meeting, as well as the results of the decision-making process through voting, including e-Proxy votes via eASY. KSEI, are as follows.

Agendas	In Favor	Against	Abstain	Question/ Opinion
<b>First**</b>	120,070,752,097 votes or 93.4910% of all shares with valid voting rights present at the Meeting	6,972,083,689 votes or 5.4286% of all shares with valid voting rights present at the Meeting	1,387,404,406 votes or 1.0802% of all shares with valid voting rights present at the Meeting	None
<b>Second</b>	118,873,158,043 votes or 92.5585% of all shares with valid voting rights present at the Meeting	8,148,828,306 votes or 6.3449% of all shares with valid voting rights present at the Meeting	1,408,253,843 votes or 1.0965% of all shares with valid voting rights present at the Meeting	1 (one)
<b>Third</b>	90,391,451,713 Votes or 70.3817% of all shares with valid voting rights present at the Meeting	36,626,415,657 votes or 28.5185% of all shares with valid voting rights present at the Meeting	1,412,372,822 votes or 1.0997% of all shares with valid voting rights present at the Meeting	None

**Notes:**

\*) In line with the Company's Articles of Association and the OJK Regulation for the GMS, an abstention vote is considered to be the same as the majority vote of the voting Shareholders. Therefore, based on the calculation system of the Indonesian Central Securities Depository (PT Kustodian Sentral Efek Indonesia) and the Securities Administration Bureau, abstention votes are added to the number of affirmative votes.

\*\*) The Series A Dwiwarna Shareholder, as the Shareholder affected by the change in the Preferential Rights of the Series A Dwiwarna Share, was present and gave his approval at the Meeting, representing 1 (one) share, or 100% of the total number of shares in the affected share classification.

Mr. Amam Sukriyanto  
 Previously: Director of Small and Medium Business  
 Changed to: Director of Commercial, Small and Medium Business

Mr. Andrijanto  
 Previously: Director of Network and Services  
 Changed to: Director of Retail Funding and Distribution

Each was appointed pursuant to the resolutions of the Extraordinary General Meeting of Shareholders (EGMS) on January 21, 2021, and the Annual General Meeting of Shareholders (AGMS) on March 1, 2022, with their respective terms continuing for the remaining period in accordance with the appointment resolutions.
4. Appointing the following individuals as members of the Company's Management:
  - 1). Mr. Catur Budi Harto as Vice President Director
  - 2). Mr. Agus Noorsanto as Director of Wholesale and Institutional Business
  - 3). Mr. Agus Sudiarto as Director of Risk Management
  - 4). Mr. Haryo Baskoro Wicaksono as Independent Commissioner

The term of office for the appointed members of the Board of Directors and Board of Commissioners, as mentioned in point 4, shall be in accordance with the Company's Articles of Association, considering the prevailing capital market regulations, and without limiting the right of the General Meeting of Shareholders (GMS) to dismiss them at any time.
5. With the dismissal, changes in job nomenclature, reassignment of duties, and appointment of members of the Board of Directors and Board of Commissioners as referred to in points 1, 2, 3, and 4, the composition of the Company's Board of Directors and Board of Commissioners is as follows:
 

**Board of Directors:**

  - 1) President Director: Mr. Sunarso
  - 2) Vice President Director: Mr. Catur Budi Harto
  - 3) Director of Consumer Business: Ms. Handayani
  - 4) Director of Micro Business: Mr. Supari
  - 5) Director of Compliance: Mr. Ahmad Solichin Lutfiyanto
  - 6) Director of Wholesale and Institutional Business: Mr. Agus Noorsanto
  - 7) Director of Risk Management: Mr. Agus Sudiarto
  - 8) Director of Human Capital: Mr. Agus Winardono
  - 9) Director of Commercial, Small and Medium Business: Mr. Amam Sukriyanto
  - 10) Director of Finance: Ms. Viviana Dyah Ayu R.K.
  - 11) Director of Digital and Information Technology: Mr. Arga Mahanana Nugraha
  - 12) Director of Retail Funding and Distribution: Mr. Andrijanto

**Boards of Commissioners:**

  - 1) President Commissioner: Mr. Kartika Wirjoatmodjo
  - 2) Vice President Commissioner / Independent Commissioner: Ms. Rofikoh Rokhim
  - 3) Commissioner: Mr. Awan Nurmawan Nuh
  - 4) Commissioner: Mr. Rabin Indrajad Hattari
  - 5) Independent Commissioner: Mr. Dwi Ria Latifa
  - 6) Independent Commissioner: Mr. Heri Sunaryadi
  - 7) Independent Commissioner: Mr. Paripurna Poerwoko Sugarda
  - 8) Independent Commissioner: Mr. Agus Riswanto
  - 9) Independent Commissioner: Ms. Nurmaria Sarosa
  - 10) Independent Commissioner: Mr. Haryo Baskoro Wicaksono\*

**Notes:**

\*) The appointed Board of Commissioners member can only perform duties and functions after obtaining approval from the Financial Services Authority (OJK) for the Fit & Proper Test.

1. The appointed commissioner has completed and passed the OJK Fit & Proper Test, as confirmed in OJK Decision No. KEPR-70/D.03/2024 dated August 8, 2024.
2. The updated company management structure has been documented in Deed No. 10, dated September 23, 2024, as per the Annual GMS decision of PT Bank Rakyat Indonesia (Persero) Tbk.

6. Newly appointed Board of Commissioners members, as referred to in point 4, may only carry out their duties and functions after obtaining approval from the Financial Services Authority (OJK) for the Fit & Proper Test and complying with applicable laws and regulations. In the event that a Board of Commissioners member is later declared unqualified in the Fit & Proper Test by OJK, they shall be honorably dismissed as of the date of the OJK decision.
7. The Board of Directors is requested to submit a formal written request to OJK to conduct the Fit & Proper Test for the appointed Board of Commissioners members as referred to in point 4.
8. Board of Directors and Board of Commissioners members appointed as referred to in point 4 who still hold other positions prohibited by law from being concurrently held with a position in the Board of Directors or Board of Commissioners of a State-Owned Enterprise must resign or be dismissed from their current position.

Authority and power, with substitution rights, are granted to the Company's Board of Directors to formalize the resolutions of this Meeting in the form of a Notarial Deed and to appear before a Notary or relevant official, making necessary adjustments or corrections if required by the authorities, to facilitate the implementation of this Meeting's resolutions.

**Status: Realized**

## GMS Decisions in The Fiscal Year and 1 (One) Year Prior to The Fiscal Year Which Are Realised In The Fiscal Year

All decisions of the 2025 GMS have been implemented in 2025, and the 2024 GMS has been implemented in 2024. So there are no decisions of the 2024 and 2025 GMS that have not been realized in 2025.

## Board of Directors

### Duties and Responsibilities of The Board of Directors

In accordance with the Articles of Association, the Board of Directors is collegially responsible for managing the Company and representing the Company in and out of court. The Board of Directors is obliged to prioritize the Company's interests following the aims and objectives of the Company while still complying with the provisions of the applicable laws and regulations, the Articles of Association, and the resolutions of the GMS.

#### Responsibilities to the Board of Commissioners and Shareholders

1. Implementing the GMS resolutions.
2. Prepare the Corporate Long-Term Plan, Bank Business Plan, Work Plan, and Budget, and other work plans and changes to be submitted for approval from the Board of Commissioners.
3. Conduct the GMS based on a written request from one or more shareholders representing at least 1/10 (one-tenth) of the total shares issued with valid voting rights.
4. Decide and formulate the Company's strategy.
5. Prepare and maintain a shareholders registry and special lists containing shareholdings of the commissioners and

directors including their families within the Bank and in other companies.

6. Consult the lending facility above a certain amount to the Board of Commissioners by referring to the prevailing provisions.
7. Submit an Annual Report following the review by the Board of Commissioners within a period of no longer than 5 (five) months after the end of the fiscal year to the General Meeting of Shareholders for approval.

#### Responsibilities in Accounting and Annual Report

1. Conduct and maintain the Bank's books and administration in accordance with the prevailing practices of the company.
2. Ensure the Bank's accounting system is in accordance with financial accounting standards and internal control principles, particularly in terms of financial management, recording, retention and control.
3. Prepare Annual Report and Periodic Financial Report.

#### Responsibilities on Risk Management

1. Ensure the adequacy of processes and systems to identify, assess and control the risks encountered by the Bank.
2. Monitor and evaluate the existence of a sound management process to assess the adequacy of the risk management system and internal control, financial reporting, and compliance.
3. Ensure the existence of an effective control system to ensure the reliability and integrity of information, compliance with applicable policies, procedures, rules and laws, safeguards of the Bank's assets, the efficient use of economic resources, and the achievement of defined objectives and targets for operations.

#### Responsibilities on Organization

Create an organizational structure, tasks and assign clear responsibilities, including management appointments.

## Rights and Authority of The Board of Directors

In carrying out its duties and responsibilities, the Board of Directors has the authority as regulated in the Company's Articles of Association as follows:

1. Establish Policies in accordance with the management of the Company.
2. Arrange the delegation of authority of the Board of Directors to represent the Company inside and outside the court to one or several members of the Board of Directors specifically appointed for such purpose, or to a personnel and/ or other entity.
3. Administer the regulations on the Company's manpower, including determining salaries, pensions or benefits and other income for the Company's employees pursuant to the prevailing laws and regulations.
4. Appoint and discharge the Company's employees pursuant to the Company's manpower regulations and prevailing laws and regulations.
5. Appoint and discharge the Corporate Secretary.
6. Write-off bad loans hereinafter reported to the Board of Commissioners.
7. Not to recollect interest receivables, penalties, costs and other receivables besides the basis in order to pay off the Company's receivables.
8. Release the right to collect or not collect any more bad debts that have been written off in the context of loan settlement, either in part or in whole, which is implemented based on the policy determined by the Board of Directors with the approval of the Board of Commissioners and within the amount of the write-off ceiling (limit) that has been determined by the GMS which will remain in effect until a new ceiling (limit) is determined by the GMS.
9. Forming committees according to needs.
10. Take or perform all other actions and deeds with regard to the management and ownership of the Company's assets, bind the Company to other parties and/or bind other parties to the Company, and representing the Company inside and outside the court with respect to all matters and in all events, with the limitations as provided in the laws and regulations, the Articles of Association and/or the Resolutions of the GMS.

## Board of Directors Tenures

The members of the Board of Directors are appointed for a period starting from the closing of the GMS or the date determined by the GMS that appointed them and ending at the closing of the 5th (fifth) Annual GMS after the date of their appointment with the condition that it may not exceed a period of 5 (five) years, but without reducing the right of the

GMS to dismiss members of the Board of Directors at any time before their term of office ends. After the term of office ends, members of the Board of Directors may be reappointed by the GMS for one term of office.

## Board of Directors Criterias

The criteria for the Board of Directors of BRI had met the requirements as stipulated in the OJK Regulation No. 33/POJK.04/2014 concerning the Board of Directors and Board of Commissioners of Issuers or Public Companies and OJK Regulation Number 17 2023 Year concerning the Implementation of Governance for Commercial Banks, Minister of SOEs Regulation No. PER-3/MBU/03/2023 on SOE Organs and Human Resources, and other applicable regulations.

## Affiliation Relationship of Directors

Information related to the financial and family relationships of members of the Board of Directors and members of the Board of Commissioners with other members of the Board of Directors, other members of the Board of Commissioners, and/or the controlling shareholders of the Bank has been presented in the Company Profile Chapter of this Annual Report.

## Board of Directors Conflict of Interest Management

Members of the Board of Directors are prohibited from using the Company for personal, family, and/or other party interests that may harm or reduce the profits and the reputation of the Company and its subsidiaries. In addition, members of the Board of Directors are prohibited from taking and/or receiving personal benefits, either directly or indirectly, in the Company's activities other than remuneration/income (salary/honorarium, facilities, and allowances) and variable remuneration determined following applicable regulations.

Members of the Board of Directors who have a conflict of interest in the Company's transactions and/or corporate actions are required to declare the conflict of interest and cannot be involved in the decision-making process related to the transaction and/or corporate action. Any transaction involving a conflict of interest must first obtain the approval of independent shareholders before it is implemented.

In 2025, there were no BRI corporate actions that contained a conflict of interest and were carried out by members of the Board of Directors.

## Board of Directors Meetings

### Board of Directors Meetings Policy

The Board of Directors meeting policies that have been regulated in the Board of Directors Work Guidelines are:

#### Time and place

1. The Board of Directors is required to hold regular Board of Directors meetings at least 1 (one) time every month. In addition to meetings of the Board of Directors, the Board of Directors must, at least 1 (one) time in 4 (four) months, hold a meeting with the Board of Commissioners.
2. Meetings in principle are held on certain days in the current month. Meetings can be scheduled on another day if:

- a. It is deemed necessary by 1 (one) or more members of the Board of Directors.
  - b. At the written request of 1 (one) person or more members of the Board of Commissioners.
  - c. Meetings may be held at the Company's domicile or in other places within the territory of the Republic of Indonesia or where the Company conducts business activities. Based on specific considerations, meetings can be held via conference (e.g., teleconferencing, videoconferencing, or other electronic media).
3. The Board of Directors is required to schedule a meeting for the following year before the end of the fiscal year with an agenda that is adjusted to the Management Calendar. The scheduling of the meeting is determined in the Board of Directors Meeting.

#### Meeting Agenda and Materials

Proposed agendas and meeting materials for the Board of Directors are submitted no later than 5 (five) working days prior to the meeting. Apart from the scheduled meetings, meeting materials are submitted no later than the day before the meeting.

#### Meeting Invitation

1. The summons for the meeting shall be delivered directly to each meeting participant in writing by letter and/or electronic mail and/or digital message and/or other means with adequate receipts.
2. The summons for the meeting shall include the agenda, presenters, date, time, and place of the meeting.
3. Submitted at least 5 (five) working days before the Board of Directors meeting is held, without taking into account the date of the summons and the date of the meeting, or a shorter period if the situation is urgent.

#### Quorum and Decision Making

1. The meeting is legal and has the right to make binding decisions if it is attended and/or represented by more than 2/3 (two-thirds) of the total members of the Company's Board of Directors
2. Board of Directors meetings are chaired by the President Director. If the President Director is absent or unable to attend, the Deputy President Director will chair the Board of Directors Meeting.
3. In the event that deliberation to reach a consensus is not reached, then the decision is taken by voting based on the affirmative votes of at least 2/3 (two thirds) of the number of valid votes cast at the Board of Directors Meeting. If the voting results do not reach at least 2/3 (two thirds), then the Board of Directors Meeting does not make a decision on the agenda.
4. Each member of the Board of Directors and/or Board of Commissioners had the right to cast 1 (one) vote and an additional 1 (one) vote for the member of the Board of Directors and/or Board of Commissioners that he/she legally represented in the meeting.

5. In the event that there is a proposal with more than 2 (two) alternative decisions and the voting results have not obtained more than ½ (one half) of the votes for 1 (one) alternative decision, then a re-vote will be carried out for 2 (two) alternative decisions with the total majority of votes, so that more than 2/3 (two thirds) of the valid votes cast at the Board of Directors Meeting are obtained in agreement.
6. A blank vote (abstain) is deemed to approve the proposal submitted at the meeting. Invalid votes are considered nonexistent and are not counted in determining the number of votes cast at the meeting.
7. Voting regarding individuals is carried out using a closed ballot without a signature, while voting regarding other matters is carried out verbally, unless the chairman of the meeting determines otherwise without any objection based on the majority vote of the members of the Board of Directors and/or Board of Commissioners present.
8. Every member of the Board of Directors and/or Board of Commissioners who personally in any way, directly or indirectly, has an interest in a transaction or contract, whether existing or future, with the Company being one of the parties, must state the nature of the interest in the meeting. Therefore, the member of the Board of Directors and/or the Board of Commissioners concerned is not entitled to vote on matters related to the transaction or contract.

### Meeting Minutes

1. The meeting results must be stated in the Minutes of Meeting, which is valid evidence for members of the Board of Directors regarding the decisions taken.
2. Minutes of the meeting must at least include:
  - a. Place, date, and time the meeting was held.
  - b. Agenda discussed.
  - c. Attendance list signed by meeting participants.
  - d. The length of the meeting.
  - e. Decision was taken.
  - f. Matters discussed, including statements of disapproval and/or objection (dissenting opinion) along with the reasons, if any.
3. The Company documents minutes of the meeting.

### Board of Directors Meeting Plan

The Board of Directors is obliged to hold regular Board of Directors Meetings at least 1 (one) time every month. The Board of Directors Meeting schedule is scheduled to be held every Monday. Board of Directors meetings can be scheduled on other days if deemed necessary.

The Board of Directors' Meeting Agenda for 2026 is explained in the following table.

No.	Meeting Agenda in 2025	Time
1	Performance Evaluation and Report for the Fiscal Year 2025	Second week of January 2026
2	2026 Monthly Performance Update	At least once a month in 2026
3	First Quarter Performance Evaluation in 2026	First week of April 2026
4	Second Quarter Performance Evaluation in 2026	First week of July 2026
5	Third Quarter Performance Evaluation in 2026	Second week of October 2026
6	Forth Quarter Performance Evaluation in 2026	Second week of January 2026
7	Evaluation and Business Plan Revision Strategy for the Bank (2025-2027)	Second week of June 2026
8	Corporate Work Plan and Budget for 2027	Forth week of June 2026
9	Operational Activities and Corporate Decisions Requiring Approval from the Board of Commissioners	To be conducted at least once a month in the year 2026.

## Agenda, Dates and Participants of The Board of Directors' Meetings

## Orientation Program for New Board of Directors

BRI has a company orientation and introduction policy for newly appointed members of the Board of Directors. Orientation is given in relation to their duties and responsibilities. The Orientation Program is organized by the Corporate Secretary for new members of the Board of Directors. This orientation program is implemented to comply with Regulation No. PER-2/MBU/03/2023 dated March 3, 2023, concerning Guidelines for Governance and Significant Corporate Activities of State-Owned Enterprises, Article 43 stipulates that members of the Board of Commissioners/Supervisory Board and members of the Board of Directors who are appointed for the first time must be given an introduction program regarding the relevant BUMN. The orientation program for new Directors was in the form of:

1. Requesting presentations to obtain explanations on various aspects deemed necessary, involving the relevant business unit/divisions.
2. Holding meetings with members of the Board of Commissioners/Directors to discuss various current issues in the Company or other required information.
3. Conducting visits to various business locations of Bank BRI.
4. Requesting data/documents related to the vision and mission of the Company, Bank BRI policies, Medium and long-term Strategy and Plans, performance, and finances of Bank BRI.
5. Conducting discussions with the relevant Business Unit to obtain explanations on various aspects deemed necessary and provide feedback to the relevant Business Unit.

The implementation of the new Directors' orientation program during 2025 is as follows.

## Decisions and Implementation of Directors Duties

During 2025, the Board of Directors carried out the duties and responsibilities, including but not limited to:

1. Carry out GMS consisting of 1 (one) Annual GMS and 1 (one) Extraordinary GMS.
2. Prepare the Company's Long Term Plan (RJPP), Bank Business Plan, Company Work Plan and Budget and other work plans
3. Prepare Annual Reports and Financial Reports.
4. Ensure that the Bank's accounting system complies with financial accounting standards and internal control principles, especially in terms of financial management, recording, storage and supervision.
5. Ensure the adequacy of processes and systems to identify, assess and control the risks faced by the Bank.
6. Carry out internal meetings of the Board of Directors and with related divisions.
7. Create organizational structure, tasks and define clear responsibilities including appointment of management.
8. Ensuring the Company's strategy is running effectively.

In addition, the decisions of the Board of Directors were decided through a Committee forum formed by the Board of Directors as well as the Board of Directors Meeting Forum reported in detail in the 2025 Board of Directors Meeting Sub-Chapter in the Corporate Governance Chapter of this Annual Report.

## Performance Assessment of Committees Under The Board of Directors and The Basis of The Assessment

In supporting the effectiveness and efficiency of carrying out the duties and responsibilities of managing the Bank, BRI's Board of Directors is assisted by ten committees that report directly to the Board. As of December 31, 2025, BRI has 10 (ten) committees under the Board of Directors as follows:

No	Committee	Decision Letter Number
1.	Asset and Liability Committee (ALCO)	5892-DIR/PPM/11/2025
2.	Credit Policy Committee	5893-DIR/PPM/11/2025
3.	Environmental, Social & Governance (ESG) Committee	5894-DIR/PPM/11/2025
4.	Human Capital Committee	5895-DIR/PPM/11/2025
5.	Information Technology Steering Committee	5896-DIR/PPM/11/2025
6.	Procurement Committee	5897-DIR/PPM/11/2025
7.	Product Committee	5898-DIR/PPM/11/2025
8.	Risk Management Committee	5899-DIR/PPM/11/2025
9.	Transformation Steering Committee	5904-DIR/PPM/11/2025
10.	Financial Conglomeration Governance	5905-DIR/PPM/11/2025

The evaluation procedure for Committees is conducted annually through reports submitted by the Committees to the Board of Directors. The evaluation is based on performance results, including each Committee's contribution to the Company, as reflected in reports and recommendations submitted to the Board of Directors. The Board of Directors assesses that in 2025, all Committees will have carried out their duties optimally. The performance of the Board-supporting Committees is discussed in full in the Subsection on the Board of Directors Committees.

## Mechanism of Resignment and Termination of Board of Directors

Dismissal The term of office of a member of the Board of Directors ends when:

1. Passed away
2. End of tenure
3. Dismissed at the GMS, due to reasons deemed appropriate by the General Meeting of Shareholders for the interests and objectives of the Company.
4. Declared bankrupt by a Commercial Court decision with permanent legal force or put under remission based on a court decision.
5. No longer meets the requirements as a member of the Board of Directors based on BRI's Articles of Association and other applicable laws and regulations, including prohibited concurrent positions, as well as resignation. A member of the Board of Directors has the right to resign from his position by notifying BRI in writing of his intention and BRI is obliged to hold a General Meeting of Shareholders to decide on the request for resignation of a member of the Board of Directors within a period of no later than 60 (sixty) days after receipt of the letter of resignation. Board of Commissioners.

## Board of Commissioners

### Board of Commissioners Duties and Responsibilities

The Board of Commissioners is in charge of supervising management policies, the general course of management both regarding the Company and the Company's business carried out by the Board of Directors as well as providing advisory committees to the Board of Directors including supervision of the implementation of the Company's Long-Term Plan, Work Plan and Company's Budget as well as the provisions of the Articles of Association and Meeting Resolutions. General Shareholders, as well as applicable laws and regulations, for the benefit of the Company and in accordance with the purposes and objectives of the Company.

In carrying out its duties, the Board of Commissioners is obliged to:

1. Carry out duties, authority and responsibilities in good faith and with the principle of prudence.
2. Provide advice, direct, monitor and evaluate the implementation of integrated governance, risk management and compliance as well as the Bank's strategic policies, in accordance with the provisions of laws and regulations, the articles of association and/or GMS decisions.
3. Provide opinions and approval for the Company's Annual Work Plan and Budget as well as other work plans prepared by the Board of Directors, in accordance with the provisions.
4. Follow developments in the Company's activities, provide opinions and suggestions to the GMS regarding any issues deemed important for the management of the Company.
5. Report to Series A Dwiwarna Shareholders if there are symptoms of declining Company performance.
6. Propose to the GMS the appointment of a Public Accountant who will audit the Company's books.
7. Examine and review periodic reports and annual reports prepared by the Board of Directors and sign the annual report.
8. Provide explanations, opinions and suggestions to the GMS regarding the Annual Report, if requested.
9. Prepare minutes of meetings of the Board of Commissioners and keep a copy.
10. Report to the Company regarding his and/or his family's share ownership in the Company and other Companies.
11. Provide a report on the supervisory tasks that have been carried out during the previous financial year to the GMS.
12. Provide explanations regarding all matters asked or requested by Series A Dwiwarna shareholders, taking into account the laws and regulations, especially those that apply in the Capital Market sector.
13. Provide supervision and advice in the formulation and implementation of the Company's strategy.
14. The Board of Commissioners is prohibited from participating in decision making on the Company's operational activities, except:
  - a. Provision of funds to related parties as regulated in the provisions regarding the Maximum Limit for Providing Bank Loan; and
  - b. Other matters stipulated in the Company's Articles of Association or applicable laws and regulations. Decision making on the Company's operational activities by the Board of Commissioners as referred to in point d is part of the supervisory duties of the Board of Commissioners so that it does not negate the responsibility of the Board of Directors for the implementation of the Company's management.
15. Supervise the Board of Directors' follow-up on audit findings or examinations and recommendations from the Bank's Internal Audit Business Unit, External Auditor, results of supervision by the Financial Services Authority, and/or results of supervision by other authorities.
16. Report to the Financial Services Authority no later than 5 (five) working days after discovery:
  - a. Violations of laws and regulations in the fields of finance, banking and those related to the Bank's business activities; and/or
  - b. Circumstances or predicted conditions that could endanger the continuity of the Company's business.
17. In order to support the effective implementation of its duties and responsibilities, the Board of Commissioners is obliged to form at least:
  - a. Audit Committee;
  - b. Nomination and Remuneration Committee;
  - c. Risk Management Monitoring Committee; and
  - d. Integrated Governance Committee.
18. Ensure that the committees formed by the Board of Commissioners carry out their duties effectively.
19. Evaluate the performance of committees that help carry out their duties and responsibilities on a regular basis.
20. In implementing supervision related to the Risk Management function, the Board of Commissioners has the authority, duties and responsibilities:
  - a. Conduct evaluation and approval of Risk Management policies and strategies;
  - b. Conduct evaluation of the Board of Directors' accountability for the implementation of Risk Management policies and strategies as referred to in letter a; and
  - c. Carry out supervision and provide advice on the implementation of Risk Management functions in accordance with the provisions of laws and regulations, articles of association, and/or decisions of the GMS/ Minister.
21. In carrying out supervision related to the Internal Audit function, the Board of Commissioners has the authority, duties and responsibilities:

- a. Ensure that the Board of Directors of BUMN and BUMN Subsidiaries have an Internal Audit Unit (SPI) that carries out the Internal Audit function;
  - b. Provide approval for the appointment and dismissal of the head of SPI proposed by the Board of Directors;
  - c. Ensure that SPI has access to information and/or data regarding BUMN that is necessary to carry out its duties;
  - d. Provide approval for the Internal Audit Charter proposed by the Board of Directors by taking into account the proposals from SPI;
  - e. Review the effectiveness and efficiency of the Internal Control System based on information obtained from SPI at least once in 1 (one) year;
  - f. Appoint an independent quality controller from an external party to conduct a review of SPI performance (quality assurance review) at least once in 3 (three) years; and
  - g. Carry out supervision and provide advice on the implementation of other Internal Audit functions in accordance with the provisions of laws and regulations, articles of association, and/or decisions of the GMS/ Minister.
22. In implementing supervision related to the Integrated Governance function, the Board of Commissioners has the authority, duties and responsibilities:
- a. Evaluate and approve the Integrated Governance policy.
  - b. Supervise the implementation of Integrated Governance in BUMN Subsidiaries to align with the Parent BUMN Risk Management policy.
  - c. Supervise the implementation of the duties and responsibilities of the Board of Directors of the Parent BUMN, and provide direction or advice to the Board of Directors of the Parent BUMN on the implementation of the Integrated Governance policy.
  - d. Evaluate the Integrated Governance policy and provide direction for improvement.
  - e. Supervise the implementation of Integrated Governance in BUMN Subsidiaries to align with the Integrated Governance policy of the Parent BUMN and BUMN Subsidiaries.
  - f. Supervise and provide advice on the implementation of other Integrated Governance functions in accordance with the provisions of laws and regulations, articles of association, and/or decisions of the GMS/Minister.
23. In implementing supervision related to the Remuneration and Nomination functions, the Board of Commissioners has the authority, duties and responsibilities:
- a. Implement remuneration policies in accordance with the OJK Regulation regarding the implementation of governance in providing remuneration for commercial banks.
  - b. Implement nomination policies:
    - i. Provide recommendations regarding the system and procedures for the selection and/or replacement of members of the Board of Directors and members of the Board of Commissioners to the GMS;
    - ii. Provide recommendations regarding candidates for members of the Board of Directors and/or candidates for members of the Board of Commissioners to the GMS; and
    - iii. Conduct evaluations and assessments of the performance of the Board of Directors. More detailed regulations regarding the authority, duties, and responsibilities of the Nomination and Remuneration function are regulated in the General Policy on Human Capital and the Rules of Procedure of the Nomination and Remuneration Committee.
24. Have guidelines and work regulations that are binding for each member of the Board of Commissioners, which must at least include:
- a. Duties, responsibilities, and authorities of the Board of Commissioners;
  - b. Regulation of authority and decision procedures of the Board of Commissioners;
  - c. Regulation of work ethics of the Board of Commissioners;
  - d. Regulation of meetings of the Board of Commissioners;
  - e. Prohibitions against the Board of Commissioners;
  - f. Evaluation of the performance of the Board of Commissioners; and
  - g. Pattern of working relations between the Board of Commissioners and the Board of Directors.
25. Provide time to carry out tasks and responsibilities optimally in accordance with work guidelines and regulations.
26. Maintain all data and information related to the Bank submitted by the Board of Directors, and in accordance with the provisions of laws and regulations.
27. Carry out other obligations in the context of supervisory and advisory duties, as long as they do not conflict with laws and/ or GMS decisions.
- Each member of the Board of Commissioners was jointly and severally responsible for the Company's losses caused by mistakes or negligence of members of the Board of Commissioners in carrying out their duties, unless the member of the Board of Commissioners concerned could prove:
1. The loss was not due to his fault or negligence;
  2. Had carried out supervision in good faith, full of responsibility, and prudence for the benefit and in accordance with the aims and objectives of the Company;

3. Did not have a conflict of interest, either directly or indirectly, over supervisory actions that resulted in losses; and
4. Had taken action to prevent the occurrence or continuation of the loss.

### President Commissioner Duties and Responsibilities

The President Commissioner has the duties and responsibilities to:

1. Lead the implementation of the Board of Commissioners' meeting and the Board of Commissioners' Meeting with the Board of Directors.
2. Lead the implementation of the General Meeting of Shareholders (GMS).
3. Coordinate and monitor the implementation of the work program of the Board of Commissioners.
4. Coordinate the activities of the Board of Commissioners in the context of supervising the implementation of the duties and responsibilities of the Board of Directors.

### Rights and Authorities of The Board of Commissioners

The Board of Commissioners has the authority to:

1. Verify books, letters, and other documents, review cash for verification purpose and other securities, and check the Company's assets.
2. Enter the yard, building and office used by the Company.
3. Requesting an explanation from the Board of Directors and/or other officials regarding all issues related to the management of the Company.
4. Knowing all policies and actions that have been and will be carried out by the Board of Directors.
5. Requesting the Board of Directors and/or other officials under the Board of Directors with the knowledge of the Board of Directors to attend the Board of Commissioners meeting.
6. Appoint and dismiss a Secretary to the Board of Commissioners, at the suggestion of the Series A Dwiwarna Shareholder.
7. Establish an Audit Committee and other committees, if deemed necessary, taking into account the Company's capabilities.
8. Use experts for certain matters and for a certain period of time at the expense of the Company, if deemed necessary.
9. Dismiss members of the Board of Directors temporarily by stating the reasons if the Member of the Board of Directors acts contrary to the Company's Articles of Association or there are indications of taking actions that are detrimental to the Company or neglecting their obligations or there are urgent reasons for the Company.

10. Take actions to manage the Company under certain conditions for a certain period of time in accordance with the provisions of the Company's Articles of Association.
11. Attend Board of Directors meetings and provide views on matters discussed
12. Approved the appointment and dismissal of the Corporate Secretary and/or Head of the Internal Audit Business Unit.
13. Provide written approval for the actions of the Board of Directors as stipulated in Article 12 paragraph 7 of the Company's Articles of Association.
14. Carry out other supervisory authorities as long as they do not conflict with the laws and regulations, the Articles of Association and/or the resolutions of the GMS
15. The duties, rules of procedure, and other requirements for the Board of Commissioners' Secretary to perform their functions are set out in a separate Guideline.

### Decision Needs Approval of The Board of Commissioners

The Company's Articles of Association regulate the decisions of the Board of Directors which must be approved by the Board of Commissioners, namely:

1. Releasing/transferring and/or pledging the Company's assets, except for assets that are recorded as inventory and assets in the context of carrying out main business activities that are commonly carried out by companies engaged in the banking sector based on the criteria and values according to the Limits of Authority of the Board of Commissioners and with due observance of laws and regulations invitations in the capital market and banking sector.
2. Write off fixed assets due to certain conditions which:
  - a. Lost;
  - b. Destroyed;
  - c. Damaged and cannot be transferred (total loss);
  - d. The transfer costs are greater than the economic value obtained from the transfer;
  - e. Dismantled to be rebuilt or built into other fixed assets, the budget for which has been determined through the ratification of the Company's Work Plan and Budget (RKAP);
  - f. Dismantled not to be rebuilt in connection with other programs that have been planned in the RKAP;
  - g. Dismantled to be rebuilt in connection with government programs; and/or
  - h. Based on laws and/or court decisions that have permanent legal force, the fixed assets are no longer owned or controlled by the Company.
3. Establish cooperation with business entities or other parties, in the form of joint operation (KSO), business cooperation (KSU), licensing cooperation, Build, Operate and Transfer (BOT), Build, Transfer, and Operate (BTO),

Build, Operate and Own /BOO) and other agreements that have the same nature as the criteria and values in accordance with the Limits of Authority of the Board of Commissioners.

4. Determine and change the Company's logo.
5. Establish an organizational structure 1 (one) level below the Board of Directors.
6. Make capital investments, releasing capital investments including changes in capital structure with a certain value determined by the Board of Commissioners in other companies, subsidiaries and joint ventures that are not in the context of rescuing receivables by taking into account provisions in the Capital Market and Banking sectors.
7. Establish subsidiaries and/or joint ventures with a certain value determined by the Board of Commissioners by taking into account provisions in the Capital Markets and Banking sectors.
8. Propose representatives of the Company to become candidates for Members of the Board of Directors and Board of Commissioners in subsidiaries that make significant contributions to the Company and/or have strategic value as determined by the Board of Commissioners.
9. Carry out mergers, amalgamations, takeovers, separations and dissolutions of subsidiaries and joint ventures with a certain value determined by the Board of Commissioners by taking into account provisions in the Capital Markets and Banking sectors.
10. Carry out actions which are included in material transactions as determined by the laws and regulations in the capital markets sector with a certain value determined by the Board of Commissioners, unless the actions are included in material transactions which are excluded by the laws and regulations in force in the Capital Markets sector.
11. Actions that have not been stipulated in the RKAP.

## Board of Commissioners Tenure

The members of the Board of Commissioners are appointed for a period starting from the closing date of the GMS or the date determined by the GMS that appointed them and at the latest until the closing of the 5th (fifth) Annual GMS after the date of their appointment, but without reducing the right of the GMS to dismiss the members of the Board of Commissioners at any time before their term of office ends by taking into account the provisions in the Capital Market and Banking sector. Members of the Company's Board of Commissioners whose term of office ends may be reappointed by the GMS with an accumulated term of office at the longest until the closing of the 10th (tenth) Annual GMS.

## The Board of Commissioners Criteria

The criteria for members of the BRI Board of Commissioners are compiled based on OJK Regulation Number 34/POJK.04/2014 concerning the Nomination and Remuneration Committee of Issuers or Public Companies, OJK Regulation Number 17 of 2023 concerning the Implementation of Governance for Commercial Banks, OJK Regulation Number 27/03.POJK/2016 concerning the Assessment of Capability and Compliance for Main Parties of Financial Services Institutions and internal provisions of the BRI Board of Commissioners Decree of the Board of Commissioners Number Decree 07-KOM/BRI/07/2015 concerning the Nomination Policy for Members of the Board of Commissioners and Board of Directors.

<p><b>General Qualification</b></p>	<p>Those who may be appointed as members of the Board of Commissioners are individuals who meet the following requirements at the time of appointment and during their term of office:</p> <p><b>Minister of State-Owned Enterprises Regulation Number PER-3/MBU/03/2023</b> To be appointed as a member of the Board of Commissioners of a State-Owned Enterprise (SOE) or a member of the Board of Commissioners of a Subsidiary, an individual must meet the following formal requirements:</p> <ol style="list-style-type: none"> <li>An individual;</li> <li>Legally capable of performing acts in law;</li> <li>Has not been declared bankrupt within five (5) years prior to appointment;</li> <li>Has never served as a member of the Board of Directors or Board of Commissioners/Supervisory Board and been found responsible for causing an SOE, subsidiary, or other business entity to be declared bankrupt within five (5) years prior to appointment; and</li> <li>Has never been convicted of a criminal offense causing financial loss to the State, an SOE, a subsidiary, another business entity, or related to the financial sector within five (5) years prior to appointment.</li> </ol> <p><b>POJK Number 17 of 2023</b> Members of the Board of Commissioners are prohibited from holding concurrent positions:</p> <ol style="list-style-type: none"> <li>As a member of the board of directors, member of the board of commissioners, member of the sharia supervisory board, or executive officer at a financial institution or financial company, whether a bank or non-bank;</li> <li>As a member of the board of directors, member of the board of commissioners, member of the sharia supervisory board, or executive officer at more than 1 (one) non-financial institution or company, whether domiciled in or outside the country;</li> <li>In the field of functional duties at a bank financial institution and/or non-bank financial institution domiciled in or outside the country;</li> <li>In other positions that may give rise to a conflict of interest in carrying out duties as a member of the Board of Commissioners; and/or</li> <li>Other positions in accordance with the provisions of laws and regulations.</li> </ol>
<p><b>Fulfillment of OJK Regulation No. 27/03. POJK/2016 on Fit and Proper Test for Main Entity of Financial Services Institution</b></p>	<p>Prospective Members of the Board of Commissioners must obtain approval from the OJK Regulation before carrying out their actions, duties and functions as Members of the Board of Commissioners. In obtaining the said approval, Members of the Board of Commissioners must meet the requirements of integrity, financial reputation, and competence in the fit-and-proper assessment conducted by the OJK.</p> <p><b>Integrity Requirements:</b></p> <ol style="list-style-type: none"> <li>Legally capable of performing acts in law;</li> <li>Possess good character and morals, at a minimum demonstrated by adherence to applicable regulations, including never having been convicted of a criminal offense within a specified period prior to nomination;</li> <li>Committed to complying with laws and regulations and supporting the policies of the Financial Services Authority;</li> <li>Committed to the development of a sound Financial Services Institution;</li> <li>Not included among parties prohibited from serving as a key party</li> </ol> <p><b>Financial Reputation Requirements:</b></p> <ol style="list-style-type: none"> <li>Has no non-performing loans and/or financing;</li> <li>Has never been declared bankrupt and/or has never been a shareholder, Controller of an Insurance Company (other than a shareholder), member of the Board of Directors, or member of the Board of Commissioners who was found responsible for causing a company to be declared bankrupt within the five (5) years prior to nomination;</li> </ol> <p><b>Financial Eligibility Requirements:</b></p> <ol style="list-style-type: none"> <li>Possess a good financial reputation;</li> <li>Have financial capacity to support the business development of the Financial Services Institution;</li> <li>Commit to taking necessary actions should the Financial Services Institution encounter financial difficulties.</li> </ol>
<p><b>Fulfillment of OJK Circular Letter 39/SEOJK.03/ 2016 concerning Fit and Conformity Assessment for Prospective Controlling Shareholders, Prospective Members of the Board of Directors, and Prospective Members of the Board of Commissioners of Banks</b></p>	<p>Member of the Board of Commissioners shall have:</p> <ol style="list-style-type: none"> <li>Adequate knowledge in the banking field, relevant to the position.</li> <li>Experiences and skills in banking and/or financial fields.</li> <li>Capabilities to carry out strategic management for the bank's soundness development.</li> </ol>

## Board of Commissioners Work Guidelines and Rules of Procedure

The Board of Commissioners has a Work Guideline and Work Rules for the Board of Commissioners, which were ratified in the Decree of the BRI Board of Commissioners Number 06-KOM/05/2024 dated May 28, 2024. The Rules of Procedure of the Board of Commissioners serve as a reference for the Board of Commissioners in carrying out its duties and as a basis for implementing Good Corporate Governance for the Board of Commissioners. The contents of the Guidelines and Rules of Procedure of the Board of Commissioners are as follows:

## Concurrent Position of The Board of Commissioner Policy

The policy of concurrent positions of members of the BRI Board of Commissioners refers to the provisions of the OJK Regulation Number 17 of 2023 dated September 14, 2023 concerning the Implementation of Governance for Commercial Banks and the Regulation of the Minister of State-Owned Enterprises Number PER-3/MBU/03/2023 concerning Organs and Human Resources of State-Owned Enterprises, with the following details:

1. Members of the Board of Commissioners are prohibited from holding concurrent positions:
  - a. As a member of the Board of Directors, member of the Board of Commissioners, member of the Sharia Supervisory Board, or executive officer at a financial institution or financial company, both bank and nonbank;
  - b. As a member of the Board of Directors, member of the Board of Commissioners, member of the Sharia Supervisory Board, or executive officer in more than 1 (one) non-financial institution or company, whether domiciled at home or abroad;
  - c. As a member of the Board of Commissioners/Supervisory Board of a BUMN, except based on a special assignment from the Minister.
  - d. As a member of the Board of Directors of a BUMN, other business entity, or holding a position that, based on laws and regulations, is prohibited from being held concurrently with the position of a member of the Board of Commissioners/Supervisory Board of a BUMN, or a position that may give rise to a conflict of interest with the BUMN concerned;

- e. In the field of functional duties at a bank financial institution and/or non-bank financial institution domiciled in or outside the country;
  - f. In other positions that may give rise to a conflict of interest in carrying out duties as a member of the Board of Commissioners;
  - g. Other positions in accordance with the provisions of laws and regulations.
2. Does not include concurrent positions, if:
    - a. Members of the Board of Commissioners serve as members of the Board of Directors, members of the Board of Commissioners or executive officers who carry out supervisory functions in 1 (one) non-bank subsidiary company controlled by the Bank;
    - b. Non-Independent Commissioners carry out functional duties from the Bank's shareholders in the form of legal entities in the Bank and/or the Bank's business group; and/or
    - c. Members of the Board of Commissioners hold positions in non-profit organizations or institutions.
  3. Candidates for members of the Board of Commissioners who have positions as intended in number 2 are required to make a statement to:
    - a. Maintain integrity.
    - b. Avoid all forms of conflict of interest.
    - c. Avoid actions that could harm the Bank and/or cause the Bank to violate the precautionary principle while serving as a member of the Board of Commissioners.
  4. Independent Commissioners are prohibited from holding concurrent public office positions.

## Affiliated Relationship of the Board of Commissioners

Information related to the financial and family relationships of members of the Board of Directors and members of the Board of Commissioners with other members of the Board of Directors, other members of the Board of Commissioners, and/or the controlling shareholders of the Bank has been presented in the Company Profile Chapter of this Annual Report.

## Board of Commissioners Conflict of Interest Management

Management of Conflicts of Interest of the Board of Commissioners is regulated in the Company's Board of Commissioners' Guidelines and Rules of Procedure as follows:

- Each Commissioner is required to safeguard information that, under prevailing laws and regulations, must be kept confidential, including provisions on insider trading and other information not yet disclosed to the public by the Company.
- Each Commissioner is required to disclose:
  - Their share ownership in the Company as well as in other companies, both domestic and abroad.
  - Financial and family relationships with other members of the Board of Commissioners and members of the Board of Directors, including their family members.
  - Other information that, according to laws and regulations, must be disclosed to the public.
- Commissioners are prohibited from participating in decision-making related to banking operational activities and/or any decisions that may give rise to conflicts of interest.
- In carrying out their duties, responsibilities, and authorities, Commissioners are prohibited from using the Company for personal, family, other company, or third-party interests in a manner that conflicts with laws, regulations, and the Company's code of ethics.

Board of Commissioners who have a conflict of interest in the Company's transaction and/or corporate action must declare such conflict of interest, and therefore, he/she is not included in the decision-making process of such transaction and/or corporate action. Any transaction involving a conflict of interest shall first obtain the approval of the independent shareholders before execution.

In 2025, there were no BRI corporate transactions or actions containing a conflict of interest by the Board of Commissioners.

## Independent Commissioner

The Board of Commissioners has fulfilled the requirements of OJK Regulation No. 17 of 2023, issued on September 14, 2023, regarding Governance Implementation for Commercial Banks. The regulation states

that the number of Independent Commissioners should be at least 50% (fifty percent) of the total number of members of the Board of Commissioners. As of December 31, 2025, there were 3 (three) people out of 6 (six) members of the Board of Commissioners (50%). This composition ensures that the Company adheres to high corporate governance standards and provides transparent, independent oversight of its activities.

## Independent Commissioner Determination Criteria

The criteria for Independent Commissioners refer to the provisions of OJK Regulation no. 17 of 2023 dated September 14, 2023 concerning Implementation of Governance for Commercial Banks. The criteria for Independent Commissioners are as follows:

## Board of Commissioners' Meetings

### Meeting Policy

The implementation of the Board of Commissioners' meeting was regulated in the Board of Commissioners' Guidelines and Rules of Conduct.

1. Board of Commissioners Meetings, consisting of Internal Board of Commissioners Meetings and Board of Commissioners Meetings with the invitation of the relevant Field Director and/or Senior Executive Vice President (SEVP).
2. Meeting of the Board of Commissioners and Directors, namely a meeting of the Board of Commissioners with the Directors and/or with the relevant SEVP.

Meeting of the Board of Commissioners and Directors took place on an ongoing basis and can be initiated by the Board of Commissioners or the Board of Directors in order to obtain a unified view and alignment of actions, including the Board of Commissioners in supervising and providing advice.

### Meeting Organizing Mechanism

1. Meetings of the Board of Commissioners shall be held periodically at least once a month.
2. Meeting with Directors shall be held periodically at least once in four months.
3. The meetings may be held at any time at the request of one or more Commissioners or at the request of the Directors, stating the matters to be discussed.
4. The meeting call must be made by the President Commissioner. If the President Commissioner is prevented or absent, which does not need to be proven to a third party, then the meeting call for the Board of Commissioners is made by the Deputy President Commissioner and if the Deputy President Commissioner is not present or absent or prevented, which does not need to be proven to a third party, then the meeting call can be made by a member of the Board of Commissioners.
5. The Meeting Call by the Board of Commissioners with the Board of Directors must be made in writing and delivered or submitted directly to each member of the Board of Commissioners with adequate receipt, or electronic mail (e-mail) no later than five days before the meeting is held, without taking into account the date of the call and the date of the meeting, or in a shorter time if in urgent circumstances.
6. The Board of Commissioners meeting invitation shall be in writing, and delivered physically or through electronic media.
7. The meeting invitations as stated above are not required for meetings that have been scheduled by the decision in the meeting held previously.

8. In special situations, which are extraordinary in nature (extraordinary situation) related to sudden proposals from the Board of Directors and require immediate decision-making, the Board of Commissioners may call a meeting in less than 1 (one) day or at any time through any media that is possible in the situation.
9. The meeting guidelines is set as follows:
  - a. The meeting invitation must include the event/ agenda, date, time, and venue of the meeting.
  - b. The meeting is held at the Company's domicile or elsewhere within the territory of the Republic of Indonesia or at the Company's place of business.
  - c. The agenda and schedule of the meeting are the responsibility of the Secretary of the Board of Commissioners by considering input from the Board of Commissioners.
  - d. The Secretary of the Board of Commissioners is responsible for assisting, organizing and preparing the meeting, preparing, and distributing the meeting agenda and discussion materials.
  - e. In the event that the Board of Commissioners meeting invites the Board of Directors/Directors, the Secretary of the Board of Commissioners may coordinate with the Company's Secretariat Division
  - f. The materials for the Board of Commissioners meeting inviting the Board of Directors/Directors must be provided to the Board of Commissioners no later than three working days before the meeting takes place, so that the Board of Commissioners has the opportunity to review the information and/or request additional information before the meeting.
10. The meeting is legitimate and has the right to take binding decision if attended or represented by more than half of total member of the Board of Commissioners.
11. Meeting materials for the Board of Commissioners are distributed to all meeting participants no later than 5 (five) working days before the meeting is held, unless the meeting is held outside of schedule, meeting materials can be submitted before the meeting is held.

### Decision-Making

1. The decisions of the Board of Commissioners Meeting shall be based on deliberation to reach a consensus. If a decision based on deliberation to reach consensus is not reached, the decision shall be taken by voting, with a majority of the total legitimate votes cast at the meeting.
2. The meeting chairman shall inform the conclusion and decision at the end of every meeting.
3. All meeting decisions are binding for all members of the Board of Commissioners.
4. Any recommendations proposed by the Committee and requiring the approval of the Board of Commissioners can be made through a meeting mechanism and/or written approval from the Board of Commissioners (circular).

5. Member of the Board of Commissioners can have a proxy in the meeting by other member of the Board of Commissioners with written attorney specifically provided for such matter and a member of the Board of Commissioners can only represent one other member of the Board. In this proxy, the absence members of the Board of Commissioners can submit his/her opinions on the concurrence of the meeting discussions and this opinion will be legitimately valid.
6. If a member of the Board of Commissioners and/or Directors cannot attend the meeting physically, then a member of the Board of Commissioners and/or Directors shall participate in the discussion via teleconference, video conference, or other electronic media according to applicable rules.

#### Voting Rights

1. Voting rights in the meeting is stipulated as follows:
  - a. Every Member of the Board of Commissioners has the right to cast one vote and one additional vote for a legitimate proxy at the meeting.
  - b. The abstaining vote is considered as an affirmative vote in the meeting. Invalid votes are considered nonexistent and are not counted to determine the number of votes cast in the meeting.
  - c. Voting on persons is conducted with closed ballots without signature, whereas voting on other matters is carried out verbally, unless the chairman determines otherwise without objection based on the majority of votes present.
  - d. Every Member of the Board of Commissioners who personally, in any way, directly or indirectly, has an interest in a proposed transaction, contract, or proposed contract in which the Company is a party, shall be declared the nature of its interests in a

meeting and is not entitled to participate in voting on matters relating to the transaction or contract.

- e. Invited guests are not granted any authority in decision-making.
2. The Board of Commissioners may also take a valid decision without holding the Board of Commissioners Meeting, provided that all members of the Board of Commissioners have been notified in writing and all members of the Board of Commissioners have given their written approval and signed the agreement. The decisions taken have the same validity as decisions taken legitimately at the Board of Commissioners Meetings.
3. Decision-making related to granting approval to the Board of Directors' proposal must be carried out no later than 15 (fifteen) working days since the final proposal is submitted or becomes an agenda for the Board of Commissioners Meeting and/or Board of Commissioners and Board of Directors Meeting or in writing for circular decisions;
4. All Board of Commissioners Meetings are chaired by the President Commissioner, and in the event that the President Commissioner is absent or unable to attend, in a matter that does not need to be proven to a third party, the Board of Commissioners Meeting is chaired by the Vice President Commissioner. In the event that the Vice President Commissioner is absent or unable to attend due to any reason, in a matter that does not need to be proven to a third party, the Board of Commissioners meeting shall be chaired by a member of the Board of Commissioners present and elected at the meeting.
5. In every meeting, minutes of the meeting must be made containing the matters discussed and matters decided. The minutes of the meeting constitute valid evidence for Members of the Board of Commissioners and third parties regarding the decisions taken at the relevant meeting.

## Training and/or Competency Improvement of Members of Board of Commissioners

BRI is subject to and complies with the Financial Services Authority Regulation (POJK) Number 24 of 2022, which regulates banks' obligations to carry out sustainable management and development of the quality of human resources owned by the company. Training and/or improving the competence of members of the Board of Commissioners has been regulated in the Decree of the Board of Directors NOKEP S.43-DIR/SKP/01/2018 concerning the Policy on Orientation and Education Programs for Directors and the Board of Commissioners. In ensuring that all the Board of Commissioners understand the roles and responsibilities, characteristics, and operations of the Company, as well as understand the latest developments in regulations and best practices, Therefore, BRI has a policy for the Board of Commissioners, namely at least once a year the Board of Commissioners will improve competence or refresh

knowledge through training activities, certification, and other activities. The implementation of the Board of Commissioners education program aims to:

1. Increase the insight and knowledge of the Board of Commissioners following their fields and business developments;
2. Increase relations with external stakeholders;
3. Support the implementation of duties and responsibilities supported by knowledge of educational outcomes;
4. Develop professional knowledge, competence, and leadership abilities of the Board of Commissioners in line with the latest developments in the industry and good corporate governance; and
5. Provide provision to develop and strengthen the Company's structure and governance.

The education program was carried out by members of the Board of Commissioners at least once a year and/or as needed. The training and/or competency improvement attended by the Board of Commissioners during 2025 are as follows.

### Orientation Program for New Commissioners

BRI has a company orientation and introduction policy for newly appointed members of the Board of Commissioners, orientation is given in relation to their duties and responsibilities. The Orientation Program is organized by the Corporate Secretary for new members of the Board of Commissioners. This orientation program is implemented to comply with Regulation No. PER-2/MBU/03/2023 dated March 3, 2023, concerning Guidelines for Governance and Significant Corporate Activities of State-Owned Enterprises, Article 43 stipulates that members of the Board of Commissioners/ Supervisory Board and members of the Board of Directors who are appointed for the first time must be given an introduction program regarding the relevant BUMN. Implementation of this program in the form of presentations, meetings, visits to the company's business unit and the assessment of documents or other programs. The objectives of the Board of Commissioners' orientation programs are as follows:

1. Adding knowledge to and new Commissioners on Vision, Mission, Profile and objectives of BRI Bank.
2. Supporting the achievement of the Bank's objectives through continuous improvement of performance
3. Provide an overview of responsibilities, authorities and prohibitions as a Commissioner of BRI.
4. Provide guidelines for Commissioners in carrying out their duties.
5. To increase the Board of Commissioners' understanding of work and operational system at Bank BRI.
6. Adding to the understanding of work and operational systems at Bank BRI; understanding of value creation for stakeholders, risk management, understanding of the banking industry or the subsidiary business of Bank BRI.
7. Increase the knowledge and understanding of the Board of Commissioners in accordance with its field and business development of BRI.
8. Support the implementation of duties and responsibilities supported by knowledge of educational outcomes.

## Risk Management Certification

Based on the OJK Regulation Circular Letter Number 28/SEOJK.03/2022 concerning Risk Management Certification for Human Resources of Commercial Banks, members of the BRI Board of Commissioners must have a valid Risk Management Certificate while holding office. The Risk Management Certification in question must be organized by a Professional Certification Institution (LSP) in the banking sector registered with the OJK Regulation, which is adjusted to the competency unit referring to the Indonesian National Work Competency Standards (SKKNI) in the field of banking risk management and qualification levels referring to the Indonesian National Qualification Framework (KKNI) in the field of banking risk management, by referring to and paying attention to:

1. Scope of BRI risk management implementation and BRI Group integrated risk management;
2. BRI business activities and functions as the main entity in the BRI Group; and
3. Current risk developments.

The validity period of the Risk Management Certificate is 3 (three) years from the date of issuance of the certificate, and can be extended for 3 (three) years after the date the validity period of the previous Risk Management Certificate ends.

## Supervision of The Implementation of The Company's Strategy

Based on the Financial Services Authority Regulation No. 5/ POJK.03/2016 concerning Bank Business Plans, the Board of Commissioners is required to supervise and provide advice on the implementation of the Bank's Business Plan, which includes, among others, management policies and strategies. The results of the supervision are set forth in the Supervision Report on the Implementation of the Bank's Business Plan, which is submitted to the Financial Services Authority each semester as follows:

1. Board of Commissioners' Supervisory Report on the Performance of PT BRI Semester II of 2024 on February 28, 2025.
2. Supervisory Report of the Board of Commissioners for Semester I of 2024 on August 5, 2025.

## Implementation of Supervisory Duties of The Board of Commissioners

The Board of Commissioners has carried out its duties, obligations, and responsibilities to supervise the Company's management policies and the management of the Company, as determined in accordance with applicable laws and regulations, the Company's Articles of Association, and the stipulated Work Plan. Duties, obligations, and responsibilities are carried out through meetings of the Board of Commissioners, meetings of the Board of Commissioners with the Board of Directors, or meetings and evaluations with committees under the Board of Commissioners and a letter from the Board of Commissioners to the Board of Directors.

As for the implementation of the duties of the Board of Commissioners during 2025, among others:

1. Supervise and provide advice on the Board of Directors' policies in carrying out the management of the Company during 2025.
2. Review of the realization of BRI's financial report performance on a consolidated and quarterly basis.
3. Evaluation of the proposed RBB for 2025-2027 and RKAP 2025, including the realization of the achievements of RKAP and RBB for 2025.
4. Evaluation of the proposed RBB for 2026-2028 and RKAP for 2026.
5. Appointment of Public Accounting Firm and/or Public Accountant for the general audit of BRI's consolidated financial statements and PUMK financial statements for 2025.
6. Loan consultation from the Board of Directors to the Board of Commissioners.
7. Approval of the 2025 SKAI Annual Audit Planning.
8. Evaluation of the performance and implementation of integrated governance in BRI's financial conglomerate.
9. Nomination and remuneration of the BRI Board of Directors and Board of Commissioners including nomination of Subsidiary Company management.
10. Review and approval of provision to related parties and capital participation under the authority of the Board of Commissioners
11. Evaluation of the performance and implementation of the main results of the SKAI audit, monitoring of follow-up actions on internal and external audit findings on a quarterly basis.
12. Review of Business Development in each Loan Segment.
13. Evaluation of the implementation of BRI's human capital policy.
14. Evaluation of Bank's soundness level, risk profile, implementation of compliance function, anti-fraud strategy and implementation of AML CFT.
15. Evaluation of BRI's talent pool policy and implementation.
16. Evaluation of reorganization proposals in the context of aligning business targets and collaboration between segments.
17. Evaluation of the implementation of Internal Control over Financial Reporting (ICoFR) and strengthening of Integrated governance.
18. Review of corporate loan portfolios and high-risk debtors.
19. Review of BRI IT governance, architecture and strategy.
20. Review and approval of sustainable financial action plans, recovery plans, and resolution plans.
21. Review of DPLK's financial and investment performance in 2024, including approval of Bank DPLK's business plan in 2025.
22. Approval on corporate secretary nomination and changes to the company's logo.
23. Implementation of other duties of the Board of Commissioners in the context of supervisory functions and providing advice to the Board of Directors.

## Board of Commissioners' Recommendations

## Performance Assessment of The Board of Directors and Board of Commissioners

### Board of Directors Performance Assessment

The Board of Directors' performance assessment is based on the Board of Directors' KPI achievement, both collectively and individually. The Board of Commissioners conducts the assessment, which is then submitted to Shareholders through the GMS.

The performance assessment of the President Director and the members of the Board of Directors is conducted annually. Performance assessments are based on collegial or joint Key Performance Indicators (KPIs) and Directorate (Individual) KPIs.

### Procedures for The Implementation of The President Director and Member of The Board of Directors

The procedures for evaluating the Board of Directors' performance are carried out in the GMS agenda. The results of the evaluation of the Board of Directors as a whole and of each Member of the Board of Directors individually are an integral part of the remuneration, compensation, and incentive scheme for Members of the Board of Directors.

The performance assessment of the Board of Directors is performed with reference to the established criteria and measuring tools, including the achievement of Key Performance Indicators (KPIs) and the results of the assessment of the implementation of Good Corporate Governance (GCG) in the Board of Directors' aspects, in order to ensure alignment between performance, governance, and the achievement of the Company's objectives.

### Criteria for Assessing The Board of Directors Performance

#### COLLEGIAL BOARD OF DIRECTORS' PERFORMANCE ASSESSMENT CRITERIA

The performance evaluation criteria measured are as follows:

1. Economic and Social Value for Indonesia, consisting of financial, operational, and social aspects
2. Business Model Innovation
3. Technology Leadership
4. Increased Investment
5. Talent Development

#### CRITERIA FOR ASSESSMENT OF INDIVIDUAL PERFORMANCE

Directorate (Individual) performance is assessed based on the achievement of each Directorate's KPI targets, with the following explanation:

##### President Director

- Consolidated PPOP performance achieved its target
- Consolidated cost control was maintained. The consolidated CIR ratio reached the target
- The government's KUR quota was distributed according to target
- BRI's service delivery showed improvement. The NPS score increased and exceeded the target
- The CASA ratio recorded an increase, driven by growth in low-cost funds and an increase in BRImo users.
- No cybersecurity incidents were recorded throughout 2025.
- The ESG rating was achieved in accordance with the established target
- Sustainable credit achieved beyond target
- In terms of human capital, employee productivity showed improvement and achieved the target

##### Vice-President Director

- Average Daily Balance of Third-Party Funds (TPF) & Cash Assets (CASA) achieved targets
- Recovery and claim income from the Micro segment increased.
- Fraud management remained below appetite

- The government's KUR quota was distributed according to BRI's targets. This supported the continued maintenance of the Micro business portfolio
- ATM, CRM, and EDC Merchant reliability exceeded targets
- Business process improvements through the implementation of PMO Operations ran according to targets and milestones

##### Finance & Strategy Directorate

- BRI Group's consolidated operating revenue achieved its target and grew year-on-year
- Subsidiaries' net profit achieved its target, and its contribution to consolidated profit increased significantly year-on-year
- Liability management was well maintained, as reflected in the cost of funds reaching its target
- Business efficiency efforts positively impacted BRI Group's performance, as reflected in the consolidated CIR ratio reaching its target
- Interim DPS and dividend yield increased year-on-year
- Monetization of synergies between subsidiaries and BRI through product diversification achieved its target and contributed to increased fee income and outstanding loans for BRI, including from the synergy between Gold Savings in BRImo and KKB Joint Financing
- The process of aligning the arrangement of BRI's subsidiaries with PT Danantara Asset Management is progressing according to milestones

##### Corporate Transformation Sub-Directorate

- The implementation of BRI's long-term plan initiatives was generally conducted according to milestones.
- Evaluation of implemented initiatives was carried out consistently and routinely
- The alignment process of BRI's subsidiary structure with PT Danantara Asset Management was in progress according to milestones
- The reorganization and organizational evaluation were performed successfully

##### Consumer Banking Directorate

- Consumer segment profit exceeded the target
- Consumer loan grew year-on-year
- Consumer loan quality remained stable and met the target
- Non-TPF Assets Under Management (AUM) exceeded the target
- The number of consumer customers met the target

##### Micro Business Directorate & Ultra Micro Business Sub-Directorate

- Micro and Super Micro KUR distribution targets achieved
- The number of Productive BRILink Agents achieved
- New Micro segment customers sourced from the Incubation Program pipeline, Government Programs, and BRILink Agents met the target
- The number of Ultra Micro customers upgraded to a higher level grew beyond the target

- Overall, the performance of the Ultra Micro Holding was achieved, as reflected in the Ultra Micro credit quality indicators, Ultra Micro loan disbursement, and e-channel business, all of which met the established targets.

#### Commercial Banking Directorate

- The daily average balance of Performing Loans increased, with maintained credit quality
- The CASA to Loan Ratio target for Commercial, Small & Medium Enterprises (CSME) was achieved
- The fee-based income target for the CSME segment was achieved
- The target number of new CSME customers was achieved
- The daily average customer funds managed by SMEs were achieved
- The pipeline management development initiative was achieved on target

#### Corporate Banking Directorate

- Corporate segment profit target achieved
- Daily average current account balance target achieved
- Cost of Fund (DPK) target achieved
- Daily average performing loan balance target achieved with maintained loan quality, as reflected in the LAR (L/R, DPK, and NPL) ratio
- The composition of non-GRE (Government Related Entity) customer funds to total core depositors increased.

#### Treasury and International Banking Directorate

- Treasury and international business revenue performance met the targets
- Liquidity risk management was maintained within appetite
- Liquidity management efficiency was maintained, as reflected in the CoBL and CoND ratios meeting targets
- Performance contributions from UKLN and Bank Representatives met targets
- Effectiveness and efficiency of goods and services procurement met the targets
- Forex transaction volume met the targets

#### Risk Management Directorate

- The frequency of internal fraud decreased.
- The Integrated Risk Profile was maintained at Low to Moderate
- The roadmap for improving risk management implementation was achieved according to milestones
- No cybersecurity incidents were recorded throughout 2025.

#### Wholesale Risk Sub-Directorate

- The target for successful restructuring and settlement of NPLs was achieved
- The target for net downgrade to LAR for the corporate segment was achieved
- The target for the daily average for the corporate segment was achieved

#### Retail Risk Sub-Directorate

- SME outstanding performing loan target achieved
- SME and Consumer loan cost deduction target achieved
- Consumer segment net downgrade to LAR target achieved

#### Operations Directorate

- Cash management indicators (such as cash ratio, maximum cash balance, and the difference between ATM and CRM cash) were achieved
- The credit operations function improved, as reflected in achieving the insurance claim success rate and premium refund targets.
- BRI's Net Promoter Score (NPS) increased and exceeded targets
- ATM, CRM, and Merchant EDC reliability exceeded targets

#### Human Capital & Compliance Directorate

- Good Corporate Governance (GCG) and Integrated Governance (IGC) Human Capital aspect ratings achieved the target
- ESG rating achieved as targeted.
- Sustainable lending exceeded the target.
- Regulator-related fines/losses management exceeded the targets
- Internal fraud frequency control exceeded the targets
- Disciplinary penalty settlement exceeded the targets
- Score BRI Group's HC Maturity exceeded the targets
- Employee Productivity exceeded the targets
- Talent Mobility exceeded the targets

#### Human Capital Sub-Directorate

- Employee Productivity exceeded targets
- Human Capital System targets were achieved according to the milestones
- Successor planning success rates exceeded targets
- Talent development targets were achieved according to the milestones
- Performance management system targets were achieved according to the milestones

#### Network & Retail Funding Directorate

- Retail Savings and CASA grew year-on-year
- Average Daily Balance of Retail Savings and CASA grew year-on-year
- Retail funding costs were maintained, with third-party funding costs reaching targets
- Network Transformation Targets were achieved according to the milestones

#### Retail Transaction & Funding Sub-Directorate

- The number of BRIMO users and transactions grew year-on-year
- The number of productive EDC and QRIS merchants grew year-on-year
- BRIMO active users and transaction volume exceeded targets
- Merchant EDC and QRIS transaction volume exceeded targets
- Merchants' average daily balance of third-party funds exceeded targets

#### Information Technology Directorate

- IT maturity level target achieved
- Zero incident cybersecurity breach target achieved
- IT hygiene implementation was achieved according to the milestone
- IT strategic plan implementation was achieved according to the milestone
- Establishing Unified Data Management implementation was achieved according to the milestone

#### Digital Banking Sub-Directorate

- Customer data quality targets achieved
- Advance Analytics and AI performance rate targets for customer pipelines achieved
- E-channel productivity targets achieved
- Digital innovation management achieved according to milestones

#### Internal Audit Sub-Directorate

- The number of fraud incidents decreased compared to the previous year.
- The quality of follow-up to the Whistleblowing System (WBS) was achieved.
- Completion of fraud case investigations was in accordance with the SLA.
- The Audit Finding Summarization tool was developed.
- Development of a new risk indicator model (Fraud Risk Detection & Periodic Monitoring) exceeded the target.

Furthermore, the Board of Commissioners and the Board of Directors were accountable for the Company's 2025 performance, including the implementation of the duties and responsibilities of the Board of Commissioners and the Board of Directors under the GMS. Before being disclosed in the GMS, the Board of Directors' Collegial KPI underwent a review by the Public Accounting Firm (KAP).

### Results of The Collegial Performance Assessment of The Board of Directors

The results of the collegial performance assessment of the Board of Directors have been reviewed by an independent party, namely the Public Accounting Firm that audited the Company's Financial Statements. The results of the collegial performance assessment of the Board of Directors are as follows.

Category		Weight	No	KPI	ESG/C	Achievement
Economic and Social Value for Indonesia	Financial	57%	1	<b>Consolidated</b> Pre-Provision Operating Profit (PPOP)	C	100,7%
			2	<b>Consolidated</b> Tier 1 Return on Equity (ROE)	C	98,8%
			3	Total Shareholder Return (TSR)	C	66,67%
	Operational		4	Cost of Credit (CoC) Parent Only	G	98,1%
			5	<b>Consolidated</b> Cost-to-Income Ratio (CIR)	C	100,0%
	Social		6	KUR Loan Disbursement Realization	S	110,0%
			7	NPS for Bank	S	110,0%
Business Model Innovation		10%	8	<b>Consolidation</b> CASA Ratio	C	105,0%
			9	Average Loan Growth of Consumer & SME (Parent Only)	C	81,9%
Technology Leadership		10%	10	Number of Active BRImo Users	C	110,0%
			11	Cyber Security Breach	G	110,0%

Talent Development		8%	15	Human Capital Transformation	S	92,0%

### ASSESSMENT OF THE IMPLEMENTATION OF GOOD CORPORATE GOVERNANCE IN THE BOARD OF DIRECTORS ASPECT

Based on the provisions of POJK No. 17/POJK.03/2023 and SEOJK No. 14/SEOJK.03/2025, which require Commercial Banks to conduct self-assessments of their GCG implementation, BRI conducted an assessment of the Board of Directors' aspects of GCG implementation during the fiscal year. Furthermore, the Board of Directors has an assessment mechanism based on the ASEAN CG Scorecard best-practice assessment.

#### The Party Conducting The Assessment

The parties responsible for evaluating the Board of Directors' performance are the Board of Commissioners and the General Meeting of Shareholders (GMS). In conducting the performance evaluation of the Board of Directors, the Board of Commissioners refers, among others, to the achievement of Key Performance Indicator (KPI) targets. The performance of the Board of Directors as a whole and of each individual member of the Board of Directors is evaluated by the Board of Commissioners. The realization of KPIs for each member of the Board of Directors is reported to the Board of Commissioners and subsequently reviewed by the Remuneration and Nomination Committee as a basis for consideration in determining the remuneration of each member of the Board of Directors. The individual performance of each Director can be specifically observed through the Individual KPI, which consists of Shared KPIs and Directorate KPIs.

## Board of Commissioners Performance Assessment

The Board of Commissioners prepares a work plan at the beginning of the year and conducts a self-assessment based on its achievements and the predetermined Key Performance Indicators (KPIs). Furthermore, the Board of Commissioners also reviewed the implementation of the duties of supporting bodies under the Board of Commissioners in accordance with the targets set in the Work Plan and Budget.

Based on the review results and the self-assessment of the Board of Commissioners and the Committees under the Board of Commissioners, it was concluded that all work plans established at the beginning of 2025 were successfully implemented in full, in line with the set targets.

## Procedure for Implementing The Performance Assessment of The Board of Commissioners

The Board of Commissioners' performance assessment is conducted collegially through a self-assessment and reported to the GMS, where the results are conveyed to Shareholders through a report on the implementation of their duties. At the GMS, shareholders review this report and provide approval in the form of a full release and discharge (*Volledig acquit et decharge*) to the Board of Commissioners and the Board of Directors for the implementation of their supervisory and management duties for the company during the Fiscal Year.

## Board of Commissioners' Performance Evaluation Criteria

Board of Commissioners Performance indicators or criteria are measured by the achievement of the work program/work plan and budget (RKA) prepared at the beginning of each year. The Board of Commissioners' work program is prepared with key success factors in mind for the implementation of the Board of Commissioners' duties, including learning & growth, internal processes, compliance, and financial perspectives. The 2025 assessment of the Board of Commissioners criteria is as follows:

Assessment Aspects		Indicators	Parameter	Weight
<b>PERSPECTIVE I : LEARNING AND GROWTH</b>				
Board of Commissioners Organization	a	Organization of the Board of Commissioners Following the provisions	Organization of the Board of Commissioners following applicable regulations	2,00
	b	Organ organization under the Board of Commissioners following the provisions	Organ organization under the Board of Commissioners following applicable regulations	2,00
Board of Commissioners Competency Development	a	New Board of Commissioners orientation program	The entire Board of Commissioners has just joined the orientation program	2,00
	b	Members of the Board of Commissioners fulfill competency/ certification in accordance with applicable regulations	Members of the Board of Commissioners have fulfilled their competencies in accordance with applicable regulations	2,00
	c	Education/training/seminar programs to improve competence	Each Commissioner member has attended at least one education/ training/seminar program	2,00
<b>Total Weight of Perspective I</b>				<b>10,00</b>
<b>PERSPECTIVE II : INTERNAL PROCESS</b>				
Planning	a	Ratification of the Work Plan and Budget of the Board of Commissioners	The RKA of the Board of Commissioners is approved before the implementation of the current year the RKAP takes effect	2,50
	b	Approval of RBB and/or revision of RBB on tim	The RBB is ratified before November 30, and the Revised RBB is approved by the Board of Commissioners before June 30 every year	5,00
Implementation	a	Approval of corporate actions of the Board of Directors that require the support of the Board of Commissioners following the provisions	The application for approval from the Board of Commissioners on the proposal of the Board of Directors is given no later than 15 working days from the date it is received	5,00

Assessment Aspects	Indicators	Parameter	Weight	
	b	Meetings of the Board of Commissioners are held following the provisions and targets	Meetings of the Board of Commissioners are held at least once a month, and the Meetings of the Board of Commissioners with the Board of Directors are held at least once every four months	10,00
	c	Formulate Nomination Policy and Implementation of the Nomination Process Candidates for the management of the Company, including subsidiaries under the authority of the Board of Commissioners	a. Company Nomination Policy b. Letter of submission of nominated talent to the Cluster Talent Committee (CTC)	2,50
	d	Develop remuneration policies and remuneration structures for the Board of Directors and the Board of Commissioners	a. Remuneration Policy for the Board of Directors and the Board of Commissioners. b. Recommendations on the remuneration structure for the Board of Commissioners and the Board of Directors submitted to Series A Dwi Warna Shareholders.	2,50
	e	Appointment of a Public Accounting Firm on the Company's Financial Statements	The recommendation of KAP to carry out an audit of the company's financial statements is given before the Company's Annual GMS	5,00
	Supervision	a	Implementation of the Working Visit of the Board of Commissioners	Implementing working visits to Regional Offices
	b	Implementation of internal control review	Review of The Internal Audit Business Unit Annual Audit Planning (PAT) and evaluation of the implementation of internal audit	2,50

## Performance Evaluation of Committees Under the Board of Commissioners and Its Basis

The Board of Commissioners conducts an evaluation of the effectiveness of the committees under its purview. The performance evaluation procedure for the committees under the Board of Commissioners is conducted Annual reports refer to the KPIs established by the Board of Commissioners. In assessing the Committee's performance, the Board of Commissioners reviews reports on the implementation of the Committee's duties under the Board of Commissioners. The evaluation Criteria are based on each committee's Key Performance Indicators (KPIs). The Board of Commissioners assessed that during 2025, the committees under the Board of Commissioners performed their duties and responsibilities effectively, as reflected in each committee's achievement of its Key Performance Indicators (KPIs).

The performance evaluation based on the achievement of the Key Performance Indicators (KPIs) of each committee under the Board of Commissioners is carried out based on the following three (3) assessment perspectives:

1. Learning & Growth Perspective.

This perspective focuses on the development and advancement of human resources within the organization, including training, skill enhancement, and the development of committee members' competencies. The objective of this perspective is to strengthen internal capabilities that support the achievement of the Committee's work program objectives. The development of committee competencies is a key element in supporting the effective implementation of the supervisory function carried out by the Board of Commissioners.

2. Internal Process Perspective.

This perspective assesses the efficiency and effectiveness of the Committees' internal processes, with a focus on ensuring each process is implemented in accordance with applicable laws and regulations and the principles of Good Corporate Governance (GCG). Achievements from this perspective directly contribute to the effectiveness of the Board of Commissioners' supervisory function.

3. Compliance Perspective.

This perspective evaluates the extent to which the activities carried out by the Committees comply with applicable laws and regulations as well as the principles of Good Corporate Governance (GCG). Compliance with regulations is an essential element in maintaining the integrity and credibility of both the Committees and the Board of Commissioners.

## Achievement of the Audit Committee's Key Performance Indicators

The performance indicators or criteria of the Audit Committee are measured based on the achievement of its work program / Work Plan and Budget (RKA), prepared prior to the beginning of the financial year, as well as the attendance rate of Audit Committee members at meetings. The Audit Committee's work program is designed to support the key success factors in implementing the Board of Commissioners' supervisory duties by executing the Audit Committee's responsibilities. These responsibilities include the review of the Company's internal control system, the quality of the Company's financial statements, the effectiveness of the Internal Audit function, as well as ensuring that the Company's overall functions and activities meet the adequacy of internal control procedures and methodologies, the implementation of the compliance function, and the application of risk management in accordance with the principles of Good Corporate Governance (GCG). In addition, the Audit Committee is responsible for reviewing the financial statements, the results of internal and external audits (Public Accounting Firm/KAP), and providing recommendations regarding the appointment of the Public Accounting Firm (KAP).

In general, all Audit Committee KPIs were achieved, as reflected in the implementation of the entire Audit Committee Work Plan and Budget (RKA) for 2025 in accordance with the established targets. In addition, the attendance of Audit Committee members complied with the applicable requirements, enabling the Audit Committee meetings to reach the required quorum and to make decisions. Throughout 2025, the Audit Committee held 28 meetings, all of which were documented in the minutes. These meetings were conducted with the attendance of Audit Committee members in accordance with the applicable requirements, thereby meeting the quorum requirements for decision-making. The attendance rate of Audit Committee members is shown in the table on the frequency and attendance of Audit Committee meetings.

Furthermore, the Audit Committee's performance was supported by the competencies of its members, which aligned with the requirements for performing supervisory functions in the field of auditing. The Audit Committee provides views, inputs, and recommendations to the Board of Commissioners, both during meetings and outside meetings, which serve as a basis for the Board of Commissioners in making decisions and providing advice and recommendations to the Board of Directors. The competencies of each Audit Committee member are presented in the Audit Committee profile.

The achievements of the Audit Committee's performance indicators are as follows:

No	Assessment Perspective	Assessment Aspect	Indicator	Output / Target Achievement	Weight	Score
1	Learning & Growth Perspective	Committee Organization	Composition of Committee members in accordance with the provisions	The composition of the Audit Committee members in 2025 has complied with OJK regulations and the provisions of the Ministry of State-Owned Enterprise	10	10
		Competency of Committee Members	Committee members possess competencies in accordance with the provisions	Members of the Audit Committee possess competencies in finance and/or accounting, law, economics, audit, and banking	5	5
			Term of office of committee members in accordance with the provisions	The term of office of Audit Committee members does not exceed the term of office of the Board of Commissioners	5	5

### Achievement of the Nomination and Remuneration Committee's Key Performance Indicators

The performance indicators or criteria of the Nomination and Remuneration Committee (NRC) are measured by the achievement of its work programs/work plans prepared at the beginning of each year and by the attendance rate of NRC members at committee meetings. The NRC's work program is designed to support the key success factors in the implementation of the Board of Commissioners' duties, particularly in carrying out the nomination process for the Company's management and subsidiaries, evaluating remuneration policies for employees and employment matters, as well as remuneration for the Board of Directors and the Board of Commissioners.

In general, all NRC KPIs were achieved, as reflected in the implementation of the entire NRC Work Plan for 2025 in accordance with the established targets, as well as in NRC members' attendance, which complied with applicable provisions, enabling NRC meetings to reach the required quorum for decision-making. The attendance rate of NRC members is shown in the table on the frequency and attendance of Nomination and Remuneration Committee meetings.

Furthermore, the NRC's performance was supported by the competencies of its members, which aligned with the requirements for performing supervisory functions in the fields of nomination and remuneration. The NRC provides views, inputs, and recommendations to the Board of Commissioners, both during meetings and outside, which serve as a basis for the Board of Commissioners in making decisions and providing advice and recommendations to the Board of Directors. The competencies of each NRC member are presented in the Nomination and Remuneration Committee profile.

The achievements of the Nomination and Remuneration Committee's performance indicators are presented as follows:

No	Assessment Perspective	Assessment Aspect	Indicator	Output / Target Achievement	Weight	Score
1	Learning & Growth Perspective	Committee Organization	Composition of committee members in accordance with applicable provisions	The composition of the NRC members is stipulated in the Board of Commissioners' Decree and is in accordance with OJK regulations and the provisions of the Ministry of State-Owned Enterprises	5	5
		Competency of Committee Members	Committee members possess competencies in accordance with applicable provisions	All members of the Board of Commissioners serving as NRC members have passed the OJK Fit and Proper Test and have participated in relevant training.	5	5
			The term of office of committee members is in accordance with applicable provisions	The appointment of the Chairperson and Members of the BRI Nomination and Remuneration Committee, including their terms of office, has been carried out in accordance with applicable provisions.	5	5
2	Internal Process Perspective	Planning	Approval of the Committee Work Plan in a timely manner	The NRC Work Plan for 2026 was approved on 31 December 2025.	10	10

No	Assessment Perspective	Assessment Aspect	Indicator	Output / Target Achievement	Weight	Score
		Implementation	Committee meetings conducted in accordance with applicable provisions and the established plan	During 2025, the NRC held 21 (twenty-one) meetings.	10	10
			Nomination of BRI management	The nomination of BRI management was conducted in accordance with the details of the meetings.	10	10
			Nomination of subsidiary management	The Nomination and Remuneration Committee carried out the nomination of subsidiary management in accordance with the details of the meetings.	10	10
			Review and preparation of recommendations on the remuneration structure for the Board of Directors and the Board of Commissioners	The NRC provided recommendations on the proposed remuneration of the Company's management.	10	10
			Review/discussion of the remuneration of the Board of Directors and the Board of Commissioners	The NRC conducted discussions on the remuneration of the Company's management in accordance with the meeting details.	10	10
		Supervision	Reviu/ Pembahasan Kebijakan Human Capital dan remunerasi Direksi dan Dewan Komisaris secara periodik	KNR melakukan pembahasan Kebijakan Human Capital pada 18 November 2025 dan terkait Remunerasi Direksi dan Dewan Komisaris pada 4 Februari 2025	10	10
3	Compliance Perspective	Implementation of corporate activities in accordance with Good Corporate Governance (GCG)	Evaluation of the performance of the Board of Directors	A meeting to discuss the evaluation of the Board of Directors of PT Bank Rakyat Indonesia (Persero) Tbk was held on 4 February 2025.	5	5
			Implementation of the Board of Commissioners' GCG self-assessment	The results of the GCG self-assessment of the Board of Commissioners obtained a composite rating of 2.	5	5
			Performance evaluation of the Board of Commissioners' organs	The performance evaluation of the Board of Commissioners' committees and the evaluation of committee members were conducted at the end of each year and disclosed in BRI's Annual Report.	5	5

### Achievement of the Risk Management Oversight Committee's Key Performance Indicators

The performance of the Risk Management Oversight Committee (RMOC) is measured based on the achievement of its work programs/work plans prepared at the beginning of each year and the attendance rate of RMOC members at committee meetings. The RMOC's work program is designed to support the key success factors in the implementation of the Board of Commissioners' duties, particularly in evaluating and ensuring that the Company's risk management implementation continues to meet the adequacy of risk management procedures and methodologies, thereby ensuring that the Company's activities remain within acceptable risk limits while generating value for the Company.

In general, the RMOC Work Plan for 2025 was implemented effectively. This is reflected in the fact that throughout 2025, the RMOC held 24 meetings, with RMOC member attendance meeting the applicable requirements, enabling the meetings to achieve the required quorum for decision-making. The attendance rate of RMOC members is shown in the table on the frequency and attendance of Risk Management Oversight Committee meetings.

Furthermore, the RMOC's performance is supported by its members' competencies, which align with the requirements for carrying out supervisory functions in the field of risk management. The RMOC provides views, input, and recommendations to the Board of Commissioners, both during meetings and outside, serving as a basis for the Board of Commissioners in making decisions and providing advice and recommendations to the Board of Directors.

The achievements of the Risk Management Oversight Committee's performance indicators are presented as follows:

No	Assessment Perspective	Assessment Aspect	Indicator	Output / Target Achievement	Weight	Score
1	Learning & Growth Perspective	Committee Organization	Composition of committee members in accordance with applicable provisions	The appointment of the Chairperson and Members of the BRI RMOC has been carried out in accordance with the applicable provisions.	5	5
		Competency of Committee Members	Committee members possess competencies in accordance with applicable provisions	All RMOC members from the Board of Commissioners have passed the OJK fit and proper test and/ or participated in training during 2024.	5	5
				The appointment of the Chairperson and Members of the BRI RMOC and the composition of RMOC members have complied with applicable provisions.	5	5
2	Internal Process Perspective	Planning	Approval of the Committee Work Plan in a timely manner	The RMOC Work Plan for 2025 was approved on December 31, 2025.	10	10
		Implementation	Committee meetings conducted in accordance with applicable provisions and the established plan	During 2025, the RMOC held 24 (twenty four) times meetings. In addition, the RMOC actively participated in joint meetings with the Board of Commissioners.	5	5
			Evaluation of credit approvals exceeding a certain threshold that require consultation with the Board of Commissioners	During 2025, the RMOC conducted eight reviews of credit consultation cases.	5	5
			Approval of corporate actions and/ or actions of the Board of Directors requiring approval from the Board of Commissioners in accordance with applicable provisions	During 2025, the RMOC conducted reviews of five approvals related to proposed corporate actions and/ or actions of the Board of Directors requiring approval from the Board of Commissioners.	10	10

### Achievement of the Integrated Governance Committee's Key Performance Indicators

The performance of the Integrated Governance Committee (IGC) is measured by the achievement of its work programs/work plans prepared at the beginning of each year and the attendance rate of IGC members at committee meetings. The IGC's work program is designed to support the key success factors in implementing the Board of Commissioners' duties, particularly by evaluating and ensuring integrated governance.

In general, the IGC Work Plan for 2025 was implemented effectively. This is reflected in the fact that throughout 2025, the IGC held 21 meetings, with IGC member attendance meeting the applicable requirements, enabling the meetings to achieve the required quorum for decision-making. The attendance rate of IGC members is shown in the table on the frequency and attendance of Integrated Governance Committee meetings.

Furthermore, the IGC's performance is supported by its members' competencies, which align with the requirements for carrying out supervisory functions in the banking sector. The IGC provides views, inputs, and recommendations to the Board of Commissioners, both during meetings and outside meetings, serving as a basis for the Board of Commissioners in making decisions and providing advice and recommendations to the Board of Directors. The competencies of each IGC member are presented in the Integrated Governance Committee profile.

The details of the Integrated Governance Committee's KPI achievements based on the self-assessment are as follows:

No.	Assessment Perspective	Assessment Aspect	Indicator	Output / Target Achievement	Weight	Score
1	Learning & Growth Perspective	Strengthening of Integrated Governance	Strengthening the implementation of Integrated Governance	Selama tahun 2025, telah dilaksanakan rapat dengan unit kerja terkait Maturity Level BRI Group	10	10

## Nomination and Remuneration of The Board of Commissioners and Directors

### Nomination Procedures of The Board of Commissioners and Directors

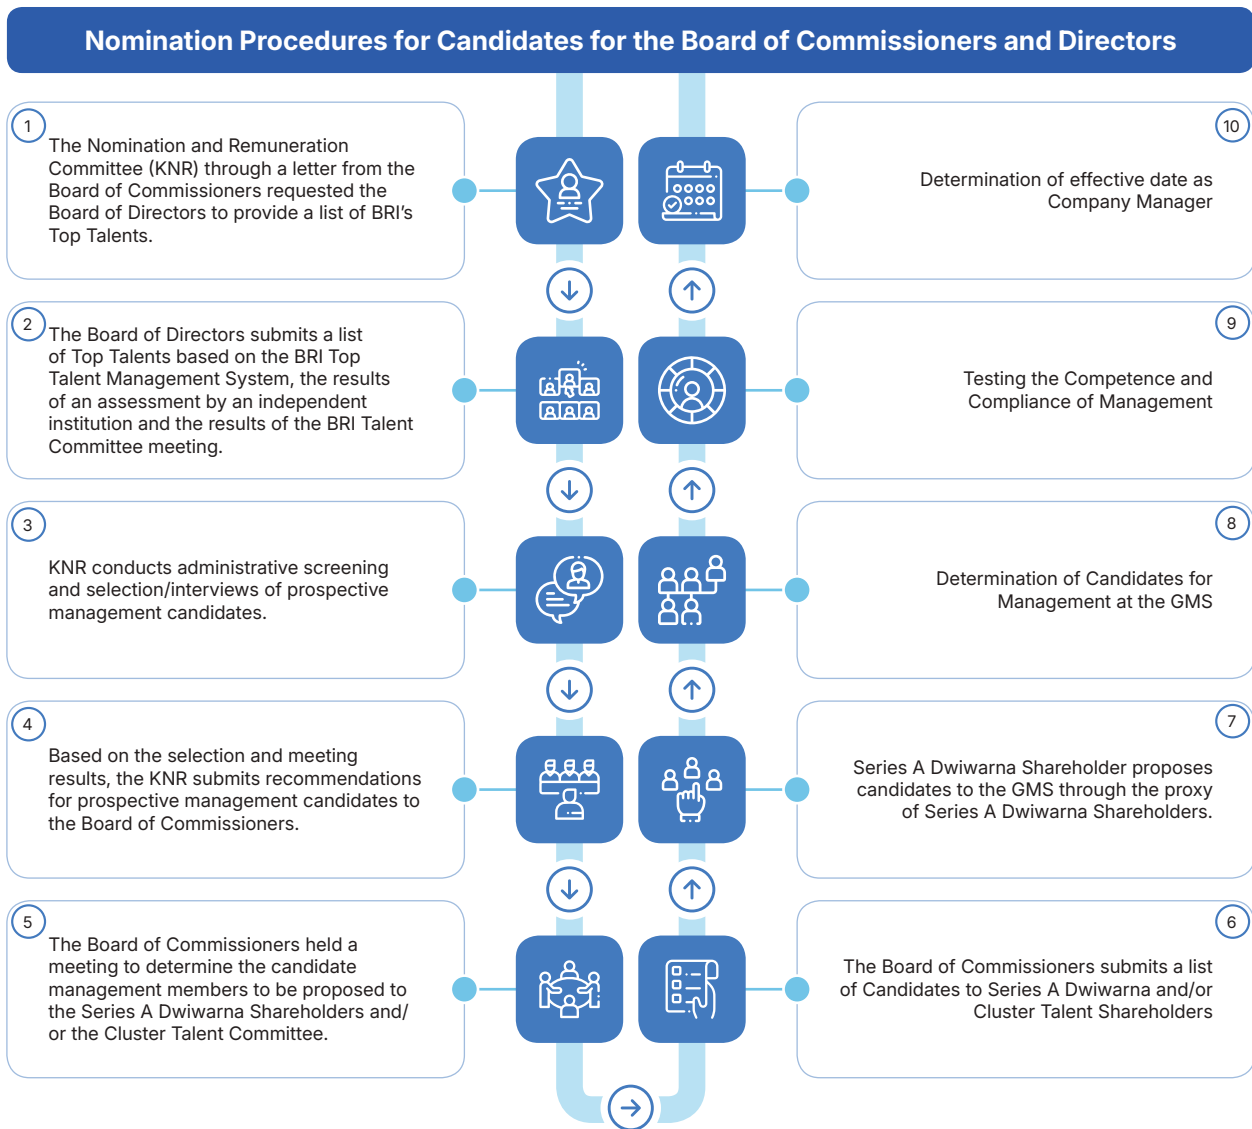

To implement sound business practices and fulfilling the GCG principles as well as the prudential principle within PT Bank Rakyat Indonesia (Persero) Tbk, the Board of Commissioners has stipulated the Nomination policy of members of the Board of Commissioners and Directors with a Decree of NOKEP: 07-KOM/ BRI/07/2015 dated July 28, 2015. In general, the Succession Policies of the Board of Commissioners and Directors are as follows:

- The Board of Commissioners is authorized to nominate candidates for members of the Board of Directors and/or the Board of Commissioners of the Bank.
- For prospective members of the Board of Directors, the nomination process is through internal candidates of the Bank, i.e:
  - Members of the Board of Directors who will end their tenures but may still be reappointed as members of the Board of Directors;
  - Executives reporting directly to the Directors or executives with excellent performance;
  - Board of Directors of a subsidiary or joint venture.
- For candidates of members of the Board of Commissioners, the Nomination process shall be conducted for prospective members of the Board of Commissioners who will end their tenures but may be reappointed as members of the Board of Commissioners.
- For prospective members of the Board of Directors and/or Board of Commissioners with the exclusion of Executives under the Board of Directors, and Subsidiaries' Board of Directors, the Nomination process shall be conducted jointly by a Team established by the Dwiwarna Series A Shareholder while simultaneously determining the prospective members of the Board of Directors and/or Board of Commissioners, which will be proposed to the General Meeting of Shareholders.
- In the Nomination process, the Chairman of the Committee shall represent the Committee, and if the Chairman of the Committee is absent, then it shall be replaced by one of the Committee members who are an Independent Commissioner.
- This decision also mandates the Chairman of the Committee or Independent Commissioner tok:
  - Represent the Committee as a member of the Assessment Team established by the Dwiwarna Series A Shareholder.
  - Provide recommendations on candidates for members of the Board of Directors and/ or Commissioners by taking into account the fulfilment of the applicant's requirements for the integrity, competence, and reputation.
- The Chairman of the Committee or Independent Commissioner who represents the Committee shall avoid any conflict of interest and shall maintain its independence.

In the selection process for candidates for the Board of Commissioners and Board of Directors, BRI maintains a list of BRILiaN Top Talent comprising individuals from the BoD-1 level who have demonstrated outstanding performance and significant potential within the company and are aligned with the company's future strategic direction. The talent pool is then identified based on pre-determined criteria to ensure that the selected individuals possess the necessary qualifications and are prepared to lead BRI Group toward greater achievements. Subsequently, the identified candidates undergo validation by the Board of Commissioners, who assess their performance and capacity based on their track record. Following this validation, the nominated talents are presented to the Series A Dwiwarna Shareholder and/or the Cluster Talent Committee for further validation and calibration within the cluster framework.

In addition, the Company is assisted by independent parties to periodically evaluate executive officers and officers below them to be able to become the next successor so that leadership and character remain suitable and in accordance with the capacity needed and required by the company.

The procedures for the nomination of candidates for the Board of Commissioners and the Board of Directors are as follows.

The procedure for selecting Prospective members of the Board of Commissioners and/or Board of Directors is regulated as follows:

1. The Nominations and Remuneration Committee through the board of commissioners, requests a list of BRI's Top Talents that meet the criteria to be proposed as a candidate for BRI management.
2. The Board of Directors submits a list of BRI's Top Talents based on BRI's Talent management system data, the results of assessments by independent institutions and the results of BRI Human Capital Committee meetings.
3. Based on the list submitted by the Board of Directors, the NRC selects Candidates who meet the specified qualifications. For prospective candidates for members of the Board of Directors Officers one level below the Board of Directors or officers with special achievements

- and Directors of subsidiaries or joint ventures, the committee may request proposals for Candidates from the Board of Directors of the Bank, which must first be assessed by a professional institution with competency indicators in accordance with applicable regulations.
4. Candidates for members of the Board of Commissioners and/ or Directors who are deemed appropriate are subsequently proposed by the NRC to the Board of Commissioners to participate in the evaluation process.
5. The NRC conducts an evaluation process to obtain comprehensive information regarding the qualifications and competencies of a Candidate, as follows:
  - a. For prospective candidates for members of the Board of Directors who are still in office and will end their term of office, but can still be reappointed, the evaluation is carried out, among others, by asking for the opinion of the President Director.

- b. The Nomination and Remuneration Committee selects prospective members of the Board of Directors who meet the specified qualifications. The Nomination and Remuneration Committee allows the use of third-party professional assessors to identify potential candidates who meet desired profiles.
  - c. For prospective members of the Board of Directors who come from officials one level below the Board of Directors or officials who have special achievements, or who come from the Directors of a subsidiary/joint venture, Evaluation can be carried out by means:
    - 1) Conducting interviews/interviews with the recommended candidate for the Board of Directors; and/or,
    - 2) Requesting Candidates for members of the Board of Directors to give presentations on certain topics, which illustrate the abilities of the Candidates in accordance with the requirements.
  - d. For prospective candidates for the Board of Commissioners, an evaluation of qualifications and competencies is conducted based on the person's curriculum vitae.
6. The results of information extraction regarding prospective candidates for members of the Board of Commissioners and/ or Directors are discussed in a Committee meeting to decide which Candidates will be elected as Candidates for members of the Board of Commissioners and/or Directors.
  7. The results of the Committee discussions are written in the Committee's Service Note to the Board of Commissioners. The official note is a committee recommendation document on the nomination of a candidate for the member of the Board of Commissioners and/or Board of Directors concerned.
  8. The Board of Commissioners decides on prospective members of the Board of Commissioners and/or Directors in a Board of Commissioners meeting which also serves as the basis for recommendations by the Board of Commissioners to Series A Dwiwarna Shareholders and/ or Cluster Talent Committee for further submission at the GMS.
  9. GMS Determine the composition and changes of members of the BRI Board of Directors, in the event that the appointed member of the Board of Directors has not been approved by the OJK, the appointment will not be effective until the person concerned is approved by the OJK. Prospective members of the Board of Directors of BRI who have not received OJK approval, are prohibited from carrying out duties as members of the Board of Directors in the Bank's operational activities and/or other activities that have significant influence on the Bank's financial policies and condition, even though they have been approved and appointed by the GMS. The GMS also dismisses the Board of Directors elected at the previous GMS if the person concerned is not approved by the OJK.
  10. BRI submits an application to the OJK to carry out a fit and proper test process.
  11. OJK is authorized to provide the result of the fit and proper test of the selected Directors, which includes administrative research and interview. Approval or rejection of such application shall be provided by OJK no later than 30 (thirty) days after receipt of the candidate's complete application.

## Remuneration Policy for The Board of Commissioners and Board of Directors

The Remuneration Policy for the Board of Commissioners and Directors is formulated under the Financial Services Authority Regulation (POJK) Number 45/POJK.03/2015 and OJK Circular Letter Number 40/SEOJK.03/2016 concerning the Implementation of Governance in the Provision of Remuneration for Commercial Banks, OJK Regulation Number 18/POJK.03/2016 concerning the Implementation of Risk Management for Commercial Banks, OJK Regulation Number 17 of 2023 concerning the Implementation of Governance for Commercial Banks, and the Regulation of the Minister of State Owned Enterprises No. PER-3/MBU/03/2023 concerning the Organs and Human Resources of State-Owned Enterprises. The Nomination and Remuneration Committee has prepared a Remuneration policy, which was ratified through the Board of Commissioners' Decree Number SK.12-KOM/BRI/11/2025 on November 18, 2025 concerning Guidelines for the Provision of Remuneration in the form of Salary/Honorarium, Allowances, Facilities and Tantiem/ Performance Incentives as well as Long-Term Incentives for the Board of Directors and Board of Commissioners of PT Bank Rakyat Indonesia (Persero) Tbk.

The remuneration for the Board of Commissioners and Directors is divided into two main categories: fixed remuneration and variable remuneration. This is determined by considering the complexity and scale of the business, performance achievements, the company's financial capacity, and its long-term goals, as part of the implementation of prudence principles based on performance and risk. The remuneration policy is established based on the predetermined eligibility criteria set at the outset as a foundation for allocation. The performance achievements of the Board of Commissioners and Directors, whether collegial or individual, are key factors influencing the amounts of compensation and incentives received.

### Fixed Remuneration

The components of fixed remuneration include salary/honorarium, allowances, facilities, and other fixed elements provided to all members of the Board of Commissioners and Directors in accordance with their duties, authority, and responsibilities.

### Variable Remuneration

In providing variable remuneration, the Company adheres to prudent risk-taking, ensuring that performance measurement methods are linked to risk. Variable remuneration components include, among other things, awards and/or performance incentive which can be given in cash or shares.

Variable remuneration can be awarded based on performance achievements, as follows:

1. Short-term incentives (STI) are provided to the Board of Commissioners and Directors under the resolution of the General Meeting of Shareholders (GMS) during the approval of the annual report. STI is granted as an incentive to achieve optimal annual performance. The amount of STI is determined by considering the achievement of annual performance results in line with the collegial Key Performance Indicators (KPIs) and the company's short-term goals. A partial STI paid to the Board of Commissioners was deferred during a certain period and/or the delegated party by GMS for the stipulation of a certain percentage amount in accordance with the mechanism stipulated in GMS/Shareholders Series A.
2. Long-term incentives (LTI) are provided to the Board of Commissioners and Directors under the resolution of the General Meeting of Shareholders (GMS) during the approval of the annual report. The purpose of providing LTI is to promote sustainable growth and ensure continuous risk management. The amount of LTI is determined by considering the achievement of additional KPIs that target long-term objectives agreed upon for a specific period, with GMS approval or the Series A Dwiwarna Shareholder as the recipient of the GMS delegation. This remuneration is granted to support the company's long-term vision, mission, and strategy. The provision of LTI is governed by specific regulations, including the performance period (vesting period) and a certain holding period, after which the incentives are awarded based on the results of long-term performance achievements.

Variable remuneration is provided in the form of shares for members of the Board of Directors and Non-Independent Commissioners, while Independent Commissioners receive it in cash. In certain specific circumstances, the Company may defer the payment of deferred variable remuneration (malus) or reclaim variable remuneration already paid (clawback) from individuals designated as Material Risk Takers (MRT).

The adjustment of deferred variable remuneration payments (malus) is applied under the following conditions:

1. There is legal evidence of abuse of position and/or authority and/or criminal acts committed by the recipient of the deferred recipient variable remuneration, resulting in losses for the Company.
2. Restatement of the Company's financial statements that served as the basis for determining the variable remuneration allocation.
3. The risk rating in the last quarter before the execution of the deferred variable remuneration is at Level 4 (Moderate to High) or worse.
4. Profit and dividend commitments, as outlined in the Company's Long-Term Plan (RJPP)/Corporate Plan for the relevant period, are not achieved.
5. The Annual General Meeting of Shareholders (GMS) decides to reject the accountability of the Board of Directors and/or the Board of Commissioners for the Company's performance in the financial year determined in the Annual GMS.
6. Other considerations deemed important by the GMS.

The clawback of Tantiem payments already disbursed is applied under the following conditions:

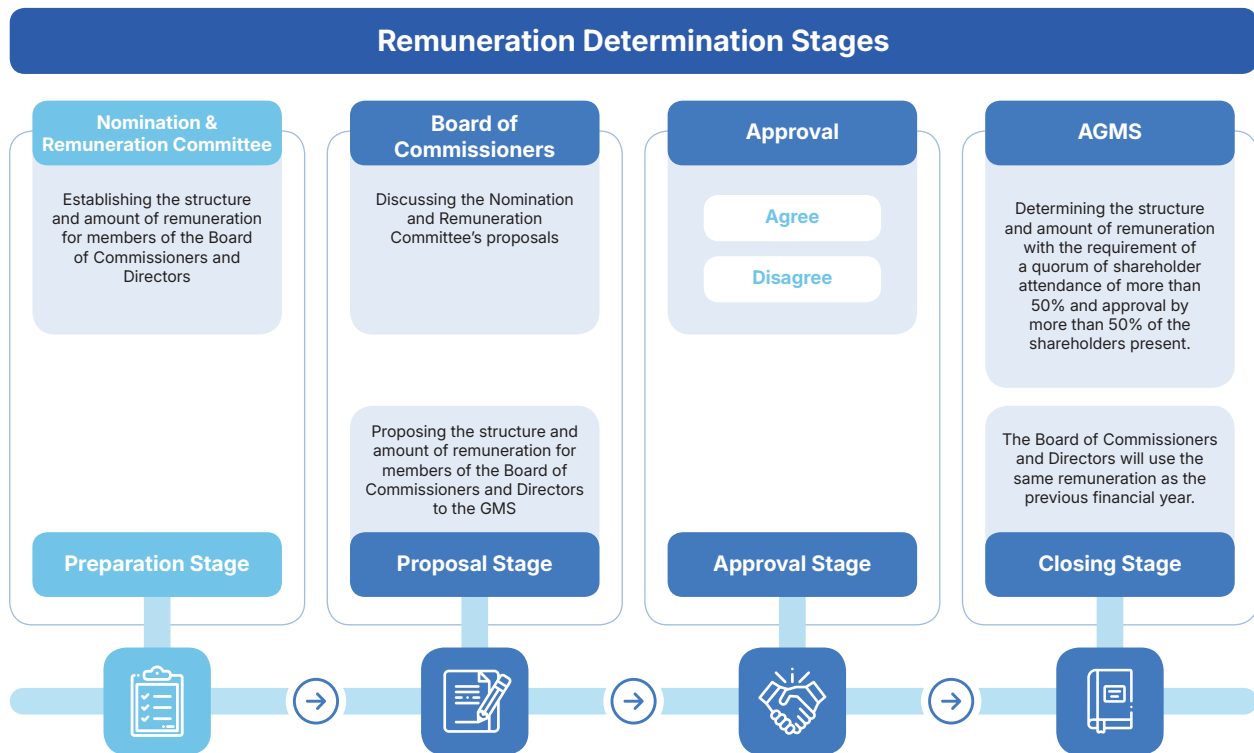

1. There is legal evidence of abuse of position and/or authority and/or criminal acts committed by the recipient of the recipient variable remuneration, resulting in losses for the Company.
2. Restatement of the Company's financial statements that served as the basis for determining the variable remuneration allocation.
3. The risk rating in the last quarter before the execution of the variable remuneration is at Level 4 (Moderate to High) or worse.
4. The Annual General Meeting of Shareholders (GMS) decides to reject the accountability of the Board of Directors and/or the Board of Commissioners for the Company's performance in the financial year determined in the Annual GMS.
5. Other considerations deemed important by the GMS.

With a structured remuneration framework, BRI is committed to providing fair and competitive compensation that not only rewards short-term performance achievements but also supports the company's long-term sustainability goals. This policy also prioritizes good governance principles, with a transparent oversight system that ensures all parties meet eligibility requirements and adhere to rules clearly and consistently defined.

The policy related to remuneration in more detail will be explained in the subheading Implementation of Governance in the Provision of Remuneration for Commercial Banks under OJK Regulation 45/POJK.03/2015 and Long-Term PerformanceBased Compensation Policy in this Annual Report.

## Remuneration Determination Procedure

Stages	Activities
Formulation	<b>Nomination and Remuneration Committee</b> The Nomination and Remuneration Committee evaluates the remuneration structure and amount of the Board of Commissioners and Board of Directors by taking into account the Bank's long-term performance, risks, fairness with peer group, objectives, and strategies, the allowance fulfillment as stipulated in the laws, and the Bank's potential income in the future. Based on the evaluation results, the Nomination and Remuneration Committee recommended the Remuneration structure and amount in the Board of Commissioners' meeting.
Proposal	<b>Board of Commissioners</b> The Board of Commissioners submits proposals on the determination of honorarium, allowances and facilities and bonuses for members of the Board of Commissioners and Directors to the General Meeting of Shareholders.
Determination	<b>General Meeting of Shareholders (GMS)</b> The GMS may approve and determine the remuneration structure and amount, with a quorum of more than 50% shareholder attendance and approval by more than 50% of the attending shareholders. In the event that the GMS does not approve the proposal, the Board of Commissioners and Directors will use the same remuneration structure and amount as in the previous fiscal year. In the event that the GMS has not yet determined the structure and amount of remuneration, the GMS may authorize the Board of Commissioners to determine the structure and amount of remuneration after obtaining approval from the Dwiwarna Series A Shareholder.

## Indicators for Determining The Remuneration of The Board of Commissioners and Board of Directors

The indicators for determining remuneration for the Board of Commissioners and Board of Directors consider a number of factors, including benchmarking remuneration with similar industries (peer groups) at the domestic and regional levels, based on the complexity and scale of the company's business, achievement of performance, size, and complexity of the Company's operations. The Company's remuneration policy is also oriented toward corporate development with a strong emphasis on sustainability principles and encouraging the achievement of long-term goals.

## Purchase/Sell of Shares of The Board of Commissioners and Directors

Disclosure of information on share ownership by the Board of Commissioners and the Board of Directors has been regulated by Decree No. KU.02-DIR/KEP/10/2023 concerning the General Policy of Corporate Governance of PT Bank Rakyat Indonesia (Persero) Tbk and Circular Letter No. SE.09.c-DIR/KEP/03/2023 concerning the Third Amendment to Corporate Governance as follows:

- Members of the Board of Directors or Board of Commissioners who own shares with voting rights, either directly or indirectly, are required to report and submit a report regarding ownership of voting rights over shares and any changes in ownership of voting rights over shares to the OJK.
- In this regard, ownership of voting rights over shares and any changes in ownership of voting rights over shares by members of the Board of Directors and Board of Commissioners must be submitted no later than 5 (five) working days since the ownership of voting rights over shares and any changes in ownership of voting rights over shares occurred.
- Members of the Board of Directors and Board of Commissioners may grant written power of attorney to other parties to report ownership of voting rights over shares and any changes in ownership of voting rights over shares.

Throughout 2025, share transactions carried out by the Board of Directors and Board of Commissioners have been reported to the Company (in Corporate Secretary Division) within 3 (three) working days after the transaction was carried out and then reported to the Financial Services Authority. The purchases/sales of shares of the Board of Commissioners and Directors during 2025 are as follows:

No	Name	Position	Transaction Date	Reporting Date	Transaction	Shares Before (units)	Shares Transacted	Share After (units)	Price per Share (IDR)	Transaction Purpose

			March 4, 2025	March 6, 2025	Purchase	5.868.656	212.800	6.081.456	3.630	Investment
2	Lukmanul Khakim	Independent Commissioner	March 27, 2025	April 17, 2025	Sale	280.000	280.000	0	4.010	Implementation of POJK No. 33/POJK.03/2015

## Diversity Policy for Directors and Board of Commissioners

The diversity of the composition of the Company's Directors and Board of Commissioners is in accordance with OJK Circular Letter No. 32/SEOJK.04/2015 concerning Public Company Governance Guidelines. The appointment of the Board of Commissioners and Directors is carried out by considering age, gender, education, experience, integrity, dedication, understanding of company management issues, having knowledge and/or expertise in the required fields and being able to provide sufficient time to carry out their duties as well as other requirements based on legislation. Currently, the Board of Commissioners and Directors have met the criteria for age, gender, education, experience, integrity, dedication, understanding of company management issues, and knowledge and/or expertise in the fields required by the Company.

### Diversity in Board of Directors Composition

Period March 24 to December 31

## Organs and Committees Under The Board of Commissioners

### Secretary of Board of Commissioners

The Board of Commissioners Secretariat is an organ responsible to the Board of Commissioners and tasked with assisting in the implementation of the Board of Commissioners' duties and responsibilities within the framework of the Company's supervision. The Board of Commissioners Secretariat is led by a Secretary of the Board of Commissioners, who is appointed and dismissed by the Board of Commissioners upon the recommendation of the Dwiwarna Series A Shareholder.

### Duties and Responsibilities of The Board of Commissioners Secretariat

The Secretariat of the Board of Commissioners has guidelines and regulations for the Secretariat of the Board of Commissioners which are stipulated by the Decree of the Board of Commissioners Nokep: 13-KOM/BRI/11/2025 dated November 28, 2025 which contains the duties and responsibilities of the Board of Commissioners Secretariat, among them:

1. Coordinating the execution of the duties of the Staff, Commissioner Secretary, and Administrator in the Board of Commissioners.
2. Coordinating the Board of Commissioners meetings.
3. Coordinating the administrative, secretarial, and protocol duties of the Board of Commissioners.

4. Reporting to the Company on the share ownership of members of the Board of Commissioners and/or their families in the Company and other companies.
5. Providing a report on the supervisory duties that have been carried out during the previous financial year to the General Meeting of Shareholders.
6. Preparing a report on the GCG Self-Assessment implementation of the Board of Commissioners and the Committee each Semester, in coordination with the Compliance division.
7. Coordinating the achievement of the duties of the Committees and organs reporting directly to the Board of Commissioners.
8. Coordinating with the Committees of the Board of Commissioners in preparing reports on the supervision results on the implementation of the Company's Business Plan every semester to the Financial Services Authority in accordance with the prevailing laws and regulations.
9. Coordinating and following-up on requests and/or collection of data/information from and/or to the Company's management and external parties not covered by the Committee's duties, including information on rules and regulations relevant to the duties and responsibilities of the Board of Commissioners.
10. Coordinating the drafting of the Annual Work Plan and Budget of the Board of Commissioners, which is an integral part of the Annual Work Plan and Budget of the Company prepared by the Board of Directors.
11. Coordinating the preparation of suggestions and opinions on the agenda and material of the General Meeting of Shareholders.

4. Implementation of Other Duties of the Secretariat of the Board of Commissioners
- Referring to the Charter of the Secretariat of the Board of Commissioners, which the Board approved of Commissioners, the Secretariat of the Board of Commissioners carries out other tasks, including:
- a. Coordinating and following up on the request of the Board of Commissioners in collecting data/information from and/or to the management of the

Company, including information on regulations and provisions relevant to the duties and responsibilities of the Board of Commissioners.

- b. Coordinating the implementation and self-assessment of Good Corporate Governance at the Board of Commissioners and Supporting Organs of the Board of Commissioners.

## Audit Committee

The Board of Commissioners established an Audit Committee to assist the Board of Commissioners in carrying out the Company's supervisory duties and functions. The Audit Committee is responsible to the Board of Commissioners by providing independent opinions on matters that require the Board's attention, in accordance with GCG principles and applicable laws and regulations.

### Basis for Establishing The Audit Committee

The establishment of the Audit Committee has been regulated in:

1. Minister of State-Owned Enterprises (BUMN) Regulation Number PER-2/MBU/03/2023 concerning Guidelines for Corporate Governance and Significant Corporate Activities of State-Owned Enterprises;
2. Minister of State-Owned Enterprises (BUMN) Regulation Number PER-3/MBU/03/2023 concerning the Organization and Human Resources of State-Owned Enterprises;
3. OJK Regulation Number 55/POJK.04/2015 concerning the Establishment and Implementation Guidelines for the Work of the Audit Committee;
4. OJK Regulation Number 17 of 2023 concerning the Implementation of Governance for Commercial Banks;
5. Articles of Association of PT Bank Rakyat Indonesia (Persero) Tbk, including its amendments.

### Audit Committee Charter

The Company's Audit Committee Charter is regulated under Decree Number 10-KOM/06/2024, dated May 28, 2024, concerning the Guidelines and Rules of Procedure for the Audit Committee of PT Bank Rakyat Indonesia (Persero) Tbk. The Audit Committee Charter serves as a reference for the Audit Committee in carrying out its duties effectively. It acts as a guideline and operational framework for the Audit Committee in assisting the Board of Commissioners in overseeing the Company, particularly regarding the implementation and evaluation of BRI's audit policies on the quality of internal control systems, risk management, and corporate governance systems based on prudential principles and Good Corporate Governance (GCG) principles.

The Audit Committee Charter includes the following aspects:

Chapter	Discussion
<b>Chapter I</b>	Introduction 1.1 Background 1.2 Legal Basis 1.1 Definitions

<b>Chapter IV</b>	Work Procedures and Processes of the Audit Committee 1.1 Audit Committee Work Program 1.2 Communication Protocol 1.3 Meeting Organization Mechanism 1.4 Correspondence Mechanism 1.1 Audit Committee Reports and Evaluations
Chapter	Discussion
<b>Chapter V</b>	Conclusion

## Appointment and Dismissal of The Audit Committee

The Audit Committee is appointed and dismissed by and is accountable to the Board of Commissioners. During 2025, the positions of Chairman and Members of the Audit Committee were determined through:

1. Board of Directors Decree No. 3922-DIR/HBS/11/2024, dated November 11, 2024 regarding the Appointment of the Chairman and Members of the Audit Committee of PT Bank Rakyat Indonesia (Persero) Tbk.
2. Board of Directors Decree No. 1719 -DIR/HBS/04/2025, dated April 17, 2025 regarding the Appointment of the Chairman and Members of the Audit Committee of PT Bank Rakyat Indonesia (Persero) Tbk.

## Duties and Responsibilities of The Audit Committee

The Audit Committee assists the Board of Commissioners in carrying out its duties and responsibilities by evaluating and ensuring the implementation of internal controls, overseeing

the quality of financial reports, supervising the performance of the Internal Audit Unit (SKAI), integrated governance, compliance with company regulations, and the effectiveness of independent auditors. Additionally, the Audit Committee ensures the functioning of the Whistleblowing System (WBS) as a transparent reporting mechanism, monitors the implementation of social and environmental responsibility programs, and assesses the company's financial health to ensure its operations align with good governance principles and support corporate objectives.

### Financial Reporting

1. Review financial information to be disclosed to the public and/or regulatory authorities, including financial statements, projections, and other financial reports.
2. Ensure the credibility and objectivity of financial reports issued to external parties and supervisory bodies, including follow-ups on complaints and/or discrepancies noted in reports reviewed by the Audit Committee.
3. Conduct reviews with Management, SKAI, and Public Accountants, KAP or Audit Team from regarding audit findings, including any difficulties encountered.

4. Provide independent opinions in case of differences between management and the Public Accountant, KAP or Audit Team regarding services provided.
5. Review the annual report to ensure adequacy, consistency, and accuracy of the information.
6. Monitor and assess the financial reporting process audited by External Auditors.

#### **Internal Control**

1. Monitor and evaluate audit planning and execution and follow-up on audit findings to assess the adequacy of internal control, including financial reporting processes.
2. Assist the Board of Commissioners in ensuring the effectiveness of internal control systems and the performance of internal and external auditors.
3. Provide recommendations for improving management control systems and their implementation.
4. Ensure satisfactory evaluation procedures for all company-issued information.
5. Identify issues requiring the Board of Commissioners' attention.
6. Perform duties related to risk management as per legal regulations.

#### **Internal Audit Unit (SKAI) and Integrated Governance**

1. Ensure SKAI operates independently and upholds integrity in performing its duties.
2. Evaluate SKAI's performance.
3. Monitor and assess the effectiveness of internal audits.
4. Ensure SKAI communicates with the Board of Directors, Board of Commissioners, and OJK Regulation.
5. Provide recommendations to the Board of Commissioners regarding:
  - a. Annual audit planning, scope, and SKAI budget.
  - b. Approval of independent quality control reviewers for SKAI performance evaluations.
  - c. Approval of the Internal Audit Charter.
  - d. Annual SKAI remuneration and performance rewards.
  - e. Appointment and dismissal of the SKAI Head.
6. Review audit reports and ensure that the Board of Directors promptly addresses weaknesses in control, fraud, compliance issues, and other identified concerns.
7. Review Company Reports submitted to the OJK Regulation regarding Internal Audit implementation.
8. Review all SKAI reports submitted to the Board of Commissioners, including reports on any deviations addressed to the Board of Directors.
9. Assess SKAI's audit execution and oversee the Board of Directors' follow-up actions on Internal Audit findings.
10. Monitor and evaluate the application of financial and internal audit policies for BRI's Parent and Subsidiary Companies.

11. Oversee and evaluate other Internal Audit functions as required by regulations, the company's articles of association, and/or General Meeting of Shareholders (RUPS) resolutions.
12. Periodically evaluate internal audit reports and recommend corrective actions to address weaknesses in controls, fraud, compliance, and other issues identified by SKAI.

#### **Subsidiary Entities (Integrated Governance)**

1. Monitor and evaluate the application of financial and internal audit policies at BRI and its subsidiaries.
2. Provide recommendations to the Board of Commissioners to enhance the effectiveness and accuracy of financial reporting and alignment of internal audit policies between the Parent Company and Subsidiaries.
3. Coordinate and hold Technical Meetings with the Audit Committee and Subsidiary Management alongside KTKT.

#### **Independent Auditors**

1. Recommend the appointment of a Public Accountant (AP) and/or Public Accounting Firm (KAP) for annual financial audits to the Board of Commissioners for submission to the General Meeting of Shareholders (RUPS), considering independence, scope, and fees.
2. Oversee the procurement process for selecting public accounting firms, ensuring compliance with corporate procurement regulations, and seeking Board of Directors' assistance when necessary.
3. Providing recommendations to the Board of Commissioners to delegate to the RUPS, in the event that the Public Accountant and/or KAP appointed by the RUPS as referred to in point 1, is unable to complete the audit services for the annual historical financial information within the Professional Assignment Period. The Board of Commissioners may appoint a replacement Public Accountant and/or KAP, taking into account the Audit Committee's recommendations.
  - a. If the Audit Committee is unable to recommend a Public Accountant and/or KAP to provide audit services for the annual historical financial information to the Board of Commissioners before the RUPS, as referred to in point 1, the Audit Committee shall recommend delegating the authority to appoint a Public Accountant and/or KAP to the Board of Commissioners, accompanied by an explanation regarding:
    - 1) The reason for delegating the authority;
    - 2) The criteria or limitations for the Public Accountant and/or KAP that may be appointed.

- b. In formulating the recommendations as referred to in point 1, the Audit Committee must consider:
  - 1) The independence of the Public Accountant, KAP, and individuals within the KAP;
  - 2) The scope of the audit;
  - 3) The audit service fees;
  - 4) The expertise and experience of the Public Accountant, KAP, and Audit Team from the KAP;
  - 5) The methodology, techniques, and audit tools used by the KAP;
  - 6) The benefits of fresh-eye perspectives gained through the replacement of the Public Accountant, KAP, and Audit Team from the KAP;
  - 7) The potential risks of using audit services from the same KAP consecutively for an extended period; and/or
  - 8) The results of evaluations of the audit services for annual historical financial information provided by the Public Accountant and KAP in the previous period, if applicable.
4. Submitting the Audit Committee's recommendations on the appointment of the Public Accountant and/or KAP to the Board of Directors of PT Bank Rakyat Indonesia (Persero), Tbk. and/or the DPLK Management for inclusion as an attachment to the Report on the Appointment of the Public Accountant and/or KAP to the OJK Regulation.
5. Proposing the termination of the Public Accountant, KAP, or Audit Team from the KAP if they fail to meet the applicable standards and regulations in carrying out their duties.
6. Reviewing prospective Public Accountants or Audit Teams from the KAP for consolidated subsidiaries. The KAP for consolidated subsidiaries shall be appointed and determined by the respective subsidiary in accordance with its Articles of Association but must be consulted with the Audit Committee to assess the independence of the prospective Public Accountant, KAP, or Audit Team from the KAP and the audit supervision conducted by the Audit Committee.
7. Providing prior approval (pre-approval) for non-assurance services assigned to the KAP.
8. Evaluating the implementation of audit services for annual historical financial information by the Public Accountant, KAP, or Audit Team from the KAP at a minimum through:
  - a. The compliance of the audit implementation by the Public Accountant, KAP, or Audit Team from the KAP with applicable audit standards;
  - b. The adequacy of fieldwork time;
  - c. A review of the scope of services provided and the adequacy of sampling;
  - d. Improvement recommendations provided by the Public Accountant and/or KAP; and
  - e. Other relevant matters.
9. Providing an independent opinion in the event of differences of opinion between management and the Public Accountant regarding the services provided.
10. Supervising the implementation of the appointment of the Public Accountant and/or KAP, including replacements, with reference to the use of audit services for annual historical financial information from the same Public Accountant for five (5) cumulative years.
11. Reviewing the KAP's self-assessment regarding compliance with restrictions on the use of audit services and cooling-off periods. The reuse of audit services for annual historical financial information from the same Public Accountant is subject to a cooling-off period based on the Public Accountant's role in the engagement:
  - a. If the Public Accountant acts as the Engagement Partner, a cooling-off period of five (5) consecutive reporting years applies;
  - b. If the Public Accountant acts as the engagement quality control reviewer, a cooling-off period of three (3) consecutive reporting years applies; and
  - c. For other audit engagement partners, a cooling-off period of two (2) consecutive reporting years applies.
12. Submitting the Audit Committee's Evaluation Report, as referred to in point 9, to the Board of Directors of PT Bank Rakyat Indonesia (Persero), Tbk. and/or the DPLK BRI Management.

#### **Compliance**

1. Monitor the effectiveness of policies and review fraudulent financial reporting risks, recommending improvements to reports prepared and executed by the Board of Directors.
2. Assess compliance with regulations related to the company's operations.

#### **Whistleblowing System**

The Audit Committee's Whistleblowing System Management Unit has the authority and responsibility to:

1. Receive and document reports of violations related to accounting processes and financial reporting, as well as violations by BRI's Board of Commissioners, Board of Directors, SEVP, and subsidiary directors from Whistleblowing System application.
2. Review reports received from SKAI's Whistleblowing System Management Unit regarding accounting violations and financial irregularities by BRI's Board of Commissioners, Board of Directors, SEVP, and subsidiary directors.

3. The Audit Committee's Whistleblowing System Management Unit verifies and validates reports together with the Board of Commissioners regarding received Whistleblowing System reports and categorizes these reports. This includes communicating with the whistleblower to gather additional evidence/documents related to the report.
4. The Audit Committee's Whistleblowing System Management Unit submits a request for approval of the recapitulation of Whistleblowing System reports categorized as Criminal Acts of Corruption to the Board of Commissioners every month, which is then reported to the Corruption Eradication Commission (KPK) through the Whistleblowing System Application.
5. Updating information in the Whistleblowing System application, including the categories of violation indications and reporting channels, if they do not meet the criteria of a Whistleblowing System report, as well as updating the status of follow-up progress whenever there is a status change.
6. Appointing the Investigation Unit/Independent Party to conduct an examination of reports indicating violations.
7. Submitting reports and recommendations on the results of the examination conducted by the Investigation Unit/Independent Party to the Authorized Business Unit for further action.
8. Ensuring that the recommendations from the Investigation Unit/Independent Party have been followed up on within the established timeframe.
9. Updating the Whistleblowing System application for each Whistleblowing System report that has been acted upon.
10. Submitting a monthly recapitulation report of the Whistleblowing System to the Board of Commissioners.
11. Managing all follow-up documents related to the Whistleblowing System in the Whistleblowing System application.
12. Managing the examination reports from the Investigation Unit and updating report data in the Whistleblowing System application.
13. Maintaining the confidentiality of all information related to the whistleblower's identity, indications of violations, and investigation reports.

#### **Social and Environmental Responsibility Program (TJSL) – Micro and Small Business Funding (PUMK)**

The PUMK program aims to enhance the resilience and independence of micro and small businesses. It seeks to improve efficiency and effectiveness in the development and empowerment of the micro and small business economy. In accordance with the Regulation of the Minister of State-

Owned Enterprises (BUMN) Number PER-1/MBU/03/2023, BRI collaborates with other BUMNs in distributing funds for the Micro and Small Business Funding Program through cooperation agreements that outline the rights and obligations of each party. In this regard, the Audit Committee has the following duties:

1. Assisting the Board of Commissioners in supervising the implementation of the BUMN TJSL program.
2. Assisting the Board of Commissioners in ensuring that the annual audited Financial Report of the Micro and Small Business Funding Program, prepared by a public accounting firm, complies with financial accounting standards and is approved by the RUPS/Minister.

#### **Soundness Level Assessment**

1. Evaluating the appointment of a Rating Company to assess the company's soundness level for recommendation to the Board of Commissioners.
2. The Board of Commissioners may request assistance from the Board of Directors to conduct the procurement process for the Rating Company based on the applicable goods and services procurement mechanism.

#### **Other Duties**

1. Reviewing and providing advice to the Board of Commissioners regarding potential conflicts of interest within the Company.
2. Maintaining the confidentiality of the Company's documents, data, and information obtained during the execution of its duties.
3. Carrying out other assignments as requested by the Board of Commissioners, in accordance with applicable regulations, including the Implementation Program of Internal Control over Financial Reporting (ICoFR).

#### **Authority of The Audit Committee**

The Board of Commissioners grants authority to the Audit Committee within the scope of Audit Committee responsibilities to:

1. Have access to accounting records, supporting data, and all relevant information about the Company related to the duties and functions of the audit committee as long as necessary to carry out its duties.
2. Provide opinions and recommendations to the Board of Commissioners regarding the execution of supervisory functions in auditing and internal control within the Company.
3. Communicate directly with employees, including the Board of Directors and those responsible for internal audit, risk management, and accounting, concerning the tasks and responsibilities of the Audit Committee.

4. Involve independent external parties, if necessary, to assist in executing its duties.
5. Exercise other authorities granted by the Board of Commissioners, provided they do not contradict applicable laws and regulations.

### Audit Committee Term of Office

The term of office of members of the Audit Committee may not be longer than the term of office of the Board of Commissioners as regulated in the Company's Articles of Association and can only be re-elected for 1 (one) subsequent period, without reducing the right of the Board of Commissioners to dismiss them at any time.

### Audit Committee Structure, Membership and Expertise

The committee operates under the Board of Commissioners' coordination and is structurally accountable to it. The membership structure is as follows:

1. The committee must have at least three (3) members, consisting of Independent Commissioners and external parties from the Issuer or Public Company.
2. The Audit Committee must include at least:
  - a. One (1) Independent Commissioner;
  - b. One (1) Independent Party with expertise in finance or accounting, who must obtain certification before assuming the role;
  - c. One (1) Independent Party with expertise in law or banking, who must obtain certification before assuming the role.
3. The Audit Committee is chaired by an Independent Commissioner who also serves as a member.
4. Members of the Board of Directors are prohibited from serving as Audit Committee members.
5. Audit Committee members must have integrity, good character, and strong morals.
6. The Audit Committee works collectively in carrying out its duties to assist the Board of Commissioners/Supervisory Board.

The structure, membership, and expertise of the Audit Committee are shown in the table below.

## Audit Committee Meeting

### Audit Committee Meeting Policy

The Audit Committee meeting arrangements are regulated as follows.

#### Meeting Organizing Mechanism

1. Audit Committee meetings must be held periodically at least 1 (one) time in 1 (one) month.
2. Audit Committee meetings can be held at any time at the request of 1 (one) or several members of the Audit Committee, stating the matters to be discussed.
3. Audit Committee meetings are held at the Company's domicile, or other places within the territory of the Republic of Indonesia or at the Company's place of business activities determined by the Audit Committee.
4. Audit Committee meetings can be held online via teleconference, video teleconference or other electronic media facilities that enable all participants to communicate and interact in Audit Committee meetings.
5. Audit Committee meeting materials are available and delivered to meeting participants no later than 5 (five) working days before the meeting is held, unless the

meeting is held outside the schedule, meeting materials can be delivered before the meeting is held.

6. If necessary, the Committee may independently hold a Technical Meeting to conduct a technical deep dive on the topics to be discussed in the Committee Meeting by inviting the relevant parties.

#### Meeting Quorum

The Audit Committee meeting is valid if attended and/or represented by more than ½ (half) of the total number of Committee members.

#### Meeting Participants

1. Each member of the Audit Committee is required to attend at least 75% (seventy-five percent) of the meetings within a year.
2. The Audit Committee meeting can invite the Board of Directors, Officers, and Employees of the Company or external guests.
3. The Audit Committee may invite the Audit Committee and Management of the Subsidiary Entities, proposed through the Integrated Governance Committee.

**Meeting Chairman**

The Board of Commissioners meeting is led by the Audit Committee Chairman. If the Chairman of the Audit Committee is absent or unable to attend, and this need not be proven to anyone, the meeting will be led by a member of the Audit Committee who is also a member of the Board of Commissioners.

**Meeting Summons**

1. The summons for an Audit Committee meeting is issued by the Chair of the Audit Committee. If the Chair of the Audit Committee is unavailable without proof to any party, the summons may be issued by a member of the Audit Committee who is also a member of the Board of Commissioners.
2. The summons for an Audit Committee meeting must be delivered in writing, including the agenda/event, date, time, and location of the meeting.
3. The Audit Committee may convene a meeting on short notice (less than one working day), either online or offline, in extraordinary circumstances.

**Meeting Decisions**

1. The meeting is valid and authorized to make binding decisions if attended by at least half (1/2) of the total members of the committee.
2. The recommendations formulated during the Committee meeting are made based on a consensus. If not reached, decisions will be made by majority vote.
3. Each Audit Committee member has one (1) vote and an additional one (1) voting right for every member they represent in the meeting.
4. Audit Committee Members who are unable to attend may submit their opinions and give their votes in writing, signed and submitted to the Chairman of the Audit Committee or the Commissioner leading the meeting. These votes will be considered valid and included in the meeting's decision-making process.
5. In the case where the number of votes in favor and against are equal, the decision is postponed and re-evaluated. If, after re-evaluation, the votes in favor and against remain equal, the decision will be made by the meeting leader.
6. The meeting leader will present the conclusions and decisions at the end of each meeting.
7. Every meeting decision is binding for all the Audit Committee.
8. The Audit Committee can also make valid decisions without holding a meeting, provided that all serving members of the Board of Commissioners approve by signing the proposed decision in writing.
9. Any Audit Committee member who directly or indirectly, has an interest in any proposed transaction, contract, or

agreement in which the Company is a party must declare their interest during the Committee meeting and is not entitled to vote on matters related to that transaction or contract.

**Meeting Minutes**

1. The results of the Audit Committee meeting must be recorded in the meeting minutes.
2. The meeting minutes must be signed by all attending Audit Committee members and distributed to all members of the Audit Committee.
3. The meeting minutes shall be prepared by an Independent Party member of the Audit Committee who attended the meeting.
4. If any member of the Board of Commissioners and/or the Board of Directors does not sign the meeting minutes as mentioned in points 2 and 3 above, they must provide their reasons in a separate written statement attached to the meeting minutes.
5. Any dissenting opinions expressed during the meeting must be clearly stated in the minutes, with the reasons for the disagreement.
6. The Audit Committee meeting minutes served as valid evidence of the decisions made during the meeting.
7. The meeting minutes must be properly documented by the Secretariat of the Board of Commissioners.

**Follow-Up on Meeting Results**

1. The decisions made in the Audit Committee meeting are conveyed through the Audit Committee memorandum to the Board of Commissioners, which includes opinions, recommendations, or suggestions to assist the Board of Commissioners in carrying out its duties.
2. The Audit Committee Memorandum mentioned in point one above may be accompanied by a draft of an outgoing letter from the Board of Commissioners and/or the Audit Committee addressed to the Board of Directors or an official one level below the Board of Directors of the Company.
3. The Audit Committee Memorandum must be signed by the Chairperson and all members of the Committee.
4. The letters issued by the Board of Commissioners shall follow the correspondence procedures established by the Board of Commissioners, while letters from the Audit Committee must be signed by the Chairperson of the Audit Committee and Committee members who are also members of the Board of Commissioners.
5. All outgoing letters from the Board of Commissioners and/or the Audit Committee must be recorded in the Letter Register, managed by the Secretariat of the Board of Commissioners, and stored by the Corporate Secretary Division.

## Audit Committee Income

Remuneration for Board of Commissioners members who are also Committee members is included in the Board of Commissioners' honorarium, and there is no separate honorarium for each Committee member. Honorarium for Committee members from independent parties (Non-Commissioners) is determined by the Board of Commissioners, with a maximum of 20% of the Main Director's salary, and no other income is provided apart from the honorarium. This is in accordance with the provisions of the Minister of BUMN Regulation Number PER-3/MBU/03/2023 dated March 20, 2023 concerning Organs and Human Resources of State-Owned Enterprises.

### Internal Audit Committee

No	Duties	Implementation	Implementation Date
1.	Audit Committee Work Budget Plan	Discussion on the Audit Committee Budget Work Plan	November 21, 2025

### Statement of The Audit Committee on The Effectiveness of The Internal Control System and Risk Management

The Audit Committee, in supporting the supervisory function of the Board of Commissioners, assesses that the internal control system of Bank BRI has been implemented adequately and in an integrated manner, and has been developed in accordance with good corporate governance principles and the prevailing laws and regulations. The implementation of the compliance function has been carried out consistently with reference to relevant regulations, with an emphasis on strengthening the culture of compliance across all levels of the organization, managed transparently and accountably, as part of the Company's commitment to implementing Good Corporate Governance (GCG).

Bank BRI continues to improve its internal control system through strengthening and integrating business processes end-to-end, in order to ensure the effectiveness of control from the planning, implementation, to reporting stages. These improvements are supported by the optimization of internal audit, risk management, compliance, as well as financial and operational control functions, including the implementation of the Internal Control over Financial Reporting (ICoFR) roadmap. These efforts are intended to improve the quality of decision-making, the reliability of financial reporting, and the efficiency and consistency of business process implementation. In addition, Bank BRI ensures alignment between policies and work procedures with the systems and information technology used, so that internal control can be implemented consistently, well documented, and able to minimize the risk of errors or irregularities in operational implementation.

The Audit Committee emphasizes the importance of maintaining Management's commitment to evaluating and improving policies, strengthening risk mitigation, and enhancing fraud prevention efforts. These measures are expected to support the sustainability of the Company's operations, grounded in the principles of transparency, accountability, and integrity. Going forward, the Company's internal control system is expected to further support the achievement of strategic objectives, create sustainable added value for stakeholders, and ensure the implementation of aligned and consistent controls both at the parent entity and across entities within the BRI financial conglomerate.

### Nomination and Remuneration Committee

The Board of Commissioners establishes the Nomination and Remuneration Committee which aims to formulate policies and assist in the implementation of the functions and duties of the nomination and remuneration of members of the Board of Commissioners and Directors in accordance with applicable laws and regulations and the principles of Good Corporate Governance. The appointment and dismissal of members of the Nomination and Remuneration Committee is carried out by the Board of Commissioners.

#### Basis for Establishing The Nomination and Remuneration Committee

1. Law of the Republic of Indonesia No. 7 of 1992 concerning Banking as amended by the Law of the Republic of Indonesia No. 10 of 1998.
2. Law of the Republic of Indonesia No. 40 of 2007 on the Limited Liability Companies.
3. Law of the Republic of Indonesia No. 19 of 2003 on the State-Owned Enterprises.
4. OJK Regulation no. 33/POJK.04/2014 dated December 08, 2014 concerning Directors and Board of Commissioners of Issuers or Public Companies.
5. OJK Regulation no. 34/POJK.04/2014 dated December 08, 2014 concerning the Nomination and Remuneration Committee of Issuers or Public Companies.
6. OJK Regulation no. 45/POJK.03/2015 concerning Implementation of Governance in Providing Remuneration for Commercial Banks.
7. OJK Regulation No.17 of 2023 concerning Implementation of Governance for Commercial Banks
8. OJK Circular Letter No. 40/SEOJK.03/2016 concerning Implementation of Governance in Providing Remuneration for Commercial Banks.
9. Minister of State-Owned Enterprises Regulation No. PER-2/ MBU/03/2023 dated March 3, 2023 concerning Guidelines for Governance and Significant Corporate Activities of State-Owned Enterprises.
10. BUMN Ministerial Regulation No. PER-3/MBU/03/2023 dated March 20, 2023 concerning Organs and Human Resources of State-Owned Enterprises.
11. Articles of Association of PT Bank Rakyat Indonesia (Persero) Tbk and its amendments.

## Nomination and Remuneration Committee Charter

The working guidelines of the Nomination and Remuneration Committee of the Company are regulated in the Board of Commissioners Decree Number B.09-KOM/05/2024 dated May 28, 2024, concerning the Guidelines and Rules of Procedure for the Nomination and Remuneration Committee of PT Bank Rakyat Indonesia (Persero) Tbk., which regulate, among others:

Chapter	Discussion
Chapter I	Introduction 1.1 Legal Basis 1.2 General Definition

## Duties and Responsibilities of The Nomination and Remuneration Committee

The Nomination and Remuneration Committee assists the Board of Commissioners in carrying out its duties and responsibilities by evaluating and ensuring the implementation of nomination and remuneration functions within the Company in accordance with the regulations and good corporate governance principles. The Nomination and Remuneration Committee is responsible for assisting the Board of Commissioners in overseeing the following matters:

### Nomination Function

1. Provide recommendations to the Board of Commissioners regarding:
  - a. The system, procedures, policies, and criteria required in the selection and/or replacement process of members of the Board of Directors and the Board of Commissioners are to be submitted by the Board of Commissioners to the General Meeting of Shareholders;
  - b. Composition of the positions of members of the Board of Directors and/or members of the Board of Commissioners;
  - c. Identification and nomination of candidates who meet the qualification to serve as members of the Board of Directors and/or the Board of Commissioners, to be submitted by the Board of Commissioners to the General Meeting of Shareholders (GMS);
  - d. Independent parties who will serve as members of the Audit Committee and the Risk Monitoring Committee under the Board of Commissioners;
  - e. Policies/ mechanism for evaluating the performance of members of the Board of Directors and/or the Board of Commissioners; and
  - f. Development programs to enhance the capabilities of members of the Board of Directors and/or the Board of Commissioners.
2. Assisting the Board of Commissioners in assessing the performance of members of the Board of Directors and the Board of Commissioners based on established benchmarks as a basis for evaluation;

3. Evaluating the proposed individual Key Performance Indicators (KPI) of State-Owned Enterprise (BUMN) Board of Directors members;
  4. Assisting the Board of Commissioners in evaluating the Selected Talent list based on performance and capacity in accordance with the Company's strategic direction;
  5. Conducting periodic reviews of the BUMN Talent Management System, as well as monitoring and evaluating its implementation;
  6. Conducting an evaluation of the system and procedures for Talent classification carried out by the Board of Directors of the State-Owned Enterprises (SOE);
  7. Conducting validation and calibration of the Selected Talent to produce a list of nominated talent proposed by the Board of Commissioners/ Supervisory Board of State-Owned Enterprises (SOEs) to the GMS/ Minister;
  8. Evaluating candidates representing BUMN who will be proposed as members of the Board of Directors or the Board of Commissioners of Subsidiaries before submission to the General Meeting of Shareholders (GMS)/ Minister;
  9. Evaluating the BUMN Board of Directors' proposal regarding the organizational structure of BUMN; and
  10. In carrying out its Nomination function, the Committee is required to follow these procedures:
    - a. Formulating the composition and nomination process for members of the Board of Directors and/or the Board of Commissioners;
    - b. Developing policies and criteria required in the nomination process for candidates for the Board of Directors and/or the Board of Commissioners;
    - c. Assisting in evaluating the performance of members of the Board of Directors and/or the Board of Commissioners;
    - d. Designing capability development programs for members of the Board of Directors and/or the Board of Commissioners; and
    - e. Reviewing and proposing qualified candidates for the Board of Directors and/or the Board of Commissioners to the Board of Commissioners for submission to the GMS.
- b. The structure, policy, and amount of remuneration for employees as a whole to be presented to the Board of Directors.
3. Ensuring that the remuneration policy is under applicable regulations;
  4. Conducting periodic evaluations of the implementation of the remuneration policy;
  5. Evaluating the remuneration policy for employees that requires approval/feedback from the Board of Commissioners;
  6. Assisting the Board of Commissioners in assessing performance concerning the appropriateness of the remuneration received by each member of the Board of Directors and/or the Board of Commissioners;
  7. In carrying out the remuneration function, the Committee must follow these procedures:
    - a. Formulating the structure, policy, and amount of remuneration for the members of the Board of Directors and the Board of Commissioners by considering:
      - financial performance and reserve compliance as regulated by applicable laws and regulations;
      - the creation of effective risk management;
      - remuneration practices in the industry under the business activities of the issuer or a similar public company and the scale of business of the issuer or public company within its industry;
      - short-term and long-term liquidity needs;
      - the objectives, long-term strategy of the bank, and its potential future revenue;
      - the duties, responsibilities, and authority of the members of the Board of Directors and/or the Board of Commissioners related to the achievement of the goals and performance of the Issuers or Public Company;
      - performance targets for each member of the Board of Directors and/or the Board of Commissioners; and
      - the balance of allowances between fixed and variable components.
    - b. The remuneration structure as mentioned in point 2.a. can include:
      - salary;
      - honorarium;
      - incentives; and/or
      - fixed and/or variable allowances.
    - c. Conducting an evaluation of the structure, policies, and amount of remuneration for members of the Board of Directors and the Board of Commissioners at least once a year.

### Remuneration Function

1. Evaluating the Remuneration policy based on performance, risk, fairness compared to peer groups, corporate goals, and long-term strategy, compliance with reserve requirements as stipulated by laws and regulations, and the Company's potential future revenue;
2. Submitting evaluation results and recommendations to the Board of Commissioners regarding:
  - a. The structure, policy, and amount of remuneration for the Board of Directors and the Board of Commissioners to be presented to the General Meeting of Shareholders (GMS); and

## Authority of The Nomination and Remuneration Committee

The Nomination and Remuneration Committee has the following authorities:

1. Accessing the data, documents, and information of the Company related to the performance of its duties;
2. Communicating and coordinating with parties related to the committee's tasks;
3. Exercising other powers granted by the Board of Commissioners as long as they do not conflict with applicable laws and regulations;
4. Providing opinions and recommendations to the Board of Commissioners of the Parent entity to enhance the internal control function, compliance function, and the implementation of integrated risk management; and
5. Exercising powers granted by the Board of Commissioners as long as they do not conflict with applicable laws and regulations.

## Nomination and Remuneration Committee Term of Office

The term of office for members of the Nomination and Remuneration Committee may not be longer than the term of office of the Board of Commissioners as stipulated in the Company's Articles of Association and may be re-elected only for the next 1 (one) period, without reducing the right of the Board of Commissioners to dismiss at any time.

## Structure, Membership and Expertise of The Nomination and Remuneration Committee

The Nomination and Remuneration Committee is under the Board of Commissioners' coordination and is structurally responsible to the Board of Commissioners. The structure and membership of the Nomination and Remuneration Committee are arranged as follows:

1. The Committee is under the coordination of the Board of Commissioners and is structurally responsible to the Board of Commissioners;
2. The Committee is chaired by an Independent Commissioner who also serves as a member; and

## Nomination and Remuneration Committee Meeting

### Nomination and Remuneration Committee Meeting Policy

Committee meeting arrangements are set as follows.

#### Meeting Mechanism

1. The Committee Meetings must be held regularly at least once every three (3) months;
2. The Committee Meetings may be held at any time upon the request of one or more Committee members, specifying the matters to be discussed;
3. The Committee meetings are conducted at the Company's domicile, another location within the Republic of Indonesia, or at a business operation site designed by the Committee;
4. The Committee meetings may be conducted online via teleconference, video conference, or other electronic media that enable all participants to communicate and interact during the meeting;
5. The Committee meeting material must be available and provided to meeting participants no later than five (5) working days before the meeting unless the meeting is held outside the schedule, in which case the materials can be provided before the meeting;
6. If necessary, the Committee may independently hold a Technical Meeting to conduct an in-depth technical review of the materials to be discussed in the Committee Meeting by inviting relevant parties.

#### Meeting Quorum

A Committee meeting is valid if attended and/or represented by more than half (1/2) of the total members, including at least one (1) Independent Commissioner and one (1) Executive Officer responsible for human resources or one (1) representative of the Company's employees.

#### Meeting Participants

1. Each Committee member is required to attend at least 75% (seventy-five) of the meetings in a year;
2. The Committee Meetings may invite members of the Board of Directors, Executives, and Employees of the Company or external guests;
3. The Committee meetings may invite other Committees and the management of Subsidiaries through the Integrated Governance Committee.

#### Meeting Chairperson

1. The Committee meetings are chaired by the Chairperson of the Committee;
2. If the Chairperson of the Committee is absent or unable to attend, without the need to provide proof to any party, the meeting will be chaired by a Committee member from the Board of Commissioners.

#### Meeting Summons

1. The Committee meetings are summoned by the Chairperson of the Committee.
2. If the Chairperson is unable to perform this duty, without the need to provide proof to any party, the summons may be made by a Committee member from the Board of Commissioners;
3. The meeting summons must be issued in writing, stating the agenda, date, time, and venue of the meeting;
4. In special situations or extraordinary conditions, the Committee may call a meeting at any time (less than one working day) online or offline.

#### Meeting Resolutions
